Case Number: ER-2010-0355  
Date Testimony Prepared: January 5, 2011

## **SURREBUTTAL TESTIMONY**

**OF**

**TED ROBERTSON**

Submitted on Behalf of  
the Office of the Public Counsel

**KANSAS CITY POWER & LIGHT COMPANY**

**Case No. ER-2010-0355**

January 5, 2010

BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF MISSOURI

In the Matter of the Application of Kansas    )  
City Power & Light Company for Approval    )  
To Make Certain Changes in its Charges for   )  
Electric Service    )

File No. ER-2010-0355

AFFIDAVIT OF TED ROBERTSON

STATE OF MISSOURI    )  
                                   )    ss  
COUNTY OF COLE     )

Ted Robertson, of lawful age and being first duly sworn, deposes and states:

1. My name is Ted Robertson. I am a Chief Public Utility Accountant for the Office of the Public Counsel.
2. Attached hereto and made a part hereof for all purposes is my surrebuttal testimony.
3. I hereby swear and affirm that my statements contained in the attached testimony are true and correct to the best of my knowledge and belief.

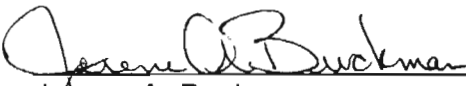

---

 Ted Robertson, C.P.A.  
 Chief Public Utility Accountant

Subscribed and sworn to me this 5<sup>th</sup> day of January 2011.

JERENE A. BUCKMAN  
My Commission Expires  
August 23, 2013  
Cole County  
Commission #09754037

---

 Jerene A. Buckman  
 Notary Public

My Commission expires August, 2013.

**SURREBUTTAL TESTIMONY  
OF  
TED ROBERTSON**

**KANSAS CITY POWER & LIGHT COMPANY  
CASE NO. ER-2010-0355**

9 **I. INTRODUCTION**

10 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

11 A. Ted Robertson, PO Box 2230, Jefferson City, Missouri 65102-2230.

12  
13 Q. ARE YOU THE SAME TED ROBERTSON THAT HAS PREVIOUSLY FILED  
14 DIRECT TESTIMONY IN THIS CASE?

15 A. Yes.

16  
17 **II. PURPOSE OF TESTIMONY**

18 Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

19 A. I will provide the Public Counsel surrebuttal to the Rebuttal Testimony of Kansas  
20 City Power & Light Company's (KCPL or Company) witnesses, 1) Mr. John P.  
21 Weisensee - Additional Amortizations to Maintain Financial Ratios, SO<sub>2</sub>  
22 Emission Allowances, and Iatan 2 O&M Expenses, and 2) Mr. Darrin R. Ives -  
23 Aquila Inc. Purchase Transition Costs. I will also provide surrebuttal to the  
24 Rebuttal Testimony of the Missouri Public Service Commission (MPSC) Staff  
25 witness, Mr. Arthur W. Rice, regarding the Additional Amortizations To Maintain  
26 Financial Ratios.

**III. ADDITIONAL AMORTIZATIONS TO MAINTAIN FINANCIAL RATIOS**

Q. WHAT IS THE ISSUE?

A. Public Counsel's recommendation on this issue differs from every other party's recommendation in the case. It is my understanding, Company's proposal is similar to the Public Counsel's, but differs in that Company prefers the spreading of the accumulated additional amortizations to all plant accounts excluding the latan 2 plant accounts (Weisensee Rebuttal Testimony, page 26, lines 7 - 11) and does not recommend a minimum of ten years recognition in rates subsequent to their actual inclusion in the determination of rates, by vintage collected. In addition, it is my understanding that the Company's depreciation witness, Mr. John J. Spanos, has made adjustments to include the accumulated additional amortizations in the development of his depreciation study utilizing a remaining life methodology. Whereas, Mr. Greg Meyer, the Midwest Energy Users Association witness, proposes a 15 year amortization of the accumulated additional amortizations, and the MPSC Staff proposes to include the accumulated additional amortizations in the depreciation reserve accounts and then amortize the amount by not reflecting net cost of removal in depreciation rates.

1 Q. DOES PUBLIC COUNSEL BELIEVE IT APPROPRIATE TO INCLUDE THE  
2 IATAN 2 PLANT ACCOUNTS WHEN SPREADING THE ACCUMULATED  
3 ADDITIONAL AMORTIZATIONS TO THE PLANT DEPRECIATION RESERVE  
4 ACCOUNTS?

5 A. Yes. The additional amortizations were developed and authorized in order to  
6 support the Company's financial ratios due to the possible rating impacts  
7 associated with the new construction identified within the Regulatory Plan - in  
8 particular Iatan 2. To exclude the Iatan 2 plant accounts dissociates the primary  
9 driver for which the additional amortizations were implemented. Had Iatan 2 not  
10 been part of the Company's Regulatory Plan, I believe it likely that additional  
11 amortizations would not have been required or authorized. Iatan 2 was the  
12 fundamental core of the Regulatory Plan and as such the related plant should be  
13 included in the allocation of the accumulated additional amortizations. In fact, it  
14 is Public Counsel's position that only the plant accounts associated with the  
15 Regulatory Plan new construction should receive allocations of the accumulated  
16 additional amortizations.

17  
18 Q. DOES PUBLIC COUNSEL AGREE WITH THE COMPANY'S UTILIZATION OF  
19 THE REMAINING LIFE METHODOLOGY IN THE DEVELOPMENT OF ITS  
20 DEPRECIATION STUDY?

1 A. Public Counsel has not taken a formal position on the Company's proposed  
2 depreciation rates or the study from which they were developed, but generally  
3 supports the MPSC Staff's position, except for its cost of removal position  
4 concerning the additional amortizations, and generally does not support the  
5 remaining life methodology.

6  
7 Q. WHY DOES THE PUBLIC COUNSEL NOT SUPPORT THE MPSC STAFF'S  
8 COST OF REMOVAL POSITION CONCERNING THE ADDITIONAL  
9 AMORTIZATIONS?

10 A. In essence, Public Counsel believes that the MPSC Staff's position "muddies the  
11 waters" because tracking the future costs and amortizations results in a more  
12 complicated process than should otherwise be required. It is my understanding, the  
13 MPSC Staff's recommendation is a "hybrid" methodology of recovery motivated to  
14 achieve two separate and distinct goals. First, the MPSC Staff seeks to obtain  
15 refund of the accumulated additional amortizations for ratepayers, and second, it  
16 seeks to resolve the unrelated issue wherein the MPSC Staff perceives Company's  
17 total depreciation reserve is over-accrued by almost a half a billion dollars (Rice  
18 Rebuttal Testimony, page 13, line 5).

19  
20 The MPSC Staff's recommendation results in a lower annualized depreciation  
21 expense and recovery of actual annual cost of removal via a reduction of the

1 additional amortizations balance; however, the cost of removal reductions would not  
2 be recognized in rates until subsequent rates are authorized. Neither would they  
3 necessarily be specific to the new construction of the Regulatory Plan. The MPSC  
4 Staff's position would also deny the Company of a more current recognition of the  
5 cost of removal and its recovery. Furthermore, Public Counsel believes that in  
6 future years, as current staffing for all the parties changes and memories fade, the  
7 process could become embroiled in unnecessary conflicts and confusion that could  
8 be bypassed by simply keeping a separate tracking of the individual costs and their  
9 retirement or amortization. That is why the Public Counsel recommends using the  
10 separate sub-accounts to book and track the accumulated additional amortizations  
11 for the benefit of ratepayers and shareholders alike. The same should be done for  
12 the over-accrued depreciation reserve amount.

13  
14 Q. DID THE STIPULATION AND AGREEMENT IN KCPL, CASE NO. EO-2005-0329,  
15 PROVIDE FOR THE COST OF REMOVAL PROPOSAL RECOMMENDED BY  
16 THE MPSC STAFF?

17 A. No. The MPSC Staff's recommendation is a new proposal combining the return  
18 of the accumulated additional amortizations and a perceived over-accrual of  
19 Company total depreciation reserve that is not identified in or consistent with the  
20 language in the agreement. Thus, Public Counsel believes that the MPSC Staff's  
21 recommendation may not be consistent with that agreement.

Q. IS THE PUBLIC COUNSEL OPPOSED TO THE RECOMMENDATION PROPOSED BY THE MIDWEST ENERGY USERS ASSOCIATION WITNESS, MR. GREG R. MEYER, TO AMORTIZE (REFUND) THE MONIES TO RATEPAYERS OVER A PERIOD OF 15 YEARS?

A. It is Public Counsel's believe that Mr. Meyer's recommendation is also not identified in or consistent with the language in the Stipulation and Agreement of Case No. EO-2005-0329; however, his proposal is merely a slight modification of the agreement because he is attempting to pass the refunds back to ratepayers more quickly. Public Counsel is in a general sense not adamantly opposed to the recommendation because his position is aligned with our goal to make the ratepayers whole for the monies they "fronted" to the utility during the course of the Regulatory Plan; however, I believe that the Public Counsel's position is consistent with the terms of the aforementioned agreement.

**IV. SO<sub>2</sub> EMISSION ALLOWANCES**

Q. WHAT IS THE ISSUE?

A. Beginning on page 1, line 14, of his Rebuttal Testimony, Mr. John P. Weisensee provides testimony wherein he attempts to support Company's position that the SO<sub>2</sub> emission allowance regulatory liability be flowed back to ratepayers over 21 years rather than 5 years as proposed by Public Counsel. Essentially, his testimony

1 attempts to justify the Company's position based on two factors, 1) an alleged  
2 linkage of the funds received with the environmental asset construction financing at  
3 the time of the Regulatory Plan, and 2) an analysis of the discounted cash flow  
4 value of the 21 year amortization versus a 5 year amortization. Public Counsel  
5 believes that neither position is valid or completely accurate.

6  
7 Q IS THERE A LINKAGE BETWEEN THE FUNDS RECEIVED FROM THE SALES  
8 AND THE ENVIRONMENTAL CONSTRUCTION FINANCING?

9 A. No. Mr. Weisensee's rendition of the Stipulation and Agreement in Case EO-  
10 2005-0329, as stated on page 2, lines 13 -19, of his Rebuttal Testimony, is not  
11 complete. Beginning on page 7, line 21, of my Direct Testimony, I included the  
12 following language from the Stipulation and Agreement:

13  
14 **The regulatory liability will be amortized over the same time**  
15 **period used to depreciate environmental assets (emission**  
16 **control equipment and other emission control investments).**  
17 **This provision recognizes that the sales of SO2 emission**  
18 **allowances to fund investments in new environmental control**  
19 **equipment, in order to meet emissions standards required now**  
20 **or in the future by legislation, MDNR or the United States**  
21 **Environmental Protection Agency ("EPA") regulations, are**  
22 **like-kind exchanges of assets.** KCPL agrees to provide all  
23 correspondence between KCPL and the United States Internal  
24 Revenue Service ("IRS") with respect to SO<sub>2</sub> emission allowances  
25 to the Signatory Parties, within fourteen (14) days of such  
26 correspondence. KCPL shall be obligated to define the  
27 correspondence as "Proprietary" or "Highly Confidential" if it so  
28 deems the material.

1  
2           **In the event the IRS fails to certify SO<sub>2</sub> emission allowance**  
3           **sales as like-kind exchanges, the Signatory Parties agree that**  
4           **the above agreement on the amortization period for the**  
5           **regulatory liability is no longer binding on, or prejudicial to,**  
6           **KCPL or the other Signatory Parties, and that KCPL and the**  
7           **Signatory Parties are free to, and may, recommend the**  
8           **appropriate amortization period for such regulatory liability to**  
9           **be included in Rate Filing #4 (Iatan 2 case) revenue**  
10           **requirement required herein and to commence on the effective**  
11           **date of tariffs from Rate Filing #4.**  
12  
13

14           Clearly, the language of the Stipulation and Agreement recognized that the failure to  
15           obtain IRS certification of the sales as a like-kind exchange was a "critical factor" to  
16           this issue and to the parties involved in the settlement. Absent the certification, the  
17           provision was no longer binding on the parties and the Commission did not link the  
18           sales with the environmental asset construction financing at the time of the  
19           Regulatory Plan and also did not synchronize the SO<sub>2</sub> amortization period with the  
20           useful life of the environmental plant.  
21

22   Q.    WHAT WOULD HAVE BEEN THE BENEFIT OF THE IRS CERTIFICATION?

23   A.    The parties to the case recognized that IRS certification of the sales as like-kind  
24           exchanges would have allowed the utility to avoid the assessment and payment of  
25           income taxes on the additional revenues. That would have been a benefit to  
26           ratepayers had it occurred, but it did not. In fact, there has been no testimony on

1 the Company's part that even indicates it made a sincere effort to achieve the IRS  
2 certification.

3  
4 Q. IS THERE ANOTHER REASON THAT THE FUNDS FROM THE SALES SHOULD  
5 NOT BE ARTIFICIALLY LINKED AS FINANCING FOR THE ENVIRONMENTAL  
6 ASSET CONSTRUCTION?

7 A. Yes. The language of the aforementioned Stipulation and Agreement was an  
8 agreement between the parties to treat the monies from the sales as a non-fungible  
9 revenue. That is, the parties, **if certain events had occurred**, had agreed to treat  
10 dollars associated with the SO<sub>2</sub> sales, for regulatory purposes, as being earned and  
11 specifically "tagged" for utilization within the operation of the utility. However, these  
12 events did not occur and so there is no reason to maintain the artificial  
13 misrepresentation of the actual treatment of revenues earned.

14  
15 Revenue dollars earned by a regulated utility, or any company for that matter, are  
16 not normally isolated dollar by dollar and then allocated or targeted for a specific  
17 expenditure or investment. The usual approach is that the dollars are earned,  
18 deposited in various financial institutions and expended as required without the  
19 benefit of knowing which individual dollar came from which individual customer or  
20 where it was actually expended. Revenue dollars are fungible and absent an  
21 agreement such as the one in the Stipulation and Agreement to artificially modify

1 the process their nature does not change. The very fact that the monies received  
2 from the SO<sub>2</sub> sales were not tracked dollar for dollar from their collection on through  
3 to the actual payment for the new environmental assets (and no information has  
4 been provided to prove that they were) proves that they are fungible and cannot be  
5 linked as argued by Mr. Weisensee.

6  
7 Q. WHAT ARE PUBLIC COUNSEL'S CONCERNS WITH MR. WEISENSEE'S  
8 ANALYSIS OF DISCOUNTED CASH FLOWS?

9 A. Public Counsel has two concerns with his analysis. First, Mr. Weisensee failed to  
10 show what the opportunity cost to ratepayers would be in the event that they  
11 received their monies back over 5 years versus the 21 years proposed by the  
12 Company. That is, what benefit or use, monetarily or otherwise, would the  
13 ratepayers receive from receiving the funds quicker than the period proposed by the  
14 Company?

15  
16 Public Counsel believes that his analysis fails to recognize that ratepayers may be  
17 able to put the funds to use in such a way that would benefit them to a degree or  
18 amount greater than that identified in his analysis. In fact, to be fair, it is more than  
19 likely that some would benefit less and some would benefit more, but since we do  
20 not know (since we cannot see into the future) how much more or less of a benefit  
21 that they would receive, we cannot quantify the issue monetarily or otherwise.

1           However, Public Counsel believes Mr. Weisensee's analysis has neglected this  
2           important part of the analysis. Further, we believe that because the monies belong  
3           to ratepayers they should be returned to ratepayers as quickly as possible and  
4           whether or not they benefit more or less in the future is a decision that they alone  
5           have control over.

6  
7   Q.   WHAT IS PUBLIC COUNSEL'S SECOND CONCERN WITH MR. WEISENSEE'S  
8       DISCOUNTED CASH FLOW ANALYSIS?

9   A.   Public Counsel's second concern has to do with intergenerational inequity. That is,  
10       to the extent that the proceeds from the sales were associated with utility operations  
11       funded by ratepayers over approximately the last five years, the longer the  
12       amortization period for the liability the more likely it is that future ratepayers will  
13       inappropriately benefit at the expense of current ratepayers.

14  
15       Public Counsel recognizes that intergenerational inequity can never be eliminated  
16       completely; however, the Regulatory Plan which artificially spawned the creation of  
17       the liability was a discrete series of events which are now coming to an end. Public  
18       Counsel believes it appropriate that the monies which rightfully belong to current  
19       ratepayers should be flowed back to them as quickly as possible so as to mitigate,  
20       as much as possible, any intergenerational inequities that have or will develop.  
21       Extending the amortization period out to the 21 years proposed by the utility merely

1 magnifies the inequities that have already developed. Further, authorization of the  
2 5 year amortization proposed by Public Counsel does no disservice to the utility  
3 since it recognizes that the funds associated with the liability do in fact belong to  
4 ratepayers.

5  
6 **V. AQUILA INC. PURCHASE TRANSITION COSTS**

7 Q. WHAT IS THE ISSUE?

8 A. On page 2, lines 4 - 8, of his Rebuttal Testimony, Mr. Darrin R. Ives states that the  
9 Public Counsel's position on this issue is consistent with the Company's request in  
10 this case; however, his testimony is not completely accurate. Public Counsel's  
11 position on this issue, as stated beginning on page 11, line 32, of my Direct  
12 Testimony, is:

13  
14 Pursuant to the Commission's authorization, Company has  
15 deferred transition costs and will amortize those costs over  
16 five years beginning with the effective date of the  
17 Commission's authorization in the instant case. However,  
18 while Public Counsel will not oppose what the Commission  
19 authorized for this issue, Public Counsel recommends that  
20 any future costs incurred subsequent to the test year and  
21 true-up period of the instant case not receive continued  
22 deferral authorization or amortization in any future rate  
23 cases.

24  
25  
26 Q. WHY DOES PUBLIC COUNSEL RECOMMEND THE  
27 DISCONTINUANCE OF THE DEFERRAL/AMORTIZATION

1                    AUTHORIZATION FOR ALLEGED FUTURE TRANSITION  
2                    COSTS?  
3

4                    A.     Public Counsel's recommendation is primarily based on the  
5                    fact that sufficient time has already passed to effect the  
6                    integration of Aquila Inc. into the operations of the current  
7                    owner. In fact, it has been more than two years since the  
8                    purchase of Aquila Inc. was authorized in Case No. EM-  
9                    2007-0374 (the effective date of the Report and Order was  
10                    July 11, 2008). Furthermore, it is my understanding, any  
11                    additional transitional costs likely to be incurred may not be  
12                    material and, given the dynamics of the Company's ongoing  
13                    operations, may be considered costs which have been  
14                    incurred due to changes caused by current operations of the  
15                    total entity because there is no foolproof manner to  
16                    determine whether the costs were incurred because of the  
17                    purchase of Aquila Inc. or are simply a normal reaction to the  
18                    operation of the utility as it currently exists.

19  
20                    (Emphasis added by OPC)  
21  
22

23                    Public Counsel's position includes a recommendation that any future costs  
24                    incurred subsequent to the test year and true-up period of the instant case  
25                    not receive continued deferral authorization or amortization in any future  
26                    rate cases. I have not been able to identify in any testimony where  
27                    Company states its agreement with this portion of Public Counsel's  
28                    recommendation, but if it does, we are in agreement. If Company does  
29                    not support this recommendation, we are not consistent with the  
30                    Company's position.

**VI. IATAN 2 O&M EXPENSES?**

Q. WHAT IS THE ISSUE?

A. Beginning on page 29, line 7, of his Rebuttal Testimony, Mr. Weisensee discusses that the Company is agreeable to the MPSC Staff's proposal to use estimated Iatan 2 O&M expense and a tracker to afford the utility recovery of the costs. He adds that not only should a tracker be established for Iatan 2, but one should be utilized to account for and track the estimated costs of the Iatan Common assets. Public Counsel opposes both the MPSC Staff's proposal and the Company's additional tracker.

Q. WHY DOES PUBLIC COUNSEL RECOMMEND THAT THE COMMISSION NOT AUTHORIZE THE O&M EXPENSES TRACKERS REQUESTED BY THE MPSC STAFF AND COMPANY?

A. As I stated in my Direct Testimony on the issue of a Transmission Expense tracker, beginning on page 13, line 20, trackers are normally utilized for material costs that significantly fluctuate that are associated with events that are outside the control of a utility's management, e.g., acts of God, government actions, etc.

In this instance, just like the proposed Transmission Expense tracker, which Public Counsel also opposes, the respective costs may be subject to increases due to the

1 Company's future operations; however, latan 2 met its in-service criteria on August  
2 26, 2010. Company, and the other parties to the case, will have had approximately  
3 four months of cost information up and through the true-up period of the instant  
4 case with which to develop an annualized level of expenses for inclusion in the cost  
5 of service. The annualization amount, and its support, can be audited and  
6 scrutinized for prudence and reasonableness just like any other expense for which a  
7 full year's worth of data is not available. That is the normal way for accounting for  
8 such costs in the regulatory ratemaking process. Once subjected to such scrutiny,  
9 the parties can present their positions to the Commission for a decision if an  
10 agreement between the parties cannot be reached on an appropriate amount.  
11 Therefore, there is no need for the trackers proposed.

12  
13 Q. WITHOUT TRACKERS ISN'T IT POSSIBLE THAT THE COMPANY COULD  
14 OVER-RECOVER OR UNDER-RECOVER ON THE ANNUALIZED AMOUNT  
15 ACTUALLY INCLUDED IN THE DEVELOPMENT OF RATES?

16 A. The answer is yes, but that is the nature of public utility regulation. As regulators,  
17 the Commission does not guarantee a utility that it will recover its authorized rate of  
18 return. The regulatory compact is that the utility is provided the "opportunity" to  
19 recover the authorized return. It is up to the utility's management to operate the  
20 company so as to achieve that goal.

21

1 The Commission's job is not to micro-management the utility and neither is it to  
2 absolve the company's management of its duties and responsibilities, and  
3 consequences of actions they make take. However, that is exactly what the  
4 proposed trackers would do. The trackers, both the O&M and the Transmission,  
5 would account for the dollars expended and provide for recovery on a one to one  
6 basis thus eliminating the incentive for management to control the costs and  
7 absolving them of any missteps they might have possibly taken.

8  
9 Q. IS IT NOT ALSO POSSIBLE THAT WITHOUT A TRACKER RATEPAYERS  
10 COULD BE NEGATIVELY AFFECTED?

11 A. Yes. If the level of annualized costs included in the development of rates turn out to  
12 be higher that the actual level of costs incurred by the utility, ratepayers would end  
13 up paying higher rates than necessary to support the company's revenue  
14 requirement (assuming all other costs held equal). That is the reality of regulatory  
15 ratemaking. It is not an exact science.

16  
17 Q. WHAT DO YOU MEAN WHEN YOU STATE THAT REGULATORY RATEMAKING  
18 IS NOT AN EXACT SCIENCE?

19 A. Simply put, regulatory ratemaking, at its core, is the process of acting as a surrogate  
20 for competition as applied to monopoly enterprises. It is the attempt to avoid, or at  
21 least mitigate, the excesses of pricing and costs associated with monopolies.

1 Regulators take the most recent historical financial and operational information  
2 available to develop rates which the utility's management then takes and attempts  
3 to achieve or exceed for the benefit of shareholders. The implementation of  
4 trackers, as proposed by the MPSC Staff and Company, essentially eliminates the  
5 necessity of the utility's management to compete. Why should they if the recovery  
6 of the expenditures are guaranteed?

7

8 Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

9 A. Yes, it does.

10

11
