**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the Matter of Union Electric)
Company d/b/a Ameren)
Missouri's Tariff to Increase Its)
Revenues for Electric Service) Case No. ER-2014-0258

AFFIDAVIT OF TED ROBERTSON

STATE OF MISSOURI)
) ss
COUNTY OF COLE)

Ted Robertson, of lawful age and being first duly sworn, deposes and states:

1. My name is Ted Robertson. I am the Chief Public Utility Accountant for the Office of the Public Counsel.
2. Attached hereto and made a part hereof for all purposes is my surrebuttal testimony.
3. I hereby swear and affirm that my statements contained in the attached testimony are true and correct to the best of my knowledge and belief.

Ted Robertson, C.P.A.
Chief Public Utility Accountant

Subscribed and sworn to me this 6th day of February 2015.

JERENE A. BUCKMAN
My Commission Expires
August 23, 2017
Cole County
Commission #13754037

Jerene A. Buckman
Notary Public

My Commission expires August 23, 2017.

**SURREBUTTAL TESTIMONY
OF
TED ROBERTSON**

**UNION ELECTRIC COMPANY
d/b/a AMEREN MISSOURI
CASE NO. ER-2014-0258**

1 I. INTRODUCTION

2 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

3 A. Ted Robertson, P. O. Box 2230, Jefferson City, Missouri 65102.

4

5 Q. ARE YOU THE SAME TED ROBERTSON THAT HAS PREVIOUSLY FILED
6 DIRECT AND REBUTTAL TESTIMONY IN THIS CASE?

7 A. Yes.

8

9 II. PURPOSE OF TESTIMONY

10 Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

11 A. The purpose of this surrebuttal testimony is to address the rebuttal testimonies of Ameren
12 Missouri (Ameren or Company) witnesses, Ms. Lynn M. Barnes, Ms. Laura M. Moore,
13 and Mr. David N. Wakeman regarding their positions on the ratemaking treatment of the
14 Noranda Ice Storm Accounting Authority Order (AAO) deferred cost recovery, major
15 storm expense annualization and tracker amortization, vegetation management and
16 infrastructure inspection expense annualization and tracker amortization, U.S.

1 Department of Energy (DOE) breach of contract settlements, rate case expense, and
2 Missouri corporate franchise tax.

3
4 III. NORANDA ICE STORM AAO

5 Q. WHAT IS THE COMPANY'S RECOMMENDATION FOR THE AMOUNTS
6 DEFERRED PURSUANT TO THE ACCOUNTING AUTHORITY ORDER
7 AUTHORIZED IN CASE NO. EU-2012-0027?

8 A. Beginning on page 63, line 20, of her rebuttal testimony, the Company's witness, Ms.
9 Lynn M. Barnes, she states:

10
11 Q. What is Ameren Missouri's proposed treatment in this case of the
12 amounts deferred in File No. EU-2012-0027?

13
14 A. The Company proposes to amortize the deferred amounts over five
15 years.
16
17

18 Q. WHAT IS THE DEFERRED BALANCE AND WHAT WOULD BE THE ANNUAL
19 AMORTIZATION EXPENSE INCLUDED IN RATES IF THE COMPANY'S
20 PROPOSAL IS AUTHORIZED BY THE COMMISSION?

21 A. Beginning on page 26, line 6, of her direct testimony, the Company's witness, Ms. Laura
22 M. Moore, she identifies the deferred balance and annual amortization expense as:

23
24 Per the Report and Order in File No. EU-2012-0027, Ameren Missouri
25 deferred the lost fixed costs of \$35,561,503 related to the 2009 ice storm

1 that caused Noranda Aluminum to reduce its load. The amortization
2 expense is increased by \$7,112,000 to include the five-year amortization
3 of this regulatory asset in Adjustment 16.

4
5 (Emphasis added by OPC)

6
7
8 Q. WHAT IS THE PUBLIC COUNSEL'S POSITION ON THIS ISSUE?

9 A. Public Counsel is opposed to the recovery of the deferred amounts because the alleged
10 costs represent nothing more than revenue requirement authorized in the Company's 2008
11 rate case that the Company did not ultimately earn. The parties utilization of the
12 semantics "lost revenues" or "lost fixed costs" is really nothing more than a
13 mischaracterization of the portion of the previously authorized revenue requirement that
14 the Company did not collect from Noranda, and/or from every other customer on the
15 Company's system that were subject to the tariffed rates. Ameren's request for the
16 Commission to authorize recovery in the current case underearnings that occurred in a
17 prior year is not reasonable or appropriate, and should be disallowed.

18
19 Q. IS IT REASONABLE AND APPROPRIATE TO ALLOW THE COMPANY TO
20 RECOVER REVENUES IT DID NOT COLLECT FROM RATES SET IN A PRIOR
21 CASE IN THE CURRENT CASE?

22 A. No, it is not, and the Commission itself has stated that it is not. On page 18 of the
23 Commission's Report and Order in Ameren Missouri Case No. EC-2014-0223, the
24 Commission stated:

1
2 Ameren Missouri has simply charged its customers the electric rates the
3 Commission authorized it to charge in its last rate case. Although the
4 parties, and this order, speak of overearnings, doing so is just a shorthand
5 way of describing a situation where the utility is earning more from its
6 rates than was anticipated when those rates were established. If a
7 company is overearning, or underearning, the Commission may need to
8 adjust future rates to correct the imbalance. But the Commission cannot
9 order Ameren Missouri to “pay the money back” by refunding past
10 overearnings, nor can it allow the utility to collect past underearnings from
11 its customers.

12 (Emphasis added by OPC)

13
14
15
16 Q. DOES A REVENUE REQUIREMENT AUTHORIZED BY THE COMMISSION
17 REPRESENT A GUARANTEE TO THE UTILITY OF FUTURE RECOVERY?

18 A. No. The revenue requirement authorized by the Commission only represents an
19 opportunity to earn that amount; it is not a guarantee that the Company will be allowed to
20 seek future reimbursement if there is any shortfall in the amount. It is up to the
21 Company's management to achieve the earnings to recover the cost of service (i.e., return
22 on rate base, and reasonable and prudent expenses) authorized for recovery by the
23 Commission. In the absence of that recovery, the Company should not be allowed in a
24 later future case to recoup revenue requirement it did not earn.

25
26 Q. IS IT YOUR UNDERSTANDING THAT IF THE COMMISSION AUTHORIZES THE
27 RECOVERY OF THE DEFERRED EXPENSES THAT RECOVERY WOULD
28 REPRESENT RETRO-ACTIVE RATEMAKING?

1 A. Yes. As I understand it, based on the advice of counsel, recovery of the expenses
2 deferred in the AAO likely would represent retro-active ratemaking because the expenses
3 deferred were already included in the revenue requirement of a prior rate case - Case No.
4 ER-2008-0318.

5
6 Q. IS THERE ANYTHING ELSE DIFFERENT IN THIS AAO REQUEST COMPARED
7 TO OTHER ICE STORM AAO DEFERRALS WITH WHICH YOU ARE FAMILAR?

8 A. Yes. In all prior ice storm AAO cases of which I am aware, the costs authorized for
9 deferral were related directly to the repairing of the infrastructure damage that the utility
10 itself incurred. The costs deferred included, in most cases, a return on and of new
11 investment until the plant could be included in rate base in a subsequent general rate
12 increase case along with incremental labor and incremental other miscellaneous costs.
13 However, to my knowledge, the Company did not incur any infrastructure damage to its
14 system pursuant to the ice storm in January 2009. The storm damage that actually
15 occurred was to transmission lines operated by Associated Electric Cooperative – not
16 Ameren. The Company incurred no storm damage to its systems so none of the expenses
17 deferred with the Noranda Ice Storm AAO represent normal costs usually deferred in an
18 ice storm AAO. What they do represent is revenue requirement not earned.

1 IV. MAJOR STORM EXPENSE ANNUALIZATION AND TRACKER

2 Q. WHAT IS THE COMPANY'S RECOMMENDATION FOR THE ANNUAL LEVEL OF
3 EXPENSE FOR THIS ISSUE?

4 A. Beginning on page 30, line 1, of the rebuttal testimony of, Company's witness, Ms. Laura
5 Moore, she states:

6
7 Q. What does Ameren Missouri propose to use for storm costs?

8
9 A. Ameren Missouri proposes storm costs of approximately
10 \$4,600,000 based on a 60-month normalization period.

11
12 Q. Why has Ameren Missouri proposed the 60-month normalization
13 period?

14
15 A. A 60-month normalization period was agreed upon by both Staff
16 and Ameren Missouri and was the normalization period ordered by
17 the Commission in File No. ER-2012-0166. As the Commission
18 pointed out in its Report and Order from that case, even if one has
19 data going back for a long period of time (citing 79 months and 94
20 months as examples), at some point, the normalization period
21 would become too long to be reliable. Sixty months is long
22 enough to capture the varied history of storm levels without going
23 back so far as to lose the normalization benefit.
24
25

26 Q. IS THE COMPANY'S POSITION NOW THE SAME AS THAT OF THE MPSC
27 STAFF?

28 A. Yes.
29

1 Q. DOES PUBLIC COUNSEL OPPOSE THE ANNUAL LEVEL OF MAJOR STORM
2 EXPENSE NOW RECOMMENDED BY BOTH THE COMPANY AND MPSC
3 STAFF?

4 A. No. However, it is my understanding that parties to the case, i.e., OPC, MPSC Staff and
5 MIEC, have had problems obtaining accurate actual major storm expense amounts
6 incurred by the Company for several of the time periods utilized in the Company's
7 recommended normalization period. The Company just recently has provided the parties
8 with new information that attempts to reconcile the errors and/or differences. After
9 reviewing the Company's recently provided information, I will provide the Commission
10 with an update of the Public Counsel's recommendation, as appropriate, in true-up
11 testimony.

12
13 Furthermore, Public Counsel takes issue with Ms. Moore's comments that the use of the
14 entire population of actual incurred historical costs creates a normalization period that is
15 too long to be reliable. The Company's records show that the actual major storm
16 expenses it has incurred have shown some variability from one year to the next. Given
17 the variability that exists, utilization of the entire population of actual costs incurred is, in
18 fact, and from a statistical point of view, the most relevant and appropriate database from
19 which to develop the normalization period for the annual major storm expense on a
20 going-forward basis.
21

1 Q. DOES THE COMPANY OPPOSE THE OPC, MPSC STAFF AND MIEC WITNESSES'
2 RECOMMENDATION TO DISCONTINUE THE UTILIZATION OF THE MAJOR
3 STORM TRACKER GOING FORWARD?

4 A. Yes. Company witness, Mr. David N. Wakeman, states, beginning on page 11, line 7, of
5 his rebuttal testimony, that he believes that the Commission should allow the major storm
6 tracker to continue.

7
8 Q. DOES PUBLIC COUNSEL AGREE WITH MR. WAKEMAN'S PROPOSAL?

9 A. No. Mr. Wakeman seems to base his conclusions on two premises to which I agree in
10 part and disagree in part: 1) major storm costs are large uncontrollable expenses that vary
11 dramatically year-to-year, and 2) the two-way tracker does not have any significant
12 downside for either the Company or its customers.

13
14 Q. PLEASE CONTINUE.

15 A. Mr. Wakeman's assertion that the costs vary dramatically year-to-year is, I believe, an
16 accurate assessment of how historical costs have been incurred. As I discussed above,
17 major storm costs have exhibited a tendency for some variability on a year-to-year basis;
18 however, not unlike many other costs that the Company incurs on a yearly basis, a
19 database of historical costs does exist upon which to develop an annualized cost level.
20 Other than the fact that we agree that yearly costs have varied year-to-year, Mr.
21 Wakeman's beliefs and mine diverge significantly.

1
2 For example, Mr. Wakeman's assertion that costs are uncontrollable by management
3 seems to imply that the Company's management has absolutely no control over the costs
4 incurred after a major storm event occurs. This is not a rational conclusion. Only a very
5 naive person would say that management has control over when an major storm event
6 itself occurs, but it is equally naive to say that management does not have any control
7 over the actual costs it incurs to repair its system (after an event) – even if only on a
8 limited basis. It is the responsibility of the Company's management to control the
9 operation of the utility, and one major facet of operations is costs incurred. There have
10 been no allegations made in the current case that the Company is not doing its best to
11 control major storm costs; however, even Mr. Wakeman must admit that if the Company
12 did not have an abnormal regulatory ratemaking tracker wherein all incurred costs are
13 essentially guaranteed recovery, the incentive to control future costs for major storm
14 events then would be quite high on the Company management's to-do list.

15
16 Furthermore, Mr. Wakeman's assertion that there is no significant downside for either the
17 Company or ratepayers if the tracker is continued shows a fundamental lack of
18 understanding of how rates for regulated public utilities in the state of Missouri normally
19 are developed. That is, rates in Missouri normally are developed from historical and/or
20 known and measureable costs. Once authorized by the Commission, the recovery of
21 those costs, i.e., revenue requirement, is not guaranteed nor is a specific earnings return

1 guaranteed for the Company. Therein, risk exists for both shareholders and ratepayers.

2 The Company may over-earn or under-earn its Commission authorized return, but that is
3 part and parcel of the regulatory compact that exists in this State. When compared to the
4 regulatory compact, a tracker mechanism is nothing more than an abnormal regulatory
5 ratemaking aberration that should only be utilized for special situations where historical
6 costs do not exist and should be discontinued as soon as a database of historical costs
7 upon which to develop an annual level of cost becomes available.

8
9 Q. DOES PUBLIC COUNSEL ALSO BELIEVE THAT THE ANNUALIZED LEVEL OF
10 MAJOR STORM COSTS RECOMMENDED IN THIS CASE IS RELATIVELY
11 INSIGNIFICANT WHEN COMPARED TO THE COMPANY'S TOTAL ANNUAL
12 OPERATING EXPENSES?

13 A. Yes. Comparing the annual level of major storm expense going forward, as
14 recommended by Ms. Moore (i.e., \$4,600,000), to the Company's total operating expense
15 developed by the MPSC Staff (source: Staff Direct Staff Accounting Schedules -
16 \$2,437,489,272) shows that Ms. Moore's recommended annual expense amount
17 represents less than 2/10ths of 1% of the Company's total operating expenses (i.e.,
18 \$4,600,000 divided by \$2,437,489,272). Certainly, the \$4.6 million dollars Ms. Moore
19 recommends as an annualized level of expense is not an immaterial amount of money.
20 But, Public Counsel does not believe that \$4.6 million is a significant enough amount to
21 justify a special tracker mechanism to replace the normal regulatory ratemaking

1 processes and procedures, particularly given that a sufficient database of historical costs
2 now exists upon which the Commission can rely in order to develop an annual level of
3 expenses to include in the development of rates.

4
5 V. VEGETATION MANAGEMENT AND INFRASTRUCTURE INSPECTION
6 EXPENSE ANNUALIZATION AND TRACKER

7 Q. WHAT IS THE COMPANY'S RECOMMENDATION FOR THE ANNUAL LEVEL OF
8 EXPENSE FOR THIS ISSUE?

9 A. Beginning on page 31, line 1, of her rebuttal testimony, the Company's witness, Ms.
10 Laura Moore, states that the Company's direct testimony proposal was to include a base
11 level of \$55,400,000 for the vegetation management expense and a base level of
12 \$5,800,000 for the infrastructure inspections expense. She states the amounts are based
13 on actual expenses incurred during the test year.

14
15 Q. HAS THE COMPANY NOW CHANGED ITS PROPOSAL?

16 A. Yes. Beginning on page 31, line 20, of her rebuttal testimony, Ms. Moore states that the
17 Company now proposes to use the actual incurred amounts through the true-up for the
18 base level of expenses because that is consistent with the treatment of the base level
19 expenses used in the Company's last three rate cases.

20
21 Q. DOES PUBLIC COUNSEL BELIEVE THIS IS REASONABLE OR APPROPRIATE?

1 A. No. Public Counsel disagrees with the Company's proposal for several reasons: 1) the
2 test year expenses identified by Ms. Moore are not accurate, 2) the annual level of
3 expenses incurred for vegetation management since 2009 have shown no significant
4 trending either increasing or decreasing while the infrastructure inspections annual level
5 of expenses have steadily decreased until the test year of the current case, and 3) Public
6 Counsel, the MPSC Staff and MIEC witnesses all recommend the discontinuance of the
7 trackers mechanisms for these costs. Accordingly, what occurred in prior rate cases is
8 not relevant going forward since the setting of the base level expense in those cases was
9 merely a prelude to the tracking of any difference in actual costs incurred from the base
10 level expense authorized.

11
12 Q. PLEASE EXPLAIN THE ERRORS IN MS. MOORE'S TEST YEAR AMOUNTS?

13 A. The base level of test year expenses Ms. Moore identifies in her rebuttal are incorrect
14 because what the amounts actually represent is the Company's forecast of actual expenses
15 for the twelve months ended December 2014 (the end of the true-up period) – not the test
16 year which is the twelve months ended March 2014. Her direct testimony work papers
17 LMM-WP-425 and LMM-WP-501 show that the Company utilized forecasted amounts
18 for the months of April 2014 through December 2014 to derive the amounts she describes
19 as actual expenses incurred during the test year.

20

1 Q. WHAT ARE THE ACTUAL TEST YEAR EXPENSES INCURRED AS OF THE
2 TWELVE MONTHS ENDED MARCH 2014?

3 A. The actual test year expense incurred for vegetation management was ** **
4 and for infrastructure inspection ** **.

5
6 Q. WHY SHOULDN'T THE ANNUAL EXPENSE AUTHORIZED IN THE CURRENT
7 CASE FOR VEGETATION MANAGEMENT ACTIVITIES BE BASED ON EITHER
8 THE TWELVE MONTHS ENDED MARCH 2014 OR DECEMBER 2014?

9 A. For the five preceding twelve-month periods ending in March, the Company's actual
10 vegetation management expense has been somewhat variable, both up and down, within a
11 range of ** ** to ** **. In year two the expenses decreased to
12 ** ** from the year one amount of ** **. In year three the
13 actual expense increased to ** ** and then decreased to ** **
14 in year four.

15
16 Clearly, the actual expense incurred by the Company during the prior five years is subject
17 to variability; therefore, the best regulatory ratemaking methodology to utilize to
18 determine the annual expense level going forward is normalize the costs based on an
19 average of actual historical costs. Ms. Moore's proposal does not take into account any
20 variability in the actual expenses and does not identify any trending that would suggest
21 that the actual expenses will continue to increase from the actual test year or true-up

1 period level. That is why Public Counsel recommends that the annual level of expense be
2 based on a normalization of the known database of historical costs.

3
4 Q. SHOULD THE ANNUAL EXPENSE AUTHORIZED IN THE CURRENT CASE FOR
5 INFRASTRUCTURE INSPECTION ACTIVITIES BE BASED ON EITHER THE
6 TWELVE MONTHS ENDED MARCH 2014 OR DECEMBER 2014?

7 A. No. For the five preceding twelve-month periods ending in March, the Company's actual
8 infrastructure inspection expense has decreased in all years except for the twelve months
9 ended March 2014. In the first year the expenses were ** ** while in year
10 four they were ** **. For the twelve months
11 ended March 2014, the actual incurred expense was **

12 ** over year four. These costs have shown a clear and substantial
13 decreasing trend in all years except the test year. That is why Public Counsel
14 recommends a two year normalization of the costs utilizing the twelve-month period
15 ending in March 2013 and March 2014. Since the future actual expenses are not known
16 and measurable, Public Counsel believes that the two-year normalization is the best
17 methodology to protect both shareholders and ratepayers from possible future over or
18 under recovery of the expenses.

19
20 Q. WHY IS THE COMPANY'S PROPOSAL TO UTILIZE THE ACTUAL INCURRED
21 EXPENSE FOR THE TWELVE MONTHS ENDING DECEMBER 2014 AS THE

1 ANNUAL LEVEL OF EXPENSES FOR VEGETATION MANAGEMENT AND
2 INFRASTRUCTURE INSPECTIONS ACTIVITIES UNREASONABLE AND
3 INAPPROPRIATE?

4 A. Above I described for the Commission that the actual incurred level of expense for
5 vegetation management has been variable on a year-to-year basis while those of the
6 infrastructure inspection activities have been trending down significantly. For both types
7 of expenses, I have recommended a normalization approach as the best methodology to
8 develop an annual expense level on a going-forward basis. However, Ms. Moore
9 suggests that the true-up period should be used because that is the way it has been done in
10 the last three cases.

11
12 Public Counsel disagrees with Ms. Moore's proposal because, in the referenced cases, the
13 continuation of the tracker was a primary reason for setting the base level as authorized.
14 In the current case, Public Counsel, the MPSC Staff and MIEC witnesses all recommend
15 that a sufficient database of historical actual costs exists upon which to determine an
16 annualized level of costs to include in the development of rates. The trackers authorized
17 by the Commission were setup to protect both shareholders and ratepayers because the
18 new rules associated with the programs had no history upon which to base an annual
19 level of costs with any accuracy. Public Counsel believes that a credible historical
20 database of actual costs is now available, and so, it is time to move the development of

1 these costs to a normal regulatory ratemaking process and eliminate the abnormal tracker
2 mechanism.

3
4 VI. DOE BREACH OF CONTRACT SETTLEMENTS

5 Q. DID THE COMPANY RECEIVE THE 4TH QUARTER 2014 REIMBURSEMENT
6 YOU DISCUSSED IN YOUR REBUTTAL TESTIMONY?

7 A. Yes. The Company's response to OPC Data Request No. 1041 and MPSC Staff Data
8 Request No. 353s1 stated that the reimbursement was received in December 2014.

9
10 Q. HOW DID THE COMPANY BOOK THE REIMBURSEMENT?

11 A. The proceeds were booked to cash and as an offset to Nuclear Construction Work In
12 Process (CWIP) accounts as a reimbursement for the Dry Cask Storage Project costs.

13
14 Q. IS IT THE COMPANY'S POSITION THAT ALL FUTURE REIMBURSEMENTS
15 ALSO BE UTILIZED AS A REDUCTION IN THE COSTS OF THE DRY CASK
16 STORAGE PROJECT COSTS?

17 A. No. Beginning on page 36, line 5, of her rebuttal testimony, the Company's witness, Ms.
18 Laura M. Moore, states:

19
20 Q. Has Staff proposed an adjustment in relation to the DOE Breach of
21 Contract Settlements?
22

1 A. No. Staff has not proposed an adjustment in this case related to the
2 DOE Breach of Contract Settlement. Although, Staff has
3 recommended the Commission order the Company to return all
4 future refunds that stem from settlements that Ameren Missouri
5 has reached with DOE to ratepayers.
6

7 Q. Does the Company agree with this recommendation?
8

9 A. No. Staff's focus on this refund ignores the fact there are also costs
10 that change between rate cases that the Company does not get to
11 recover. For example, in File No. ER-2012-0166 the true-up
12 period ended July 31, 2012, and property taxes are not paid until
13 December 2012. The amount that was allowed in rates for that
14 case was based on the property taxes paid in 2011. The increase in
15 the property taxes paid in 2012 was never recovered by the
16 Company. Also, the settlement amounts that were booked as
17 miscellaneous non-utility operating revenue related to refunds of
18 expenses that were incurred in a period of time that Ameren
19 Missouri was not involved in rate cases. Requiring the Company
20 to pass these refunds through rates to be set in this case would
21 result in a windfall to current customers.
22
23

24 Q. DOES PUBLIC COUNSEL BELIEVE THAT MS. MOORE'S ARGUMENT MAKES
25 SENSE?

26 A. No. Ms. Moore seems to be discussing two different points: 1) that the December 2014
27 reimbursement should not be included in the development of rates authorized in the
28 current case, and 2) that future DOE reimbursements should not be returned to ratepayers
29 via a reduction of investment costs.
30

31 Regarding the first point, as I discussed above, Company booked the December 2014
32 reimbursement to CWIP so that reimbursement will not be included in the development

1 of rates in the current case. According to the way Company has booked the
2 reimbursement, it will, unless Company changes its position, be included in the
3 development of rates in the rate case subsequent to the plant investment to which it is
4 associated is transferred to plant-in-service. Thus, it is a not an issue in this case unless
5 the CWIP balance associated with the Dry Cask Project was transferred to plant-in-
6 service as of December 31, 2014, and it is my understanding that it was not.

7
8 Regarding Ms. Moore's second point, under Missouri regulatory ratemaking prudent
9 used and useful investment is usually based on the most current level existing at the time
10 of the test year, known and measurable period or true-up period. If the Company incurs
11 an investment cost, but that cost is paid for by an entity other than the Company, e.g.,
12 contributions in aid of construction or insurance reimbursement, the cost of the
13 investment which Company did not pay for is not included in the development of rates.
14 Shareholders are not allowed to recover expenses the did not pay for, nor are they
15 allowed to earn a return on or return of investment costs which they did not incur. It
16 would be illogical to allow the Company to earn a return on or return of a rate base
17 investment which cost it nothing. Future DOE reimbursements should be utilized to
18 reduce the investment cost incurred by the Company in the same manner as the Company
19 booked the December 2014 reimbursement.

20
21 Q. WHAT IS PUBLIC COUNSEL'S RECOMMENDATION FOR THIS ISSUE?

1 A. As stated in my rebuttal testimony, Public Counsel believes that all DOE reimbursements
2 related to this issue should flow back directly to ratepayers via a reduction of the plant
3 investment cost the Company incurs because of the contract breach. It is a common
4 concept of regulatory ratemaking theory that a regulated utility is only allowed to earn a
5 return on and return of investment for which it actually incurs a cost. If the cost of an
6 investment is reduced by a ratepayer contribution or proceeds from another entity,
7 shareholders are not allowed to earn any return on or of the portion of the investment not
8 paid for by the Company. The Company should not be allowed to treat the DOE
9 reimbursements as unregulated revenues because they are directly related to reducing the
10 cost of the plant investment related to the DOE breach of contract settlement.

11
12 Q. IS PUBLIC COUNSEL OPPOSED TO REDUCING THE AMOUNT OF FUTURE
13 REIMBURSEMENTS RETURNED TO RATEPAYERS FOR PRUDENT AND
14 REASONABLE INCREMENTAL COSTS INCURRED BY THE COMPANY TO
15 OBTAIN THE REIMBURSEMENTS?

16 A. No.

17
18 VII. RATE CASE EXPENSE

19 Q. WHAT IS THE ISSUE?

20 A. This issue concerns rate case costs the Company incurred to process the recent Rate
21 Design Complaint Case, No. EC-2014-0224. Public Counsel believes that most of the

1 costs the Company incurred to process that case were arguably booked to the wrong
2 Uniform System of Accounts (USOA) Account, and that a majority of the total costs
3 were imprudently incurred. Public Counsel believes that the booking issue is a minor
4 issue with no ratemaking effect; however, ratepayers should not be required to reimburse
5 the Company for the imprudent costs. Thus, Public Counsel recommends that the
6 imprudent costs should be disallowed from the development of rates in the instant case.
7

8 Q. WERE THE COSTS INCURRED BY THE COMPANY IN CASE NO. EC-2014-0224
9 INCURRED DURING THE TEST YEAR FOR THE INSTANT CASE?

10 A. Some of the charges were incurred during the test year, but most were incurred in the
11 true-up period authorized for the instant case.
12

13 Q. WHAT COSTS DID THE COMPANY BOOK INACCURATELY?

14 A. The Company booked its legal and consultant costs to a legal reserve liability account,
15 but the Company stated that the offsetting expense entry was charged to USOA Account
16 923 - Outside Services. Public Counsel believes that the costs incurred, both legal and
17 consulting, should have been booked to USOA Account 928 Regulatory Expenses.
18

19 Q. WHAT COSTS DID THE COMPANY INCUR TO PROCESS CASE NO. EC-2014-
20 0224?

1 A. The Company's response to OPC Data Request No. 1035 and MPSC Staff Data Request
2 No. 479 identify that the Company incurred legal costs **, outside experts
3 (consulting) costs **, and miscellaneous outside support, hotels, meals and
4 travel costs **.

5
6 Q. WHICH OF THE ABOVE COSTS DOES PUBLIC COUNSEL BELIEVE WERE
7 IMPRUDENTLY INCURRED?

8 A. Public Counsel believes that almost all of the costs are imprudent and should have never
9 been incurred. Because this was a complaint case filed against the Company, the
10 Company was certainly required to participate, but because the issues to be determined in
11 the case had little or no impact on the Company or its shareholders, the extent to which
12 the Company participated far outweighed what should be considered reasonable and
13 necessary.

14
15 Q. PLEASE CONTINUE.

16 A. Regarding legal costs, the Company incurred the services of two separate firms: 1)
17 Brydon, Swearingen & England P.C. and 2) Smith Lewis, LLP. Brydon, Swearingen &
18 England P.C. total charges were **, while charges for Smith Lewis, LLP
19 were approximately **. Public Counsel believes that these large costs should
20 never have been incurred because it is likely the Company's own in-house legal staff

1 could have been utilized to process the case due to the absence of any substantial risk to
2 the Company's operations or its shareholder's earnings.
3

4 Q. DID THE COMPANY ALSO INCUR SIGNIFICANT OUTSIDE EXPERT CHARGES?

5 A. Yes. The Company incurred even larger total charges for three outside expert firms: 1)
6 Brattle Group **, **, 2) Pierre Arseneault **, **, and 3) Healy &
7 Healy, Attorney's at Law, LLC **. Hourly rates for the consultants varied
8 depending on the personnel utilized at the respective firm; however, the hourly rates
9 incurred were as high as ** ** for Brattle Group (Mr. Mudge was **
10 **), ** ** for Pierre Arseneault (in addition to a retainer fee of **
11 **), and ** ** for Healy & Healy, Attorney's at Law, LLC.
12

13 Q. DOES PUBLIC COUNSEL BELIEVE THAT ALL THE OUTSIDE EXPERT
14 CHARGES SHOULD BE DISALLOWED?

15 A. Yes. Public Counsel believes that all of the outside expert charges identified above were
16 imprudently incurred given the limited rate design issues to be determined in the case.
17 That is, the services of the three outside expert firms were unnecessary. As the
18 Commission has noted before, when the Company has internal expertise capable of being
19 brought to bear in a case more cheaply than the use of outside expertise, the Company
20 should employ the internal expertise. A Company of Ameren's size retains employees
21 capable of understanding and presenting testimony on the relevant issues that were to be

1 determined in that case. Had the Company utilized their own employees, the outside
2 expert charges would not have been incurred. Thus, they should be disallowed.

3
4 Q. SHOULD THE MISCELLANEOUS CHARGES ALSO BE DISALLOWED?

5 A. Public Counsel believes that some portion of the total miscellaneous charges relate to
6 either the legal or outside service providers identified above, but because the amount is
7 relatively immaterial and cannot be accurately determined from the Company's data
8 request response, and it likely that the Company's personnel would have incurred similar
9 costs, no disallowance is required for these charges.

10
11 Q. PLEASE SUMMARIZE THE PUBLIC COUNSEL'S POSITION ON THIS ISSUE?

12 A. Public Counsel recommends, for the reasons stated above, that the Commission disallow
13 the legal and outside expert charges the Company incurred in Case No. EC-2014-0224
14 because the charges were imprudently incurred. To the extent that the test year includes a
15 portion of the costs identified, those costs should be removed from the annual level of
16 costs for the accounts where they were booked. If the accounts in which these costs were
17 booked are either updated or included in the true-up, the charges included in those
18 periods should be disallowed.

1 VIII. CORPORATE FRANCHISE TAX

2 Q. HAS PUBLIC COUNSEL RECEIVED ADDITIONAL INFORMATION FROM THE
3 COMPANY REGARDING THE CORPORATE FRANCHISE TAX ISSUE?

4 A. Yes. Since the filing of rebuttal testimony, Public Counsel has received data request
5 responses identifying and describing how corporate franchise tax and any tax credit offset
6 were calculated and allocated between the Company's electric and gas operations in prior
7 years. In addition, Company has recently provided a supplemental response to OPC Data
8 Request No. 1040 which included the Missouri 2015 corporate franchise tax schedule
9 (Form MO-FT) and a listing of Missouri tax credits available to offset the 2015 tax
10 liability.

11
12 Q. IS THE 2015 TAX LIABILITY BASED ON CALENDAR YEAR END 2014
13 FINANCIAL INFORMATION?

14 A. Yes. Public Counsel understands that the information and account balances required to
15 calculate the 2015 tax liability are determined from the Company's calendar year 2014
16 (i.e., end of the instant case true-up period) financial records. Furthermore, the 2015 tax
17 liability represents the last year of corporate franchise tax that the Company will incur
18 before the corporate franchise tax is eliminated completely.
19

1 Q. WHAT IS PUBLIC COUNSEL'S RECOMMENDATION REGARDING THE
2 RATEMAKING TREATMENT OF THE 2015 CORPORATE FRANCHISE TAX
3 LIABILITY?

4 A. Public Counsel recommends that the 2015 corporate franchise tax liability less tax credits
5 be normalized over a period of 18 months. Utilizing the 2015 corporate franchise tax
6 information provided by the Company, Public Counsel recommends that a normalized
7 annual amount of ** ** be included in the development of rates for the
8 Company's electric operations (i.e., ** **.
9 Utilization of the ** ** as the annual cost results in an adjustment that
10 decreases the Company's actual test year expense by ** ** (i.e., **
11 ** booked electric test year less the ** **).

12
13 Public Counsel believes its recommendation is fair to both the Company and ratepayers
14 since it is Public Counsel's understanding that the Company intends to file for a new
15 general rate increase case shortly after the finalization of the current case. If the
16 Company does indeed file a new rate case as expected, it is likely that rates developed in
17 that subsequent case will be authorized near the end of the 18 month timeframe of the
18 recommended normalization period, thus allowing the Company to recover fully its
19 actual incurred cost while, if it files the new case as expected, not over-recovering the
20 cost by any significant amount. Furthermore, since applicable legislation eliminated any
21 future corporate franchise tax subsequent to 2015, there is absolutely no reason to include

1 the entire 2015 corporate franchise tax liability as the expected level of annual ongoing
2 expense.

3
4 Q. IS THE ELECTRIC OPERATIONS PERCENTAGE YOU USED TO CALCULATE
5 YOUR RECOMMENDED ANNUAL CORPORATE FRANCHISE TAX AMOUNT
6 BASED ON CALENDAR YEAR-END 2014 INFORMATION?

7 A. No. Company did not provide that information in its supplemental response to OPC Data
8 Request No. 1040s1 so I utilized the percentage that the Company utilized to allocate its
9 2014 corporate franchise tax liability. While utilization of the actual 2015 percentage
10 would yield a more accurate amount, I do not believe it likely that the differences in the
11 2014 and 2015 percentages will be material, but if the Company provides the 2015
12 percentage, I will update my recommendation, as appropriate, in true-up testimony.

13
14 Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

15 A. Yes.
