Missouri Public
Service Commission

Exhibit No.: 011

Issues: Updated Cost of Service
Study With Actual Data

Witness: Gary S. Weiss

Sponsoring Party: Union Electric Company

Type of Exhibit: Supplemental Direct Testimony

Case No.: ER-2007-0002

Date Testimony Prepared: September 29, 2006

MISSOURI PUBLIC SERVICE COMMISSION

CASE NO. ER-2007-0002

SUPPLEMENTAL DIRECT TESTIMONY

OF

GARY S. WEISS

ON

BEHALF OF

UNION ELECTRIC COMPANY

d/b/a AmerenUE

St. Louis, Missouri
September, 2006

AmerenUE Exhibit No. 11
Case No(s) ER-2007-0002
Date 3/27/07 Rptr MV

II. PURPOSE AND SUMMARY OF TESTIMONY	1
III. REVENUE REQUIREMENT	6
IV. IMPACT ON REVENUE REQUIREMENT REFLECTING 4 CSR 240-10.020	29
V. CONCLUSIONS.....	30

1 **SUPPLEMENTAL DIRECT TESTIMONY**

2 **OF**

3 **GARY S. WEISS**

4 **CASE NO. ER-2007-0002**

5 **I. INTRODUCTION**

6 **Q. Please state your name and business address.**

7 A. Gary S. Weiss, Ameren Services Company, One Ameren Plaza, 1901
8 Chouteau Avenue, St. Louis, Missouri 63103.

9 **Q. Are you the same Gary S. Weiss who previously filed testimony in this**
10 **case?**

11 A. Yes.

12 **II. PURPOSE AND SUMMARY OF TESTIMONY**

13 **Q. What is the purpose of your supplemental direct testimony in this**
14 **proceeding?**

15 A. The purpose of my supplemental direct testimony and attached Schedules
16 GSW-E20 through GSW-E38 is to update the cost of service (revenue requirement) for the
17 Missouri electric operations of AmerenUE for the test year adopted by the Commission in
18 this case (the actual twelve months ended June 30, 2006). This is in accordance with the
19 Order Adopting Procedural Schedule and Test Year in Case No. ER-2007-0002 issued
20 September 12, 2006, which states: "It is Ordered that AmerenUE will update its Direct Case,
21 i.e., its forecasted data for April to June 2006, to actual data, including limited Supplemental
22 Direct Testimony".

1 **Q. Does your supplemental direct testimony provide comprehensive**
2 **information on the Company's revenue requirement with the updated information for**
3 **the last three months of the test year?**

4 A. Yes. This supplemental direct testimony, including the accompanying
5 schedules, is designed to provide the Commission with the total revenue requirement picture
6 for the Company's electric operations to avoid the need to refer back and forth between the
7 supplemental direct testimony and my direct testimony, which was filed using nine months of
8 actual data and three months of forecasted data. However, in accordance with the
9 Commission's above referenced Order, no changes in methodology or new methodologies
10 are introduced.

11 **Q. Do your supplemental direct testimony and attached schedules reflect any**
12 **new adjustments to the AmerenUE electric revenue requirement?**

13 A. Yes, there is one new adjustment (Adjustment #18) for a New Tree Trimming
14 Program. This new adjustment, reflected on Schedule GSW-E29-3 in the amount of
15 \$15,000,000, arises from the severe storms that occurred in July 2006 and the resulting
16 extreme damage inflicted on the AmerenUE electric distribution system. Because the
17 Company believes that normal tree trimming programs are not sufficient to prevent this kind
18 of extreme damage, the Company is proposing new programs in addition to the normal tree
19 trimming program, as outlined in the supplemental direct testimony of Company witness
20 Ronald C. Zdellar. If the Commission approves this additional \$15,000,000 for new tree
21 trimming programs, the Company commits to spend this amount on the new programs as
22 long as the rates containing the \$15,000,000 are in effect. The Company will track the

1 expenditures on the new tree trimming programs in a separate account and provide reports
2 annually to the Commission.

3 **Q. Have you prepared or have there been prepared under your direction and**
4 **supervision a series of schedules for presentation to the Commission in this proceeding?**

5 A. Yes. I am sponsoring Schedules GSW-E20 through GSW-E38.

6 **Q. What is the subject matter of these schedules?**

7 A. Schedules GSW-E20 through GSW-E38 develop the various elements of the
8 revenue requirement to be considered in arriving at the proper level of rates for the
9 Company's electric service based on the test year of twelve months ended June 30, 2006,
10 with pro forma adjustments and updates for known and measurable changes. Schedule
11 GSW-E38 shows the impact on the Company's revenue requirement if the provisions of
12 4 CSR 240-10.020 are followed. All of these Schedules are updates to Schedules GSW-E1
13 through GSW-E19 contained in my direct testimony using updated numbers including actual
14 data for April through June, 2006.

15 **Q. Will you please briefly summarize the information provided on each of**
16 **the schedules you are presenting?**

17 A. Each schedule provides the following information:

- 18 • Schedule GSW-E20 – Original Cost of Plant by functional classification
19 at June 30, 2006 per book and pro forma with the allocation of pro forma
20 total electric plant to the Missouri jurisdiction.
- 21 • Schedule GSW-E21 - Reserves for Depreciation and Amortization by
22 functional classification at June 30, 2006 per book and pro forma with the

- 1 allocation of the pro forma total electric reserve for depreciation and
2 amortization to the Missouri jurisdiction.
- 3 • Schedule GSW-E22 – Average Fuel Inventories and Average Materials
4 and Supplies Inventories at June 30, 2006 per book and pro forma with
5 the allocation of the pro forma electric inventories to the Missouri
6 jurisdiction.
 - 7 • Schedule GSW-E23 – Average Prepayments at June 30, 2006 per book
8 and pro forma with the allocation of the pro forma electric prepayments
9 to the Missouri jurisdiction.
 - 10 • Schedule GSW-E24– Missouri Jurisdictional Cash Requirement
11 (Lead/Lag Study) for the twelve months ended June 30, 2006.
 - 12 • Schedule GSW-E25 – Missouri Jurisdictional Interest Expense Cash
13 Requirement, Federal Income Tax Cash Requirement and State Income
14 Tax Cash Requirement for the twelve months ended June 30, 2006.
 - 15 • Schedule GSW-E26- Customer Advances for Construction and Customer
16 Deposits reductions to rate base at June 30, 2006 applicable to the
17 Missouri jurisdiction.
 - 18 • Schedule GSW-E27 – Accumulated Deferred Taxes on Income at
19 June 30, 2006 and allocation to the Missouri jurisdiction.
 - 20 • Schedule GSW-E28 - Electric Operating Revenues for Total Electric and
21 Missouri Jurisdiction for the twelve months ended June 30, 2006 per
22 book and pro forma.

- 1 • Schedule GSW-E29 – Electric Operations and Maintenance Expenses, by
2 functional classifications for the year ending June 30, 2006 updated for
3 certain known items, per book and pro forma. A description of each of
4 the pro forma adjustments is included, as well as the allocation of the
5 total electric pro forma operating and maintenance expenses to the
6 Missouri jurisdiction.
- 7 • Schedule GSW-E30– Depreciation and Amortization Expenses
8 applicable to Electric Operations, by functional classification for the year
9 ending June 30, 2006, updated to reflect the Company's proposed new
10 depreciation rates. A description of the pro forma adjustments and the
11 allocation of the total electric pro forma depreciation and amortization
12 expenses to the Missouri jurisdiction is included.
- 13 • Schedule GSW-E31– Taxes Other Than Income Taxes, for the year
14 ending June 30, 2006 per book and pro forma. A description of the pro
15 forma adjustments and the allocation of the total electric pro forma taxes
16 other than income to the Missouri jurisdiction is included.
- 17 • Schedule GSW-E32 – Income Tax Calculation at the proposed rate of
18 return and statutory tax rates for total electric and the Missouri
19 jurisdiction.
- 20 • Schedule GSW-E33- The development of the fixed (demand) allocation
21 factor for the Missouri jurisdiction.
- 22 • Schedule GSW-E34- The development of the variable allocation factor
23 for the Missouri jurisdiction.

14 A. Yes.

16 Q. What do you mean by “revenue requirement”?

6

1 The revenue requirement represents the total funds (revenues) that must be
2 collected by the Company if it is to pay employees and suppliers, satisfy tax liabilities, and
3 provide a return to investors. To the extent that current revenues are less than the revenue
4 requirement, a rate increase is required. This is the purpose of this proceeding.

5 **Q. Why is it necessary to make pro forma adjustments to the test year?**

6 A. It is an axiom in ratemaking that rates are set for the future. In order for
7 newly authorized rates to have the opportunity to produce the allowed rate of return during the
8 period they are in effect, it is sometimes necessary that the test year data be adjusted so that it
9 is representative of future operating conditions. This requires pro forma adjustments to reflect
10 known changes.

11 **Q. Please explain Schedule GSW-E20.**

12 A. Schedule GSW-E20 shows the recorded original cost of electric plant by
13 functional classification at June 30, 2006 along with the estimated plant additions through
14 December 31, 2006. This schedule also shows the allocation of the total pro forma electric
15 plant to the Missouri jurisdiction.

16 **Q. Why is it necessary to allocate the total electric to the Missouri**
17 **jurisdiction on this schedule and the other schedules?**

18 A. AmerenUE provides service to retail Missouri jurisdictional customers as well
19 as sales for resale customers which are regulated by the Federal Energy Regulatory
20 Commission (FERC). Therefore it is necessary to allocate certain plant, rate base items,
21 revenues and operating expenses between the Missouri retail jurisdictional customers and the
22 sales for resale customers.

1 **Q. Are the Company's plant accounts recorded on the basis of original cost**
2 **as defined by the Uniform System of Accounts prescribed by this Commission?**

3 A. Yes, they are.

4 **Q. Please explain the elimination of the plant balances related to Financial**
5 **Accounting Standard ("FAS") 143 Accumulated Retirement Obligation shown as the**
6 **first adjustment on Schedule GSW-E20-1.**

7 A. FAS 143 is basically a financial reporting requirement to reflect the fact that
8 the Company has a legal obligation to remove certain facilities in the future. Since
9 AmerenUE is regulated and through its depreciation rates collects removal costs, this
10 adjustment to plant of \$110,248,000 is eliminated for ratemaking purposes.

11 **Q. Why is the Company including plant additions through December 31,**
12 **2006?**

13 A. The Company has spent over \$2.6 billion on infrastructure expenditures since
14 January 2002 and continues to make substantial infrastructure expenditures. In order to
15 provide the Company an opportunity to earn a fair and reasonable return on its total
16 investment, it is necessary for the cost of service to reflect as closely as possible the level of
17 the Company's investment at the time the new rates will become effective. Adjustment 2
18 adds the plant in service additions from July through December 2006, except for the plant
19 additions related to new business, of \$552,061,000. Plant additions for new business are
20 excluded since these additions should increase revenues. The direct testimonies of Company
21 witnesses Charles D. Naslund, Mark C. Birk, Maureen A. Borkowski and Richard J. Mark
22 discuss the Company's infrastructure expenditures.

1 **Q. Please explain the elimination of items of General Plant applicable to gas**
2 **operations.**

3 A. General Plant facilities such as general office buildings and equipment, the
4 central warehouse, the central garage, and computers and office equipment are used in both
5 the electric and gas operations. For convenience, such facilities are accounted for as electric
6 plant. Adjustment 3 eliminates the portion of the multi-use general plant applicable to the
7 Company's gas operations of \$4,656,000.

8 **Q. After reflecting the above pro forma adjustments, what amount of**
9 **electric plant in service is the Company proposing to include in rate base?**

10 A. As shown on Schedule GSW-E20 the total electric plant in service is
11 \$11,376,178,000 with \$11,262,123,000 allocable to the Missouri jurisdiction.

12 **Q. Please explain Schedule GSW-E21.**

13 A. Schedule GSW-E21 shows the reserve for depreciation and amortization at
14 June 30, 2006, by functional group. It also indicates the pro forma adjustments. Finally,
15 Schedule GSW-E21 allocates the total electric pro forma balances to the Missouri
16 jurisdiction

17 **Q. What pro forma adjustments were made to the reserve for depreciation?**

18 A. The following adjustments were made to the reserve for depreciation on
19 Schedule GSW-E21.

20 Adjustment 1 is a reallocation of the accumulated depreciation reserve from
21 distribution plant to general plant of \$82,068,000. Because the Company's depreciation rates
22 have not been changed since the early 1980s, the lives used for distribution plant have proven
23 to be too short while the lives used for new technology items in general plant such as

1 personal computers have proven to be too long. See the direct testimony of Company
2 witness John F. Wiedmayer of Gannett Fleming, Inc. for further detail on this adjustment.
3 However, the total accumulated depreciation reserve is not impacted by this reallocation of
4 the accumulated depreciation reserve.

5 Adjustment 2 reduces the reserve for depreciation by \$51,000 for Hydraulic
6 Plant Account 335, Roads, to reflect the fact that the account is fully depreciated.

7 Adjustment 3 for \$198,000 increases the reserve for depreciation and
8 amortization to reflect a ten-year amortization of the Venice Plant removal costs not
9 recovered through depreciation rates.

10 Adjustment 4 eliminates \$81,090,000 from the depreciation reserve related to
11 FAS 143 Accumulated Retirement Obligation. The plant related to FAS 143 was removed
12 from rate base in Adjustment 1 to plant in service.

13 Adjustment 5 increases the depreciation reserve by \$18,468,000 for the pro
14 forma plant additions to plant in service through December 31, 2006.

15 Finally, Adjustment 6 eliminates the accumulated amortization and
16 depreciation reserve of \$2,084,000 for the multi-use general plant applicable to gas operations
17 and corresponds to Adjustment 3 made to the plant accounts in Schedule GSW-E20.

18 The pro forma accumulated provision for depreciation and amortization as
19 shown on Schedule GSW-E21 applicable to total electric plant in service is \$4,538,426,000
20 and the Missouri jurisdictional amount is \$4,495,359,000.

21 **Q. Please explain Schedule GSW-E22.**

22 A. Schedule GSW-E22 shows the average investment in fuel inventories and
23 materials and supplies at June 30, 2006. Fuel consists of nuclear fuel, coal and minor

1 amounts of oil, shredded tires, petroleum coke and stored natural gas used for electric
2 generation. General materials and supplies include such items as poles, cross arms, wire,
3 cable, line hardware and general supplies. A thirteen-month average is used for all of these
4 items except nuclear fuel and coal inventories. An eighteen-month average is used for the
5 nuclear fuel since the Callaway Nuclear Plant is refueled every eighteen months. The coal
6 inventory has been adjusted by \$44,599,000 to reflect 55 days of maximum burn priced at the
7 January 1, 2007 cost at all of the steam generation plants except the Meramec Plant. Due to
8 storage constraints, the Meramec Plant cannot handle a coal inventory level of 55 days of
9 maximum burn. With the interruptions encountered in receiving deliveries of low sulfur coal
10 from the Powder River Basin in Wyoming, the Company has made the decision to increase
11 its level of coal inventory. See the direct testimony of Company witness Robert K. Neff for
12 additional testimony on the coal inventory.

13 Pro forma adjustments 2 and 3 shown on Schedule GSW-E22 remove the
14 average propane inventory (\$144,000) and the portion of the average general materials and
15 supplies inventory (\$1,861,000) applicable to the Company's Missouri gas operations.

16 **Q. What are the pro forma materials and supplies applicable to electric**
17 **operations?**

18 A. The pro forma materials and supplies applicable to total electric operations, as
19 shown on Schedule GSW-E22, is \$256,607,000 with the amount applicable to the Missouri
20 jurisdiction being \$252,895,000.

21 **Q. Please explain the average prepayments shown on Schedule GSW-E23.**

22 A. Certain rents, insurance, assessments of state regulatory commissions, freight
23 charges for coal, service agreements, medical and dental voluntary employee beneficiary

1 association (veba) and coal car leases are paid in advance. The thirteen-month average
2 balances of total electric prepayments at June 30, 2006, after eliminating the portion
3 applicable to gas operations, are \$5,393,000. The prepayments allocated to the Missouri
4 jurisdiction are \$5,324,000 as shown on Schedule GSW-E23.

5 **Q. Please explain Schedule GSW-E24.**

6 A. Schedule GSW-E24 shows the calculation of the Missouri jurisdictional cash
7 working capital requirement based on a lead/lag study for the pro forma twelve months ended
8 June 30, 2006 of (\$4,181,000). The development of the various revenue and expense leads
9 and lags is explained in the direct testimony of Company witness Michael J. Adams from
10 Navigant Consulting, Inc.

11 **Q. What appears on Schedule GSW-E25?**

12 A. The Missouri jurisdictional interest expense cash requirement, the federal
13 income tax cash requirement and the state income tax cash requirement are shown on
14 Schedule GSW-E25. The payment lead times for these items are developed in the testimony
15 of Mr. Adams. However, the payment lead time for the interest expense was calculated by
16 Mr. Adams based on the Company's methodology.

17 **Q. How was the expense lead time on the interest expense calculated?**

18 A. The lead time on the interest expense was calculated as the mid-point of six
19 months (i.e., $365/2/2$ or 91.25 days) plus a half day to account for the mid-point of the day on
20 which the interest payment was made.

1 **Q. Did the Company direct Mr. Adams to employ this approach when**
2 **calculating the interest expense lead time?**

3 A. Yes, I directed Mr. Adams to follow this approach. This approach is
4 consistent with that used by the Staff of the Missouri Public Service Commission in previous
5 cases. For purposes of this proceeding, the Company believes that the approach described
6 above most accurately reflects the timing of cash flows related to the payment of the
7 Company's interest expense.

8 **Q. What is the cash requirement for the interest expense, the federal income**
9 **taxes and the state income taxes?**

10 A. The expense leads for the interest expense, the federal income taxes and the
11 state income taxes are greater than the revenue lags. This results in a negative cash
12 requirement for the Missouri jurisdiction of (\$20,744,000) for the interest expense,
13 (\$11,236,000) for federal income taxes and (\$1,766,000) for state income taxes.

14 **Q. What items are shown on Schedule GSW-E26?**

15 A. The thirteen-month average balances at June 30, 2006 for the Missouri
16 jurisdictional customer advances for construction and customer deposits are shown on
17 Schedule GSW-E26. These items represent cash provided by customers that can be used by
18 the Company until they are refunded. Therefore, the average balances of the customer
19 advances for construction and customer deposits are reductions to the Company's rate base.

20 Customer advances for construction are cash advances made by customers
21 that are subject to refund to the customer in whole or in part. These advances provide the
22 Company cash that offsets the cost of the construction until they are refunded. The Missouri

1 jurisdictional thirteen-month average balance of electric customer advances for construction
2 at June 30, 2006 is (\$2,403,000).

3 Customer deposits are cash deposits made by customers which are subject to
4 refund to the customer if the customer develops a good payment record. The Company pays
5 interest on the deposits, which is shown as a customer account expense on Schedule GSW-
6 E29. The Missouri jurisdictional thirteen-month average balance of electric customer
7 deposits at June 30, 2006 is (\$12,549,000).

8 **Q. Please explain Schedule GSW-E27.**

9 A. Schedule GSW-E27 lists the accumulated deferred income taxes applicable to
10 total electric operations and Missouri jurisdictional electric operations at June 30, 2006.
11 Accumulated deferred income taxes are the net result of normalizing the tax benefits resulting
12 from timing differences between the periods in which transactions affect taxable income and
13 the periods in which such transactions affect the determination of pre-tax income.

14 Currently the Company has deferred income taxes in FERC Accounts 190,
15 282 and 283. As shown on Schedule GSW-E27 the total electric accumulated deferred
16 income tax balance at June 30, 2006 is a net balance of (\$1,132,653,000) and the Missouri
17 jurisdictional amount is (\$1,117,530,000). The net deferred income taxes are a deduction
18 from the rate base.

19 **Q. What is the Company's Missouri jurisdictional pro forma net original**
20 **cost electric rate base at June 30, 2006?**

21 A. The Missouri jurisdictional electric rate base as shown on Schedule GSW-E36
22 is \$5,854,574,000 consisting of:

1		<u>In Thousands of \$</u>
2	Original Cost of Property & Plant	\$11,262,123
3	Less Reserve for Depreciation & Amortization	<u>4,495,359</u>
4	Net Original Cost of Property & Plant	6,766,764
5	Average Materials & Supplies	252,895
6	Average Prepayments	5,324
7	Cash Requirement (Lead/Lag)	(4,181)
8	Interest Expense Cash Requirement	(20,744)
9	Federal Income Tax Cash Requirement	(11,236)
10	State Income Tax Cash Requirement	(1,766)
11	Average Customer Advances for Construction	(2,403)
12	Average Customer Deposits	(12,549)
13	Accumulated Deferred Taxes on Income:	<u>(1,117,530)</u>
14	Total Missouri Jurisdictional Electric Rate Base	<u>\$ 5,854,574</u>

15 **Q. Please explain Schedule GSW-E28.**

16 A. Schedule GSW-E28 shows total electric and Missouri jurisdictional operating
17 revenues per book and pro forma for the twelve months ended June 30, 2006.

18 **Q. Are the revenues from off-system sales included on Schedule GSW-E28?**

19 A. Yes, Adjustment 7 on Schedule GSW-E28 reduces the actual off-system sales
20 revenues by \$180,976,000 to reflect a normal level of off-system sales and revenues
21 calculated using a normal market price. The direct testimony of Company witness Shawn E.
22 Schukar develops the normal market prices. The production cost model (PROSYM)

1 explained in the direct testimony of Company witness Timothy D. Finnell develops the
2 normal off-system sales volumes and revenues.

3 **Q. Please explain the pro forma adjustments to the Missouri jurisdictional**
4 **operating revenues shown on Schedule GSW-E28.**

5 A. The following pro forma adjustments are shown on Schedule GSW-E28:
6 Adjustment 1 eliminates the gross receipts taxes of \$98,163,000 from revenues as they are
7 add-on taxes that are passed through by the Company. Adjustment 2 eliminates the unbilled
8 revenues of \$24,099,000 to reflect the book revenues on a bill cycle basis. Since the unbilled
9 revenues were negative, this results in an increase to the revenues. The revenues were
10 reduced in Adjustment 3 by \$52,610,000 to reflect normal weather. The sales and revenues
11 for the twelve months ended June 30, 2006 were higher than normal. See the direct
12 testimony of Company witness Richard A. Voytas for the weather normalization
13 methodology (with the results updated in Mr. Voytas' supplemental direct testimony) utilized
14 by the Company. Adjustment 4 reduces the revenues by \$756,000 to reflect the actual twelve
15 months of revenues from Noranda Aluminum, Inc. Adjustment 5 reduces revenues by
16 \$4,548,000 to synchronize the book revenues with the revenues developed by Company
17 witness James R. Pozzo in his billing unit rate analysis and discussed in Mr. Pozzo's direct
18 testimony, supplemented by Mr. Pozzo's supplemental direct testimony using actual data for
19 April to June, 2006. The transmission revenues included in "other revenues" on Schedule
20 GSW-E28 were reduced by \$5,866,000 in Adjustment 6 to reflect the elimination of certain
21 transmission revenue items during the test year. See the direct testimony of Company witness
22 Maurcen Borkowski for an explanation of the decreases in transmission revenues.

1 **Q. What are the system revenues included on Schedule GSW-E28?**

2 A. System revenues include rents received from the rental of Company buildings
3 and agricultural land, off-system facilities charges plus the revenues from the Meramec Coal
4 Terminal. Since these revenues are generated by Company assets which are accounted for
5 “above the line” and paid for by all customers, these revenues are removed from the
6 jurisdiction where received and then the total is allocated to jurisdictions based on a fixed
7 allocation factor. The system revenues along with the off-system sales revenues are shown
8 on Schedules GSW-E36 and GSW-E37 as reductions to the revenue requirement and not as
9 revenues since these revenues are not generated from the provision of electric service to
10 jurisdictional customers.

11 **Q. What are the Missouri jurisdiction pro forma electric operating revenues**
12 **for the twelve months ended June 30, 2006?**

13 A. The Missouri jurisdiction pro forma electric operating revenues for the twelve
14 months ended June 30, 2006 are \$2,016,490,000 excluding the allocation of the system
15 revenues and the off-system sales revenues of \$24,331,000 and \$311,517,000 respectively.
16 The system revenues and the off-system revenues are treated as reductions to the total
17 revenue requirement.

18 **Q. Please describe what is shown on Schedule GSW-E29.**

19 A. The total electric operating and maintenance expenses for the twelve months
20 ended June 30, 2006, are shown per books by functional classification; a listing of the pro
21 forma adjustments is provided; and finally, the allocation of the total electric pro forma
22 operating and maintenance expenses to the Missouri jurisdiction is shown on Schedule
23 GSW-E29.

1 **Q. Will you please explain the pro forma adjustments to electric operating**
2 **expenses for the year ending June 30, 2006?**

3 A. A summary of the pro forma adjustments to operating expenses appear on
4 Schedule GSW-E29.

5 Adjustment 1 reflects the increased labor expense from annualizing the
6 average 3.75% wage increase for management employees effective April 1, 2006 and the
7 3.25% wage increase for the Company's union employees effective July 1, 2006 per the labor
8 contracts. The annualized increase in the total electric operating labor resulting from the
9 above increases is \$8,140,000. Incentive compensation was subtracted out of the calculation
10 of the wage increase as the wage increases only apply to base wages.

11 Adjustment 2 reduces the test year level of incentive compensation by
12 \$3,200,000 to reflect the amount of incentive compensation annualized at the target level for
13 calendar year 2006. The actual incentive compensation for calendar year 2005 exceeded the
14 target due to unusual circumstances.

15 Adjustment 3 is an increase in fuel expense of \$91,760,000 and a decrease in
16 purchased power expense of \$242,094,000 to reflect the normalized billed kWh sales and
17 output for the pro forma twelve months ended June 30, 2006 using the January 1, 2007 coal
18 and transportation cost as discussed in Mr. Neff's direct testimony. The net result of the two
19 items is a reduction in expenses of \$150,333,000. The increase in fuel cost and the decrease
20 in the purchased power expense were calculated by Mr. Finnell using the PROSYM
21 production cost model. His direct testimony details the inputs and assumptions used in the
22 PROSYM Model. The purchased power expenses also include the MISO power market
23 charges. Due to initial start-up problems, the test year MISO power market charges have

1 been reduced to reflect our current experience and to annualize these expenses for the
2 calendar year 2006. Since the MISO power market operations and charges are continuing to
3 be refined, the Company recommends an update of these costs to the actual amount incurred
4 for the twelve months ending December 31, 2006.

5 Adjustment 4 is a reduction to the production expense to remove one-third of
6 the Fall 2006 Callaway Nuclear Plant refueling expenses other than replacement power. This
7 adjustment is required because the test year included the full cost of a Callaway refueling
8 outage which only occurs every eighteen months. Therefore, in order to reflect only twelve
9 months of operating and maintenance expenses, it is necessary to only include two-thirds of
10 the Callaway Plant refueling expense. The production expenses are reduced by \$7,167,000
11 for outside contractors' maintenance expenses and \$3,633,000 for incremental overtime
12 expense. This is a total reduction of \$10,800,000. The impact on replacement power and
13 purchased power is part of the fuel and purchased power adjustment in Adjustment 3. The
14 inputs for the PROSYM Model included two-thirds of a Callaway outage.

15 Adjustments 5 and 6 increase production expenses other than fuel to reflect
16 the increase in operating expenses due to the purchase of the Audrain combustion turbine
17 generator ("CTG") and the Raccoon and Goose Creek CTGs. These CTGs were not
18 purchased until the end of March 2006 and their operating expenses must be annualized.
19 These adjustments to other operating expenses of \$1,120,000 and \$2,190,000 are required to
20 reflect a full twelve-month level of operating expenses. The impact on fuel expense is
21 reflected in Adjustment 2 as the inputs for the PROSYM Model included these new CTGs.

1 Adjustment 7 increases operating expenses at the Osage Plant (Bagnall Dam)
2 by \$660,000 annually to reflect payments required under a settlement agreement concerning
3 the license renewal of the Osage hydroelectric project.

4 Adjustment 8 is also an increase in the operating expense at the Osage Plant.
5 In April 2006, the Osage Plant recorded an additional \$6,500,000 fees from the Federal
6 Energy Regulatory Commission ("FERC") for Headwater Benefits received by the Osage
7 Plant due to the construction and operation of the Truman Lake since 1981. On
8 September 26, 2006 a settlement was reached with the FERC that reduced the \$6,500,000 to
9 \$4,332,000. As these fees are for items that benefited the ratepayers in prior periods, the
10 Company is reflecting a five-year amortization of the \$4,332,000 in additional fees. Also,
11 the annual Headwater Benefit fees will be increasing in the future. Therefore, the annual
12 amount in the test year is being increased from \$275,000 to \$410,000. The adjustment
13 reflected in Adjustment 7 as a result of both of these items is a reduction in the Osage Plant
14 operating expenses of \$5,499,000.

15 Adjustment 9 reduces operating expenses to remove the expenses related to
16 the Taum Sauk reservoir failure and clean-up activities that were recorded in the test year
17 operating expenses. This adjustment reduces operating expenses by \$1,986,000.

18 Adjustment 10 increases transmission expenses by \$437,000 to reflect the
19 increase in fees related to MISO's transmission operations effective in 2006. See the direct
20 testimony of Ms. Borkowski for an explanation of these increased transmission fees.

21 Adjustment 11 is a reduction of \$1,032,000 in the fees related to the MISO's
22 power market operations that are recorded as transmission expenses. The initial start-up costs
23 were higher than the costs that are expected in the future. The Company recommends

1 updating these MISO power market fees to the actual amounts for the twelve months ending
2 December 31, 2006 consistent with the treatment of MISO power market fees in
3 Adjustment 3.

4 Adjustment 12 reflects an increase of \$1,588,000 in distribution expenses to
5 reflect the annualized year 2006 level of tree trimming. See the testimony of Mr. Mark for
6 additional details of the Company's tree trimming program.

7 Adjustment 13 is an increase in customer accounting expenses to reflect
8 interest expense at 8% on the average customer deposit balance applicable to only electric
9 service and 9.50% on the average customer deposit balance for joint electric and gas service.
10 The average customer deposit balance at June 30, 2006 is deducted from the rate base. The
11 interest expense added to the customer accounting expenses is \$1,011,000.

12 Administrative and general expenses are decreased by \$903,000 in
13 Adjustment 14 to annualize the year 2006 pension expense.

14 Adjustment 15 increases administrative and general expenses by \$2,985,000
15 to reflect the increases in the other post retirement benefits ("OPEBs"), major medical and
16 other employee benefit expenses to annualize the calendar year 2006 employee benefits
17 expenses. Increasing the employee benefit costs to the 2006 annual level matches the pro
18 forma labor adjustment in Adjustment 1.

19 Adjustment 16 is an adjustment to customer service expenses to reflect the
20 restatement of pay station expenses to an annual amount. This is an increase of \$861,000.

21 Administrative and general expenses are increased to reflect the three-year
22 amortization of the expenses that have been and will be incurred to prepare and litigate this
23 rate increase filing (rate case expense) in Adjustment 17. The Company's estimated

1 additional expenses applicable to the electric rate case are \$4,576,000 and the three-year
2 amortization is \$1,526,000 per year.

3 Adjustment 18 is a new adjustment to the distribution expenses of \$15,000,000
4 to reflect the addition of new tree trimming programs. See the supplemental direct testimony
5 of Company witness Ronald C. Zdellar for a description of the new programs.

6 **Q. What is the impact on total electric operating and maintenance expenses**
7 **from the above pro forma adjustments?**

8 A. As shown on Schedule GSW-E29, the total electric operating and
9 maintenance expenses are decreased from \$1,625,551,000 to \$1,487,315,000 or a total net
10 decrease of \$138,236,000 by the above pro forma adjustments.

11 **Q. What amount of the total electric pro forma operating and maintenance**
12 **expenses is applicable to the Missouri jurisdiction?**

13 A. As shown on Schedule GSW-E29-4, \$1,468,518,000 of the total pro forma
14 electric operating and maintenance expenses is applicable to the Missouri jurisdiction.

15 **Q. What is shown on Schedule GSW-E30?**

16 A. Schedule GSW-E30 shows the depreciation and amortization expenses by
17 functional classification for the test year ended June 30, 2006, per book and pro forma, and
18 the allocation of the total electric pro forma depreciation and amortization expenses to the
19 Missouri jurisdiction.

20 **Q. What pro forma adjustments apply to the depreciation and amortization**
21 **expenses?**

22 A. Schedule GSW-E30 details the following pro forma adjustments to the
23 depreciation and amortization expenses.

1 Adjustment 1 eliminates the portion of the depreciation and amortization
2 expenses for multi-use general facilities applicable to gas operations of \$132,000. The
3 related plant is removed from the electric general plant on Schedule GSW-E20.

4 Depreciation expense is increased by \$18,468,000 in Adjustment 2 to reflect a
5 full year's depreciation expense at the proposed depreciation rates on the additions to plant in
6 service from July through December 2006.

7 Adjustment 3 increases depreciation expense to reflect the Company's
8 proposed new depreciation rates applied to the June 30, 2006 depreciable plant balances.
9 The direct testimony of Company witnesses William M. Stout and John F. Wiedmayer of
10 Gannett Fleming, Inc. provide the details of the Company's depreciation study and the
11 resulting new depreciation rates the Company is proposing. The Company's proposed new
12 depreciation rates increase the depreciation expense by \$41,311,000.

13 Amortization expense is increased by \$174,000 in Adjustment 4 to reflect the
14 ten-year amortization of the Venice Plant removal costs. The Venice Plant was retired and
15 the Company has incurred removal costs to take the plant out of service. The depreciation
16 rates applied to the Venice Plant over its life did not reflect these final removal costs.
17 Therefore, it is appropriate to amortize these costs in rates.

18 Adjustment 5 increases the depreciation expense to add back the \$20,000,000
19 annual reduction in book distribution plant depreciation contained in the Stipulation and
20 Agreement in Case No. EC-2002-1.

1 **Q. What are the total electric pro forma depreciation and amortization**
2 **expenses and what is the amount applicable to the Missouri jurisdiction?**

3 A. As reported on Schedule GSW-E30 the total electric pro forma depreciation
4 and amortization expenses are \$391,830,000 with \$387,630,000 allocated to the Missouri
5 jurisdiction.

6 **Q. Please explain Schedule GSW-E31.**

7 A. Schedule GSW-E31 shows the taxes other than income taxes for the twelve
8 months ended June 30, 2006, per book and pro forma, and the allocation of the total electric
9 pro forma taxes other than income to the Missouri jurisdiction.

10 **Q. Please list the pro forma adjustments required to arrive at the total**
11 **electric pro forma taxes other than income taxes as detailed on Schedule GSW-E31.**

12 A. The following pro forma adjustments detailed on Schedule GSW-E31 are
13 required to arrive at the total electric pro forma taxes other than income taxes.

14 Adjustment 1 increases F.I.C.A. taxes by \$589,000 to reflect the pro forma
15 wage increases.

16 Adjustment 2 increases real estate taxes by \$774,000 to reflect the additional
17 real estate taxes applicable to the three sets of CTGs purchased by the Company in March
18 2006.

19 Adjustment 3 eliminates property taxes of \$104,000 applicable to plant held
20 for future use, as this investment is not included in rate base.

21 Adjustment 4 eliminates the portions of the taxes other than income taxes of
22 \$73,000 applicable to the multi-use general facilities used for gas operations. The related
23 plant investment is eliminated on Schedule GSW-E20.

1 The real estate taxes applicable to non-utility plant of \$38,000 are eliminated
2 in Adjustment 5, as this investment is not used to provide service to the ratepayers.

3 Adjustment 6 adjusts taxes other than income taxes to remove the Missouri
4 gross receipts taxes of \$98,315,000, as they are an add-on taxes that are passed through to
5 customers. The pro forma book revenues also reflect the removal of the gross receipts taxes.

6 Adjustment 7 eliminates \$397,000 of prior year tax refunds.

7 **Q. How much is the total pro forma taxes other than income taxes for the**
8 **twelve months ended June 30, 2006 and what is the amount applicable to the Missouri**
9 **jurisdiction?**

10 A. As reflected on Schedule GSW-E31, the pro forma total electric taxes other
11 than income taxes and the Missouri jurisdictional amount are \$120,973,000 and
12 \$119,604,000 respectively.

13 **Q. What is shown on Schedule GSW-E32?**

14 A. Schedule GSW-E32 shows the derivation of the income tax calculation at an
15 8.876% rate of return for total electric operations and Missouri jurisdictional operations
16 reflecting the statutory tax rates.

17 **Q. As shown on Schedule GSW-E32, what are the income taxes at the**
18 **requested rate of return for total electric and Missouri jurisdictional operations ?**

19 A. The total federal and state income taxes using the statutory tax rates at the
20 requested rate of return as shown on Schedule GSW-E32 are \$231,893,000 for total electric
21 operations and \$229,583,000 for Missouri jurisdictional operations.

1 **Q. What is calculated on Schedule GSW-E33?**

2 A. Schedule GSW-E33 shows the calculation of the fixed or demand allocation
3 factor. The fixed factor is used to allocate the Company's investment in production facilities
4 and other related rate base items along with certain related operating expenses. The fixed
5 factor is based on the average of the Missouri jurisdictional twelve monthly coincident peaks
6 in relation to the total AmerenUE system's average twelve monthly peaks (the 12CP method).

7 **Q. Using the 12CP method, what is the Missouri jurisdictional fixed**
8 **allocation factor for the twelve months ended June 30, 2006?**

9 A. The Missouri jurisdictional fixed allocation factor based on the 12CP method
10 for the twelve months ended June 30, 2006 is 98.33%.

11 **Q. Please explain Schedule GSW-E34.**

12 A. Schedule GSW-E34 calculates the variable allocation factor for the twelve
13 months ended June 30, 2006. The variable factor is based on pro forma kWh sales adjusted
14 for losses to equal pro forma kWh output for the test year. For the twelve months ended
15 June 30, 2006, the per books kWh sales and kWh output are adjusted to reflect billed sales
16 normalized for weather. The Missouri pro forma kWh output in proportion to the total
17 AmerenUE pro forma kWh output is the calculation of the variable factor. The variable
18 factor is used to allocate the fuel inventories and the production materials and supplies along
19 with related taxes. Also the majority of the production expenses including fuel are allocated
20 using the variable factor.

1 **Q. What is the Missouri jurisdictional variable allocation factor for the pro**
2 **forma twelve months ended June 30, 2006?**

3 A. The Missouri jurisdictional variable allocation factor for the pro forma twelve
4 months ended June 30, 2006 is 98.46%.

5 **Q. What is shown on Schedule GSW-E35?**

6 A. Schedule GSW-E35 shows the calculation of the labor allocation factor for the
7 twelve months ended June 30, 2006. The Missouri jurisdictional pro forma labor excluding
8 the administrative and general labor in proportion to the total electric pro forma labor
9 excluding the administrative and general labor is the labor allocation factor. The labor
10 allocation factor is used to allocate general plant (system general), the related general plant
11 depreciation expense and taxes other than income taxes, and administrative and general
12 expenses. However, the administrative and general expenses in FERC Account 930 001
13 (general advertising expense) and the EPRI assessment are directly assigned.

14 **Q. For the twelve months ended June 30, 2006 what is the labor allocation**
15 **factor for the Missouri jurisdiction?**

16 A. The Missouri jurisdictional allocation factor for the twelve months ended
17 June 30, 2006 is 98.83%.

18 **Q. Please explain Schedule GSW-E36.**

19 A. Schedule GSW-E36 shows Missouri jurisdictional rate base for the test year
20 of \$5,854,574,000 and the Missouri jurisdictional revenue requirement of \$2,389,139,000 at
21 the requested return of 8.876%. This revenue requirement calculation reflects reductions to
22 account for system revenues and off-system sales revenues. After reflecting the applicable
23 increase in uncollectible accounts, the final Missouri jurisdictional revenue requirement is

1 \$2,391,238,000. See the supplemental direct testimony of Company witness Lee R. Nickloy
2 for the development of the 8.876% rate of return.

3 **Q. What does Schedule GSW-E37 reflect?**

4 A. Schedule GSW-E37 compares the Missouri jurisdictional revenue requirement
5 of \$2,391,238,000 with the Missouri jurisdictional pro forma operating revenues under the
6 present rates of \$2,016,490,000, excluding system revenues and off-system sales revenues. It
7 shows that the revenue requirement for the test year is \$374,749,000 more than the pro forma
8 operating revenues at present rates. This is the amount of additional revenues AmerenUE
9 needs to collect each year to recover its cost of service.

10 **Q. Is AmerenUE proposing rates to reflect the \$374,749,000 increase in**
11 **revenues justified by the revenue requirement supported by the Company's updated**
12 **cost of service for the test year?**

13 A. No. While the actual data for the test year adopted by the Commission would
14 support rates including the entire \$374,749,000 revenue increase, the Company's tariffs filed
15 on July 7, 2006 reflect rates that would produce a lower \$360,709,000 revenue increase.
16 This means that if the Commission were to find that adjustments to AmerenUE's requested
17 revenue requirement are warranted, the adjustments should be made to the higher revenue
18 increase of \$374,749,000 supported by the Company's supplemental direct testimony.

1 **IV. IMPACT ON REVENUE REQUIREMENT REFLECTING 4 CSR 240-10.020**

2 **Q. Are you familiar with 4 CSR 240-10.020?**

3 A. Yes. That is a Commission rule that prescribes the method that the
4 Commission must follow in accounting for income derived by gas, electric, water, telegraph,
5 telephone and heating utilities from their investment of depreciation funds.

6 **Q. Generally what does this rule require?**

7 A. This rule generally requires that in the process of setting a utility's rates, the
8 Commission must provide the utility's customers with a 3% annual credit to reflect income
9 from investment of the money in the utility's depreciation reserve account. The rule applies
10 regardless of whether the utility's depreciation reserve account is represented by a fund ear-
11 marked for that purpose.

12 **Q. Has the Commission followed this rule in recent years in setting rates for**
13 **utilities?**

14 A. No. In recent years, instead of following this rule, the Commission has
15 subtracted accumulated depreciation from utilities' investment in rate base in calculating the
16 return that is provided to the utilities' shareholders. In other words, the utility's rate of return
17 is multiplied by net rate base (i.e. original cost less accumulated depreciation) to calculate the
18 return component of the utility's revenue requirement.

19 **Q. Have you calculated the impact on the Company's rates if the**
20 **Commission were to follow 4 CSR 240-10.020?**

21 A. Yes. Schedule GSW-E38 shows what the impact on the Company's revenue
22 requirement would be if the Commission complied with the provisions of 4 CSR 240-10.020.
23 This schedule shows that using the Company's proposed rate of return of 8.876% the impact

1 of following this rule on the Company's revenue requirement is an increase of \$264,147,000.

2 A rate increase of \$638,896,000 is recommended under 4 CSR 240-10.020.

3 **Q. Is the Company proposing to implement rates that reflect compliance**
4 **with this rule?**

5 A. No. Although the Company is not proposing rates to recover the full amount
6 of the revenue requirement that it is legally entitled to as a result of the application of 4 CSR-
7 10.020 in this case, application of the rule provides additional support for the \$360,709,000
8 in additional revenue requirement that the Company is requesting. In other words, if the
9 Commission were to find that adjustments to AmerenUE's revenue requirement are
10 warranted, the Company would still be entitled to the full amount of the revenue requirement
11 it is seeking due to the application of this rule.

12 **V. CONCLUSIONS**

13 **Q. Please summarize your testimony and conclusions.**

14 A. My supplemental testimony and attached schedules show that updating the
15 Company's Missouri jurisdictional rate base and revenue requirement to actual versus
16 forecast for April, May and June 2006 results in a required increase in present revenues of
17 \$374,749,000 compared to the \$360,709,000 required increase contained in my direct
18 testimony filed in Case No. ER-2007-0002. The Company continues to seek a rate increase
19 of \$360,709,000 outlined in my direct testimony, as reflected in the Company's tariffs filed
20 on July 7, 2006. The higher revenue increase reflected in this testimony provides further
21 support for the requested increase.

22 **Q. Does this conclude your supplemental direct testimony?**

23 A. Yes, it does.

AmerenUE

ELECTRIC OPERATING AND MAINTENANCE EXPENSE
PRO FORMA ADJUSTMENTS
TWELVE MONTHS ENDED JUNE 30, 2006 UPDATED THROUGH JANUARY 1, 2007
(\$000)

LINE	PRO FORMA ITEM NO.	DESCRIPTION	TOTAL AMOUNT
	(A)	(B)	(C)
1	(1)	Increase labor to annualize the average 3.75% wage increase for management	\$ 8,140
2		employees effective April 1, 2006 and the 3.25% wage increase for the union employees	
3		effective July 1, 2006.	
4	(2)	Reduce labor expenses to reflect Incentive Compensation for the year 2006 at target	\$ (3,200)
5		level.	
6	(3)	Increase the fuel expense for 1/01/07 coal and transportation prices and adjust purchase	\$ (150,333)
7		power costs to reflect normalized sales and output for the test year.	
8	(4)	Reduce the production expenses for one-third of the Fall 2005 Callaway refueling cost	\$ (10,800)
9		other than replacement power. Since the Callaway refueling occurs every eighteen	
10		months, it is appropriate to only reflect two-thirds of the Callaway refueling in a twelve	
11		month test year.	
12	(5)	Increase Operating expenses as a result of the purchase of the Audrain CTG.	\$ 1,120
13	(6)	Increase Operating expenses as a result of the purchase of the Raccoon Creek and	\$ 2,190
14		Goose Creek CTGs.	
15	(7)	Additional annual expenses as a result of the Settlement Agreement Concerning the	\$ 660
16		Relicensing of the Osage Hydroelectric Project.	
17	(8)	Amortize additional expense related to FERC Headwater Assessment and to reflect	\$ (5,499)
18		increased annual cost for Osage Hydroelectric Project.	
19	(9)	Reduce expenses associated with the Taum Sauk Reservoir failure and clean-up.	\$ (1,986)
20	(10)	Additional Transmission expenses associated with MISO's operation of the transmission	\$ 437
21		system.	
22	(11)	Additional Transmission expenses associated with MISO's operation of the Power	\$ (1,032)
23		Market.	
24	(12)	Additional tree trimming expenses.	\$ 1,588
25	(13)	The interest on customer deposits are included in the customer accounting expenses to	\$ 1,011
26		reflect the interest at 8.0% on electric only deposits and 9.5% on combined electric and	
27		gas deposits on the June 30, 2006 balance. The June 30, 2006 customer deposit	
28		balance is included as a reduction to rate base.	
29	(14)	Decrease Pension Expense to reflect the Year 2006 expense.	\$ (903)
30	(15)	Increase Employee Benefits Expense to annualize the Year 2006 expenses.	\$ 2,985
31	(16)	Increase processing costs for third party pay stations.	\$ 861
32	(17)	Reflect the three year amortization of the Company's estimated expenses involved with	\$ 1,526
33		filing this rate case.	
34	(18)	Reflect increased tree trimming expense in association with the new tree trimming	\$ 15,000
35		program.	
36	Total Pro Forma Adjustments to Electric Operating and Maintenance Expenses		<u>\$ (138,236)</u>
