**Subject:** Missouri Public Service Commission Case EW-2012-0065  
**Attachments:** EW-2012-0065 Order.pdf

On August 30, 2011, the Missouri Public Service Commission issued an order opening an investigation into the cost of compliance with federal environmental regulations (copy attached). In this order, the Staff was directed to lead a working group to perform this investigation and draft a report. The report will be filed no later than May 1, 2012.

The first meeting for this working group has been scheduled for Wednesday, October 26 at the Governor Office Building, Jefferson City, Missouri. It is anticipated that each of the investor-owned utilities will present information at this meeting. Other participants will be provided an opportunity to make presentations. Additional details regarding this meeting will be provided at a later date.

Please review the addressees on this e-mail and inform me of any other people that should be included in future notifications. If you would like to schedule a non-utility presentation for this initial meeting, please inform me by September 27, 2012. If you have any questions, please contact me.
