The following features are provided where facilities are available:

Anonymous Call Rejection (ACR):

Rejects incoming call that have been marked anonymous or blocked.

Call Forwarding: Automatically routes all incoming local or long distance calls to any number customer specifies (maximum 24 digits). The customer will hear a short ring on the forwarded line each time a call is forwarded as a reminder that this feature is activated. Call Forwarding may ring once before the call is forwarded but the call cannot be answered. The user has control of the activation and deactivation process, but only from the base station where the feature is provisioned. Applied on a per line basis. Cannot be selected with Remote Access Call Forwarding

Call Forwarding Busy: Automatically forwards calls to a pre-selected telephone number on a different premise when the called telephone number is busy. Applied on a per line basis. Cannot be selected with Voicemail.

Call Forwarding Busy with Customer Control: Includes the Call Forwarding Busy feature and in addition provides the capability to Activate or Deactivate Call Forwarding Busy from the base station using dial codes. Applied on a per line basis. Cannot be selected with Call Forwarding Busy, Multi-ring 2, Multi-Ring 3, or Voicemail.

Call Forwarding No Answer: Automatically forwards unanswered incoming calls to an alternate TN after a pre-selected number of rings (customer may select between 2 and 7 rings). Cannot be selected with Voicemail. The customer must specify the number to which calls are forwarded and the approximate number of ringing cycles at the time the feature is ordered. Applied on a per line basis.

Call Forwarding No Answer with Customer Control: Includes the Call Forwarding No Answer feature and provides the capability to activate or deactivate Call Forwarding No Answer from the base station using dial codes. Applied on a per line basis. Cannot be selected with Call Forwarding No Answer, Call Forwarding No Answer w/ Ring Control, Multi-ring 2, Multi-ring 3, or Voicemail. The customer must specify the number to which calls are forwarded and the approximate number of ringing cycles at the time the feature is ordered.

Call Forwarding No Answer with Ring Control:
Allows subscribers real-time control over the number of seconds, or ring cycles that occur prior to forwarding an unanswered call to voice mail or another telephone number. Applied on a per line basis. Cannot be selected with Call Forwarding No Answer, Call Forwarding No Answer w/ Customer Control, or Voicemail. The customer must specify the number to which calls are forwarded.

3.9.8 Features and Options

The following features are provided where facilities are available:

Anonymous Call Rejection (ACR):

Rejects incoming call that have been marked anonymous or blocked.

Call Waiting: When on a call, Call Waiting alerts the customer with a special tone that another call is waiting. It allows the waiting call to be answered without disconnecting from the existing call. Allows switching between the calls whenever desired. Allows either call to be ended at any time. The customer has the ability to disable and reactivate the feature at will.

Caller ID-Number Only: This feature enables the customer to view on a display unit the Directory Number of incoming telephone calls. When Caller ID - Number Only is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle with the exception of numbers where the caller is marked "private". The number information is only transmitted when the customer's receiver is on-hook. Calling party number information via Caller ID - Basic is not available on operator handled calls. Utilization of the full capabilities of Caller ID- Number Only requires the use of an Analog Display Services Interface (ADSI) - compatible telephone at the customer's premises. The installation, repair and the technical capability of the ADSI-compatible CPE to function in conjunction with the features specified herein is the responsibility of the customer.

Caller ID - Name and Number: This feature enables the customer to view on a display unit the Directory Name and Directory Number on incoming telephone calls. A maximum of 15 characters is allowed for transmission of the calling party name. When Caller ID - Name and Number is activated on a customer's line, the Directory Name and Directory Number on incoming calls will be displayed on the called CPE during the first long silent interval of the ringing cycle. The date and time of the call is also transmitted to the Caller ID - Name and Number customer. Utilization of the full capabilities of Caller ID- Name and Number requires the use of an Analog Display Services Interface (ADSI) - compatible telephone at the customer's premises. The installation, repair and the technical capability of the ADSI-compatible CPE to function in conjunction with the features specified herein is the responsibility of the customer.

Call Waiting ID - Name and Number: When the customer is on the phone and receives another call, Call Waiting Id displays the name and number of the incoming caller.

Speed Dial- 8: This provides for the calling of pre-selected telephone numbers by dialing an abbreviated code for up to 8 phone numbers. When the designated code is entered, the telephone number assigned to the code will be dialed.

Three Way Calling: Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.

3.9.9 Pay Per Use Features

Repeat Dialing (66): Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard. The customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. In some locations, due to technological limitations Repeat Dialing must be purchased with Call Return.

Call Return (69): This feature enables the customer to dial back the number of the last incoming call whether the call was answered or not. If the line is busy call return will keep trying to complete the call for 30 minutes.

Call Trace (57) This feature provides a detailed record of the last incoming call, including call-waiting calls. It automatically records the phone number, time, and date of the call. MCI security processes this information and provides it to the appropriate law enforcement agency should customer decide to file a complaint.

Three-Way Calling (71) Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.

If the called line is busy, a confirmation announcement is heard. The customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. In some locations, due to technological limitations Repeat Dialing must be purchased with Call Return.

Call Return (69): This feature enables the customer to dial back the number of the last incoming call whether the call was answered or not. If the line is busy call return will keep trying to complete the call for 30 minutes.

Call Trace (57) This feature provides a detailed record of the last incoming call, including call-waiting calls. It automatically records the phone number, time, and date of the call. MCI security processes this information and provides it to the appropriate law enforcement agency should customer decide to file a complaint.

Three-Way Calling (71) Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.

<u>Feature</u>	<u>Per-Use Charge</u>
Repeat Dialing (66)	\$0.75
Call Return (69)	\$0.75
Call Trace	\$6.48 (N)
Three Way calling	\$0.87 (N)

A spending cap of \$6.00 will apply to this feature; once the customer uses at least \$6.00 worth of this feature in any given month, the customer may continue to use this feature but will not be charged more than \$6.00 for that month of usage.

For new customers enrolling in Local Residential on or after August 24, 2002, this spending cap shall not apply.
