Re: North Fork Ridge Wind Farm – Requirements of the Non-Unanimous Stipulation and Agreement

Dear Mr. Rooney,

Burns & McDonnell Engineering Company, Inc. (“Burns & McDonnell”) was retained by Empire District Electric Co. – a Liberty Utilities Company to provide a professional opinion regarding the requirements set forth in paragraph 12.b. of the Non-Unanimous Stipulation and Agreement as stated to the Missouri Public Service Commission and filed April 22, 2019 (the “Agreement”) as it relates to the North Fork Ridge Wind Farm located in Barton and Jasper Counties, Missouri (the “Project”).

Burns & McDonnell was provided (i) wind turbine mechanical completion certificates for each of the Project’s 69 wind turbine generators; (ii) infrastructure completion certificates for each of the Project’s six electrical collection circuits, which include completion documentation for the electrical collection system, the wind turbine foundations, and the Project’s roadways; (iii) the interconnection facilities completion certificate; (iv) the balance-of-plant substantial completion certificate, including certain punchlist items; and (v) commissioning completion certificates for each of the Project’s 69 wind turbine generators.

Based on the information noted herein and notwithstanding any punchlist items, Burns & McDonnell is of the opinion that the Project has achieved mechanical completion and that there is a reasonable likelihood that the Project will be capable of fulfilling the requirements of the in-service criteria, as noted in Appendix A of the Agreement. Burns & McDonnell believes that the Project is capable of being placed into service in a timely manner and is not aware of any material issues or defects that would prevent each of the Project’s wind turbine generators to be capable of producing, at a minimum, electrical energy in accordance with the wind turbine manufacturer’s power curve.

Sincerely,

Re: King's Point Wind Farm – Requirements of the Non-Unanimous Stipulation and Agreement

Dear Mr. Rooney,

Burns & McDonnell Engineering Company, Inc. ("Burns & McDonnell") was retained by Empire District Electric Co. – a Liberty Utilities Company to provide a professional opinion regarding the requirements set forth in paragraph 12.b. of the Non-Unanimous Stipulation and Agreement as stated to the Missouri Public Service Commission and filed April 22, 2019 (the "Agreement") as it relates to the King's Point Wind Farm located in Barton, Jasper, Lawrence, and Dade Counties, Missouri (the "Project").

Burns & McDonnell was provided for review (i) wind turbine mechanical completion certificates for each of the Project's 69 wind turbine generators; (ii) infrastructure completion certificates for each of the Project's six electrical collection circuits, which include completion documentation for the electrical collection system, the wind turbine foundations, and the Project's roadways; (iii) the interconnection facilities completion certificate; (iv) the balance-of-plant substantial completion certificate, including certain punch list items; and (v) commissioning completion certificates for each of the Project's 69 wind turbine generators.

Based on the information noted herein and notwithstanding any punch list items, Burns & McDonnell is of the opinion that the Project has achieved mechanical completion and that there is a reasonable likelihood that the Project will be capable of fulfilling the requirements of the in-service criteria, as noted in Appendix A of the Agreement. Burns & McDonnell believes that the Project is capable of being placed into service in a timely manner and is not aware of any material issues or defects that would prevent each of the Project's wind turbine generators to be capable of producing, at a minimum, electrical energy in accordance with the wind turbine manufacturer's power curve.

Sincerely,

Re: Neosho Ridge Wind Farm – Requirements of the Non-Unanimous Stipulation and Agreement

Dear Mr. Rooney,

Burns & McDonnell Engineering Company, Inc. (“Burns & McDonnell”) was retained by Empire District Electric Co. – a Liberty Utilities Company to provide a professional opinion regarding the requirements set forth in paragraph 12.b. of the Non-Unanimous Stipulation and Agreement as stated to the Missouri Public Service Commission and filed April 22, 2019 (the “Agreement”) as it relates to the Neosho Ridge Wind Farm located in Neosho County, Kansas (the “Project”).

Burns & McDonnell was provided for review (i) wind turbine balance-of-plant and turbine supplier mechanical completion certificates for each of the Project’s 139 wind turbine generators; (ii) wind turbine foundation completion certificates for each of the Project’s wind turbine generators; (iii) commissioning completion certificates for each of the Project’s wind turbine generators; (iv) electrical works completion certificates, including SCADA, for each of the 14 electrical collection circuits; (v) SCADA completion certificates for each of the wind turbine generators; (vi) the balance-of-plant substantial completion certificate which includes completion of the Project’s infrastructure facilities (structures, roads, foundations, tower foundations, pad-mounted transformers, O&M building, and other works) and the final punch list; and other such documentation as to indicate SCADA communication and Project functionality as it relates to delivering electrical energy to the grid from the Project wind turbines.

Based on the information noted herein and notwithstanding any punch list items, Burns & McDonnell is of the opinion that the Project has achieved mechanical completion and that there is a reasonable likelihood that the Project will be capable of fulfilling the requirements of the in-service criteria, as noted in Appendix A of the Agreement. Burns & McDonnell believes that the Project is capable of being placed into service in a timely manner and is not aware of any material issues or defects that would prevent each of the Project’s wind turbine generators to be capable of producing, at a minimum, electrical energy in accordance with the wind turbine manufacturer’s power curve.

Sincerely,
