

EC-2023-0395

Brett Felber
VS
Ameren Missouri

Response to Counselk

I object respondents motion to strike. They've been provided copies from both the BBB abd the Ag's office. In addition, I've sent a copy of the front and back of each page.

There is nothing to alter, nor was it altered in any way shape or form. Respondent's know they are in the wrong on this matter and have failed to restore services as a result.

Respondents have provided blank pages to the Staff in which they put their opinion on how everything is typed into their entries. Nothing they have provided I the complainant aligns with their story, or accuracy of their story.

I no longer need to compel any DR's from Ameren as I received a copy as they has no authorization from the [REDACTED] to disrupt the peace or trespass [REDACTED] property. In addition, the picture of the vehicle uploaded to EFIS showing Illinois plate was the paerties own personal vehicle, did not have appropriate documentation fo soliciting Ameren or being a sub-contractor for Ameren, nor holding properly licenses, identification or peddlers license. In addition, if he was a sub-contract he would be required to carry his own workmans comp policy and liability policy, as sub-contractors don't follow the same provisions.

Respondents are upset because I followed through with filing a report to the FTC against Mr. Banks and Ms. Grubbs and two regulatory specialists.

Again, respondents counsel is wanting the PSC to clean up their mess they've created.

When Ameren removes the fraudulent balance that has not only been reported to the FTC, but also to the police and restores utility services, then I'll engage in a conversation with them, otherwise I reserve my right to all legal strategies to be used against Ameren and the respondents in any other complaints filed.

I don't engage in conversations with attorney's of all people that make ludacris and absurd statements. They've enjoyed over 115 days of abusing the process of restoration and have frankly lied from the beginning. If respodents counsel fees it is necessary to lie to the abundance of exhibits and documents presented, so be it. However, I'm not going to engage and continously submit more and more documents to Ameren, because they fail to retain or keep them in their possession. That isn't my job or anyone elses job to do. it is their own responsibility.

I'll attach the report from the FTC. I will not upload the police report filed , as there is other complainant information on the report besides mine. I've been fair with all parties only to be taken advantage of, so they can deal with that as well.

In addition, I will give Ameren until the close of business to restore services today Monday September 11, 2023, before I proceed any further with any and all legal remedies available in this matter.
