

EC-2023-0395

Brett Felber
VS
Ameren Missouri

Complainants 2nd Motion to Compel and Motion for Immediate Hearing to have services immediately restored.

Complainant comes before the Commission and the Honorable Judge Clark to grant the request of the Motion submitted on Monday September 11, 2023. During the last hearing, respondents counsel stated for the complainant to email the request. Since then, Ameren has done their common tactic, which is to shutdown and go into ghost and hibernation mode. A common tactic that respondent has done numerous times.

The information requested in the data request submitted to the respondent will this prove that Ameren illegally trespassed unauthorized property and violated numerous State laws in the act, such as trespassing, disruption of the peace and property damage.

In addition, Complainant requests an immediate hearing before the Honorable Judge Clark within the next week to present a new piece of information that was given to the Complainant on Friday September 15, 2023. The new information provided is from the proven direct source itself Twilio (SendGrids) parent company that will prove the emailed payment agreement that Ameren sent to the complainant was in fact set up for May 22, 2023. The Complainant has received such copy from Twilio and would like to be able to present it at the hearing at which Ameren should be prepared to restore services upon the exhibited copy from Twilio being introduced. It will also prove and discredit all of respondents, unethical, bogus and absurd claims.

Whereas the Complainant asks that the Commission grant the Motion to Compel and grant an immediate hearing within the next week for the Complainant to produce the documents given to the Complainant by Twilio that will thus, prove Ameren illegally disconnected utility services.

Respectfully,
Brett Felber
