Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

Missouri needs jobs, but they must be CLEAN jobs. Getting Missouri on the fast track will not only deal with clean and renewable energy; it will generate jobs and be a great compliment in our economy.

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Mr. Mike Byington
