July	1,116	16:58	6:13
August	1,835	26:54	7:55
September	31,704	21:27	9:16
October	18,890	16:10	8:34

Customer Feedback Examples

“Give us lower rates all year long. I do everything to cut cost. I use most 4 to 8 pm cooking supper and it honestly part of Days” – July 29

“Good explanation of rate plan choices, good coaching.” – July 21

“I am upset with your new energy rate hike during the hours of 4-8 pm. That is the time people get home from work. In our case, when the sun is setting in the west our house is the hottest. If you are allowed to raise my rates like this I should have the option of choosing which electric company deserves my business.” – July 10

“The only reason I like everygy is now gone with these time based rates that is exactly what the rest of these companies already do and that makes it so much harder on low income families. So disappointing.” – July 7

Campaign Strategy, Outreach Examples and Special Customer Group Approach

Communication Strategy & Special Group Customer Details

Campaign Goals

Goals

1. Prepare customers for the upcoming change in rate structures, including the new mandatory rate, and how TOU rates work.
2. Offer choice and inform customers of their rate options and the benefits depending on the customer's lifestyle.
3. Provide customers with tools, resources, and reports that serve to help them understand TOU rates and options, empower them to choose their rate, and provide guidance to modify their behaviors so that they can mitigate usage and bill impact to increase their success on a TOU rate.
4. Help all customers (and with increased emphasis on special customer groups) be successful before, during and after the mandatory TOU rate transition and/or enrollment on their selected TOU rate option.

Education and Awareness Strategy

Strategy Overview: Use a phased approach, that incorporates both mass awareness and direct marketing tactics, to move a customer from awareness to action and then finally to transition and success.

Campaign Phase	Objective	Message Idea	Tactic Type
Phase 1 Awareness & Education June 15 th – Nov. 30 th , 2023	Inform customers that Missouri is changing rate structures soon and educate them on how TOU rates work.	Missouri will be changing electric rate structures starting this Fall. Learn how to prepare.	Mass Awareness
Phase 2 Action & Preparation Aug. 1 st – Nov. 30 th , 2023	Prepare customers for the upcoming change, inform them of their rate options & how they work, and encourage pre-selection of a rate.	As Missouri moves to TOU rates, Everygy is offering new personal power plans. Learn about your plan options and select a plan before October.	Mass Awareness and Direct
Phase 3 Transition & Coaching Oct. 1 st – Dec. 31 st , 2023	Ensure customers know they will be defaulted into a new rate and provide coaching to help them be successful on the new plan.	Your rate will change on X date. We are here to support your transition to TOU.	Direct
Phase 4 Success & Coaching Jan. 1 st – April 30 th , 2024	Help customers understand how their rate works and encourage shifting usage to off-peak times.	Your new rate allows you to save money by shifting to off-peak times. Here are tips and tricks to help you save.	Direct
Phase 5 Summer Prep & Coaching May 1 st – Sept. 30 th , 2024	Prepare customers for the change in summer pricing and provide tools, tips, and resources to avoid summer peak usage.	Prices change in the summer, start preparing your home and family to avoid high usage during the summer.	Mass Awareness and Direct

Messaging Strategy

Overarching Campaign Message

Missouri is changing electric rate structures this Fall, and Evergy is here to help you understand your new rate options, how to pick a plan that is best for your home, and how to be successful on the new plan as the seasons change. This means that Missouri customers will have a choice of electric rate plans that fit their household. The new rate plans will help you save money when using less energy during peak times, when people use it most.

Sub Message by Campaign Phase

Phase 1

Missouri will be changing electric rate structures starting this Fall. Learn how to prepare and review your new plan options.

Phase 2

Evergy is offering new rate plans to help you save money by using less energy during peak times, when people use it most. Learn which plan may be best for you and select an option by October 2023.

Phase 3

Your new rate plan will start in October/November. You can save money on your new rate plan by shifting usage away from peak hours of 4-8pm, learn how.

Phase 4 & 5

As the seasons change, Evergy will support you with customized rate education and usage reports to help you maximize savings with on your new time-based rate plan.

Key Messages

	Phase 1	Phase 2	Phase 3	Phase 4 & 5
Objective	Inform customers that Missouri is changing rate structures soon and educate them on how TOU rates work.	Prepare customers for the upcoming change, inform them of their rate options & how they work, and encourage pre-selection of a rate.	Ensure customers know they will be defaulted into a new rate and provide coaching to help them be successful on the new plan.	Prepare customers for behaviors needed to lessen impact of high usage season.
Primary Message	Missouri is moving to time-based rate plans this Fall.	We have 4 new time-based rate plan options. Select your plan before October.	Your energy rate plan is changing to the {Rate Plan Name}. Evergy is here to help during the transition.	We are heading into high energy use season and we want to make sure you are managing your new rate plan during seasonal changes.
Supporting Message	Timing plays a crucial role in the cost of energy. That is why Missouri is moving to time-based rate plans. As the demand for energy rises, so does the cost of producing electricity. This usually takes place during the busy peak hours of 4-8pm. Conversely, the demand for energy decreases during off-peak times, typically in the early morning and overnight, resulting in lower energy costs.	<p>Missouri is changing how electric rate plans work this Fall, so Evergy has introduced four new rate plan options to fit your household needs. To help you choose the best option for you, we have developed new tools that analyze your energy usage and determine the plan that offers the greatest savings. Every household is different, so your savings will depend on how much energy you're able to shift to times when the demand is lower and energy is cheaper.</p> <p>If you don't want to make a choice by October, you'll be moved to the Standard Peak Saver plan.</p> <p>Timing plays a crucial role in the cost of energy, which is why Missouri is moving to time-based rate plans. As the demand for energy rises, so does the cost of producing electricity. This usually takes place during the busy peak hours of 4-8pm. Conversely, during off-peak times, typically in the early morning and overnight, the demand for energy decreases, resulting in lower energy costs. According to our analysis, the time-based rate plan offers a modest cost reduction for the majority of customers, with savings varying depending on the season.</p>	<p>Since you have transitioned to a time-based energy rate plan, it is important to minimize significant energy usage between 4-8pm. During this period, we recommend reducing use of high-energy appliances or activities that consume a substantial amount of electricity. By avoiding peak hours, you can reduce your energy usage and benefit from lower costs.</p> <p>As the demand for energy rises, so does the cost of producing electricity. Helping Groups At-Risk with New Rates

Income-Eligible & Seniors

Strategy: Leverage community events and trusted agency partners to offer more educational opportunities.

Electric Heat Customers

Strategy: Increase customer engagement with TOU plans through targeted direct mail, email, and trade ally network efforts.

Net-Meter & Solar Subscription

Strategy: Proactively inform these customer they are moving into the Default Time Based Plan and educate on how the rate works.

Income-Eligible and Seniors

Strategy: Enhance TOU engagements by leveraging community events and collaborating with trusted agency partners to offer more touchpoint and educational opportunities.

Special Support Tactics:

- Conduct training workshops for agency partners to enhance their knowledge and ability to promote our services.
- Develop a bilingual handout and video on Time-of-Use (TOU) plans in Spanish to facilitate customer understanding and engagement.
- Participate in over 60 community events from June to October to create awareness about our services and engage with potential customers.
- Organize Connect Center events to offer in-person assistance and support to customers.
- Increase the frequency of email and direct mail campaigns to better inform and engage customers about our services.
- Offer both in-person and virtual appointments to provide more convenient options for customers to learn about and sign up for our services.
- Targeted paid media tactics to provide additional touchpoints.
- Specialized TOU support number highlighted on education material.
- Food bank and Library outreach events and materials

evergy

Your current rate plan will be changing.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

To meet the new requirement, Evergy will move you to our new Standard Peak Saver plan in October. No action is needed on your part.

How does the Standard Peak Saver plan work?

- **October through May:** During these months, the cost for energy will be lower, all day, every day. It's especially lower during super-off peak times from midnight to 6 am.
- **June through September:** During these summer months, the cost for energy is highest during peak hours of 4-8 pm Monday - Friday. All other times the cost for energy is lower than you pay today.

Tip: To save on your energy bill with this new plan, try to limit the use of large appliances, like the clothes dryer or dishwasher, during the summer months from 4-8 pm Monday through Friday. With this change to tiered rates, it will be important to monitor not only how much energy you use but also when you use it to save 8 months bill.

Want a different rate plan?

Evergy has three other time-based rate plans, including our new Peak Reward Saver plan, which is similar to plan you have today. If you want to switch to one of these other rate plan options or learn which one might be for your household, we invite you to use our online personalized Rate Comparison Tool or read your Rate Up Report that arrived by mail in August to see which of the other plan options may be best.

We're here to help!

We know rate plans can feel confusing. If you need help, we are here to assist you.

- **Give us a call:** 1-800-541-0427 from 7 am to 5 pm Monday through Friday
- **Visit us in-person:** Evergy Connect from 9 am to 4 pm Monday through Friday
1710 The Plaza Blvd., Kansas City, MO 64108
- **Visit us online:** evergy.com/SavePlans

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- **Delay running your dishwasher:** Use your dishwasher timer to delay running it until after peak hours.
- **Adjust when you use your dryer:** Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- **Use a smart thermostat to automate off-peak savings:** Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- **Be mindful of peak hours:** Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The average to time-based rate plan does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Electric Heat Customers

Strategy:

Increase customer engagement with TOU plans through targeted direct mail, email, and trade ally network efforts, emphasizing the best available rates and winter savings tips.

Special Support Tactics:

- Conducted a workshop with trade allies in May to educate them about the change with Electric Heat Rate.
- Will send an additional Rate Education Reports (RER) for customers who are not on the best plan.
- Increase direct mail and email campaigns to electric heat rate customers.
- Provide winter heating coaching support as part of Phase 4, to assist customers in maximizing their savings during the winter season.

It's time to select your new time-based rate plan.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

With time-based rate plans, you'll pay less for energy than you do today during 20 off-peak hours a day, but when energy demand is high during the peak hours of 4-8 pm, the cost for energy will be higher. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

In order to assist customers with this change, Evergy has developed four new time-based rate plans for you to choose from. It's important to select your new plan by October. If you decide not to choose a new plan, you'll be moved to the new default plan, the Standard Peak Saver starting in October.

Visit evergy.com/SaverPlans or call 1-800-541-0407 to learn more about the plan options and to select your new plan.

We invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which plan best fits your household based on your past energy usage.

An important note about your old rate plan
As part of the new mandate from the MPSC, your current All-Electric rate plan (or electric space heating rate) is being discontinued. Your old plan offered a discounted rate in the winter for electric space heating customers, which is no longer offered. Due to this change, customers with electric heat may experience more impact moving to time-based rate plans, making it especially important to understand your home energy usage, and shift large appliance usage, like doing laundry and running the dishwasher, to off-peak times.

*Note: If you have selected an equipment rebate (see Slide 2) recently, the Rate Comparison Tool and Rate Education Report is not an available option. However, you can still use the online Rate Comparison Tool and Rate Education Report to see which plan best fits your household based on your past energy usage.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher. **Do shift a few of your major appliances to off-peak times to save on your energy costs.**

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Net-Meter & Solar Subscription Customers

Strategy:

Proactively inform net-meter customers of the upcoming change in their rate to the Peak Reward Saver plan and provide them with comprehensive information on how the rate works.

Special Support Tactics:

- Send a direct mail letter to all net-meter customers, providing them with clear and concise information about the upcoming change in their rate and how it will impact them.
- Follow up with multiple email touchpoints to remind and update customers about the rate change, and to offer additional support and assistance as needed.
- Provide specialized TOU support number for net-meter customers to provide assistance and answer any questions.

Your new time-based rate plan is coming soon.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Net Metering program, your rate plan with Evergy will change to the Peak Reward Saver plan in October.

The **Peak Reward Saver** plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 5 am every day.

The Peak Reward Saver plan is the only plan currently available for Net Metering customers.

Peak Reward Saver
Closest to Our Current Standard Residential Rate

What's next?
This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your energy will be billed on the Peak Reward Saver Plan. If you have questions, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit evergy.com/SaverPlans.

Why is Missouri moving to time-based plans?
Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Why can't I pick one of the other time-based rate plans?
The MPSC has ordered that Net Metering customers move to the Peak Reward Saver plan. This is partly due to Missouri state statute that specifies how net metering is to be calculated and when it is to be available. The Peak Reward Saver plan is currently the only rate plan that meets the Missouri statute criteria.

Are there changes to my net metering agreement?
Although your rate plan is changing, your net metering agreement is not. Just as now, Evergy will purchase energy from you at the Cost to Fuel rate.

How to save on the Peak Reward Saver plan.
This plan is very similar to your current rate, but you can save money by shifting some energy to overnight times. You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

-  **Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
-  **Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
-  **Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
-  **Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Introducing Your New Rate Plans

You may have heard: Missouri is moving to time-based rate plans this fall.

The Missouri Public Service Commission has required utilities, including Evergy, to transition to mandatory time-based rate plans in order to assist customers with their energy needs. This report uses your electricity usage to help you choose the best plan for your household. This report also provides information on how to save money by shifting energy usage to off-peak times.

Why is Missouri changing?

Timing plays a crucial role in the cost of energy, which is why Missouri is changing to time-based rate plans. During off-peak times, the demand for energy decreases, resulting in lower energy costs. By shifting your large appliance use to off-peak times, you can take advantage of these lower rates. This report uses your electricity usage to help you choose the best plan for your household. This report also provides information on how to save money by shifting energy usage to off-peak times.

A note about electric heating

Since your home uses electric heat, it's especially important to understand how time-based rates affect your heating costs. Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that reduces usage during the peak hours of the day. If you don't have a smart thermostat, Evergy offers free and discounted smart thermostats.

We're here to help

Evergy has provided you with this Rate Education Report to help you choose the best plan for your household. This report uses your electricity usage to help you choose the best plan for your household. This report also provides information on how to save money by shifting energy usage to off-peak times.

Campaign Goals and Measurement Plan

Goals

1. Prepare customers for the upcoming change in rate structures, including the new mandatory rate, and how TOU rates work.
2. Offer choice and inform customers of their rate options and the benefits depending on the customer's lifestyle.
3. Provide customers with tools, resources, and reports that serve to help them understand TOU rates and options, empower them to choose their rate, and provide guidance to modify their behaviors so that they can mitigate usage and bill impact to increase their success on a TOU rate.
4. Help all customers (and with increased emphasis on special customer groups) be successful before, during and after the mandatory TOU rate transition and/or enrollment on their selected TOU rate option.

Measurement

Customers enrolled in Average Payment Plan

- **Current:** Evergy has worked to add information about the Average Payment Plan onto outbound communications, like letters, postcards and emails and on Evergy.com TOU landing page.
- **Upcoming:** During Phase 3-5 of the campaign, additional program information will be provided as we work to help customers be successful on their rate by providing more tools, tips, programs and options.

By submitting, you authorize Evergy to change your rate plan. Your new rate plan will become effective on the next business day. Depending on where you are at in your billing cycle when your rate change becomes effective, you will either receive a final, separate bill for charges on your current rate plan or you will receive a bill with both your final charges on your current rate plan and a prorated amount due for the charges incurred up to the point of billing on your new rate plan. If you are enrolled in the Average Payment Plan, changing your rate will unenroll you from that plan. If you have an Average Payment Plan balance, that amount will be added to the final balance due for your current rate plan. Once your rate is changed, you will have the option to re-enroll in Average Payment Plan. All subsequent bills will include charges on your new rate plan. There will be no interruption in your electric service during this transition.

You may change your rate to another available rate option at any time, but we recommend staying on a plan for 3 months to understand usage patterns and determine impact. Changing your rate plan does not guarantee savings.

You may change your rate to another available rate option at any time, but we recommend staying on a plan for 3 months to understand usage patterns and determine impact. Changing your rate plan does not guarantee savings.

What to Expect Next
Depending on where you are at in your billing cycle when your rate change becomes effective, you will either receive a final, separate bill for charges on your current rate plan or you will receive a bill with both your final charges on your current rate plan and a prorated amount due for the charges incurred up to the point of billing on your new rate plan. All subsequent bills will include charges on your new rate plan. Your electric service will remain on during this transition.

Budget Billing
All rate plans start with the Budget Billing feature turned off. You can turn on Budget Billing in your preferences after your new rate plan becomes effective.

You have a Budget Billing account balance of \$210.05. This amount will be added to the final bill for your current rate plan. This balance is an estimate and may vary slightly at the time of billing.

Use **Energy Analyst** to manage your energy usage, find energy saving tips and more.

Your current rate plan will be changing in October.
You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission, which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Why is Missouri moving to time-based plans?
When there is a high demand for energy during peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Shift a few of your major appliances, like the dishwasher or dryer, to off-peak times to save on your energy costs. It's ok to use appliances that use less energy, like lights and computers.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan program (sometimes called Level Payment or Budget Billing) and you can still be on Average Pay with these new rates.

We're here to help!
We know rate plans can feel confusing. If you need help, we are here to assist you.

- Give us a call: 1-800-541-0407 from 7 am to 6 pm Monday through Friday
- Visit us in-person: Evergy Connect from 9 am to 4 pm Monday through Friday
1710 The Paseo Blvd., Kansas City, MO 64108
- Visit us online: evergy.com/SaverPlans

Why is Missouri moving to time-based plans?
Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

STEP ONE: **Be mindful of peak and off-peak hours**
Energy costs are higher during peak hours of 4-8 pm, and off-peak times and pricing varies by plan.

Off-Peak Hours
Demand for energy is lower during these times, so you're charged less. Off-peak times vary by plan but are typically late at night and in the early morning.

Peak Hours
Demand for energy is higher during these few hours, so energy costs more during peak hours. Peak hours are 4-8 pm and vary by day and season.

Costs and times vary by each plan. Get your plan's peak and off-peak times at evergy.com/SaverPlans

STEP TWO: **Optimize when you use your large appliances**
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Be mindful of peak hours
Reduce large appliance use during peak hours of 4-8 pm.

- Use your dishwasher delay button
- Adjust your thermostat to avoid peak hours
- Shift when you use your clothes dryer

Learn more at evergy.com/SaverPlans

STEP THREE: **Use our Evergy energy engagement tools**
Use our personalized tools to help you understand when you're using energy and how to save money.

- Weekly Rate Coach Emails**
With our weekly Rate Coach emails, you'll get an email every week that breaks down your weekly energy usage by each hour of the day, helping you to see when you're using energy.
- Energy Engagement Portal**
Through your online Energy MyAccount portal, you can see your usage patterns broken down by hour, helping identify when you're using the most energy.
- Compare My Rate Tool**
Use our online rate compare tool to see which time-based rate plan is best for you.
- High Bill Alerts**
When you enroll in our High Bill Alert emails, you'll receive a notice if you're currently on track to receive a higher-than-normal bill.
- Average Payment Plan**
Sometimes called budget billing, this program averages your bills each month to help keep payments level throughout the year.

Be mindful of peak and off-peak hours
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Optimize when you use your large appliances
Reduce large appliance use during peak hours of 4-8 pm.

- Use your dishwasher delay button
- Adjust your thermostat to avoid peak hours
- Shift when you use your clothes dryer
- Set your EV or other appliances to charge overnight

Here to help you with time-based rate plans.
Evergy has personalized tools to help you find ways to shift some of your energy usage, manage costs, or choose another rate plan option that best fits your household.

- Our **Average Payment Plan** program (sometimes called budget billing) averages your bills each month to help keep payments level and consistent throughout the year.
- With our weekly **Rate Coach Emails**, you'll get an email every week that breaks down your weekly energy usage by each hour of the day. Not receiving these emails? Sign up online or give us a call.
- Use our online **Rate Compare Tool** to see which time-based rate plan is best for you. Check back to see if a different rate may be best for you as your energy usage changes.

Modifications Based on Customer Feedback

- **Average Payment Plan (APP) Information:** Evergy added information about APP on most TOU materials to help clarify that customers could still stay on their APP.
- **Finding Monthly Breakdown Estimates:** Updated Compare My Rate tool to make it easier to find estimated cost breakdown by month.
- **Additional Graphics:** Evergy worked to add more charts and graphics to help explain both the rate plans and how TOU works.
- **Rate Descriptions:** Added subheads under each plan name to give more details about the plan.
- **Additional Rate Plan Differences:** Due to the similar nature of many of the plans, Evergy provided additional descriptions of differences between plans to help customers make a selection.
- **Additional Spanish Resources:** Added a Spanish contractor to help with outreach events and translations to Spanish speaking groups and communities. Created Spanish video.

Phase 1 – Awareness Tactics

Examples filed in June 2023

Campaign Website Landing Page

Audience: Mo Residential customers
 Launched Date: June 2023

The screenshot shows the top navigation bar with 'Missouri West', 'Residential', and 'Business' tabs. The main header features the 'evergy' logo and navigation links for 'Manage Account', 'Outages', 'Ways to Save', and 'Smart Energy'. A large hero image of a woman in a yellow sweater is on the right. The main heading reads 'Changes are coming in Missouri' with a sub-heading 'Time-based plans are here'. Below this, there are sections for 'Why is Missouri changing?', 'Making the switch', and 'New Missouri time-based plans are here'. A bar chart titled 'Summer Weekdays (Mon-Fri)' shows electricity prices for different times of day. A 'Standard Peak Saver' section includes a 'Who's it for?' list and a 'Tip' about thermostat settings. A 'KANSAS CUSTOMERS' notice is highlighted in blue. At the bottom, there is a 'Frequently asked questions' section with expandable items.

This desktop view shows the same layout as the full-page view. The navigation bar is prominent, and the hero image and main heading are clearly visible. The 'Standard Peak Saver' section is expanded, showing the 'Why is Missouri changing?' text and the 'Making the switch' section with a 'Change My Rate' button. The 'New Missouri time-based plans are here' section follows, including the 'Check out your new time-based plans...' heading and the 'Standard Peak Saver' details. The 'KANSAS CUSTOMERS' notice and the 'Frequently asked questions' section are also visible at the bottom.

This mobile view shows the website adapted for a smaller screen. The navigation bar is simplified, and the hero image is cropped. The 'Standard Peak Saver' section is the primary focus, with the 'Who's it for?' and 'Savings level' information clearly displayed. The 'Tip' about thermostat settings is also visible. The 'KANSAS CUSTOMERS' notice is highlighted in blue. The 'Frequently asked questions' section is at the bottom, with expandable items.

Why is Missouri changing to time-based rates?

Timing is everything when it comes to energy costs. Time-based rates match the cost you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy during off-peak times, when demand for energy is lower, and more for energy used during the peak hours of 4-8pm.

Missouri está adoptando planes de tarifas eléctricas en función del tiempo este otoño.

Los clientes de Missouri tendrán la opción de elegir entre **cuatro nuevas opciones de planes de tarifas**. Evergy está aquí para ayudarle a comprender sus opciones y a elegir el plan de tarifas que mejor se adapte a su hogar.

Obtenga más información en evergy.com/Time

Nuevas opciones de planes de tarifas en función del tiempo
Elije tu nuevo plan antes de octubre o se le asignará de manera automática el plan Estándar de Ahorro de mas demanda.

-  **Estandar de Ahorro de mas demanda**
-  **Ahorro en Noches y Fines de Semana**
-  **Plan de Ahorro con Recompensas en tiempo de mas demanda**
-  **Ahorro Maximo en Noches y Fines de semana**

¿Por qué Missouri está adoptando tarifas en función del tiempo?
El tiempo lo es todo cuando se trata de costos energéticos. Las tarifas basadas en el tiempo se ajustan a lo que paga con el costo real de producir energía. Con los planes de tarifas en función del tiempo, se pagará menos por la energía durante los períodos de menor demanda, cuando el consumo de energía es mas bajo, y más por la energía utilizada durante las de mas demanda de 4-8 pm.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during the peak hours of 4-8 pm.

With time-based rate plans, you can take advantage of discounted off-peak pricing by shifting your larger appliance usage, like dishwashers and clothes drying, to off-peak hours.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times.

We're here to help:

To help you choose the best plan for your household, we have developed online tools and reports that analyze your actual energy usage and determine the plan that best fits your lifestyle.

Cover Letter Insert in the Rate Education Reports

Welcome to your Rate Education Report

Missouri is moving to time-based rate plans this fall, and Evergy is here to support you through this change. That's why we're sending you the attached Rate Education Report. This report uses your home's past energy usage data to estimate the costs of each new time-based rate plan. This report will help you understand the possible costs of each of the new plan options and how you might be able to save money by shifting energy usage to off-peak times.

Select your plan by October!

Select your new plan before October by going to [evergy.com/PickMyRate](https://www.evergy.com/PickMyRate). If you have not selected a new plan by October, you will be moved to the Standard Peak Saver plan.

Why is Missouri changing to time-based rates?

Timing is everything when it comes to energy costs. By switching to time-based rates, Missouri is working to match the cost you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during the peak hours of 4-8 pm.

With time-based rate plans, you can take advantage of discounted off-peak pricing by shifting your larger appliance usage, like dishwashers and clothes drying, to off-peak hours.

How to read your Rate Education Report

The attached report estimates what your average monthly Evergy bill might be on each of the new time-based plan options, based on your home's last year of energy usage. Please note that this is only an estimate, and any changes in your home or household members could affect the estimated cost of each plan. Additionally, this estimate does not consider any shifting of your energy use to off-peak times, which could help lower your monthly energy costs.

Questions about the plans or your estimated costs?

- Visit [evergy.com/My-Plans](https://www.evergy.com/My-Plans) for plan details and your personalized Rate Comparison.
- Talk with a rate plan specialist: 800-541-0407.
- Keep a look out for our weekly Rate Plan Coach emails, which provide a weekly breakdown of your energy usage and costs by time of day.

Time-based Plans - Savings Tips

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Choose a rate plan that works for your household

Missouri is changing how electric rate plans work to match the cost you pay with the actual cost to produce energy—and Evergy has responded with four new time-based rate plans for you to choose from. The good news is that you're estimated to save with the default Standard Peak Saver plan, which takes effect in **Month 2023**. Want to start saving sooner? Switch to the Standard Peak Saver plan now!

Learn more and select your new rate plan at [evergy.com/PlanDetails](https://www.evergy.com/PlanDetails).

Make your selection today

If you don't select a new plan, you'll be enrolled in Standard Peak Saver starting **Month 2023**.

Standard Peak

No Peak pricing for 8 months of the year

To save, shift your energy use away from weekday Peak hours in the summer (June – Sept.).

Peak Reward

Earn discount credits

Keep your electricity use low during Peak hours and earn discount credits by using large appliances during Super Saver hours.

Nights & Weekends

Lower overnight prices

To save, schedule your smart thermostat and set your large appliances to run during Saver and Super Saver hours.

Nights & Weekends Max

Lowest overnight prices

To save, charge your EV overnight and set your large appliances to run during Super Saver hours.

How do rate plans compare?

Estimated average monthly cost per plan (based on your historical usage)

How can time-based plans work for you?

Small actions go a long way when it comes to shifting your energy use away from Peak hours. You'll save energy *and* money—while lessening the impact on the grid for everyone. Take simple steps like delaying running large appliances such as your dryer and dishwasher until Saver hours. Another great way to save is using a smart thermostat to automate your heating and cooling systems to run less frequently during Peak hours.

What time should your household use energy based on new plans?

To make the most of your plan, do your best to make a habit of shifting energy use away from Peak hours (4 to 8 pm). See below for a breakdown of each rate plan's hours so you can find the one that works for your household.

Choose your new plan today!

Customer Event Handout

Missouri's Time-Based Rate Transition

In October, customers will be moved to time-based rate plans

Evergy's Missouri customers will be automatically enrolled in the **Standard Peak Saver plan** if you don't choose one of the other three additional rate plan options before October.

Why is Missouri changing to time-based rates?
The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:
With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times. With time-based plans, it's important to avoid using large amounts of energy during peak hours.

Standard Peak Saver
New Default Residential Rate

Peak Reward Saver
Closest to the Current Standard Residential Rate

Nights & Weekends Saver
Three Time Periods, Overnight and Weekend Discount

Nights & Weekends Max Saver
Three Time Periods, Largest Difference in Price

Time-Based Plans - Savings Tips

- Delay running your dishwasher:** Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer:** Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Adjust your thermostat to automate off-peak savings:** Adjust your thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours:** Reduce large appliance energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Transición a tarifa basada en la hora de uso de Missouri

En octubre, los clientes pasarán a planes de tarifas basadas en la hora de uso

Los clientes de Evergy en Missouri quedarán inscritos automáticamente en el plan **Standard Peak Saver** si no se elige una de las otras tres opciones de planes de tarifas adicionales antes de octubre.

¿Por qué se realiza el cambio a tarifas basadas en la hora de uso en Missouri?
La Comisión de Servicios Públicos de Missouri ha ordenado a los proveedores de servicios públicos de Missouri, incluido Evergy, que realicen la transición a planes obligatorios de tarifas basadas en la hora de uso. El objetivo de las tarifas basadas en la hora de uso es equilibrar los costos que se pagan con el costo real de producir energía. Con los planes de tarifas basadas en la hora de uso, pagará menos por la energía utilizada durante las horas de menor actividad, cuando la demanda de energía es menor, y más por la energía utilizada durante las horas de mas demanda.

¿Cómo funcionan los planes de tarifas basadas en la hora de uso?
Con las tarifas basadas en la hora de uso, pagará menos por la energía utilizada durante las 20 horas de menor actividad. Pero cuando la demanda de energía es alta durante las horas de mas demanda, el costo de la energía será mayor. Es importante cambiar el uso de grandes electrodomésticos, como lavavajillas, secadoras y sistemas de calefacción y aire acondicionado, a horas de menor actividad, como durante la noche y a primera hora de la mañana, para evitar pagar un precio más alto por la energía durante las horas de mas demanda. Con los planes basados en la hora de uso, es importante evitar el uso de grandes cantidades de energía durante las horas de mas demanda.

Standard Peak Saver
Nueva tarifa residencial predeterminada

Peak Reward Saver
El plan más cercano a la tarifa residencial estándar actual

Nights & Weekends Saver
Tres períodos de tiempo; descuentos nocturnos y de fin de semana

Nights & Weekends Max Saver
Tres períodos de tiempo; la mayor diferencia de precio

Planes basados en la hora de uso - Consejos para ahorrar

- Retrase el uso del lavavajillas:** utilice el temporizador del lavavajillas para retrasar su uso hasta después de las horas pico.
- Ajuste la hora de uso de la secadora:** las secadoras eléctricas consumen más energía que las lavadoras, por lo que ahorrará aún más dinero si deja el secado de la ropa para las horas de menor actividad.
- Ajuste su termostato para automatizar los ahorros en las horas de menor actividad:** ajuste su termostato para que su sistema de calefacción/aire acondicionado no opere durante tanto tiempo durante las horas pico.
- Tenga en cuenta las horas pico:** reduzca el consumo de energía de los electrodomésticos grandes durante las horas pico, de 4:00 a 8:00 p. m., cuando la demanda y los costos son mayores.

It's time to pick your new time-based rate plan!

Missouri is moving to time-based rate plans in October. With time-based rate plans, you'll pay less for energy during off-peak times and more for energy used during peak hours.

Select your new plan by October: customers without a preference will be moved to our default Standard Peak Saver Plan.

[LEARN MORE AND PICK YOUR PLAN](#)

Customers on TOU Pilot

We have new time-based rate plan options!

Your Time of Use Plan has been renamed to the Nights and Weekends Saver plan, and we are introducing three additional time-based rate plans. Your existing plan will remain the same, but we recommend exploring the new alternatives to see if any are more suitable for your household.

Visit our online Rate Comparison Tool to see which plan might be best for you.

[COMPARE PLANS](#)

All Mo Customers: August Email

You may have heard: Missouri is moving to time-based rate plans this fall

The Missouri Public Service Commission has required utilities, including Evergy, to transition to mandatory time-based rate plans. In order to assist customers with this change, Evergy has four new time-based rate plans for you to choose from. These plans offer you the flexibility to select the plan that best fits your household's needs.

With time-based rates, you'll pay less for energy used during 20 off-peak hours a day, and more for energy used during a four-hour peak period.

It's important to pick your new plan by October. **If you decide not to choose one, you will be moved to the new default plan, the Standard Peak Saver.**

[Compare Plans](#)

We're here to help

Evergy has introduced new four rate plan options, along with our [Rate Comparison Tool](#)*, which shows your expected annual cost on each of the new plans, based on your past energy usage. In addition, we will send you weekly usage reports, to show which time of day you're using the most energy.

All Missouri customers are encouraged to compare the new plans and make a choice by October. If you decide not to choose one, then you will automatically change to the [Standard Peak Saver](#) plan.

Note that you don't have to keep the Standard Peak Saver plan after October. You can change to one of the four new plans anytime.

See [more details on the Missouri changes](#), and what they mean for you.

Why is Missouri changing?

Timing plays a crucial role in the cost of energy, which is why [Missouri is changing](#). As the demand for energy rises, so does the cost of producing electricity, resulting in "peak" and "off-peak" times.

During off-peak times, the demand for energy decreases, resulting in lower energy costs. By shifting your large-appliance use—like running the dishwasher and doing laundry—to off-peak times, you'll potentially save both energy and money on these new plans. With time-based rates, you'll pay less for energy most of the time.

According to our analysis, time-based rate plans may result in a small annual savings for most customers, depending on the season and household.

A note about electric heating

Since your home uses electric heat, it's especially important to understand how your home uses energy, and to shift large-appliance usage like laundry and dishwasher use to off-peak times.

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that optimizes usage around time-based rate plans. If you don't have a smart thermostat, Evergy offers [free and discounted models](#).

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool will not yet have enough data to provide cost estimates. Please view each rate description to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407

A note about electric heating

Since your home uses electric heat, it's especially important to understand how your home uses energy, and to shift large-appliance usage like laundry and dishwasher use to off-peak times.

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that optimizes usage around time-based rate plans. If you don't have a smart thermostat, Evergy offers [free and discounted models](#).

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

Introducing: Your New Rate Plans

New plans are here

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

To support customers in this change, four new rate plans have been created to reflect the actual cost of energy, which varies throughout the day depending on demand.

Please look for your Rate Education Report, coming to you by postal mail in August, which will contain more information on your home's energy use, along with which new rate plan will be best for your home.

What does this mean for me?

This means that all customers now have the opportunity to select from four new plans, designed to provide lower prices for the majority of the day. However, it's important to choose a plan by October. If no selection is made by that time, you will be moved to the [Standard Peak Saver plan](#).

Keep in mind that this may not be the most cost-effective option for your specific needs. We recommend you explore your rate-plan options with our [Rate Comparison Tool](#) and make an informed choice before the October deadline.

[Compare Plans](#)

How do I change my plan?

If you need help, we are here to assist you.

- [Change your plan online](#) before October
- Call our special hotline at **1-800-541-0407** from 7 am to 5 pm Monday through Friday
- In Kansas City, stop by our [Connect Center](#) for in-person assistance

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

A note about electric heating

Since your home uses electric heat, it's especially important to understand how your home uses energy, and to shift large-appliance usage like laundry and dishwasher use to off-peak times.

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that optimizes usage around time-based rate plans. If you don't have a smart thermostat, Evergy offers [free and discounted models](#).

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

Suggestions to save on time-based plans

By shifting some of your energy use to off-peak times, you can pay lower rates of 75% or more compared to peak times. The more you shift, the more you save.

Laundry

- Wash clothes on cold. They get just as clean and save energy
- Run your dryer after 8 pm on weekdays, or on weekends

Dishwashing

- Run full loads and wait until after 8pm on summer weekdays

Heating and cooling

- Adjust your thermostat to cool your home a few degrees lower before peak hours begin to delay using the AC when energy is more expensive.
- In winter, warm your home a few extra degrees before peak hours begin.

You can also check out this chart to understand which appliances tend to use the most electricity in your home.

Missouri Rate Update

Missouri makes changes to rate plans for Evergy customers

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

While many customers, based on their current usage, are expected see a modest reduction on their energy bill, others will not. Those customers will need to offset the increased costs by shifting the use of large appliances away from the peak hours (just four hours per day and never on weekends), when energy costs will be highest.

Impact to your home

Based on your past usage history, time-based plans may increase your overall energy bill if you don't make some effort to shift energy usage to the 20 hours of the day when energy will cost less.

What you can do

By October, choose one of the four time-based plans that will be least expensive for you, based on how you currently use energy. Our [Rate Comparison Tool](#) shows you what you would pay on each of the four new plans, based on 9 months of your prior usage.

[Choose Now](#)

We're here to help

If you need help choosing a plan, we have a special hotline to help from 7am to 5pm Monday through Friday: **1-800-541-0407**. Or you can visit us in person at our [Evergy Connect location](#).

Lastly, once you sign up for your new plan, you'll receive tips and strategies to avoid higher costs.

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

Your New Rate Plan

Get to know your new plan

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

As a participant in our Net Metering program, your rate plan will change to the new Peak Reward Saver plan this fall.

[Peak Reward Saver](#)

No changes to your net-metering agreement

Although your plan is changing, your net-metering agreement is not. Just as now, the energy you generate will continue to offset your bill.

Also unchanged from your current agreement is the purchase of excess energy over and above what you use per billing cycle. This energy will continue to be purchased at the Cost of Fuel rate.

The [Peak Reward Saver plan](#) is similar to your current plan in that it is a tiered plan, with prices that change based on the amount of energy used, and with variation in summer and winter.

Additionally, on the Peak Reward Saver plan, there is a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm. This means that any energy received from your system during those peak times could provide even greater savings.

Subject: Your new rate plan is coming soon
Audience: Net-metering ~6,000
Note: electric heat pod only shows for space heating customers
Send Date: August 25th

The diagram illustrates the rate plan structure with four time periods: 12-6 AM, 6 AM-4 PM, 4-8 PM, and 8 PM-12 AM. The 12-6 AM period is labeled 'Super Off-Peak' with a blue arrow pointing to a blue bar above the green bar, indicating '\$0.01 credit added'. The 4-8 PM period is labeled 'Peak' with an orange arrow pointing to an orange bar above the green bar, indicating '\$0.01 or \$0.0025 added charge'. The other periods (6 AM-4 PM and 8 PM-12 AM) are represented by green bars.

What's next?

No action is needed on your part. Beginning with your October bill cycle, your new plan will be in effect.

Send Date: September 15-20, 2023

Your current rate plan will be changing in October.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission, which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

Why is Missouri moving to time-based plans?

When there is a high demand for energy during peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Shift a few of your major appliances, like the dishwasher or dryer, to off-peak times to save on your energy costs. It's ok to use appliances that use less energy, like lights and computers.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan program (sometimes called Level Payment or Budget Billing) and you can still be on Average Pay with these new rates.

Bill Message

It's time to choose your new rate plan. Evergy's Missouri customers will be switching to time-based rate plans starting in October. With time-based rate plans, you'll pay less for energy during off-peak times and more for energy used during the peak hours. **Select your new plan at evergy.com/NewPlans.**

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times.

Which plan is right for your household? We have a tool for that!

Visit our online Rate Comparison Tool* to see which plan may be best for your home based on your past usage history.

Visit evergy.com/TimePlans

*At least 9 months of usage history at your current home is needed to use the Rate Comparison Tool.

All MO: September Email

Choose your plan by October

You have probably heard that the Missouri Public Service Commission (MPSC) is requiring Missouri utilities, including Evergy, to change to [time-based rate plans](#).

While changing to a time-based plan is required, you do have the opportunity to choose from one of four new plans.

To help you choose, our personalized [Rate Comparison Tool](#) can recommend the best plan for your home, based on your past usage.

We ran the numbers...
The **BEST PLAN** for your home is:
Nights & Weekends Max Saver Plan

[Change My Plan](#)

How does the Rate Comparison Tool work?

This personalized [Rate Comparison Tool](#) takes 9-12 months of your historical usage data, applying that information to the rates of the four new time-based plans.

You'll see an estimate of what your Energy bill would be on each of the four plans, based on your home's last year of energy usage. This estimate does not consider any shifting of your energy use to off-peak times, which could help lower your energy costs.

To use this customized rate tool, you'll first log into your [online Evergy account](#). If you don't yet have an account, you can easily create one with the Evergy account number shown on your bill.

Pick a plan that fits your home

Each of the four plans has various peak and off-peak pricing periods. On all plans, you can avoid the higher energy costs during peak hours by shifting large appliance use to off-peak periods.

If you are willing to make a bigger effort to shift usage, plans with the largest price difference can potentially save you more.

Here are the four plans in order of the lowest difference in cost between peak and off-peak hours, and the largest difference.

-  [Peak Reward Saver](#)
Closest to the current standard residential rate, with the lowest price difference between time periods
-  [Standard Peak Saver](#)
This is our default residential rate plan if you don't choose a plan by October
-  [Nights & Weekends Saver](#)
Three time periods with different prices, with an overnight and weekend discount
-  [Nights & Weekends Max Saver](#)
Three time periods with different prices, with the highest difference in prices between time periods

What happens if I don't choose?

If you don't decide to switch to one of the new plans, you'll be automatically enrolled in the default rate plan, the [Standard Peak Saver](#).

We encourage you to [check out all the plans](#) in case there's a better one for your household.

How well do you know your home?

You can avoid higher peak-hour prices by spreading your energy use throughout the day, especially when it comes to larger appliances.

Using your laundry machines during off-peak hours, for example, can cost less. But smaller items, like hair dryers or cell-phone charging, won't make much difference.

[Appliance Chart](#)

You can get personalized information about your home's energy use with our [Energy Analyzer tools](#).

A note about electric heating

As part of the new mandate from the MPSC, your promotional All-Electric rate plan is being discontinued, and these new time-based plans may impact your home this winter (depending on the weather). There are steps you can take to reduce that possibility.

- Plan to shift some of your large-appliance usage, like laundry and dishwashing, to off-peak times.
- Take time now to seal window leaks, install draft stoppers, and replace any dirty furnace filters.
- Pre-heat your home during the day, taking advantage of lower daytime rates.

The most important tip? Choose the right rate plan. Use our tool to compare last year's usage to what you would have spent on each of the four new plans. Then simply choose the most cost-effective plan.

Evergy August 29

We have followed the conversation on Facebook and elsewhere about Missouri's shift to time-based rate plans. We want to take the time to walk through the changes for Missouri residential customers. Let's talk time-based rate plans and your plan options.

Your lives are full and busy, especially when you get home at night. From cooking dinner to washing laundry to watching your favorite shows in the comfort of your homes from 4-8 p.m. It's also the period when energy demand is highest.

The Missouri Public Service Commission (MPSC) mandated Evergy Metro and Evergy West implement time-based rates starting October 1. The intent is for customers to shift your usage to off-peak hours to help reduce grid strain for the benefit of all in our communities.

The good news for you is that you still have a choice here.

- There are four plan options, including the Peak Reward Saver, which looks similar to the plan most customers in Missouri are on now.
- The new default plan, the Standard Peak Saver, offers customers a discounted price on their usage for 20 hours a day (For example: Instead of about \$0.14 kWh, Evergy Metro customers will pay \$0.0958 kWh during summer months). That discounted rate will offset the prices customers pay during the peak hours of 4-8 p.m. during summer months. <https://www.evergy.com/landing/missouri-rate-plans>
- Over 70% of Evergy customers are predicted to see their costs stay the same or save money annually on the new Standard Peak Saver without changing usage habits. If customers on this plan choose to shift their usage away from the peak hours, there's potential to save even more on your bills, especially with the discounts during non-peak hours. We encourage you to use our rate comparison tool to see a month-to-month rate comparison based on your last 12 months of usage to help you find the best plan for your needs: <https://www.evergy.com/ma/rate-comparison>

Evergy's mission is to provide reliable, affordable and sustainable energy for you. A resilient energy grid now and in the future is important to us and state regulators. It's what empowers the communities we live in and serve. We hope this offers some understanding about the changes to come, how they may benefit you and why the MPSC has implemented time-based rates in Missouri.

In the comments, we're going to offer answers to some frequently asked questions about time-based rates and your options. Remember to choose from one of the four time-based rate plans by October 1. Don't worry, if you don't choose a plan, you'll be placed on the default Standard Peak Saver plan.

Electric Heat Customers: September Letter

Audience: Customers on the Space Heating Rate ~103,749

Send Date: September 5-15, 2023

It's time to select your new time-based rate plan.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

With time-based rate plans, you'll pay less for energy than you do today during 20 off-peak hours a day, but when energy demand is high during the peak hours of 4-8 pm, the cost for energy will be higher. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

In order to assist customers with this change, Evergy has developed four new time-based rate plans for you to choose from. It's important to select your new plan by October. If you decide not to choose a new plan, you'll be moved to the new default plan, the Standard Peak Saver starting in October.

Visit evergy.com/SaverPlans or call 1-800-541-0407 to learn more about the plan options and to select your new plan.

We invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which plan best fits your household based on your past energy usage.

An important note about your old rate plan

As part of the new mandate from the MPSC, your current All-Electric rate plan (or electric space heating rate) is being discontinued. Your old plan offered a discounted rate in the winter for electric space heating customers, which is no longer offered. Due to this change, customers with electric heat may experience more impact moving to time-based rate plans, making it especially important to understand your home energy usage, and shift large appliance usage, like doing laundry and running the dishwasher, to off-peak times.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Net Metering Customers: September Letter

Audience: Customers on the Net Metering Rate ~6,766

Send Date: September 5-15, 2023

Your new time-based rate plan is coming soon.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Net Metering program, your rate plan with Evergy will change to the Peak Reward Saver plan in October.

The **Peak Reward Saver** plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 6 am every day.

The Peak Reward Saver plan is the only plan currently available for Net Metering customers.

What's next?

This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your energy will be billed on the Peak Reward Saver Plan. If you have question, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans).

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Why can't I pick one of the other time-based rate plans?

The MPSC has ordered that Net Metering customers move to the Peak Reward Saver plan. This is partly due to Missouri state statute that specifies how net metering is to be calculated and when it is to be available. The Peak Reward Saver plan is currently the only rate plan that meets the Missouri statute criteria.

Are there changes to my net metering agreement?

Although your rate plan is changing, your net metering agreement is not. Just as now, Evergy will purchase energy from you at the Cost to Fuel rate.

How to save on the Peak Reward Saver plan.

This plan is very similar to your current rate, but you can save money by shifting some energy to overnight times. You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Additionally, on the Peak Reward Saver plan, there is a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm. This means that any energy received from your system during those peak times could provide even greater savings.

Low Income and Seniors: September Letter

Your current rate plan will be changing.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

To meet the new requirement, Evergy will move you to our new **Standard Peak Saver plan in October**. No action is needed on your part.

How does the Standard Peak Saver plan work?

- **October through May:**
During these months, the cost for energy will be lower all day, every day. It's especially lower during super off-peak times from midnight to 6 am.
- **June through September:**
During these summer months, the cost for energy is highest during peak hours of 4-8 pm Monday - Friday. All other times the cost for energy is lower than you pay today.

Tip: To save on your energy bill with this new plan, try to limit the use of large appliances, like the clothes dryer or dishwasher, during the summer months from 4-8 pm Monday through Friday. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

Want a different rate plan?

Evergy has three other time-based rate plans, including our new Peak Reward Saver plan, which is similar to the plan you have today. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which of the other plan options may be best.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407

We're here to help!

We know rate plans can feel confusing. If you need help, we are here to assist you.

- **Give us a call:** 1-800-541-0407 from 7 am to 5 pm Monday through Friday
- **Visit us in-person:** Evergy Connect from 9 am to 4 pm Monday through Friday
1710 The Paseo Blvd., Kansas City, MO 64108
- **Visit us online:** [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans)

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Audience: Customers identified as lower income or a senior ~187,293

Update Your Rate Plan

It's time to choose your new rate plan

The Missouri Public Service Commission (MPSC) has required utilities, including Evergy, to change to [time-based rate plans](#) by October. We've made it quick and easy to make your choice right now.

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to manage your usage and be successful on your new plan.

[Plan Options](#)

How do I change my plan?

If you need help, we are here to assist you.

- [Change your plan online](#) before October.
- Call our rate plan hotline at [1-800-541-0407](tel:1-800-541-0407) from 7 am to 5 pm Monday through Friday.
- In Kansas City, stop by our [Connect Center](#) for in-person assistance.

Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

Do I have to pick one?

If you decide not to pick one of the four new plans, you will automatically be assigned to the Standard Peak Saver plan, which is the new default plan for residential customers.

However, that plan might not be the best choice for your household. It's a good idea to look at [all four plan choices](#) and make an informed decision.

We have a personalized [Rate Comparison Tool](#)* that shows what you would pay per year on each plan.

A note about electric heating

As part of the new mandate from the MPSC, your promotional All-Electric rate plan is being discontinued, and these new time-based plans may impact your home this winter (depending on the weather). There are steps you can take to reduce that possibility.

1. Plan to shift some of your large-appliance usage, like laundry and dishwashing, to off-peak times.
2. Take time now to seal window leaks, install draft stoppers, and replace any dirty furnace filters.
3. Pre-heat your home during the day, taking advantage of lower daytime rates.

The most important tip? Choose the right rate plan. Use our tool to compare last year's usage to what you would have spent on each of the four new plans. Then simply choose the most cost-effective plan.

It's time to select your new time-based rate plan.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission, which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

With time-based rate plans, you'll pay less for energy during 20 off-peak hours a day, but when energy demand is high during the peak hours of 4-8 pm, the cost for energy will be higher. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

In order to assist customers with this change, Evergy has four new time-based rate plans for you to choose from. It's important to **select your new plan by October**. If you don't select a new plan, you'll be moved to the new default Standard Peak-Saver plan starting in October.

Visit [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans) or call **1-800-541-0407** to learn more about the plan options and to select your new plan.

We invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which plan best fits your household based on your past energy usage.

Solar Subscription Customers: September Letter

Your new time-based rate plan is coming soon.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Solar Subscription program, the portion of your energy bill from the solar program will not change, but any non-solar energy will be billed on the new **Peak Reward Saver plan**.

The Peak Reward Saver plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 6 am every day.

The Peak Reward Saver plan is the only plan currently available for Solar Subscription program customers.

What's next?

This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your non-solar energy will be billed on the Peak Reward Saver Plan. If you have questions, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans).

Why is Missouri moving to time-based plans?

Evergy now has more time-based rate plan options.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans starting in October.

Good news! You're already on a time-based rate plan (or TOU plan), so you're set. But we encourage you to explore the new additional time-based options in case there's a better plan for your household.

Our online Rate Comparison Tool shows your annual estimated cost on each of the four time-based plan options, based on your past energy usage, as long as you've lived in your home for more than 9 months. We invite you to use the personalized online tool or read your Rate Education Report* that arrived by mail in August to see which plan may best fit your household.

Your current plan has a new name

You were an early adopter of time-based plans, nice work! We have updated the name of your current plan and it is now called the **Nights & Weekends Saver plan**. Nothing else has changed with your current plan, just the name.

What's next?

No action is needed on your part if you're happy with your current plan. Our analysis shows, however, that some customers on a time-based plan could save more money on a different one, so it's worth checking out.

Visit evergy.com/SaverPlans or call **1-800-541-0407** to learn more about the plan options and to select your new plan.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407.

 Send Date: August - Present

Your current rate plan will be changing.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

To meet the new requirement, Evergy will move you in the **Default Time Based Plan** (formerly called Peak Reward Saver).

How does the new default plan work?

The **Default Time Based Plan** is very similar to the rate plan you use today. It also has the lowest price difference between peak and off-peak times. This means that energy used during peak times won't have a major impact on your bill.

The Default Time Based Plan has a set rate for energy most of the day, with only a small increase during the 4-8 pm peak period.

Rate	Monday - Friday	June - Sept	October
Off-Peak	\$0.14	\$0.14	\$0.12
Peak	\$0.15	\$0.15	\$0.17

Note: The actual charge for peak hours is \$0.17, compared to \$0.15 for off-peak hours.

Want a different rate plan?

Evergy has three other time-based rate plans. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report that arrived by mail in August to see which of the other plan options may be best.

*Note: If you have been 30 days current here for less than 6 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan or call our Time-Based Plan hotline for assistance: 1-800-541-0427

We're here to help!

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Missouri's Time-Based Rate Transition
 Beginning in October, customers will be moved to time-based rate plans.

Evergy's Missouri customers will be automatically enrolled in the **Default Time Based Plan** if you don't choose one of the other three plan options. The **Default Time Based Plan** is very similar to the rate plan you have today, and has the lowest price difference between peak and off-peak times.

Questions?

We're here to help you work your transition to time-based rate plans. Visit: evergy.com/realTime

Call: 800.541.0427

Analytics: Use our online Compare My Rate tool to see which plan might be best for you.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 50 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times. With time-based plans, it's important to avoid using large amounts of energy during peak hours.

Default Time Based Plan
 Default residential rate plan with the lowest difference between peak and off-peak times.

Nights & Weekends Max Plan
 Three time periods with different rates, with the highest difference in price between time periods.

Summer Peak Time Based Plan
 Only has peak pricing during the summer months.

Nights & Weekends Max Plan
 Three time periods with different rates, with the highest difference in price between time periods.

Time-Based Plans - Savings Tips

- Delay running your dishwasher:** Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer:** Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Adjust your thermostat to automate off-peak savings:** Adjust your thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours:** Reduce large appliance energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Announcer-read spot

VO: Hey, [Radio Talent Name], here. If you're a Missouri resident like me, things are changing with your energy bill. That's because in October, Missouri is being mandated to move to time-based rate plans.

So what's that mean for us? Well, due to demand, we'll pay more for energy during peak hours. BUT, during the other 20 off-peak hours, we'll actually pay less.

Evergy has four time-based rates to help make the switch. They'll even recommend the best plan for you based on your usage history.

Learn more at evergy.com/myrate.

Produced spot

VO: Hey Missouri, have you heard? Missouri electric utilities, including Evergy, are being mandated to move to time-based rates beginning this October.

So what's that mean for you? Well, to help reduce the strain on the power grid you'll pay more for energy during peak hours. BUT, during the other 20 off-peak hours, you'll actually pay less.

Evergy has four time-based rates to help Missouri residents make the switch. To find the plan that best fits your lifestyle, check out our personalized "Rate Comparison" tool at evergy.com/myrate.

Send Date: October 9-14, 2023

Dear [Name],

Important update to Evergy's Time-based rate plans.

Please note: The default time-based rate plan has changed from past Evergy communications.

During the last few months, Evergy has been working to inform you about our new time-based rate plans. Recently, the Missouri Public Service Commission (MPSC), which regulates Evergy, has updated which of the four rate plan options will be the default rate plan. For customers who do not select a time-based plan on their own, **the new default plan will be the Default Time Based Plan (formerly called Peak Reward Saver).**

We've noticed that you have not selected a new plan yet. There is still time to pick your plan but **if you don't select soon, you will be placed into the Default Time Based Plan before the end of the year.** We encourage all customers to select a plan that works best for their household.

How does the new default plan work?

The **Default Time Based Plan** is very similar to the rate plan you have today. It also has the lowest price difference between peak and off-peak times. This means that energy used during peak times won't have a major impact on your bill.

The Default Time Based Plan has a set rate for energy most of the day, with only a small increase during the 4-8 pm peak period.

TIP: On the **Default Time Based Plan** it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

Want a different rate plan? We're here to help!

Evergy has three other time-based rate plans. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online personalized Rate Comparison Tool. You can change your rate plan at any time.

We know selecting the right rate plan can feel confusing. If you need help, we are here to assist you.

- **Give us a call:** 1-800-541-0407 from 7 am to 5 pm Monday through Friday
- **Visit us in-person:** Evergy Connect from 9 am to 4 pm Monday through Friday
1710 The Paseo Blvd., Kansas City, MO 64108
- **Visit us online:** evergy.com/TimePlans

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Default Plan Change Email

Audience: Customers who have not yet selected a rate.

Send Date: October 9-18, 2023

Changes to the default time-based plan

By now, you know that [Missouri is changing](#) to time-based rate plans this fall. You can choose from one of four new plans, or if you do not select one on your own, you will automatically be moved to the default plan.

Recently, the Public Service Commission (MPSC), which regulates Energy, has updated which of the four rate plans will be the "default" plan. The new default plan will be the [Default Time Based Plan](#) (formerly called the Peak Reward Saver plan).

We requested this change based on feedback from customers. Among the four plans, the Default Time Based Plan is the most like Energy's previous standard plan. It has the lowest price difference between peak and off-peak times.

This means that energy used during peak times won't have a major impact on your bill.

The Default Time Based Plan has a set rate for energy most of the day, with only a small increase during the 4-8 pm peak period.

Want a different plan?

It's not too late to choose one of the other time-based plans.

We have a personalized [Rate Comparison Tool](#) to help you choose the plan that's best for your home, based on your prior year's energy usage.

Be mindful of peak hours

Reduce large appliance use during peak hours of 4-8 pm.

Use your dishwasher delay button

Adjust your thermostat to avoid peak hours

Shift when you use your clothes dryer

Learn more at evergy.com/SaverPlans

energy

STEP ONE:

Be mindful of peak and off-peak hours
Energy costs are higher during peak hours of 4-8 pm, and off-peak times and pricing varies by plan.

Off-Peak Hours
Demand for energy is lower during these times, so you're charged less. Off-peak times vary by plan but are typically late at night and in the early morning.

Peak Hours
Demand for energy is higher during these few hours, so energy costs more during peak hours. Peak hours are 4-8 pm and vary by day and season.

Costs and times vary by each plan. Get your plan's peak and off-peak times at evergy.com/SaverPlans

STEP TWO:

Optimize when you use your large appliances
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Be mindful of peak hours
Reduce large appliance use during peak hours of 4-8 pm.

Use your dishwasher delay button

Adjust your thermostat to avoid peak hours

Shift when you use your clothes dryer

Learn more at evergy.com/SaverPlans

STEP THREE:

Use our Energy energy engagement tools
Use our personalized tools to help you understand when you're using energy and how to save money.

- Weekly Rate Coach Emails**
With our weekly Rate Coach emails, you'll get an email every week that breaks down your weekly energy usage by each hour of the day, helping you to see when you're using energy.
- Energy Engagement Portal**
Through your online Evergy MyAccount portal, you can see your usage patterns broken down by hour, helping identify when you're using the most energy.
- Compare My Rate Tool**
Use our online rate compare tool to see which time-based rate plan is best for you.
- Average Payment Plan**
Sometimes called budget billing, this program averages your bills each month to help keep payments level throughout the year.
- High Bill Alerts**
When you enroll in our High Bill Alert emails, you'll receive a notice if you're currently on track to receive a higher-than-normal bill.

energy

Internal Use Only

Welcome to your weekly Rate Plan Coach, an email designed to help you save money by avoiding high-cost times

You're currently on the Super Saver & Weekend Max Saver plan which offers a very low energy price overnight. To help avoid heavy electricity use during the weekday peak hours of 4 to 8 p.m. (and shift your electricity usage to overnight).

Here's how you used electricity during the weekdays

What parts of your routine could you do at off-peak times?

1 kWh is equal to 3,412 BTUs, or 3,412 Btu. (1 kWh = 3,412 Btu)

On weekdays, electricity is 12x more expensive from 4 to 8 p.m.

How can you save big during peak hours?

Appliances that use a lot of energy. By using them at lower-priced, Super Saver hours, you'll save more money.

These high-energy appliances can be used at lower-priced, off-peak times to save money.

Time to prepare for lower seasonal price changes!

Starting October 1, Energy's summer pricing will end for the year. While fall and winter rates are lower than summer pricing, you'll save even more if you still have appliances and heavy loads that peak loads at 4-8 p.m. on weekdays, especially if you have electric heating. Take a moment to make adjustments to your routine to save the fall and winter. Here are ideas to get you started.

	Summer	Non-Summer
Daytime (12pm - 6pm)	\$0.15 / kWh	\$0.15 / kWh
Evening (6pm - 11pm)	\$0.15 / kWh	\$0.15 / kWh
Overnight (11pm - 12am)	\$0.15 / kWh	\$0.15 / kWh
Super Off-peak (12am - 6am)	\$0.15 / kWh	\$0.15 / kWh

You spent about the same amount on electricity during peak hours last week

Here's how you used electricity during the weekdays

What parts of your routine could you do at off-peak times?

1 kWh is equal to 3,412 BTUs, or 3,412 Btu. (1 kWh = 3,412 Btu)

On weekdays, electricity is 12x more expensive from 4 to 8 p.m.

Ways to Save

Shift non-essential loads away from peak hours. Consider using electric water heaters, clothes washers, dryers, and other appliances during off-peak hours. This can help you save money on your electricity bill.

DEFAULT TIME BASED PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

The Default Time Based Plan has very small differences in price between peak and off-peak hours, so you don't have to worry much about when you use energy during the day.

This is a tiered plan, meaning that prices go up or down by tiers as you use more energy throughout the month, depending on the season.

Default Time Based Plan All Year (Mon-Sun)

Monthly kWh	June - Sept	Oct-May
First 600:	\$0.11829	\$0.09784
Next 400:	\$0.11829	\$0.07718
Over 1000:	\$0.12829	\$0.07718

Default Time Based Plan All Year (Mon-Sun)

Monthly kWh	June - Sept	Oct-May
First 600:	\$0.11829	\$0.09784
Next 400:	\$0.11829	\$0.07718
Over 1000:	\$0.12829	\$0.07718

How does the plan work?

October through May
During these months, the cost of energy gets lower as you use more.

There is a small extra charge of ¼ of a cent, for energy used during the peak times of 4-8 pm, and there's a one-cent discount for energy used between midnight and 6 am.

June through September
During the summer, energy prices increase as you use more.

There is an extra charge of one cent during peak hours of 4-8 pm, and a one cent discount on energy used between midnight and 6 am.

How to save on this plan

On the Default Time-Based Plan, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Wash clothes on cold. Studies show they get just as clean while using less energy. Avoid peak hours to save, too.
- Run full dishwasher loads to save energy and use the delay-start setting to run to cheaper overnight hours.
- Pre-heat your home: If you have electric heating, adjust your thermostat a few degrees before 4 pm, reducing the time the compressor runs during the peak hours. Tip: most [smart thermostats](#) have time-based settings.

Shifting the use of your large appliances to off-peak hours will make a more significant difference on your bill.

Smaller items like cell-phone chargers, the vacuum cleaner, laptops

SUMMER PEAK TIME BASED PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

With time-based plans, WHEN you use energy matters.

On the [Summer Peak Time Based Plan](#), it pays to think about the timing of your energy use. From the months of October-May, shifting some of your appliance usage to the overnight hours of midnight to 6 am can really make a difference. That's because energy used during overnight hours costs about half as much.

October - May Every Day (Mon-Sun)

Super Off-Peak Off-Peak

[View Rate Details](#)

How does the plan work?

October through May
During these months, the cost for energy will be lower all day, every day. It's especially lower during super off-peak times from midnight to 6 am.

June through September

During the summer months, the cost for energy is highest during peak hours of 4-8 pm on weekdays. At all other times the cost for energy is lower.

How to save on this plan

With time-based rates, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Schedule your laundry to run overnight by using a delay timer.
- Use the delay-start setting on your dishwasher so it runs after midnight.
- Pre-heat your home before 6 am. If you have electric heating, set your thermostat to warm your home a few degrees higher before 6 am, then set it back to normal. Tip: most [smart thermostats](#) have time-based settings.

Smaller items like cell-phone chargers don't draw enough energy to make a huge difference, so it's up to you whether to delay charging to after midnight.

How does your home use energy?

It's helpful to know which items in your home use a lot of energy, and which use much less.

We have a tool to help. Our quick quiz asks you about your home, then estimates what you are spending on appliances, heating/cooling, lights and more.

NIGHTS AND WEEKENDS PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

With time-based plans, WHEN you use energy matters.

On the Nights and Weekends Plan, thinking about the timing of your energy use, and shifting some usage to off-peak evening and weekend hours can really pay off. That's because off-peak power costs about 60% less.

[View Rate Details](#)

How does the plan work?

Weekdays
From Monday through Friday, the days are divided into three time periods: Peak, Off-Peak and Super Off-Peak.

The Peak prices are higher because energy costs the most to produce on weekdays between 4-8 pm.

Weekends and Holidays
There are no peak hours at all on the weekends or on holidays.

How to save on this plan

With time-based rates, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Try doing your laundry in the mornings or on weekends.
- Start your dishwasher at bedtime instead of right after dinner or use your delay-start setting.
- Pre-heat your home: Adjust your thermostat a few degrees before 4 pm, reducing the time the compressor runs during the peak hours. Tip: most [smart thermostats](#) have time-based settings.

Shifting the use of your large appliances to off-peak hours will make a more significant difference on your bill.

Smaller items like cell-phone chargers, the vacuum cleaner, laptops and lamps don't draw enough energy to make a huge difference, so it's up to you whether to avoid peak hours with those types of items.

How does your home use energy?

It's helpful to know which items in your home use a lot of energy, and which use much less. The impact of spreading your usage throughout the day will be greater if you shift the use of large appliances.

We have a tool to help. Our quick quiz asks you about your home, then estimates what you are spending on appliances, heating/cooling, lights and more.

Take the [Analyze My Usage](#) quiz today.

Get winter ready on your new time-based rate plan.

To save this winter, optimize your home's energy usage to avoid peak hours.

Costs and peak times vary by each plan. Get your plan's peak and off-peak times at [evergy.com/TimePlans](https://www.evergy.com/TimePlans).

Stay cozy and save with these time-based plan savings tips

Energy costs are higher during peak hours of 4-8 pm on most rate plans.

- 1 Kitchen**
Delay Start: Delay your dishwasher until overnight or in the morning.
- 2 Living room**
Program Your Thermostat: Use a smart thermostat to adjust your heating system to avoid peak hours.
- 3 Garage**
Off-Peak Charging: If you have an electric vehicle, charge it during off-peak hours to save on charging costs.
- 4 Laundry room**
Wash Clothes Wisely: Try cold water for washing clothes, and run your washer and dryer during off-peak hours.
- 5 Bedroom**
Seal Drafts: Ensure windows and doors are sealed to prevent heat loss.
- 6 Office**
Monitor Energy Usage: Login to your Evergy online MyAccount to monitor your usage by hour.

Do you have Electric Heat? Customers that use electricity to heat their home may experience more impacts on time-based rate plans, making it especially important to limit high energy use during peak times. Adjust your thermostat so your heating system doesn't run as long during peak hours.

Evergy Mandated Time-Based Rate Campaign

Executive Summary

Evergy's Time-Based Rate Campaign has proven to be successful in creating awareness among Missouri residential customers.

- In October, 89% of Missouri residential customers had heard about Evergy's time-based rates. That is a 98% increase from the baseline measurement in June.
- The number of Missouri residential customers who recall Evergy communications about the new time-based rates has more than doubled in the past few months (increased from 32% to 87%)
- When first asked about their knowledge of time-based rates, Evergy customers rate their knowledge a 4.1 on a 7-point scale. But when asked what they believe to be true about time-based plans, most correctly identify the key aspects of time-based plans. This may show that customers know more about the plans than then think they do.

TOU Awareness & Understanding Research

Top Line Report- Wave 2

Insights by TrueNorth

October 2023

Objectives and Methodology

TOU Customer Education Campaign; Awareness and Understanding; Wave 2.

Measure the Impact of how the Time of Use Campaign is Performing on Educating Customers

- To measure awareness of the transition to a Time of Use rate plan.
- Determine understanding of and familiarity with Evergy's Specific TOU rate plans and the appeal of multiple rate plans to fit customers' lifestyles.
- Measure overall satisfaction with Evergy as a provider and with customers' current rate plan.
- Monitor customer's opinions and perceptions of Time Of Use rate plans and reactions to Evergy making this change.

Research Methodology

- A 15-minute online survey was conducted in September 2023 among n=604 respondents. This was the second wave, with wave one conducted in May 2023 among n=600 respondents.
- This was a blind study among Evergy customers
- Respondents were screened based on the following criteria
- 18+ years old
- Evergy is the current electricity supplier
- Sole or joint decision maker for household energy decisions
- If renter, electric bill must not be included in rent

Executive Summary

The Time Of Use awareness campaign was successful

- The TOU plan increased in awareness from 36% to 71% among non-TOU plan users. This is strong awareness, given that customers heard about this primarily through mail, email, and inserts.

Time Of Use Plan Awareness Among Non-Users

- Similarly, the awareness that different rate plans exist increased from 45% to 81%.
- However, of those aware, the level of understanding increased only slightly. Those who said they know “a lot” or a “good amount” only increased by 4 points (not statistically significant). But when asked what they believe to be true of time-based plan, many show understanding of time-based plans.
- The knowledge of tools on the Evergy Website increased significantly (from 25% to 57%)

Satisfaction with Evergy dropped as awareness increased

- Satisfaction dropped from May to September 2023 after communications of the rate plans.

Satisfaction with Evergy
(Percent Extremely or Very Satisfied)

Interest in the Time of Use plans are limited

- Only 13% say they are positive about the idea of switching to a TOU plan. Most do not believe they will save money by switching.
- Similarly, only 16% say they will save money on this plan. About half (46%) believe their rates will increase.

Percent of Customers Who Believe they will save money with the Time Of Use plans

Executive Summary

The Time Of Use Plan has the lowest satisfaction among its users.

- Not only are non-users not interested in using this plan, additionally, current users give this plan the lowest satisfaction scores.
- It is possible that the TOU plan's benefits are not as clear as that of the other plans. The names of the other plans also convey a benefit (e.g., good for the environment). Customers may be willing to pay more if the benefits are clear.

Satisfaction of Rate Plan
(Percent Extremely or Very Satisfied)

There are opportunities to improve understanding of the Time Of Use Plan benefits.

- About two-thirds appear to understand the basic premise of the plan (significantly up from Wave 1), although only 18% say they understand it a lot or a great deal.
- However, about half (48%) understand that this will reduce the load on the grid (48%), save money on generation costs (36%), or be better for the environment (24%).
- Customers believe this will benefit Evergy or the government; few believe it will benefit the customers (11%).

Overall Satisfaction with Evergy

Around half (49%) of customers are satisfied with Evergy. This is significantly lower than Wave 1.

Overall Satisfaction with Evergy as an Electric Provider

Statistically higher/lower than W1 ↑↓

Internal Use Only

Base: Missouri respondents W1 n=601; W2 n=604

Awareness of New Rate Plans

Almost 8 in 10 (79%) customers have now seen or heard about the new rate plan options, up significantly from wave 1 (24%). Over half of those aware (58%) understand usage rates are based on time-of-day usage (time of day, peak, weekends, nights). This is also significantly more that understood this concept in Wave 1 (36%)

Have Heard About the Rate Plan

Customers Understanding of the Rate Plan

↑↓ Statistically higher/lower than W1

Base: Missouri respondents W1 n=601; W2 n=604

Q12. Today, we are talking about your electricity supplier, Evergy. Have you seen or heard anything recently about Evergy offering new rate plan options to customers?

Base: Missouri respondents aware of new rate plan W1 n=146; W2 n=477

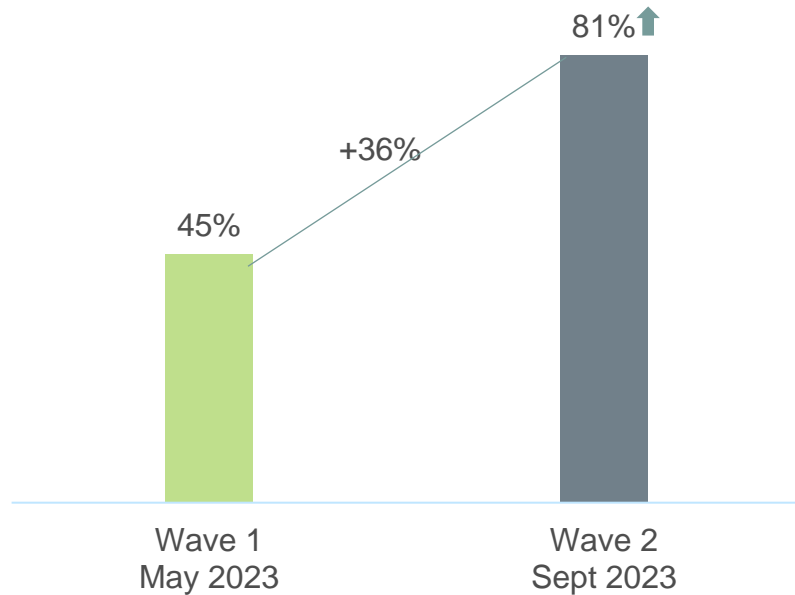

Q13. What type of new rate plan is Evergy offering customers?

Aided Awareness of Rate Plans Options

There has been a significant increase (+36%) of those aware of different types of rate plans. We see an upward shift in familiarity with those plans since W1.

Aware of Choices of Different Types of Rate Plans

Familiarity with Rate Plans

115 Base: Missouri respondents Q14 W1 n=600, W2 n=604 and Missouri respondents aware of different plans Q15 W1 n=270 W2 n=489
 Q14. Are you aware that Evergy currently offers you choices of different types of rate plans?
 Q15. How familiar are you with the different types of plans available from Evergy?

↑↓ Statistically higher/lower than W1

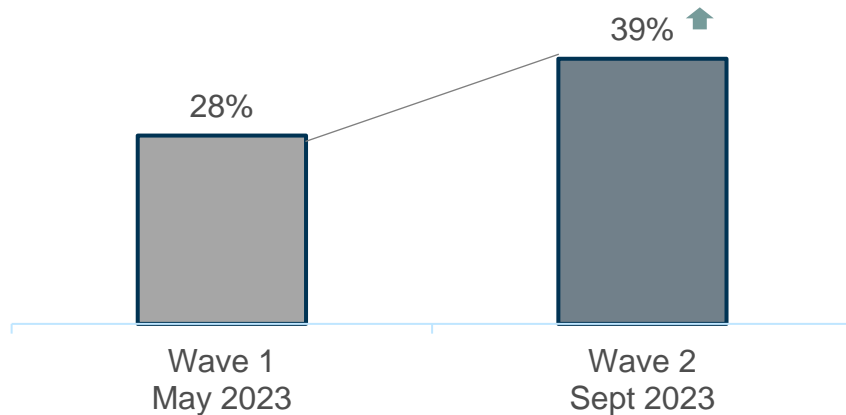

Selection of Rate Plans

Significantly more people are actively choosing their rate plan now than in W1. Customers were more likely to select the Time Of Use rate plan in W2 and less likely to select the standard utility rate plan.

Actively Selected Rate Plan

(% selected rate plan)

Electric Plans

(% who chose electric plans)

116 Base: Missouri respondents W1 n=600 and W2 n=604 and Missouri respondents who chose plan Q17 W1 n=270 and W2 n=238
 Q16. Did you actively select your current rate plan, or did Evergy assign you to a default rate plan?
 Q17. What electric rate plan did you choose?

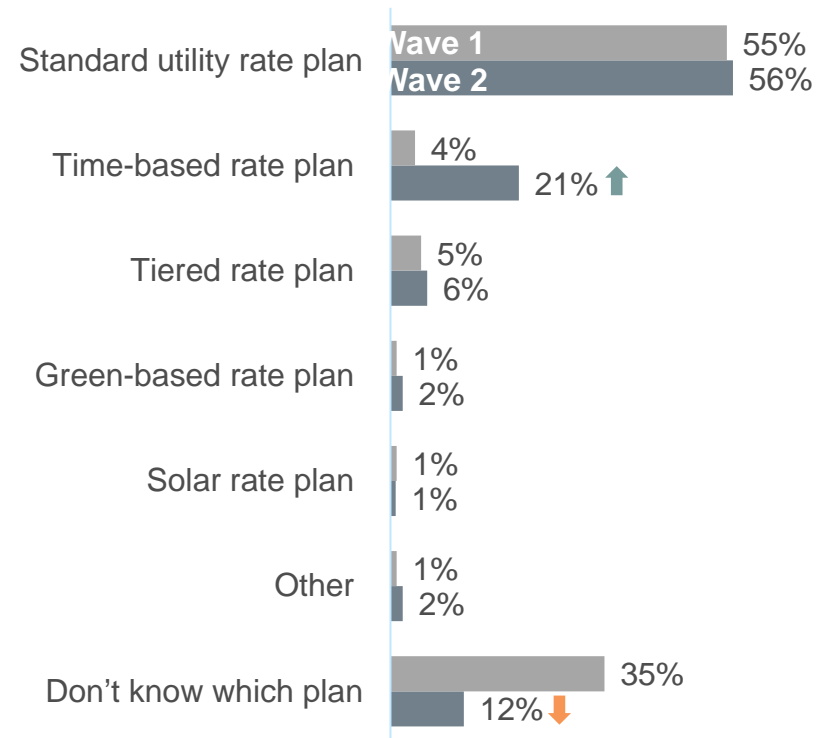

Current Electric Plan (Non-Selectors)

In Wave 2, customers who did not select their plan are likelier to tell us they are on the Time Of Use rate plan.

In Wave 2, customers who did not choose their plan are likelier to tell us they are on the Time Of Use rate plan.

- The proportion of these customers who did not know their plan dropped significantly from Wave 1.
- Only 12% indicated they did not know which plan they were on in Wave 2 compared to 35% in Wave 1.

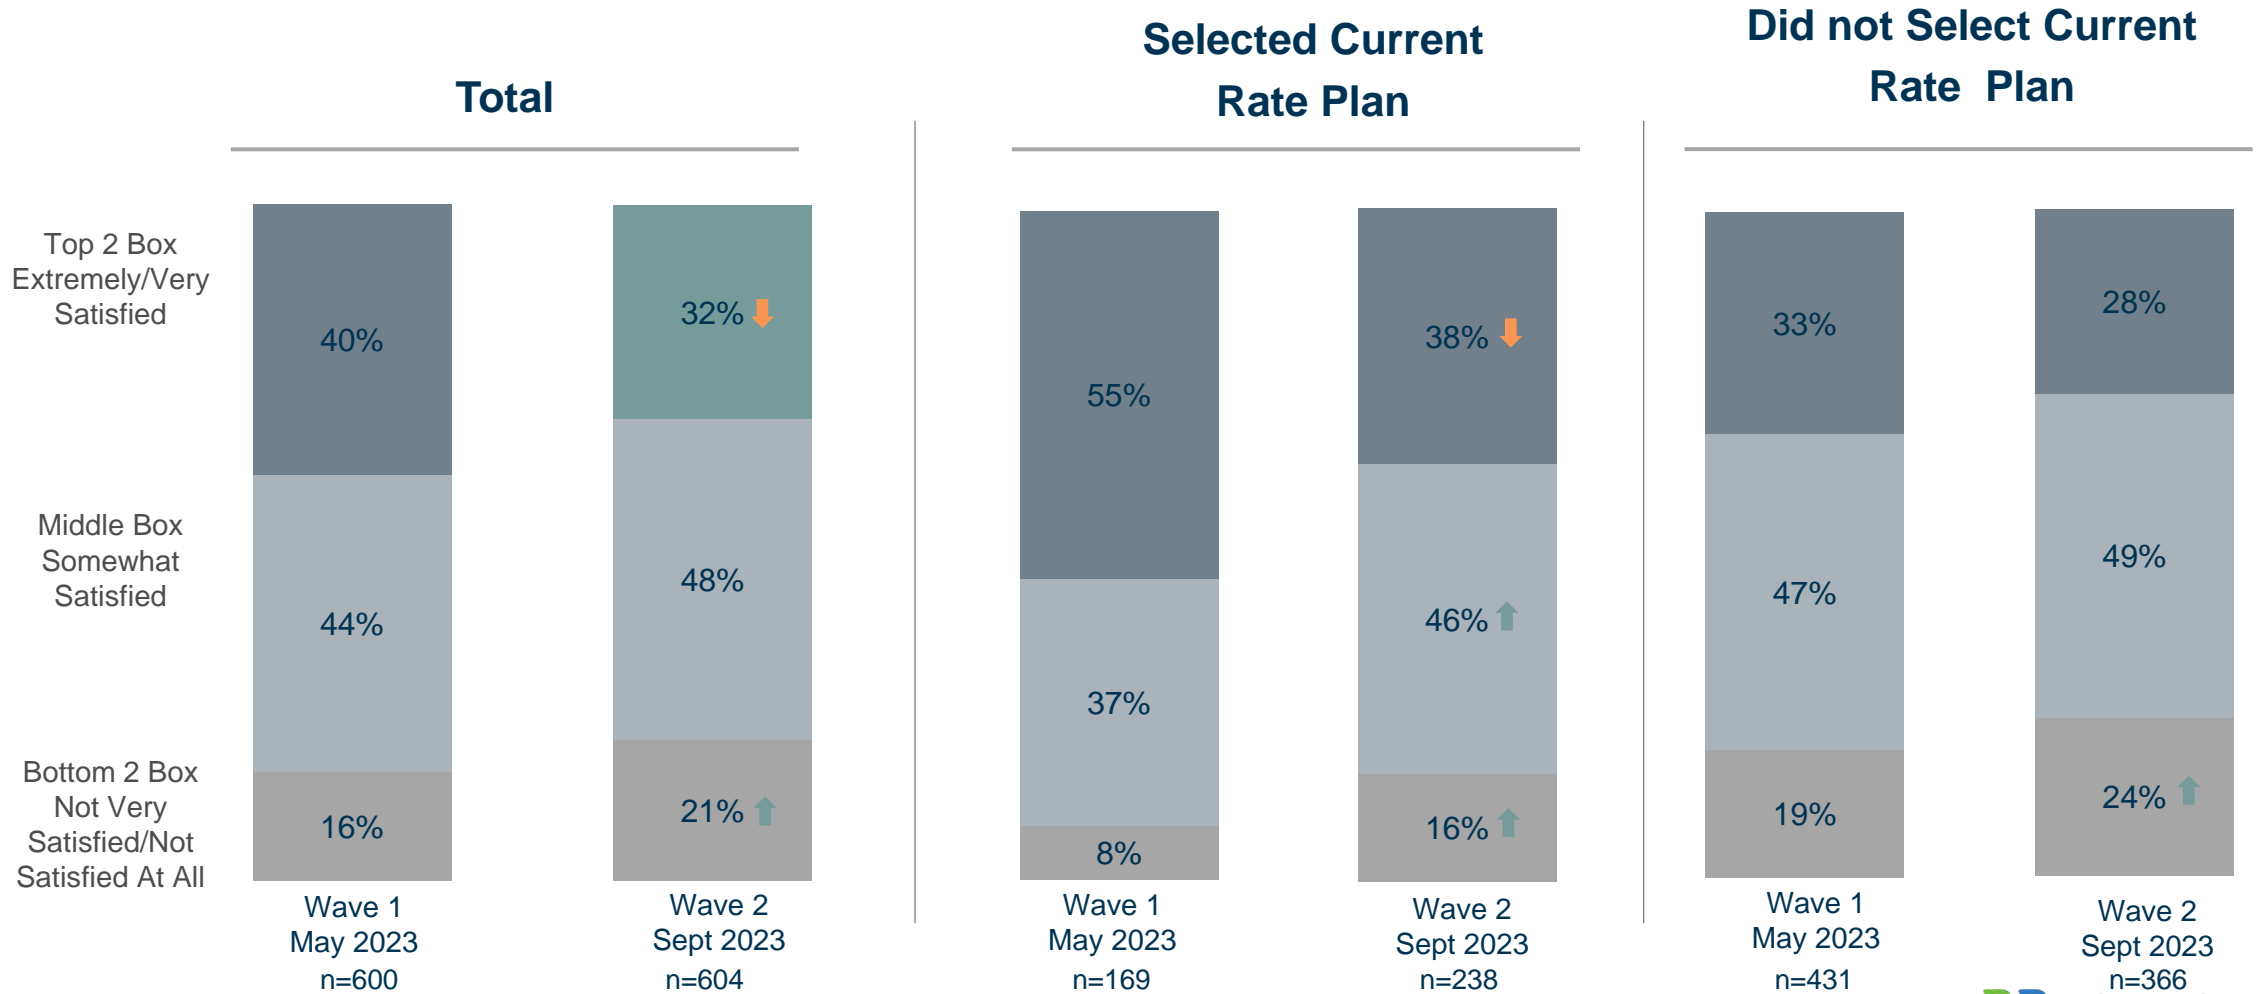

Current Electric Plan

↑ ↓ Statistically higher/lower than W1

Satisfaction with Current Rate Plan Selection

Customers overall are expressing lower levels of satisfaction with their current rate plan. Those who did not choose their rate plan indicated the highest levels of dissatisfaction.

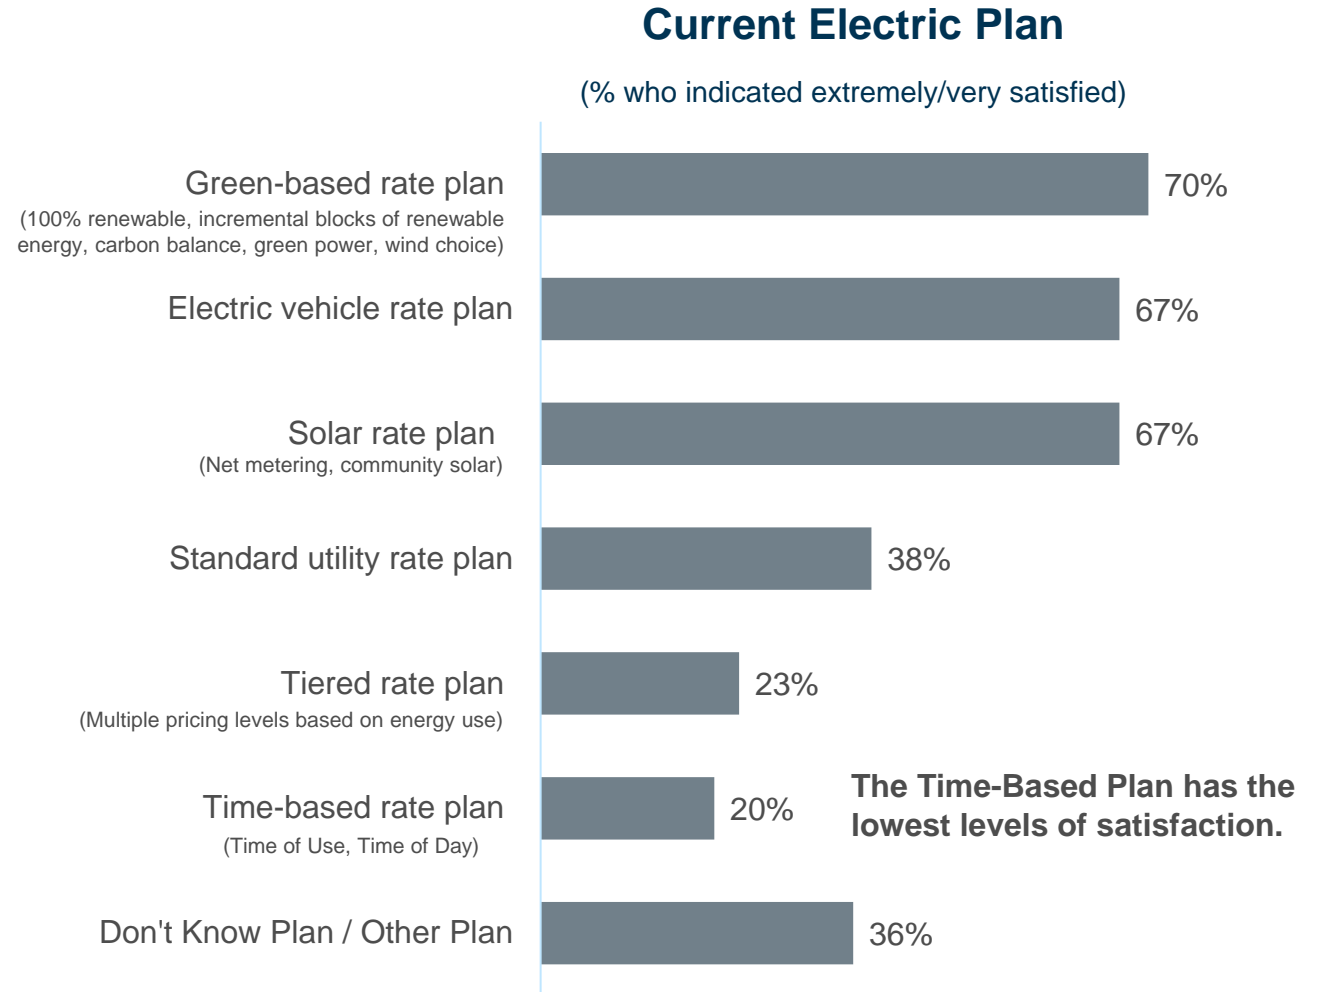

118 Base: Missouri respondents
Q19. How satisfied are you with your current rate plan from Evergy?

↑ ↓ Statistically higher/lower than W1

Overall Satisfaction with Evergy Rate Plans

Those using the green-based, electric vehicle, or solar rate plan tend to be highly satisfied; however, this represents a smaller group. The Time Of Use and tiered rate plans have the lowest levels of satisfaction.

Awareness and Usage of Evergy Tools

Many know that Evergy provides tools on their website to understand electricity usage. This has shown a significant increase since Wave 1. A little over half of those aware that Evergy provides tools use them.

Knowledge of Tools on Evergy Website

(% overall respondents)

Usage of Tools

(% those aware of tools)

↑ Statistically higher/lower than W1

Base: Missouri Respondents W1 n=600 and W2 n=604

Q44. Did you know that Evergy is providing tools on their website which you can use to understand your electricity usage to help you choose the Time Of Use rate plan which is best for you?

Base: Missouri Respondents aware of website tools W1 n=152 and W2 n=347

Q45. Have you visited the Evergy website and used any of these tools?

Evergy Brand Evaluation

Evergy is more likely to be seen as proactive and transparent with customers in W2.

Statements to Describe Evergy

(% overall respondents)

W1 Difference

Perceptions of Evergy have changed somewhat since the first wave

- On the positive side, Evergy is more likely to be seen as proactive and transparent.
- It received lower scores for affordability and reliability

Statement	(% overall respondents)	W1 Difference
Provides helpful resources and information	30%	3%
Proactive and transparent with customers	25%	5% ↑
Helps me manage my home energy use	22%	2%
Communications from Evergy fit with their image	20%	3%
Helps me manage my bill during changes in seasonal..	20%	2%
Powers my life with affordable and reliable power	19%	-4% ↓
Seeks customer or community input on important issues	18%	-1%
Provides more reliable service than other utility companies	15%	-4% ↓
Supports local businesses and my community	14%	-3%
Seen as a leader in its communities	14%	-3%
An important part of customers' lives, beyond providing..	12%	-4% ↓
Is seen as an innovator in its communities	12%	0%
Has my best interests at heart	11%	0%
Adds value beyond just providing energy	9%	-1%
Cares that my home is where I can be myself	7%	-2%
None of the above	32%	2%

- *Plan Beliefs*
- *Interest in the Time Of Use Plans*

Evergy Time Of Use Rate Plans

Non-users awareness of the Time of Use plans has almost doubled since W1. Of those aware, knowledge has increased since W1.

Aware of Time-Based Plans

Knowledge of Time-Based Rate Plans

Base: Missouri respondents not on Time Of Use plan Q20 W1 n=559 and W2 n=479

Q20. Before today, have you ever heard of Evergy's time-based rate plans? This would be a rate plan where electricity costs will vary based on the time of day you use it.

Base: Missouri respondents not on Time-Based but who have heard of it Q21 W1 n=204 and W2 n=339

Q21. How would you rate your knowledge of the different time-based rate plans that Evergy allows you to choose from? (10-point scale with 10 as Know a great deal and 1 is Know nothing at all)

Evergy Time-Based Rate Plans

Understanding of the Time-Based Rate Plan.

Many understand the Time-Based Rate Plan

- However, there is room for improvement as roughly two-thirds understand that you pay more during peak hours.

Most do not believe that the Time-Based Rate Plan will lower their electric bill.

- Just over a quarter (28%) believe it will lower their electric bill.

What Customers Believe About the Rate Plans

Communications

Around 7 in 10 customers (69%) have heard communications about the rate plans, which is almost 3x the number of recalls since Wave 1. Most communications remembered came in the mail, followed by email and electric bill.

Recall Communications About Rate Plans

Where Customers Have Heard Communications

Retained Messages

More than half of customers have heard that they must be on a time-based rate plan and that it is required by the end of the year. This is vastly different than W1, suggesting customers are beginning to understand the transition.

Changes to Electric Services Respondents Have Heard About

Future Communication Preference

Around one-third (32%) either have the needed information or have already chosen a plan. Around 30% each would like to understand more about the cost implications or a better explanation of the plans.

What Customers Want to Know

More people in W2 (+12%) indicated nothing vs W1 (14%).

More people in W1 ask about rates (20%)

Customer Verbatims

- "Already switched based on suggestions from Evergy"
- "Nothing, I read the email and made my choice right away."
- "Details on costs and plans"
- "Everything"
- "Will it lower my bill?"
- "Why are we being forced to change something that works fine?"
- "What my projected monthly bill will be and how will the rates be different"

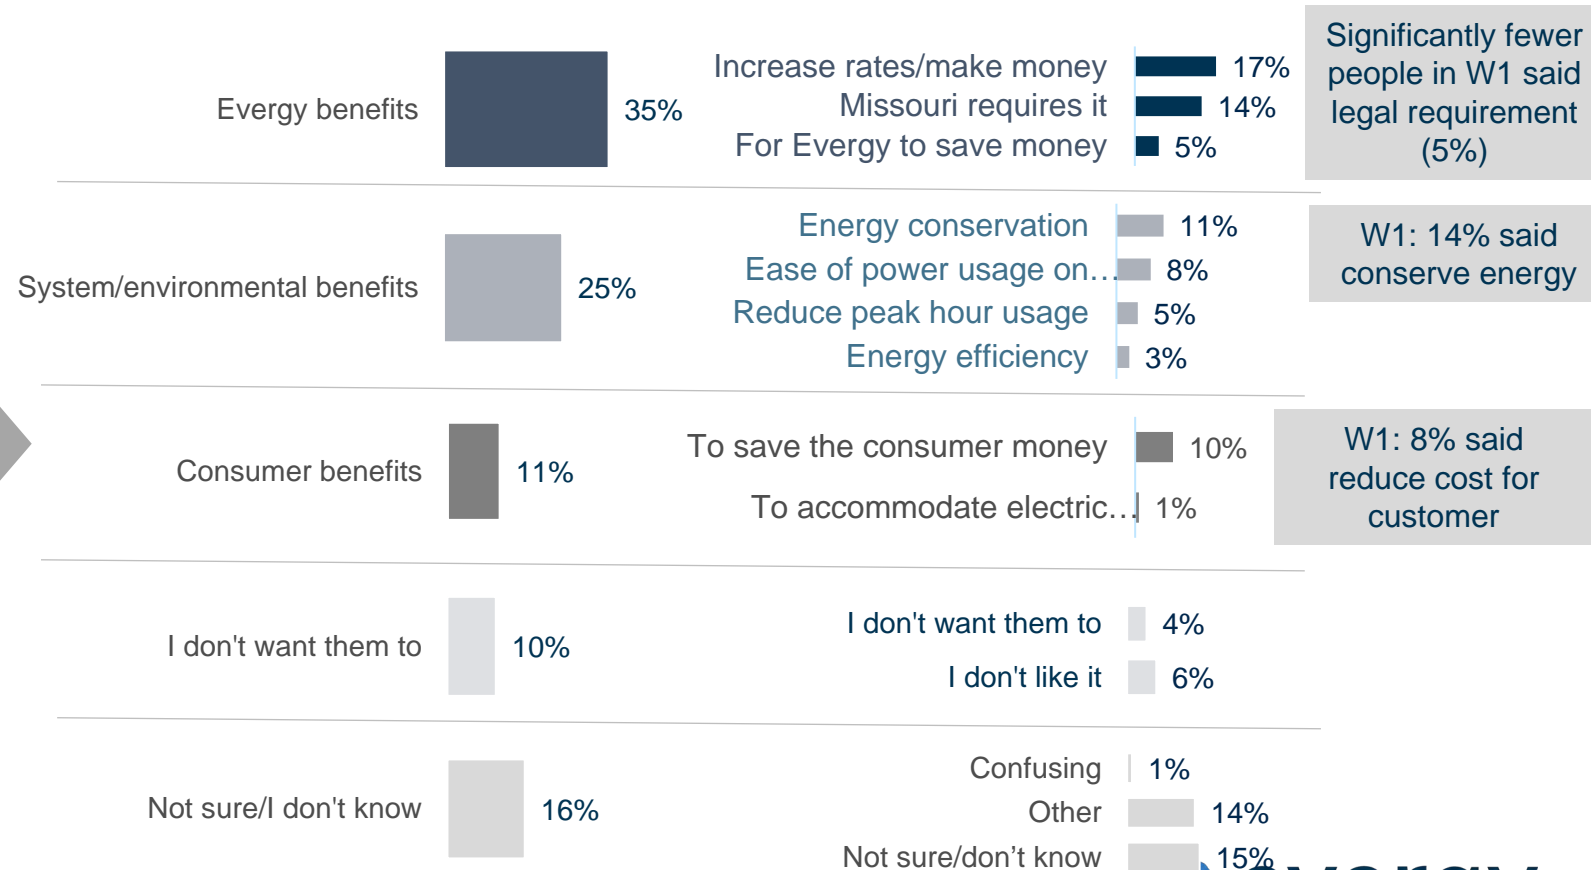

Awareness and Current Understanding

Almost 80% are aware of the time-of-day rate plans. A little more than one-third see it as a benefit to Evergy. Few believe it is a benefit for the customer.

Awareness of Time-of-Day Rate Plan

Why Evergy Needs Customers on a Time-Based Plan

Base: Missouri respondents W1 n=600 and W2 n=604

Q26. Before today, were you aware that the costs of electricity will vary based on the time of day that you use it by the end of 2023?

Q27. Why do you think Evergy needs to change all their customers to enroll in a time-based rate plan?

Perceptions of Why Evergy is Switching to Time-Based Rate Plans

The perception that switching will save money, for either Evergy or the consumer, has gone down significantly.

Why Customers Believe Evergy is Switching

Appeal of Time Of Use Rate Plan

A little over 1/3rd of customers indicated that the overall appeal of the time-of-use-based plan was not appealing. However, around 30% do find the ability to choose their plan appealing. The Time Of Use rate plan is less appealing than it was in W1, and the ability to choose among options does not mitigate this.

Overall Appeal of Time Of Use Rate Plan

Appeal of Being Able to Choose Time Of Use Plan

↑ ↓ Statistically higher/lower than W1

Concern Regarding the Time Of Use Rate Plan

The gap has increased since Wave 1, and twice as many customers find the Time Of Use rate plan concerning compared to those who do not. The top concern is that their electric bills will go up.

Level of Concern About Moving to New Rate Plan

Concerns Customers Have About Switching Rate Plan

↑ ↓ Statistically higher/lower than W1

131 Base: Missouri respondents Q32 W1 n=600 and W2 n=604 and Q33 W1 n=466 and W2 n=491
 Q32. How concerned, or not concerned, are you about moving to a rate plan where the costs of electricity will vary based on the time of day that you use it?
 Q33. What concerns, if any, do you have about switching to a rate plan where the costs of electricity will vary based on the time of day that you use it?

Money Savings

Fewer customers now believe they would save money on the new rate plan when compared to earlier this year. Furthermore, the amount of savings they believe it might save is less than in Wave 1.

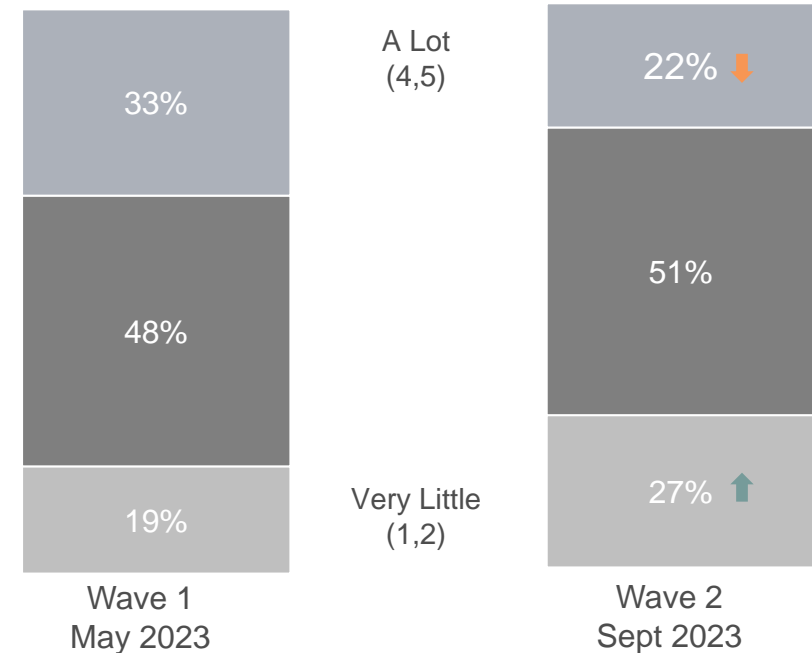

Perception of Saving Money on a Time-of-Use Rate Plan

(% all respondents)

Amount Saved

(% of those who believe it will save money)
