

EC-2023-0395

Brett Felber
VS
Ameren Missouri

Attached is another audio recording from today November 13, 2023, in which again, I asked about the CWR plans. Unfortunately, the representative gave me no options. I had to bring talking to the Regulatory Department before the Representative even mentioned it.

This goes to show that Ameren's transparency doesn't exist.

Attached is the audio recording.

I really hope my motion gets considered for discussion on Tuesday November 14, 2023, as these are clear violations by Ameren Missouri. I would think the Commission and the PSC as a whole would have a care about what the utility provider is getting away with.
