)

**ORDER APPROVING APPLICATION TO MODIFY TECHNICAL RESOURCE
MANUAL AND PROGRAM DESIGN INCENTIVE RANGES**

Issue Date: March 27, 2019

Effective Date: April 1, 2019

On March 12, 2019, Kansas City Power and Light Company and KCP&L Greater Missouri Operations Company (collectively, the "Company") filed its Application for Approval of Modification to Its Demand-Side Programs with the Missouri Public Service Commission ("Commission") for approval to modify the Company's Technical Resource Manual ("TRM") and Program Design Incentive Ranges. This request represents modifications to Appendix 1 and Appendix 2 of the Non-Unanimous Stipulation and Agreement ("Stipulation") in File Nos. EO-2015-0240 and EO-2015-0241, which was approved by the Commission on April 6, 2016.

The Company also requests expedited approval of the application to be effective on April 1, 2019 to coincide with the next Program Year start date. The Company explains that by having the same date, the EM&V reports will not require split comparisons for the

deemed value (old and new) to actual value. The Company believes having the same date avoids complications with evaluators and state auditors' measure tracking and net to gross calculations. It will also aid the Company for other reporting of throughput disincentive and cost effectiveness if there is a clean break at Program Year. The Commission set a deadline for a Staff recommendation and responses by other parties. Staff filed its recommendation on March 19, 2019, and no other parties filed a response to the Company's application or request for expedited treatment.

Staff states that the proposed modifications in the application are primarily based on incorporating the Evaluation, Measurement, and Verification ("EM&V") results for the Company's MEEIA Cycle 2 program year 2017. The proposed modifications implement suggestions and feedback from the implementation team and the Company's third-party EM&V contractor, Navigant Consulting, Inc. The TRM is being modified to improve the accuracy of program measure savings based on final EM&V for MEEIA Cycle 2 program year 2017. The modifications to the Incentive Ranges are intended to allow for greater overall residential and business participation and improved cost effectiveness. The Company is not asking for any modifications to the currently approved MEEIA Cycle 2 budgets or annual savings targets.

The Commission's February 27, 2019, Order Approving Stipulation and Agreement in File No. EO-2019-0132 allowed for the Company to extend MEEIA Cycle 2 for up to nine months, with a new end date of not later than December 31, 2019. The modified Appendix 1 (Incentive Ranges) and modified Appendix 2 (TRM) will be used during the MEEIA Cycle 2 extension period. Staff recommends that the Commission approve the modifications to

Appendix 1 and Appendix 2 of the Stipulation described in the Company's application to go into effect on April 1, 2019, or as close to that date as possible.

Based on its review of Staff's recommendation and the Company's unopposed application, the Commission concludes that the Company's Application for Approval of Modification to Its Demand-Side Programs should be approved. The Company has also demonstrated good cause for granting expedited treatment, so this order will be made effective on April 1, 2019.

THE COMMISSION ORDERS THAT:

1. Kansas City Power and Light Company and KCP&L Greater Missouri Operations Company's Application for Approval of Modification to Its Demand-Side Programs, filed on March 12, 2019, is approved.
2. This order shall be effective on April 1, 2019.

BY THE COMMISSION
