

EC-2023-0395

Brett Felber
VS
Ameren Missouri

Maybe since there has been a lack of response to the outstanding Motions I have filed the Honorable Judge Clark and the Commission would at least order Ameren to respond as to why they had a technician banging on my door on the evening of Thursday November 16, 2023? I have the video of it, however, since respondents counsel isn't a big fan of technology and he probably doesn't think I have a security system to the premises. I have saved that to present to St.Louis County Police Department.

I'm pretty sure I know why, because of me stating I have electric, and it is true I do have electric. I'm allowed to have electric. No law that states I can't have electric.

Unless Ameren is there to restore my utility services, there is no reason for them to be on or near my premises, try to trespass the private property in back of the field and which is not part of the utility easement at all.

My electric is my electric and they are trying to disrupt and disturb the peace of the electric that I have.

Hopefully their technician enjoyed my Holiday Display before leaving.
