

To add, without saying it, I believe the Commissioners are calling my children and wife or classifying them as non-credible witnesses. I take serious offense to that and that the Commissioners are not only discriminatory, but also violating Human Rights on that matter, along with Ameren themselves.

I am very proud of both my children's accomplishments throughout life. They have always been hard workers and achieved great success, whether in sports programs, work accomplishments and engaging in programs to enrich the community. Their biggest accomplishments to add to their success is graduating early from school and graduating top of their class.

Same with my wife, she has been a hard worker throughout her life and has been a successful mentor to many throughout her accomplishments in life and a hard worker and a great mother to my children and now runs a prestigious business that I help operate in nearly 35 states.

My wife wasn't technically a part of this matter until Ameren's lowlife legal counsel and co-counsel decided to slander her name into this matter. For that matter, I label Ameren's legal counsel and their representing counsel lowlives.

Especially during their cross examination in which they tried to turn the words of what were said by my child who is autistic, and they know is special needs. In addition, Eric Banks is a pervert for asking my daughter one single question that didn't pertain to even remotely the topic of the complaint and asked my daughter is she loved her father. He's a sick pervert, that needs to be disbarred, along with Ms. Grubbs for allowing him to even ask or say that.

It is also unprofessional that the Honorable Judge Clark allowed that question to be asked and furthermore didn't take more serious action against counsel when I brought that up. Instead, they spent more time trying to chastise me for providing exhibits that proved my claim.

I'm glad the Commission calls someone that admitted to altering and editing documents as a "credible" witness. If we are calling people that admit that they altered or admitted to editing documents 'credible" then Missourians that must go through the same process I just went through are royally screwed by our

elected officials and maybe our elected officials need to do better searching for credible leaders.

While I'm at it. I guess under complaint EC-2024-0176 for a business the Commission is going to exempt Ameren Missouri from following Commission Rules, Regulations and Tariffs, and following them because their "credible" editing and altering specialist can type that up at her own convenience?

To date Ameren has failed to reach out to me in that matter and state the reason for denial- fact.

To date-Ameren has failed to mail out a denial letter and the process steps to resolve the matter-fact.

But I'm sure their lowlife counsel along with their alteration specialist who is being labeled as a "credible" party will twist it with some other excuse like they've been allowed to do throughout the whole matter.

Seriously, what is the point of having rules and regulations, tariffs, State and Federal Statutes if a company doesn't abide by them?

Hope the PSC is enjoying that hefty payout that Ameren gave them. Yep, I know all about it. I have numerous friends that work within Ameren, so I know the story. In fact, if the matter is allowed to go to a re-hearing or appeal, then I will call them in as witnesses.

Yep, that is exactly what I said. I know people who work within Ameren, and they talk. People talk. In fact, I know certain people in the utility sector that talk. I'm a prominent businessman who works hard and have relationships with numerous people in various industries through the countless meetings I've attended over the years.

Look forward to being denied a rehearing and or appeal of this and the continue prejudice, discriminatory and human rights violations and illegal disconnections.

Brett Felber
