MESSAGE TOLL TELEPHONE SERVICE TARIFFS

APPLICATION AND EXPLANATION OF SYMBOLS

**A. APPLICATION OF TARIFF**

This section applies to the Intrastate Message Toll Telephone Service of the Chariton Valley Telephone Corporation, hereinafter referred to as the Telephone Company, or jointly by the Telephone Company and its connecting companies over facilities wholly within the State of Missouri, between two or more points within the State of Missouri, where the respective rate centers of such points also are located in said state.

The provisions of service is subject to the General Rules and Regulations in Section III of this Tariff, which section as it now exists or as it may be revised, added to, or supplemented by superseding issues, is hereby made a part of this Intrastate Message Toll Telephone Service Tariff.

These Tariffs cancel and supersede all other Tariffs of the Telephone Company issued and effective prior to the effective dates of these Tariffs.

**B. EXPLANATION OF SYMBOLS**

- (C) Signifies a changed regulation.
- (D) Signifies a discontinued rate, treatment or regulation.
- (I) Signifies an increased rate or new treatment resulting in increased rate.
- (N) Signifies a new rate, treatment or regulation.
- (R) Signifies a reduced rate or new treatment resulting in reduced rate.
- (T) Signifies a change in text but no change in rate, treatment, or regulation.

MESSAGE TOLL TELEPHONE SERVICE TARIFFS

GENERAL REGULATIONS

A. GENERAL

1. Definition - Message toll telephone service is that of furnishing facilities for telephone communication between telephones in different local service Areas in accordance with the regulations and system of charges specified in this Tariff are in payment for all service furnished between the calling and the called telephones.
2. Undertaking of Telephone Company - The Telephone Company does not undertake to transmit messages but offers the use of its facilities for communications between its customers.
3. Priority of Service - In case a shortage of facilities exists at any time, either for temporary or protracted periods, the establishment of message toll telephone service shall take precedence over all others.
4. Limited Conversation - The Company reserves the right to limit the length of conversation when necessary in times of emergency resulting in shortage of facilities.
5. Liability of Telephone Company -
  - a. In view of the fact that the customer has exclusive control of his communications over the facilities furnished him by the Telephone Company, and of the other users for which facilities may be furnished him by the Telephone Company, and because of the unavoidable nature of errors incident to the services and to the use of such facilities of the Telephone Company, the services and facilities furnished by the Telephone Company are subject to the terms, conditions and limitations herein specified.

GENERAL REGULATIONS  
(continued)

5. Liability of Telephone Company (Continued)

b. The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays or errors, or defects in transmission occurring in the course of furnishing service, or facilities and not caused by the negligence of the customer, or of the Telephone Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission occurs. No other liability shall in any case attach to the Telephone Company.

c. When the lines of other telephone companies are used in establishing connections to points not reached by the Telephone Companies lines, the Telephone Company is not liable for any act or omission of the other Company or Companies.

6. Obligation of Customer

- a. The calling party (or customer) shall establish his identity in the course of any communication as often as may be necessary.
- b. The calling party (or customer) shall be solely responsible for establishing the identity of the person or persons with whom connection is made at the called station.

7. Advance Payments

a. Applicants for service who have no account with the Telephone Company or whose financial responsibility is not a matter of general knowledge, may be required to make an advance payment at the time the application is signed, equal to any construction charges applicable and at least one month's estimated charges for service provided.

GENERAL REGULATIONS  
 (continued)

11. Telephotograph Equipment Provided by Press

- a. Message toll telephone service is available for use by the Press for the transmission and reception of pictures and similar materials for publication, by means of telephotograph equipment provided by the Press.
- b. No direct physical connection of the telephotograph equipment shall be made to the facilities of the Telephone Company or its connecting companies, except where special equipment is provided by the Telephone Company or a connecting company for this purpose.
- c. The operating characteristics of the telephotograph equipment shall be such as not to interfere with any of the services offered by the Telephone Company.
- d. The Telephone Company assumes no responsibility for the quality of or defects in the material transmitted or received over the message toll connection, regardless of cause.
- e. The customer indemnifies and saves the Telephone Company harmless against claims for libel, slander or infringement of copyright arising from the material transmitted over its facilities; against claims for infringement of patents arising from combining with, or using in connection with, facilities of the Telephone Company, apparatus and systems of the customer, and against all other claims arising out of any act or omission of the customer in connection with the facilities provided by the Telephone Company.
- f. The regulations and rates of each call made for the purpose of transmitting pictures are those applicable for message toll telephone service, i.e., station-to-station, person-to-person, or conference according to the connection established.

B. CLASSES OF SERVICE

1. Two classes of message toll telephone service are offered, namely, station-to-station service and person-to-person service. For each class of service day, night, and Sunday rates apply as follows:

FILED  
DEC 7 1955

a. Day Rates

Day Rates apply from 4:30 A.M. to, but not including 6:00 P.M. on all days except as provided under "Night and Sunday Rates" below.

PUBLIC SERVICE COMMISSION

b. Night and Sunday Rates (Reduced Rates)

Night rates apply daily from 6:00 P.M. to, but not including 4:30 A.M.  
Sunday rates apply from 4:30 A.M. to, but not including 6:00 P.M. on Sundays, Christmas Day, (December 25) and New Year's Day, (January 1).  
In case the Christmas and New Year's legal holidays fall on dates other than December 25 and January 1, Sunday rates apply on such legal holidays.

c. Sunday rates also apply on Thanksgiving Day, as proclaimed by the Governor of the State of Missouri, from 4:30 A.M. to, but not including 6:00 P.M.

MESSAGE TOLL TELEPHONE SERVICE TARIFFS

GENERAL REGULATIONS  
(continued)

B. CLASSES OF SERVICE (continued)

2. Station-To-Station Service

Station-to-Station service is that service under which the person originating the call gives only the telephone number of the station or branch exchange system desired or the name and address under which the telephone is listed and does not specify a particular person or branch exchange station to be reached at the called point.

3. Person-To-Person Service

Person-to-Person service is that service under which the person originating the call specifies a particular person to be reached at the called point or a particular station, department, office, or branch, reached through a branch exchange.

- a. Where the person originating the call wishes arrangements made in advance with a particular party or station for the establishment of a connection at a specified time (appointment call), the call is classified as person-to-person.
- b. When it is necessary for the Telephone Company to employ a messenger or other means to bring the called party to a telephone, the call is classified as person-to-person and, in addition to the charges for the message, a charge is made for the exact amount expended, if any, for messenger service.
- c. When the called station does not accept the charges and the calling party requests that the call be tried again later on a collect basis the classification of the call is changed to person-to-person and the rates and regulations applicable to person-to-person service apply.

GENERAL REGULATIONS  
(continued)

C. COLLECTION CHARGES

1. Charges (including messenger charges) for all classes of telephone calls are billed against or collected from the calling telephone in all cases, except that upon request toll charges may be:
  - a. Billed against or collected from the called telephone (i.e., charges may be reversed) if the charges are accepted at the called station. The regularly established rates (including messenger charges, if any) apply except that:
    - (a) On station-to-station calls where the initial period rate is \$0.20 or less an additional charge of \$0.05 is added to charges computed on "Paid" basis if the charges are reversed.
    - (b) Transferred from the calling telephone (called station on a collect call) to another telephone (non-coin station) served by the same toll center, or other nearby toll centers where locally authorized, if the charges are accepted at that telephone.

D. TIME OF DAY

1. The time of day when conversation actually starts, determined in accordance with the time system, standard or daylight saving - legally or commonly is used at the point where the calling station is located, determines whether day, night or Sunday rates apply. This rule applies irrespective of whether the call is sent paid or collect.

GENERAL REGULATIONS  
(continued)

E. TIMING OF MESSAGES

1. Length of conversation is the elapsed time between the start and the end of a telephone communication.
2. On calls placed on a station-to-station basis, conversation is considered as starting at the time telephonic communication is established between the calling station and the called station or private branch exchange switchboard.
3. On calls placed on a person-to-person basis, conversation is considered as starting at the time telephonic communication is established between the person calling and the particular person called or another party acceptable to the person calling, or the private branch exchange extension station called.
4. On all calls, conversation is considered as terminated at the time the disconnect signal is received by the operator handling the call.

MESSAGE TOLL TELEPHONE SERVICE TARIFFS

RATES

A. INITIAL AND OVERTIME PERIODS

1. Message toll rates are quoted in terms of initial and overtime periods
  - a. The initial period is the interval of time allowed at the rate quoted for toll connections between given points.
  - b. The overtime period is the unit of time used for measuring and charging for time in excess of the initial period.

B. METHOD OF APPLYING RATES

1. Message toll telephone rates between all points are based on the airline distance between the measuring point or rate center for the calling point, and the measuring point or rate center for the called point. In general, each city, town or locality is designated as a rate center and those localities not so designated are assigned a nearby rate center. In the case of a few of the largest cities several rate centers are employed. Furthermore, the country is geographically divided into blocks and sections. The blocks are seven miles square and the sections, combining twenty-five blocks, are thirty-five miles square. All rate centers geographically located in or associated with a given block take the same rate to points located in or associated with any other given block, unless otherwise specifically stated.
  - a. The rate-distance between rate centers which are less than forty miles or exactly forty miles, direct airline distance from each other is the direct airline distance between the rate centers as scaled on Government Post Route Maps.

Section No. IV

MESSAGE TOLL TELEPHONE SERVICE TARIFFS

RATES  
 (continued)

B. METHOD OF APPLYING RATES (continued)

1. (continued)

- b. The rate-distance between rate centers which are more than forty miles from each other direct airline is the airline distance between the centers of the blocks in which the rate centers are located, except as provided in paragraph c following.
- c. The rate-distance between the rate centers located in sections the centers of which are more than 350 miles from each other in any direction, or which are exactly 350 miles from each other, horizontally or vertically, is the air-line distance between the centers of the sections in which the rate centers are located.

C. PROCEDURE FOR ASCERTAINING A RATE

- a. In order to ascertain the rate for a given class of service between two points within the state, refer first to the specific point-to-point rates and if the points are found, the rate given is the Station-to-Station day paid rate. The corresponding station-to-station night and Sunday rates, the collect rates, the Person-to-Person Day, night and Sunday rates, and the Overtime Rates will be covered in the Table of Mileages and Corresponding Intrastate Rates, but with the "Station-to-Station Day Rates" used as a base.
- b. In order to ascertain the rate for a given class of service within the State, covered by this Tariff but which does not appear in the Table of Specific Point-to-Point Rates, the steps to be followed are:
  - 1. Refer to the Toll Rate and Route Guide in which the points are located. Note the rate centers of the points concerned. In addition note the rate block designations of the rate centers involved, together with any other rate information in the rate center column.

PUBLIC SERVICE COMMISSION

ACCESS SERVICES TARIFF CONCURRENCE

Access Services

Access services are those services which are described in the Access Services Tariff of Oregon Farmers Mutual Telephone Company. These services are offered by the Company to intrastate interexchange customers (ICs) in accordance with the rules and regulations specified in the Access Services Tariff of Oregon Farmers Mutual Telephone Company and approved by the Missouri Public Service Commission, and in any amendments thereto and authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for access services of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions has been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Access Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Access Services Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

PRIVATE LINE TARIFF CONCURRENCE

Private Line Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Private Line Service as set forth in Oregon Farmers Mutual Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for private line service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Private Line Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, in whole or in part, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

Digital Link Services Concurrence

APR 16 1993

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Digital Link Service as set forth in Oregon Farmers Mutual Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for Digital Link Service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions have been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Digital Link Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Digital Link Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

DISTANCE LEARNING COMMUNICATIONS SERVICES CONCURRENCE

**MAY 5 1994**

The Company concurs in the rules and regulations governing intrastate interexchange Distance Learning Communications Service as set forth in Oregon Farmers Mutual Telephone Company's Tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for Distance Learning Communications Service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

**MO. PUBLIC SERVICE COMM.**

PROVISION OF SERVICES

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions have been made for the Company's telephone exchange services, will provide to customers, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Distance Learning Communications Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Distance Learning Communications Services Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

CANCELLATION RIGHTS

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

RECEIVED

1.1 GENERAL

JAN 24 1992

This tariff contains regulations, rates and charges applicable to the provision of Radio Common Carrier Interconnection Services provided by Chariton Valley Telephone Corporation, hereinafter referred to as the Telephone Company, to all carriers, hereinafter referred to as Carrier, for Type 1 and Type 2B connecting circuit arrangements as found, for descriptive purposes only, in the Bell Communications Research, Inc. Technical Reference TR-NPL-000145, Compatibility Information for the Interface between a Cellular Mobile Carrier and a Wireline Exchange Carrier dated April 1986 and Technical Reference TR-EOP-000352, Cellular Mobile Carrier Interconnection Transmission Plans, dated May 1986. This tariff is also applicable to all carriers for line side interconnection as found, for descriptive purposes only, in Bell System Technical References, Number 43303 dated December 1981.

PUBLIC SERVICE COMM.

This tariff provides, where facilities are available, connection with the Telephone Company network for originating calls from a landline customer to an RCC customer, for terminating calls from an RCC customer to a landline customer, and for High Capacity 1.544 Mbps Radio Transmitter Links.

The regulations and rates in this tariff are in addition to the regulations, rates and charges in other Telephone Company tariffs.

1.2 DEFINITIONS

The following definitions are in addition to those found in the Telephone Company's Local Exchange Tariff.

ACCESS SERVICE TARIFF: The Telephone Company's intrastate Access Service Tariff on file with the Missouri Public Service Commission, offering exchange access to intrastate customers.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

RECEIVED

JAN 24 1992

1.2 DEFINITIONS (Cont'd)

CELL SITE: A cell site is an RCC transmission point where the radio signal is transmitted to the RCC mobile customers.

MO. PUBLIC SERVICE COMM.

CELLULAR MOBILE CARRIER (CMC): A common carrier provider of domestic public cellular telecommunications service, as defined in Part 22, Subpart K, of the Rules of the FCC.

END OFFICE: An end office is a local Telephone Company central office where the exchange service customer's station loops are terminated to connect to each other and the network.

LOCAL CALLING SCOPE: Refers to the area of calling included in the local rates of the Telephone company as defined in the Local Exchange Tariff.

LOCAL EXCHANGE TARIFF: Refers to the Schedules of LOCAL EXCHANGE SERVICE, MISCELLANEOUS SERVICE, AND GENERAL RULES AND REGULATIONS applying to the intrastate services and facilities of the Telephone Company, as approved by the Missouri Public Service Commission.

MOBILE TELEPHONE SWITCHING OFFICE (MTSO): An RCC's switching equipment or terminal used to provide the RCC's switching services or, alternatively, any other point of termination designated by the RCC. The MTSO does the switching that connects the RCC's customers within its Radio Service Area to the Telephone Company's facilities.

NXX CODE: A block of 10,000 consecutive telephone numbers having the same 3-digit prefix.

RADIO COMMON CARRIER INTERCONNECTION SERVICE JAN 24 1992

1.2 DEFINITIONS (Cont'd)

MO. PUBLIC SERVICE COMM.

ORIGINATING TRAFFIC: Traffic delivered to an RCC for termination on the RCC system within the Radio Service Area.

ORIGINATING USAGE: Landline originated traffic delivered to an RCC for mobile termination within the Radio Service Area of the RCC Carrier.

POINT OF INTERCONNECTION: The end office (Type 1 or 2B connection circuit) that the RCC chooses to connect for terminating traffic in the Telephone Company network. For example, where terminating traffic is switched to other end offices in the LATA, Interexchange Carriers and operator or auxiliary services, e.g. 411, 911, and 555-1212.

POINT OF TERMINATION: The point of demarcation on a carrier's premises where the Telephone Company's responsibility for service ends.

RADIO COMMON CARRIER (RCC): A licensee under Part 22 or Part 73 of the FCC Rules and Regulations who provides radio telecommunications service excluding Rural Radio Service. A Radio Common Carrier for purposes of this tariff is a Cellular Mobile Carrier.

RADIO COMMON CARRIER INTERCONNECTION SERVICE: Hereafter referred to as service, are dedicated circuits between a RCC's point of termination and the Telephone Company's point of switching for the exchange of traffic. Such circuits may be one-way or two-way.

RADIO TRANSMITTER LINKS: Dedicated voice and/or data circuits provided by the Telephone Company between an RCC MTSO and tower/cell site locations or between tower/cell site locations.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

JAN 24 1992

1.2 DEFINITIONS (Cont'd)

MO. PUBLIC SERVICE COMM.

RCC SERVICE AREA: The geographic area served by a RCC's system where the RCC is authorized to provide service under Part 22 or 73 of the FCC Rules and Regulations. For cellular carriers this area is the Cellular Geographic Service Area (CGSA).

SERVICE GROUP: A group of RCC connection service circuits of the same configuration combined into a single service group for traffic handling.

TANDEM OFFICE: A telephone company switching system that provides a concentration and distribution function for originating and terminating traffic between Telephone Company end offices or the network.

TERMINATING TRAFFIC: Traffic received from a carrier for delivery to a point on the intraLATA wireline exchange network.

TERMINATING USAGE: RCC mobile originated traffic interchanged with the Telephone Company for landline termination at a point on the intraLATA wireline exchange network.

TYPE 1 CONNECTING CIRCUITS - Connecting circuits that interconnect the RCC with the Telephone Company's end office, via line side connection allowing originating or terminating calls from or to that end office, allowing access operator services, directory assistance services, 911, community information services, to other end offices in the Lata and Interexchange Carriers.

TYPE 2B CONNECTING CIRCUITS - Connecting circuits that interconnect the RCC with the Telephone Company's end office via trunk side connection allowing originated or terminated calls by directory numbers (DNs) served only by that specific Telephone Company end office.

1.3 GENERAL REGULATIONS

JAN 24 1992

1.3.1 Liability of the Telephone Company

MO. PUBLIC SERVICE COMM.

A. The Telephone Company's failure to provide or maintain service under this tariff subject to the interruption allowance provisions of this tariff, shall be excused by labor difficulties, government orders, civil commotions, acts of God, and other circumstances beyond the Telephone Company's reasonable control.

B. Where a RCC carrier's service is interrupted other than by negligence or willful act of the Telephone Company, and it remains out of order for 24 hours or longer after the Telephone Company has been notified and has access to the RCC's premises, adjustments shall be made to the RCC. The adjustment shall be based on the time the interruption is first reported and shall be the pro rata part of the monthly rates the service is inoperative. The adjustment may be credited to a subsequent bill.

For calculating credit allowances, every month is considered to have 30 days.

A credit does not apply for any period the RCC does not allow the Telephone company personnel access to the facilities so they can investigate and clear trouble.

1.3 GENERAL REGULATIONS (Cont'd)

MO PUBLIC SERVICE COMM.

1.3.1 Liability of the Telephone Company (Cont'd)

C. The Telephone Company's liability, if any, for its gross negligence or willful misconduct is not limited by this tariff. With respect to any other claim or suit, by an RCC or any other for damages arising out of mistakes, omissions, interruption, delays, errors or defects in transmission, the Telephone Company's liability, if any, shall not exceed an amount equivalent to the proportionate charge to the RCC for the period of service during which such mistakes, omission, interruption, delay, error or defect in transmission or service occurs and continues. This liability shall be in addition to any amounts that may otherwise be due to the RCC under this tariff as an allowance for interruptions. Any such mistakes, omissions, interruptions, delays, errors or defects in transmission of service, which are caused or contributed to by the negligence or willful act of the RCC or which arise from the use of RCC-provided facilities or equipment, shall not result in the imposition of any liability whatsoever upon the Telephone Company.

D. The Telephone Company is not liable for any act or omission of other providers of services to the RCC.

The Telephone Company charge for transmitter links between the Cell Site and the MTSO and between the Cell Site and the end office shall be equivalent to the specific rate elements and rate levels in Section 7 of the Access Service Tariff, except that no special access surcharge shall be applicable. In the case of the provision of High Capacity 1.544 Mbps (T-1 or DS1) Service the specific rate elements and rate levels are set forth at 1.7.3 following.

1.3.9 Special Service Arrangements

When the customer requests a service arrangement which requires the installation of special equipment or modification of standard equipment, it can be furnished by the Telephone Company subject to the regulations, rates and charges found in the Telephone Company's Local Exchange Tariff.

1.3.10 Telephone Numbers

- A. Shared NXX codes are available as specified in paragraph 1.7.2 following.
- B. Telephone numbers are furnished subject to the availability of facilities and numbers in a manner consistent with code conservation in the administration of the North American Numbering Plan.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

RECEIVED

1.4 DESCRIPTION OF SERVICE

JAN 24 1992

1.4.1 Type of Service

MO. PUBLIC SERVICE COMM.

Radio Common Carrier Interconnection Service circuits and switching are line-side switching using end office Type 1 Connecting Circuit arrangements and trunk side using Type 2B Connecting Circuit arrangements. Wink start, answer and disconnect supervisory signaling are provided from electronic offices. Line side interconnection is made using line-side terminating equipment in the end office. Line-side signaling may be ground start with on-hook indication to the carrier at the distant end or may be loop supervision.

Service may be arranged for two-way or one-way traffic either in the originating or terminating direction where facilities and equipment permit. Separate service groups may be required in each direction for two-way operation. Different types of facilities or switching arrangements may not be combined in a single service group.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

RECEIVED

1.4 DESCRIPTION OF SERVICE

JAN 24 1992

1.4.2 Calling Scope

MO. PUBLIC SERVICE COMM.

Any calling scope available to the landline customers is available to the carrier.

A. Type 1 and Type 2B interconnections may only be to end offices that serve telephone subscribers within the RCC Service Area of the RCC's system.

B. Local terminating usage rates and intrastate access charge rates will apply based on the point of interconnection where the call is delivered to the Telephone Company.

1.4.3 Type 1 Interconnection

A. Type 1 terminating service may be used to access valid NXXs in the LATA, operator services, Directory Assistance (411 and 555-1212), emergency reporting service (911), exchange telephone repair and business offices, community information services of an information provider, and the services of an interexchange carrier.

B. For Type 1 connection service, the Telephone Company shall select the first point of switching within the LATA. The carrier may request a different first point of switching where facilities and measurement capabilities are available. When required by technical limitations, a separate service group will be established for each type of switching arrangement.

RADIO COMMON CARRIER INTERCONNECTION SERVICE		<b>RECEIVED</b>
1.4 DESCRIPTION OF SERVICE		JAN 24 1992
1.4.4	Type 2B Interconnection	MO PUBLIC SERVICE COMM.
A.	<p>Calls completed via the Type 2B interconnection circuit(s) are terminated to or originated by directory numbers (DNs) served only by that specific Telephone Company end office. With Type 2B connections, calls may terminate only to directory numbers served by the end office where the Type 2B interface is located. Type 2B terminating calls cannot be routed to services provided by Feature Group B (FGB), Feature Group C (FGC), or Feature Group D (FGD) Interexchange Carriers (ICs), International Carriers (INCs), or operator services, public response networks, Directory Assistance, or Type 2A or Type 2B interconnections of other carriers.</p>	
B.	<p>Telephone Company end offices available for Type 2B interconnection will be restricted to those offices having the required capabilities, e.g. measuring and recording. Generally, available offices include those large offices with stored program control (SPC) type technology.</p>	
C.	<p>A Type 2B interconnection may be used in conjunction with the Type 2A interconnection on a high-usage alternate routing basis to serve high-volume traffic between the MTSO and the Telephone Company end office(s). Type 2B interconnections used in conjunction with a Type 2A interconnection will utilize the same NXX code(s) assigned to the Type 2A and no additional number changes are applicable. If the RCC utilized a Type 2B as a stand-alone interconnection and used the</p>	<b>FILED</b>

1.5 FEATURES

1.5.1 Optional Features - Nonchargeable

MO. PUBLIC SERVICE COMM.

A. Outpulsing

This option provides the end office capability of providing up to 10 digits of the called party telephone number to the RCC's location. The RCC may request that only some of the digits in the telephone number be forwarded. When a steering digit is required (e.g., third digit of the NXX code), only 7 digit outpulsing will be furnished.

B. Delay Dial Start-Pulsing Signaling

This option provides a method of indicating to the originating trunk circuit a readiness to accept address signaling information by the terminating trunk circuit. Delay dial is the off-hook signaling sequence. The delay dial signal is the off-hook interval and the start-pulsing signal is the on-hook interval. With integrity check, the calling offices will not out-pulse until a delay dial (off-hook) signal followed by a start-pulsing (on-hook) signal has been identified at the calling office.

C. Immediate Dial Pulse Address Signaling

This option forwards dial pulses from the Telephone Company end office to the RCC without a start-pulsing signal from the RCC. This option is available only to RCCs who have existing dial pulse services.

MO PUBLIC SERVICE COMM.

1.5 FEATURES (Cont'd)

1.5.1 Optional Features - Nonchargeable (Cont'd)

C. Immediate Dial Pulse Address Signaling (Cont'd)

Such arrangements may be continued under this tariff, but the RCC may not add to or move these arrangements.

D. Dial Pulse Address Signaling

This trunk-side option provides for the transmission of number information, e.g. called number, between the Telephone Company end office switching system and the RCC's premises (in either direction) by means of direct current pulses.

1.5.2 Optional Features - Chargeable

A. Testing Capabilities

This service is provided, in the terminating direction where appropriate equipment is available (both telephone company and RCC), with seven digit access to balance (100 type) test line, milliwatt (102 type) test line, nonsynchronous or synchronous test line, automatic transmission measuring (105 type) test line, data transmission (107 type) test line, loop around test line, short circuit test line and open circuit test line. Additional Cooperative Acceptance Testing, Automatic Scheduled Testing, Cooperative Testing, Manual Scheduled Testing and Nonscheduled Testing may be provided if requested as set forth in Section 13 of the Access Service Tariff.

1.6 RATE REGULATIONS

The Telephone Company's charge for circuits and switching provided in the interconnection of traffic with RCCs is as follows: MO. PUBLIC SERVICE COMM.

1.6.1 Type 1 - Originating Only Connecting Circuits

- A. The charge for two-wire or four-wire connecting circuits used exclusively for the interchange of one-way originating traffic shall be equivalent to the charge for a two-wire or four-wire termination and channel mileage and multiplexing if required, as found in Section 7 of the Access Service Tariff.
- B. The charge for a 1.544 Mbps connecting circuit, equivalent to 24 voice grade circuits, used exclusively for the interchange of one-way originating traffic shall be equivalent to the charge for a 1.544 Mbps channel termination and channel mileage if required, as found Section 1.7.3 following.

1.6.2 Type 1 - Terminating Only Connecting Circuits

- A. Telephone Company charges for the termination of RCC originated traffic interchanged with the Telephone Company and destined to points on the intraLATA/local wireline exchange network shall be on a usage sensitive basis. To the extent that a Telephone Company office lacks the capability of measuring terminating usage for billing purposes, terminating usage charges shall be calculated based on assumed minutes of usage pursuant to paragraph 1.6.2, D.

MO. PUBLIC SERVICE COMM.

1.6.2 Type 1 - Terminating Only Connecting Circuits (Cont'd)

B. The terminating usage charges for RCC originated traffic interchanged with the Telephone Company and destined to points within the local calling scope of the RCC's end office shall be as specified in paragraph 1.7.1 following.

C. The terminating usage charges for RCC originated traffic interchanged with the Telephone Company and destined to points outside the local calling scope of the RCC's end office shall be constructed by referencing the following rate elements and levels, at the premium rate levels from the Access Service Tariff: Section 3 - Carrier Common Line Access: Section 6 - Local Transport and Local Switching (LS1). These rates will remain equivalent, through this rate reference, and will change as rate changes are effectuated in the Access Service Tariff.

D. In the event the Telephone Company is unable to measure specific terminating usage from the end office where service is provided, charges based on assumed minutes shall apply as follows: (1) the Telephone Company and the RCC shall jointly develop the assumptions for use in calculating the monthly terminating usage which will be billed for the initial quarter of each RCC's operation; (2) based upon actual usage data provided by the RCC, each individual carrier's average minutes of use from the prior quarter will be used for monthly billing purposes for the next quarter.

RADIO COMMON CARRIER INTERCONNECTION SERVICE

JAN 24 1992

1.6 RATE REGULATIONS

MO. PUBLIC SERVICE COMM.

1.6.2 Type 1 - Terminating Only Connecting Circuits (Cont'd)

E. Local Terminating Usage measurement on RCC terminating traffic delivered to the Telephone Company for termination within the local calling scope begins when the Telephone Company's end office switch receives an off-hook supervisory signal from the end office serving the called party, indicating that the called party has answered and transmits that same information to the RCC's location. The measurement of terminating call usage ends when the Telephone Company's end office switch serving the carrier receives an on-hook supervisory signal from either the RCC or the called party.

1.6.3 Type 1 - Two Way Connecting Circuits

A. The recurring charges, other than terminating usage charges, for the provision of connecting circuits used for interchange of both originating and terminating traffic (two-way connecting circuits) shall be prorated. It is assumed that 18% of the traffic interchanged between the Telephone Company and the RCC over two-way circuits is originating traffic. The charge for each two-way circuit will be 18% of the charge specified in paragraphs 1.6.1, A, or 1.6.1, B, preceding. In addition, all terminating traffic interchanged over two-way circuits is subject to terminating usage as described in paragraph 1.6.2 preceding.

1.6.4 Nonrecurring Charges

The nonrecurring charges for all one-way and two-way connecting circuits shall be the same as specified for originating circuits in paragraphs 1.6.1, A, and 1.6.1, B.

1.6.5 Minimum Monthly Charges

For Type 1 interconnection, the minimum monthly charge is equal to the rate specified in paragraph 1.6.1, A or 1.6.1, B preceding.

1.6.6 Type 2B - Connecting Circuits

A. Telephone Company charges for facilities and services provided for Type 2B interconnection and interchange of traffic with RCCs shall consist of: (1) flat rate charges for one-way or two-way connecting circuits and associated facility terminations that connect the RCC's MTSO to the Telephone Company's serving end office(s); and (2) traffic originating on the RCC's network and terminating on the Telephone Company's intraLATA wireline exchange network will be billed on a usage-sensitive per minute of use basis.

B. The charge for a 1.544 Mbps connecting circuit, equivalent to 24 voice grade circuits, shall be the charge for a 1.544 Channel Termination and if applicable, Channel Mileage, multiplexing and associated facility terminations as specified in the Section 1.7.3 following.

EMERGENCY TELEPHONE SERVICE (9-1-1)

AUG 2 1993

A. CONDITIONS

MO. PUBLIC SERVICE COMM.

1. Definition

a. 9-1-1 is the three-digit telephone number designated throughout the United States as the emergency telephone number to be used by the public to obtain law enforcement, medical, fire, rescue, and other emergency services.

b. 9-1-1 Service enables a caller dialing 9-1-1 from a station with access to the local exchange telephone network, arranged to provide 9-1-1 Service, to be automatically connected to the appropriate Public Safety Answering Point (PSAP). A PSAP is the communications facility, designated for a specific territory, to which 9-1-1 calls are routed for response. The Service, including non-regulated components, may be provided from any one of the following three categories:

(1) B9-1-1 (or Basic 9-1-1) Service automatically routes 9-1-1 calls to a PSAP but provides no information about the location or telephone number of the caller.

(2) C9-1-1 (or ANI-only 9-1-1) Service automatically routes 9-1-1 calls to a PSAP and provides the calling telephone number (through automatic number identification of ANI) to the PSAP attendant who answers the call. C9-1-1 Service is comprised of B9-1-1 Service plus ANI spill.

EMERGENCY TELEPHONE SERVICE (9-1-1)

AUG 2 1993

A. CONDITIONS (Cont'd)

MO. PUBLIC SERVICE COMM.

1. Definition (Cont'd)

(3) E9-1-1 (or enhanced 9-1-1) Service automatically routes 9-1-1 calls to a PSAP and provides the calling telephone number and address, and may also provide the name of the telephone access line subscriber and the names of the Emergency Response Agencies with responsibility for the caller's location. E9-1-1 will provide a PSAP with the location of the billing or lead telephone number in cases where a nonregulated telecommunication service provider (e.g., Private Branch Exchange (PBX) has failed to provide the customer with their subscribers' names, addresses, and telephone numbers. E9-1-1 Service is comprised of C9-1-1 Service plus ALI provisioning.

2. Definition of Terms

a. Automatic Location Identification (ALI)

A feature designated to permit information regarding the location of the calling party to be displayed on a display screen at a PSAP when a 9-1-1 call is received.

EMERGENCY TELEPHONE SERVICE (9-1-1)

A. CONDITIONS (Cont'd)

2. Definition of Terms (Cont'd)

b. ALI Database

A database of ALI records containing access line subscriber's names, addresses, telephone numbers, and ESNs to be used for 9-1-1 purposes. This database, once provided to the customer, may include additional information about that location. Subscriber names may be omitted as a local option.

c. Alternate Routing

A feature that will route a 9-1-1 call to a location other than the primary PSAP, should some temporary condition prevent the primary PSAP from answering the call.

d. Automatic Number Identification (ANI)

A feature designed to permit the telephone number of the calling party to be displayed on a display screen at a PSAP when a 9-1-1 call is received.

e. ANI Spill

A central office generated data stream that forwards the telephone number of the calling party

2. Definition of Terms (Cont'd)

**MO. PUBLIC SERVICE COMM.**

f. Caller

An individual who places a 9-1-1 call in order to obtain emergency assistance. May also be referred to as an end user.

g. Customer

Governmental unit or other entity authorized to provide 9-1-1 Service

h. Default Routing

A feature activated when an incoming 9-1-1 call cannot be selectively routed due to an ANI failure, garbled digits or other causes. Such incoming calls are routed from the 9-1-1 control office (location of the selective routing function) to a preselected PSAP.

i. Emergency Response Agency

For the purpose of this Tariff, an Emergency Response Agency (ERA) is a functional division of an agency authorized to respond to requests from the public to meet emergencies related to safety and/or health. The agency is prepared to provide its service(s) in response to a 9-1-1 call received at, or transferred from, a PSAP.

2. Definition of Terms (Cont'd)

j. Emergency Service Number

An Emergency Service Number (ESN) is assigned by the customer to all subscribers served by each combination of Emergency Response Agencies (i.e., which police, fire, and ambulance service is responsible for that subscribers's location). Thus the service area of each PSAP and Secondary PSAP can be defined in terms of the ESNs for which it is responsible. The ESN is recorded in the ALI database (where established to inform the PSAP attendant which ERA is responsible for each 9-1-1 caller's location and in the Selective Routing records (where Selective Routing is established to assist in determining call routing to the correct PSAP.

k. End User

An individual who may place a 9-1-1 call in order to obtain emergency assistance. May also be referred to as a caller.

l. Host Provider

The telephone company that serves exchanges within the customer's serving area and provides 9-1-1 service to the customer and, where applicable, acts as the coordinator of other regulated telephone companies which serve as secondary providers within the customer's serving area.

2. Definition of Terms (Cont'd)

m. Master Street Address Guide (MSAG)

A perpetual database defining the geographical area of a 9-1-1 service, such as by an alphabetical list of the street names, high-low house number ranges, community names, PSAP identification codes, and Emergency Service Numbers (ESNs).

n. Nonlisted/Unlisted

Subscriber information that is not listed in the published phone directory but is made available via Directory Assistance Service.

o. Nonpublished

Subscriber information that is neither listed in the published phone directory nor available via Directory Assistance Service.

p. Public Safety Answering Point (PSAP) - Primary

A primary PSAP is the initial answering point responsible for taking appropriate action on a 9-1-1 call by either providing the response itself from the Emergency Response Agencies dispatched from that center or by transferring the call to a secondary PSAP for action. A primary PSAP must be operated on a 24-hour (seven days-a-week) basis.

AUG 2 1993

A. CONDITIONS (Cont'd)

MO. PUBLIC SERVICE COMM.

2. Definition of Terms (Cont'd)

- q. Public Safety Answering Point (PSAP) - Secondary

A secondary PSAP responds to 9-1-1 calls transferred from a primary PSAP by dispatching those Emergency Response Agency services under its authority. It may become the initial respondent to a 9-1-1 call in an alternate routing configuration where the primary PSAP is unable to answer the call.

- r. Selective Routing

A service that routes calls to the correct PSAP base on the caller's ANI. This service is available when a C9-1-1 or E9-1-1 system is served by more than one PSAP or when a central office is split by a political boundary and one of the political areas does not subscribe to 9-1-1 services.

- s. Subscriber

A person or business that orders access line service from a telephone company.

- t. Secondary Provider

A regulated telephone company that participates in offering 9-1-1 service under an agreement with the host provider.

A. CONDITIONS (Cont'd)

MO. PUBLIC SERVICE COMM.

3. General

- a. 9-1-1 Service is restricted to one-way incoming emergency service only.
- b. The Company shall not be required to provide 9-1-1 Service to less than an entire central office (switching entity). The Company does not undertake to answer and forward 9-1-1 Service calls, but furnishes the use of its facilities to enable the customer's personnel to accept such calls on the customer's designated premises.
- c. 9-1-1 Service is provided solely for the benefit of the local governmental unit; the provision of such service shall not be interpreted, construed, or regarded as being of the benefit of, or creating any Company obligation toward, or any right of action on behalf of any third person or other legal entity.
- d. Intercept service for any seven-digit emergency number(s) replaced by 9-1-1 Service will be provided for a period of time as negotiated between the Company and the customer; however, in no case shall intercept service be provided for more than one year or beyond the next directory issuance, whichever is longer.
- e. 9-1-1 Service is limited to the use of central office telephone number 9-1-1 as the emergency telephone number. Only one 9-1-1 Service will be provided within any government agency's locality.

**MO. PUBLIC SERVICE COMM.**

A. CONDITIONS (Cont'd)

3. General (Cont'd)

- f. 9-1-1 calls originated from local exchange telephone network access facilities shall be completed to the appropriate PSAP without a charge being assessed to the end user by the Company. Calls from a pay telephone shall not require a coin to be deposited or payment of any charge.
- g. Calls placed from all stations, including those with non-published or unlisted numbers, to a PSAP may display subscriber information associated with such numbers to emergency 9-1-1 responding personnel. The subscriber forfeits the privacy afforded by a nonlisted or nonpublished service upon placing a 9-1-1 call.
- h. The main telephone directory listing for the PSAP must be a seven-digit administrative telephone number of a listed emergency number. A listing for the PSAP will also be provided under 9-1-1 at no additional charge.
- i. The Company will not prorate any billing among agencies of the same governmental entity jointly subscribing to 9-1-1 Service.
- j. All nonregulated telecommunications service providers (e.g., Private Branch Exchange (PBX) Shared Tenant Services (STS) etc.) in an E9-1-1 service area should provide current lists of their subscriber's names, addresses, and telephone numbers to the Company for inclusion in the E9-1-1 database.

3. General (Cont'd)

k. Information provided by the Company as part of the provision of C9-1-1 or E9-1-1 is to be used only for the purposes for answering and dispatching emergency calls.

l. Charges for customer-initiated changes and rearrangements affecting service address and ALI database records (e.g., street name and number changes, emergency services territorial or name change, jurisdictional boundary changes and rearrangements, etc.,) other than those processed in normal daily updates will be based upon the actual costs for such changes and rearrangements. In such cases, a valid comparative listing of changes must be supplied providing direct and individual reference to existing designations.

m. Where a 9-1-1 call is placed by the calling party via interconnection with an interexchange carrier or operator service provider, the Company cannot guarantee the completion of said call, the quality of the call, or the features that may otherwise be provided with 9-1-1 Service. Because the addresses of these service providers' subscribers are not provided to the regulated telecommunications service providers, the customer must obtain them directly.

5. Liability (Cont'd)

h. The Company shall have no liability whatsoever to any person arising from its provision of, or failure to provide, 9-1-1 Service to any subscriber to a nonregulated telephone service (e.g., shared tenant service). It is the obligation of the customer to answer, respond to, transfer, terminate, dispatch, or arrange to dispatch emergency services, or otherwise handle all 9-1-1 telephone calls that originate from telephones within the customer's service area. Neither the customer nor the Company shall have any responsibility for 9-1-1 calls that carry foreign dial tone, whether they originate within or outside of the customer's service area, or for calls originating from mobile/cellular telephones.

i. The Company shall not be liable for any mistakes, omissions, interruptions, delays, errors or defects in transmission or service caused or contributed to by the negligence or willful act of any person other than the Company, or arising from the use of customer provided facilities or equipment.

B. DESCRIPTION

1. B9-1-1 (Basic 9-1-1 Service)

a. B9-1-1 Service provides for routing all 9-1-1 calls originated by stations with given central office prefix codes to a single PSAP which is prepared to receive those calls via a 9-1-1 Service line.

EMERGENCY TELEPHONE SERVICE (9-1-1)

Service Commission

B. DESCRIPTION (Cont'd)

1. B9-1-1 (Basic 9-1-1 Service) (Cont'd)

b. Interoffice 9-1-1 service is provided via dedicated trunking. 9-1-1 service from the central office serving the PSAP is provided over dedicated lines or trunks.

c. The following rate elements apply to a typical B9-1-1 arrangement:

(1) 9-1-1 Central Office Enabling – Enables the central office to recognize 9-1-1 as a valid number and connect a 9-1-1 call to a 9-1-1 Service Line or dedicated 9-1-1 trunk.

(2) 9-1-1 Service Line – A business network access line connecting the PSAP and its serving central office. The business individual line and / or business trunk or key business line rate is applicable.

(3) Interoffice Trunk – A dedicated facility between central offices (intra-or interexchange). The Interoffice Trunking Charges apply to each trunk ordered. A minimum of two trunks is required on each interoffice route.

(a) Applicable to each trunk on a non-distance sensitive basis. (C)  
(D)

d. Additional 9-1-1 Features, as described on Sheets 29 and 30, are available with 9-1-1 Service where conditions permit.

Service Commission

2. C9-1-1 (ANI - Only 9-1-1 Service)

a. The following rate elements apply to a typical C9-1-1 arrangement:

- (1) 9-1-1 Central Office Enabling - Enables the central office to recognize 9-1-1 Service Line or dedicated 9-1-1 trunk. Also enables the central office to generate ANI for the caller's telephone number and provide it to the 9-1-1 Service Line or dedicate 9-1-1 trunk.
- (2) 9-1-1 Service Line - Same as B9-1-1 Service
- (3) Interoffice Trunk

(a) Flat Rate - Same as B 9-1-1 Service.

(C)  
(D)  
(D)

b. C9-1-1 Service includes ANI Spill which is the provision of the caller's telephone number to the PSAP. ANI Spill may not be provided from multi-party end users. For calls placed to a PSAP from off-premises stations and stations behind business systems, where ANI Spill is provided, it will provide the identity of the primary telephone service billing or lead number.

Section VIII  
Original Sheet 2

1. INTEGRATED SERVICE DIGITAL NETWORK

Missouri Public  
Service Commission

REC'D AUG 03 1998

1.1 Integrated Service Digital Network (ISDN) Services

A. General

ISDN Service is central office based arrangements that may provide local exchange access, interexchange access, business group communications and feature package.

ISDN Service consists of a digital service line that provides digital origination and termination capabilities to the customer's premise and may allow for the simultaneous transmission of voice and data information. Basic service capabilities, custom features and optional features are available and listed later in this tariff.

ISDN Service will be provided where facilities and equipment are available

There are two basic ISDN service arrangements:

ISDN Basic Rate Interface Service (BRI)

ISDN Primary Rate Interface Service (PRI)

B. Limitations

ISDN lines, equipment and facilities provided under this Tariff will be designed by the Telephone Company to provide at least the same level of service reliability and quality as local exchange service in the exchanges where ISDN-BRI service is offered. When ordering ISDN service the user/subscriber/customer will provide power to the customer provided equipment. Loss of said power will eliminate life line service. At a minimum, ISDN-BRI service will only be provided where the access line does not exceed 18 kilofeet in length from the customer's premises to the serving central office/CSA or experience a maximum loss of 32.4 db as measured at the customer's premises.

Chariton Valley Telephone Corporation

Section VIII  
Original Sheet 3

**Missouri Public  
Service Commission**

1. INTEGRATED SERVICE DIGITAL NETWORK

**REC'D AUG 03 1998**

B. Limitations – (Continued)

The Network Interface Device will be installed at a location jointly determined by the subscriber and the Company. The Network Interface Device (NID) is the company point of termination. The customer is responsible to provide NT1 and all wiring beyond the NID.

ISDN BRI may include Custom Calling Features and/or Custom Local Area Signaling Service. However, these features require customer-provided compatible terminal equipment.

The ISDN services offered in this tariff are for Chariton Valley Telephone Customers only and are not for resale.

Line Extensions, either on-premises or off-premises, are not offered with ISDN services.

C. Liability

1. The telephone Company shall not be liable for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing service hereunder where the same is caused by the negligence of the customer or user. Any liability of the Telephone Company for damages arising out of any of the foregoing, or for failing to maintain proper standards of maintenance and operation, or for failing to exercise reasonable supervision shall, in no event, exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay or error or defect in transmission occurs.
2. The Telephone Company shall be indemnified and saved harmless by the user/subscriber/customer against:
  - a. Claims for libel, slander and infringement of copyright arising from the material transmitted over the service components;

1. INTEGRATED SERVICE DIGITAL NETWORK

REC'D AUG 03 1998

C. Liability – (Continued)

- b. Claims for infringement of patents arising from combining with, or using in connection with, service components furnished by the Telephone Company, apparatus and systems of the user/subscriber/customer;
  - c. All other claims arising out of any act of omission of the user/subscriber/customer in connection with the service components provided by the Telephone Company.
3. The Telephone Company does not guarantee nor make any warranty with respect to service components provided by it for use in an explosive atmosphere. The customer or user indemnifies and holds the Telephone Company harmless from any and all loss, claims, demands, suits or other action or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or user or by any other party or persons for any personal injury to or death of any person or persons and for any loss, damage or destruction of any property, whether owned by the customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of said service components so provided.

The Telephone Company will require each customer to sign an agreement or legal equivalent for the furnishing of such service components as a condition precedent to the furnishing of such service components.

4. The Telephone Company is not liable for any defacement of or damage to the premises of a user/subscriber/customer resulting from the furnishing of ISDN service components or the attachment of the associated wiring furnished by the Telephone Company on such premises or by the installation or removal thereof, when such defacement or damage is not the result of negligence of the agents or employees of the Telephone Company.

D. Unlawful Purposes

The service is furnished subject to the condition that it will not be used for any unlawful purpose. Service will be discontinued forthwith if any law enforcement agency, acting within its apparent jurisdiction, advises in writing that such services or channels are being used in violation of law. The Telephone Company will refuse to furnish service when it has reasonable grounds to believe that such service will be used in violation of the law.

1. INTEGRATED SERVICE DIGITAL NETWORK

REC'D AUG 03 1998

E. Resale of Use to Others

ISDN Services are provided for the exclusive use of the user/subscriber/customer and shall not be resold.

F. Definitions and Descriptions

ACO – Additional Call Offering, is a feature that notifies the ISDN user through D channel signaling procedures that there is a circuit-switched voice (CSV) or circuit-switched data (CSD) call waiting. The user can answer the incoming call by putting an existing call on hold or by disconnecting an existing call.

BRI – Basic Rate Interface, The ISDN BRI combines two 64Kbps B channels and one 16Kbps D channel (2B+D) over one Digital Subscriber Line (DSL).

B Channel – Bearer Channel, A 64Kbps channel used to convey user information (voice/data); the BRI has two B channels and the PRI has 23.

BPS – Bits per second, A measure of the speed with which data communications can move over a line. The prefixes K (for thousand) or M (for millions) are used to represent higher speeds.

CA – Call Appearance of an ISDN PDN.

CACH – Call Appearance Call Handling, is an EKTS terminal which supports multiple call appearances and multiple DNs. One or more DNs and/or call appearances of the CACH EKTS terminal can be shared with other terminals in an EKTS group.

CSA – Customer Serving Area, the physical point where the customer serving facilities originate, normally the central office or digital subscriber cabinet.

CSD – Circuit Switched Data, Data being sent over the circuit switched network similar to most voice calls.

CSV – Circuit Switched Voice, voice calls being sent over the circuit switched network.

**P.S.C. MO. No. 1 CONSOLIDATED**

Chariton Valley Telephone Corporation

Section VIII  
Original Sheet 6

1. INTEGRATED SERVICE DIGITAL NETWORK **Missouri Public Service Commission**

F. Definitions and Descriptions - (Continued)

REC'D AUG 03 1998

D Channel – Delta Channel, The packet switched channel on a DSL at 16Kps, or a PRI at 64Kbps that carries signaling messages and packet-switched user data.

DN – Directory Number, the 10 digit telephone number consisting of the area code plus seven digits.

DS1 – The common terminology for T-carrier that multiplexes 24 channels into a single 1.544 million bits per second bit stream.

DSL – Digital Subscriber Line, see BRI or PRI description.

EKTS – Electronic Key Telephone System, this feature allows a user served by a National Integrated Services Digital Network (ISDN) terminal to have access to multiple directory numbers (DNs). In addition, a DN can be accessed by more than one user (that is, a Shared DN). Directory Numbers (DNs) may be shared on the same ISDN basic rate interface (BRI) and/or on different ISDN BRIs. Two or more users with access to the same DN can be simultaneously bridged onto the same call on the DN.

FCO – Flexible Call Offering, the flexible call offering feature informs the called party that a transferred call is waiting. The called party begins alerting while the attendant is connected. (The attendant hears the alerting.) The attendant can disconnect any time after camp-on is activated, and the switch connects the calling part to ringing, tone, announcements, or silence (determined by the customer at subscription).

ISDN – Integrated Services Digital Network, An international plan by the CCITT to standardize a public communication network to handle circuit switched digital voice, circuit switched data, and packet switched data.

IXC's – Interexchange Carriers, Long distance common carriers providing intraLATA and interLATA telecommunications services.

1. INTEGRATED SERVICE DIGITAL NETWORK

REC'D AUG 03 1998

F. Definitions and Descriptions - (Continued)

NFAS – Non Facility Associated Signaling, this feature allows the use of multiple PRI ISDN physical connections to deliver up to 479 B channels to a given location. NFAS is required when using more than one physical link or if an optional backup D channel is needed.

NID – Network Interface Device, The physical Demarcation Point of Company provided outside plant facilities.

NT1 – Network Terminal 1, The CCITT label for ISDN network termination device that terminates the physical layer-1. This device is provided by the customer and is normally associated with the Terminal Adapter.

Packet Switching – A network technique that divides user messages into relatively short blocks and uses geographically distributed switching nodes, to achieve low end-to-end delay for real-time bursty data traffic.

PDN – Primary Directory Number, The number that is the unique identifier of an ISDN terminal.

PVC – Permanent Virtual Circuit, A virtual circuit established for the duration of an agreement between the user/subscriber/customer and the network authority and is available to send packets in either direction at any time. It has all the features of a virtual call without the call setup and release procedures.

PRI – Primary Rate Interface, The ISDN PRI combines 23 B channels and one 64Kbps D Channel on a single line.

SDN – Shared Directory Number, Shared directory number of an ISDN terminal.

SPID – Service Profile Identification, A unique number associated with an ISDN terminal device.

SVC – Switched Virtual Circuits, A logical connection across a packet switched network. It is established on an as-needed basis and can provide connection to any other switched user in the network.

Section VIII  
Original Sheet 8

1. INTEGRATED SERVICE DIGITAL NETWORK

**Missouri Public  
Service Commission**

F. Definitions and Descriptions - (Continued)

**REC'D AUG 03 1998**

T1 – T 1 Facility, A digital transmission standard in North America that carries traffic at the DS1 rate of 1.544 million bits per second.

Terminal Adapter – A device that provides protocol conversion from standard non-ISDN or TE2 interfaces (e.g., X.25, RS-232) to ISDN interface.

G. Service Description

ISDN services may be used for transmission of communications (voice and data).

Carrier handled interexchange circuit switched voice and data calls are subject to the applicable rates, charges and regulations of that carrier.

The Telephone Company will provide all service components necessary for ISDN services up to the demarcation point. The customer will be responsible for providing his/her own terminal equipment, communications system for use with such service as specified in this tariff.

ISDN is offered in two different channel structures. The first is Basic Rate Interface (BRI), and the second is Primary Rate Interface (PRI). Both use channels called "B" or Bearer Channels and "D" or Delta Channels. The B Channel provides a transmission path for user information, such as voice and data, while the D Channel carries signalling information and packet data.

Each B Channel has the capacity for 64 Kilobits per second channel connection. The D Channel has the capacity of 16 Kilobits per second if BRI and 64 Kilobits per second if PRI, and is used to send and receive call set-up and signaling messages to and from customer owned premises equipment and may carry limited packet data.

1. BRI-Basic Rate Interface

The BRI includes two B Channels and one D Channel (2B+D). The BRI can support the following:

- Simultaneous data and voice communications
- Data channel rates up to 64Kbps per B Channel
- Message based signaling
- Packet-switched data transmission

B-Channel

- 64Kbps per channel
- Voice or data
- Circuit or packet-switched

D-Channel

- 16Kbps
- Signaling messages and packet data
- Packet-switched

2. PRI-Primary Rate Interface

The basic PRI includes twenty-three B Channels and one D Channel (23B+D)

B-Channel

- 64Kbps per channel
- Voice or data

D-Channel

- 64Kbps per channel
- Control and signaling

A single primary directory number (DN) is included with ISDN-BRI. A shared DN is a primary DN that appears on more than one terminal. A shared Secondary DN is a DN that appears on more than one terminal but is not the Primary DN on any of those terminals. A Secondary DN may function as a primary DN on a terminal with a business group.

Extra directory listings will be furnished subject to the rates and regulations specified in P.S.C. MO: No. 1 Consolidated Section II of the General Exchange Tariff.

Service order processing charges as specified in P.S.C. MO. No. 1 Consolidated Section II of the General Exchange Tariff shall apply.

Extra directory numbers (DN) are available as listed in P.S.C. MO. No. 1 Consolidated Section IX of the General Exchange Tariff.
