Hi Kimberly,

Here you go! Please let us know if you need anything else, and thanks so much for the opportunity.

Dena

**GLK:**

“This impressive project is the latest example of Kansas’ place as a wind energy leader in our region and beyond,” Governor Laura Kelly said. “The Grain Belt Express will be instrumental in helping to power Kansas and other states, and have a significant economic impact here at home. My administration is committed to supporting investments that will continue to boost Kansas’ production and export of wind and other renewable energy.”

**Secretary Toland:**

“Kansas had the vision many years ago to commit to wind energy, and the unwavering commitment from Governor Kelly to further support renewable sources is paying off in many ways, including this tremendous step forward in the Grain Belt Express,” Secretary of Commerce David Toland said. “This major investment will be a huge help to restaurants, motels and other businesses hit hard by COVID-19, and deliver a significant economic boost to our rural communities in particular. The news couldn’t come at a better time.”

Yes, Lauren. Sorry, this is the same company that Governor Kelly met with their CEO in early March. They are building a high-voltage electric transmission line that will begin in Spearville and bring Kansas wind to market in the east coast. The project’s total investment is \$8B with \$6B of direct investment from new wind generation and the line itself occurring in Kansas. The project is moving into its next phase and the company plans to announce this development.

We have now a couple more hours. Until 1 or 2p today which is great.

Happy to jump on a call to walk through the project and its impact on Kansas!

Best,  
Kimberly

Hi Kimberly – thanks for reaching out. Could you tell us more about the company?

Good evening,

I hope this note finds you three well! My apologies for sending this after hours, however, time has become a greater issue with this press release this afternoon.

One of my member companies, is preparing to issue a press release for KS and MO regarding a large renewable energy investment that would bring \$6B of new private investment into KS.

**Would the Governor and/or Secretary Toland be interested in being quoted in the release?** If so, I can provide more information about the project. However, I would need to have a **final quote by noon tomorrow**.

Thank you all for your consideration – especially in such a rapid timeframe.

Best,  
Kimberly
