

EC-2023-0395

Brett Felber
VS
Ameren Missouri

I am disappointed in how the Regulatory Judge in this matter and the Commissioners got away with manipulation and extortion methods.

The only manipulators of this complaint were the Commissioners and the Regulatory Judge. They allowed Ameren, along with themselves to give excuses to every piece of verifiable documentation that was submitted and introduced through EFIS and during the evidentiary hearing.

I believe I was severely discriminated against for multiple reasons that I have proven and continue to prove to this day.

Thanks to the Commissioners and the Regulatory Judge not taking my complaint in a more serious or stern matter, Ameren Missouri is back at their same deceiving, deceptive, illegal and fraudulent tactics, in which is why I had to file a new complaint against Ameren Missouri.

This will now be the third time dealing with concurrent issues, especially surrounding their deposits, etc.

I lost a ton of money that I will probably never see again in recourse, because the Public Service Commission allows Ameren Missouri to continuously cycle through their fraudulent ways.

Ameren needs to be fined, punished and prosecuted for their illegal and deceptive tactics.
