I apologize for the lack of response for the first notification we received. After reading the recommendation, we just assumed it was a foregone conclusion, which was just to be finalized by the meeting. Although we may not agree with the decision, we certainly appreciate and respect the process. All of the information we have has already been given either verbally or through email correspondence. Thank you for bringing this to light. We are just one of many, with a common problem. With that said, if possible, please proceed without us in attendance.

Thank you again

Jack & Tammy Duncan
