

EC-2024-0217

Brett Felber
VS
Ameren Missouri

I can rest assure to Regulatory Judge Fewell and the Commission the document that I am asking the Staff to examine wasn't used in determination or already investigated. If it would have been investigated the Commissioners , Regulatory Judge and the Staff would be in agreement.

Also there was no investigation into the document in EC-2023-0395, of whether is was counterfeit or not.

The whole purpose is to launch an investigation into why Ameren produced a countefeit document with an invalid email address.

We can argue all day and night about it. I'm really not trying to be ingorant with Mr. Vandergriff or any of the Staff, I just want them to see the clear obvious that www2.ameren.com is not a valid external or internal email address for sending emails and this was never investigated.

The document is very suspicious. Also if it was a valid email address, it would come back in blue, such as [REDACTED].

Amazing what happens when you tell the truth. Trust me, it's not a ruthless or frivolous investigation. It's a counterfeit document.

Most likely why Ameren's counsel has failed to respond to me now twice about the document, even though I have email correspondence she would engage with me and respond on both Thursday March 14, 2024 & Friday March 15, 2024.

I just ask for the truth that is it. I shouldn't be lied to. Ameren isn't above the law.

I appreciate the Commission and Judge Fewell's clarification .
