BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF MISSOURI

FILED

MAY 7 2009

In the Matter of a Proposed Rulemaking
To Amend Commission Rule 4 CSR 240-20.065

Date: 28 April 2009
Case No: EX-2009-0267
Missouri Public Service Commission

COMMENTS OF MISSOURI SOLAR APPLICATIONS, LLC

As a small business designing and installing solar photovoltaic (PV) electric power systems, it is important that net metering laws and utility procedures be as easy as possible with minimum additional documents and minimum costs. In addition, our solar energy customers or owners of solar systems must find the solar experience to be quick and at minimum regulatory/utility cost. Additional renewal energy insurance over their normal residential and commercial insurance requirements would be excessive and expensive. Therefore, it should not be required on any systems.

Today's solar systems are manufactured, designed and installed to industry codes and standards to be safe. There is no need for the "Interconnection Application/Agreement for Net Metering Systems" to contain language that "scares off" a potential customer-generator for installing a renewable energy system on their project.

Therefore our firm agrees with Renew Missouri Net Metering comments to the Public Service Commission submitted today.
