

EO-2024-0244
Change of Supplier

In another response to Mr. Grahams filing I'm going to submit why the Staff of the Commission should have to file a response.

Seems I'm not the only one who thinks that Ameren Missouri is a Con Artist. While it has nothing to do with my matter. I want to present a piece of paper in which was at a most recent hearing on March 28, 2024 in the District Court. The Honorable Judge Rodney Sippel stated exactly what is on the document.

In addition, Ameren Missouri has ignored Judges rulings in court orders.

In addition, the Honorable Judge Sippel stated " Stopping violating the law is not a solution to the harm done."

Looks like I'm not the only one stating that Ameren Missouri is a Con Artist. They are repeat offenders of violating the law. Looks like the Honorable Judge Sippel has caught on the Ameren's deceptive tactics.

Maybe Mr. Graham or Ameren would like to file a response to that. Better yet sounds like the PSC is enjoying the company and allowing a Con Artist Corporation to eclipse laws and court orders.

The Honorable Judge Clark and Mr. Keevil are familiar with the Rush Island matter. Sorry, Ameren's failed to install the appropriate scrubbers for debris and now they want to close the plant on consumers money, instead of spending those hefty billions they have sitting in a bank account right now.

I don't know how the PSC has the authority to approve a tariff utility bond or overrule a Federal Judge, but apparently the system works backwards in Missouri and the PSC thinks they have jurisdiction over an actual Federal Judge.

That being said these words stated by the Honorable Judge Sippel clearly show that Ameren Missouri is a Con Artist company like I've said all along .

I think this matter should stay open as long as possible , therefore I can continue exposing all the fraud that Ameren Missouri has tried to get away with and is finally being caught up on.

Maybe they can make some more counterfeit documents that contain bogus email address like www2.ameren.com .

I bet that is what they've done in their newest proposal for their securing of bonds to close Rush Island. Pumped out some counterfeit, fraudulent documents . I bet if I ran all the documents through a verification document authenticator 2/3rd's would come back counterfeit, just like the counterfeit agreement.

However, I think this matter should remain open until the Con Artist Corporation that serves my area allows another provider to move into my area due to their counterfeit and fraudulent actions. Otherwise, I'm going to continue to expose the fraudulent behaviors Ameren Missouri has done. Also since Ameren decided to practice Con Artist and produce fraudulent documents. Whatever the cost to allow another provider to come into the area, Ameren should be liable for paying the full balance for that.

Ameren Missouri is no more than a Con Artist Company that practices extortive methods to steal money from Missourians and Consumers.

As far as I'm concerned, Mr. Grahams filing he is defending a Con Artist Corporation that submitted a counterfeit document with a bogus email address, made to resemble a payment agreement, that isn't a payment agreement.

Mr. Graham or more importantly "Staff" doesn't want to admit that, because then they won't get their lobbyist funding from Ameren Missouri.

How much money did Ameren Missouri lobby or give to the PSC this past year to approve rate cases, hikes and complaints?

Oh, don't worry, if this matter stays open. I'm going to expose the slush funding that Ameren pays Commissioners and PSC members to lobby for them. Banks don't lie.

Ameren Missouri, Union Electric, whatever they want to call themselves are the welfare bone of stealing from consumers. Nothing more than glorified grifters who will always be Con Artists.

As far as I'm concerned the PSC has allowed the glorified grifters to continuing grifting peoples money.

Hopefully, Ameren's undersigned Counsel has that response to www2.ameren.com on April 22nd. Can't wait for the response. Wouldn't be surprised when undersigned counsel gives another Con Artist excuse.

I also have come to terms with myself that I shouldn't expect an apology from Ameren Missouri, because glorified grifters continue to lie even more. Then you expose more lies from the grifter.
