

EO-2024-0244
Change of Supplier

Since i have little faith in the Commission granting me an extended timeframe to answer the matter can keep the complaint moving forward I will answer best to my abilities as to why this matter shouldn't be dismissed.

Essentially the Commission has allowed Ameren Missouri to extort me out of money I shouldn't have had to pay.

The Commission is no more than protecting coniving thieves, Ameren Missouri and have allowed the coniving thieves to publish and produce altered, forged and counterfeit documents.

I invite all parties to take a gander at matter EC-2024-0217 in which Ameren Missouri asked for not one,, but twice to further delay filing an answer regarding the counterfeit document at question which contains a bogus email address. The date it was due, the Con Artist Corporation who has certificated of being a coniving thief instead of filing a response, filed a Motion to have the matter dismissed.

If my brain serves correct, while Ameren Missouri has so called "certificates" and are a "registered" company in the area, it doesn't allow them to manipulate systems and disregard the law in general. Ameren has done nothing but break the law and the Commission themselves are breaking the law themselves too.

Ameren Missouri has done nothing but break the law, destroyed my personal property and enviroment. They illegally disconnected utility services and when I introudced the document that I asked for many, many many, months prior to a evidentiary hearing, (I was denied any and all my motions to compel) they sold the Commission and the Commissioners an altered product and countefeit document to resemble a "payment agreement" an agreement that wouldn't have been sent to I the Complainant because it had an invalid email address and invalid PAG terms.

Honestly, dismissing my complaint isn't going to make a complaint go away, I'm just going to further go up the recourse tree in which then I seek the Commission is prosecuted, along with Ameren Missouri.

I shouldn't be subjected to continous business dealings with a Con Artist Corporation that has utilized counterfeit documents, admitted at an evidentiary hearing to altering documents and went so far off par by elaborating about their master manipulating career in the Army.

I don't expect the Commission to give me any answers. You've been protecting Ameren Missouri for almost a year now on any part of my complaints that have been filed.

Ameren Missouri knows they are in the wrong, the Commission knows they are in the wrong. The fact that the Commission hasn't forced Ameren to explain the counterfeit document shows that the Commission is hindering and infringing my rights bringing forward a Complaint. As far as I'm concerned, Staff of the Commission and the Regulatory Judges are no more than puppets to Ameren Missouri. Might as well dressup in your Ameren Missouri uniform and go to work for Ameren everyday, because that is all that has been done.

I honestly don't care what the Commission does with this matter at this point. I've explained they've broke the law. They used a counterfeit document to extort \$ [REDACTED] and more out of me. Ameren knows it, the Commission knows it, Staff knows it and anybody elses knows it.

Who in their right mind would absolutely think that an email address consists of the embedment of www2.ameren.com, without the @ symbol?

What's even worse is the Staff Attorney's Regulatory Judges, Ameren Missouri being all buddy/buddy and teaming up against the party that doesn't have a license to practice to law.

I've asked for honesty from all parties and instead I've been robbed, deceived, extorted, used and not to mention stolen from thanks to the Staff of the Commission and the Commissioners and Regulatory Judges.

At this point the horse manure that Ameren Missouri continues to dwindle upon stinks so bad, that every time they file a so called "response" that they should clean their garbage up. But they don't, because they file another lie.

I'm not here to cite statutes, rules, regulations and tariffs. That isn't my job. My job is to file a complaint, elaborate in further detail of the complaint and move forward from there on the appropriate action. That hasn't happened at all during this matter. Ameren has been allowed to mislead so many counterfeit production jobs that it isn't even funny anymore.

Bad business, especially when a business produces counterfeit documents should be refrained from conducting business. It's not only illegal, its against the law.

The Commission can do what they please on this matter, but I guarantee it isn't going to end any of the Complaints and I'm going to go to a higher authority to investigate not only the Commission, but continue investigating Ameren Missouri.

At this point, until the Commission grants my request for a Change of Supplier and Ameren Missouri is forced to have their certificates revoked, along with their Articles of Incorporating revoked, I will continue my battle to have them removed from doing business in the State of Missouri.

My final words are I caught the Commission and Ameren Missouri in lie. Please stop with your coniving acts. My message to Ameren is stop with the counterfeit documents and return my \$ [REDACTED] that you extorted out of me.
