## Ameren Missouri's Response to MPSC Data Request - MPSC EF-2024-0021

In the Matter of the Request of Union Electric Company d/b/a Ameren Missouri for Issuance of a Financing Order Arising From the Retirement of its Rush Island Energy Center.

## No.: MPSC 0024

1. Provide the project number/work order number associated with each Ameren Missouri project listed on Schedule MCB-D2. For any such project where the project number/work order is not available state as such. 2. What is the source of the dates and projects/components listed in MCB-D2 with regards to Ameren Missouri? 3. Please double check the dates associated with the following projects: • Rush Island Unit 2 Lower Slope (listed in 2010) • Rush Island 1 and Rush Island 2 Air Preheater (listed in 2001 and 2003) • Labadie 3 Reheater (1991) • Labadie 3 Air Preheater (1997) • All Meramec Unit 3 components (1999). • Meramec 1 & 2 Superheater (2000)

Prepared By: Laura Moore Title: Controller, Ameren Missouri Date: March 8, 2024

1. Attached is Mr. Birk's Schedule MCB-D2 but with project numbers added for projects that were in service as of the time Ameren began utilizing PowerPlan as part of its plant accounting processes (in the third quarter of 2005) and for certain other projects for which paper work orders were on site. The project numbers for other projects placed in service prior to that time must be acquired from paper work order files which are housed in offsite storage. The files have been requested from offsite storage but are voluminous and will require additional time to review. This response will be supplemented when such review is complete.

2. The source of the data in Schedule MCB-2 is a combination of PowerPlan data as noted above and paper work orders reviewed several years ago when the files were not in offsite storage.

3. The dates on the projects listed in part 3 that went into service prior to the 3<sup>rd</sup> quarter of 2005 will be checked as part of the review of the paper work order files as referenced above. There is one project listed in part 3 for which information does exist in Power Plan – the Rush Island Unit 2 Lower Slope. Upon further review, the Rush Island Unit 2 Lower Slope (listed in Schedule MCB-D2 as 2010) was not installed until 2016 (the equipment was purchased in 2010 which led to its incorrect data listing in the table. This correction has also been made on the attached.

## Ameren Missouri's Response to MPSC Data Request - MPSC EF-2024-0021

In the Matter of the Request of Union Electric Company d/b/a Ameren Missouri for Issuance of a Financing Order Arising From the Retirement of its Rush Island Energy Center.

No.: MPSC 0074

See response to Staff data request 24.1 and supplement the response or indicate the status of the work order file review.

Prepared By: Laura Moore Title: Controller, Ameren Missouri Date: April 11, 2024

I assume the reference to DR No. 24.1 above is a reference to DR 24 since there is no 24.1.

I have updated Mr. Birk's Schedule MCB-D2 to add additional work order numbers based on paper file review of work orders – see attached. My review of other paper files is ongoing so some projects are not yet associated with a work order number.

My file review indicated that two projects, Rush Island U1 Air Preheater and Rush Island U2 Preheaters had been listed in the wrong year, the U1 project was completed in 1995 and 1997 instead of 2001 and the U2 project was completed in 1994 and 1996 instead of 2003. I have therefore moved those projects to the correct year.
