ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE

5.1 General

This Section sets forth the regulations and order-related charges for Access Orders for Switched and Special Access Services. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.

(CT) An Access Order is the customer's request for the Telephone Company to provide the customer with
(CT) Switched Access Service or Special Access Service or to provide modifications to existing services. An
(AT) Access Order may be submitted by Access Service Request (ASR) or by such other ordering processes as
(AT) the Telephone Company may provide. Depending upon the services, facilities or service interval dates
(AT) requested, one or more Access Orders may be required to provide the IC with access service.

5.1.1 Ordering Conditions

A customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

The customer shall provide all information necessary for the Telephone Company to provide and bill for
(RT) the requested service. In addition to the order information required in Paragraph 5.2, the customer must also provide:

- Customer name and premises address(es).
- Billing name and address (when different from customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

The Telephone Company will establish a service date when the customer has provided an Access Order that contains the information as required for each respective service described in this and other sections of the tariff. The date on which the service date is established is considered to be the Application Date. The Telephone Company will provide a firm order confirmation to the customer and will advise the customer of the application Date and the Service Date.

Orders for FGA and BSA-A Switched Access Service must be in multiples of 30 busy-hour minutes of capacity.

CANCELLED - Missouri Public Service Commission - 05/01/2024 - TN-2024-0278 - JI-2024-0140

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE

5.1 General

This Section sets forth the regulations and order-related charges for Access Orders and Planned Facilities Orders for Switched and Special Access Services. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.

An Access Order is an order to provide the IC with Switched Access Service or Special Access Service or to provide changes to existing services. A Planned Facilities Order is an order to make facilities available on an established activation date for an IC's future Access Service needs.

For purposes of ordering Access Service, an End User who orders Access Service will be considered to be an IC and will be required to provide the same information that a non-End User IC must provide when placing an order.

5.1.1 Ordering Conditions

An IC may order any number of services of the same type (e.g., Feature Group, interface group, facility type, etc.) between the same locations (i.e., the IC terminal location and end office, Hub or End User's premises) on a single Access Order or Planned Facilities Order.

The IC shall supply all the necessary information to provide service, e.g., IC name and terminal location, End User's name and location, facility interface, etc. All details for a particular order must be identical except for those for multipoint services. The minimum order requirements are set forth in Paragraphs 5.2 and 5.4, following.

Orders for Feature Group A Switched Access Service must be in multiples of 30 busy-hour minutes of capacity.

CANCELLED
JUL 1 1984

Dedicated Access Line Special Access Service must be ordered for use with a Feature Group C or D Switched Access Service which is in service or on order.

ACCESS SERVICES

(RT) 5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.1 General-(Continued)

5.1.2 Provision of Other Services-(Continued)

B. With the agreement of the Telephone Company, the items listed in Paragraph A., preceding, may subsequently be added to the order at any time, u p to and including the service date for the Access Service. When added
(CT) subsequently, charges for a design change as set forth in Paragraph 5.2.3, C., following, will apply when an engineering review is required.

C. Additional Engineering is not an ordering option, but will be applied to an
(C) Access Order when the Telephone Company determines that Additional Engineering is necessary to accommodate a customer's request. Additional Engineering will only be required as set forth in Paragraph 13.1, following. When it is required, the customer will be so notified and will be furnished with a written statement setting forth the justification for the Additional Engineering as well as an estimate of the charges. If the customer agrees to the Additional Engineering, a firm order will be established. If the customer does not want the service or facilities after being notified that Additional Engineering of Telephone Company facilities is required, the order will be withdrawn and no charges will apply. Once a firm order has been established, the total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10 percent.

The regulations, rates and charges for Additional Engineering are as set forth in Paragraph 13.1, following, and are in addition to the regulations, rates and charges specified in this Section.

5.1.3 Special Construction

The regulations, rates and charges for special construction are set forth in Section 14, following, and are in addition to the regulations, rates and charges specified in this Section.

5.2 Access Order

An Access Order is used by the Telephone Company to provide to an IC Access Service as follows:

- Switched Access Services as set forth in Section 6, following.
- Special Access Services as described in Section 7, following, and
- Other Services as set forth in Paragraph 5.1.2, preceding.

5.2 Access Order

An Access Order is used by the Telephone Company to provide to an IC Access Service as follows:

- Switched Access Services as set forth in Section 6, following,
- Special Access Services as described in Section 7, following, and
- Other Services as set forth in Paragraph 5.1.2, preceding.

When placing an order for Access Service, the IC must provide, at a minimum, the following information:

FILED
JAN - 1 1984
83-253
Public Service Commission

- For Switched Access Service, the IC must specify the number of busy-hour minutes of capacity (BHMC) from the IC terminal location to the end office by Feature Group and by type of BHMC. In addition, for Feature Group A, the IC must specify whether the ordered capacity is for foreign dial tone service, second dial tone service or switched private network service. This information is forwarded to the Circuit Administration Center (CAC) for networking design, then back to the IC for specifying the Interface Group Supervisory Signaling and Local Switching options.

Issued: DEC 29 1983 Effective: JAN 01 1984

By R. D. BARRON, Vice President-Missouri
Southwestern Bell Telephone Company
St. Louis, Missouri

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When placing an order for Access Service, the IC must identify itself as a certified LEC, a certificated IXC, or an ESP for the services being ordered and provide, at a minimum, the following information:

A. Feature Group A (FGA) or Circuit Switched-Line Side BSA (BSA-A) Switched Access Service

The customer shall specify the Interexchange Carrier to which the FGA or BSA-A service is connected or, in the alternative, specify the means by which the FGA or the line side access communication is transported to another state.

The customer shall also specify the number of lines and the first point of switching (i.e., dial tone office), the directionality of the service, and the Switched Transport and Local Switching features desired. The first point of switching cannot be an end office served by a Remote Switching System (RSS) or Remote Switching Module (RSM) because all traffic originating or terminating at a remote switching office must switch through its host office.

In addition, the customer shall specify whether the ordered lines are for MTS/WATS-type or FX-ONAL services. The customer shall also specify which MTS/WATS-type FGA or BSA-A lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.

The customer shall indicate if the FGA or BSA-A Switched Access Service is to be provided with an extension to a different LATA. When an extension is indicated on the order, the customer must specify the customer designated premises within the LATA of the Switched Access FGA or BSA-A service at which the FGA or BSA-A extension is to be terminated.

The customer must also specify if new or existing Switched Transport facilities, interconnection cross connect, or switched transport connection will be used. If a new Switched Transport facility or facilities are specified, additional information as set forth in (C) following is also required. If an existing Switched Transport facility or facilities are specified, such facilities must have a compatible interface and available capacity to install the FGA or BSA-A service. If a new interconnection cross connect or switched transport connection is to be used, the customer must provide the Telephone Company with information sufficient to identify the interconnection cross connect or switched transport connection. In addition, the customer must also specify the circuit facility assignment for the FGA or BSA-A being installed.

(RT) (RT) B. Feature Group B (FGB), Feature Group D (FGD) or Circuit Switched-Trunk Side BSA Alternatives B or D (BSA-B or BSA-D) Switched Access Service

The customer shall specify the number of trunks, directionality of the service, the entry switch and the Switched Transport and Local Switching features desired. The first point of switching cannot be an end office provided by an RSS or RSM because all traffic originating from or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine if direct trunking to the end office will be provided.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When placing an order for Access Service, the IC must identify itself as a certified LEC, a certificated IXC, or an ESP for the services being ordered and provide, at a minimum, the following information:

(AT)

A. Feature Group A (FGA) or Circuit Switched-Line Side BSA (BSA-A) Switched Access Service

The customer shall specify the Interexchange Carrier to which the FGA or BSA-A service is connected or, in the alternative, specify the means by which the FGA or the line side access communication is transported to another state.

The customer shall also specify the number of lines and the first point of switching (i.e., dial tone office), the directionality of the service, and the Switched Transport and Local Switching features desired. The first point of switching cannot be an end office served by a Remote Switching System (RSS) or Remote Switching Module (RSM) because all traffic originating or terminating at a remote switching office must switch through its host office.

In addition, the customer shall specify whether the ordered lines are for MTS/WATS-type or FX-ONAL services. The customer shall also specify which MTS/WATS-type FGA or BSA-A lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.

The customer shall indicate if the FGA or BSA-A Switched Access Service is to be provided with an extension to a different LATA. When an extension is indicated on the order, the customer must specify the customer designated premises within the LATA of the Switched Access FGA or BSA-A service at which the FGA or BSA-A extension is to be terminated.

The customer must also specify if new or existing Switched Transport facilities, interconnection cross connect, or switched transport connection will be used. If a new Switched Transport facility or facilities are specified, additional information as set forth in (C) following is also required. If an existing Switched Transport facility or facilities are specified, such facilities must have a compatible interface and available capacity to install the FGA or BSA-A service. If a new interconnection cross connect or switched transport connection is to be used, the customer must provide the Telephone Company with information sufficient to identify the interconnection cross connect or switched transport connection. In addition, the customer must also specify the circuit facility assignment for the FGA or BSA-A being installed.

B. Feature Group B (FGB), Feature Group C (FGC), Feature Group D (FGD) or Circuit Switched-Trunk Side BSA Alternatives B, C or D (BSA-B, BSA-C or BSA-D) Switched Access Service

The customer shall specify the number of trunks, directionality of the service, the entry switch and the Switched Transport and Local Switching features desired. The first point of switching cannot be an end office provided by an RSS or RSM because all traffic originating from or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine if direct trunking to the end office will be provided.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When placing an order for Access Service, the IC must identify itself as a certified LEC, a certificated IXC, or an ESP for the services being ordered and provide, at a minimum, the following information:

(AT) - For the DNAL Switched Access BSA, the customer shall specify the designated customer premises, the channel interface and the line side or
(AT) trunk side Switched Access BSA to be associated with the DNAL.

(AT) - For FGA and BSA-A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office). The first point of switching shall be selected in accordance with the provisions set forth in Section 2, Paragraph 2.1.2.A., and cannot be an end office served by an RSS or RSM because all traffic originating from or terminating at a remote switching office must switch through its host office. The customer shall also specify the directionality of the service, the Local Transport and Local Switching features desired. The IXCs or LECs must also specify whether the ordered lines or capacity is for FX/ONAL or MTS/WATS-type service. The customer shall also specify
(AT) which MTS/WATS-type FGA or BSA-A lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.
The customer shall also specify that the FX/ONAL is to be provided with an extension to a different LATA, if applicable. When such an extension is specified on the order, the customer must also specify the customer-designated premises within the LATA of the Switched Access Feature Group A
(AT) service, at which the FGA or BSA-A extension is to be terminated.

(AT) For FGB or BSA-B Switched Access Service, the customer shall specify the number of trunks, directionality of the service, the entry switch and the Local Transport and Local Switching features desired. The first point of switching cannot be an end office served by an RSS or RSM because all traffic originating or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine whether direct trunking of the service to the end office is necessary. Direct trunking to an end office will be installed when a customer orders features that can only be provided through direct trunking.

(AT) When placing an order for Access Service, the IC must identify itself as a certified LEC, a certificated IXC, or an ESP for the services being ordered and provide, at a minimum, the following information:

- For Feature Group A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office). The first point of switching shall be selected in accordance with the provisions set forth in Section 2, Paragraph 2.1.2.A., and cannot be an end office served by an RSS or RSM because all traffic originating from or terminating at a remote switching office must switch through its host office. The customer shall also specify the directionality of the service, the Local Transport and Local Switching features desired. The IXCs or LECs must also specify whether the ordered lines or capacity is for FX/ONAL or MTS/WATS-type service. The customer shall also specify which MTS/WATS-type FGA lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.

  The customer shall also specify that the FX/ONAL is to be provided with an extension to a different LATA, if applicable. When such an extension is specified on the order, the customer must also specify the customer-designated premises within the LATA of the Switched Access Feature Group A service, at which the FGA extension is to be terminated.

- For Feature Group B Switched Access Service, the customer shall specify the number of trunks, directionality of the service, the entry switch and the Local Transport and Local Switching features desired. The first point of switching cannot be an end office served by an RSS or RSM because all traffic originating or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine whether direct trunking of the service to the end office is necessary. Direct trunking to an end office will be installed when a customer orders features that can only be provided through direct trunking.

(RT) 5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When placing an order for Access Service, the IC must provide, at a minimum, the following information:

- For Feature Group A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone (RT) office), the directionality of the service, the Local Transport and Local (CT) Switching features desired. The first point of switching cannot be an end office served by an RSS or RSM because all traffic originating or terminating at a remote switching office must switch through its host office. In addition, the customer shall specify whether the ordered lines or capacity is for FX/ONAL or MTS/WATS-type service. The customer shall also specify which MTS/WATS-type FGA lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.

  The customer shall also specify that the FX/ONAL is to be provided with an extension to a different LATA, if applicable. When such an extension is specified on the order, the customer must also specify the customer-designated premises within the LATA of the Switched Access Feature Group A service, at which the FGA extension is to be terminated.

- For Feature Group B Switched Access Service, the customer shall specify the number of trunks, directionality of the service, the entry switch and (CT) the Local Transport and Local Switching features desired. The first point of switching cannot be an end office served by an RSS or RSM because all traffic originating or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine whether direct trunking of the service to the end office is necessary. Direct trunking to an end office will be installed when a (RT) customer orders features that can only be provided through direct trunking.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

- Directory Assistance Service is ordered in the same manner as Basic Switched Access Service and requires the same information.

- For Special Access Service, the IC must specify the IC terminal location and End User's premises or Hub, the type of service (e.g., Narrowband 1, Voice Grade 3, High Capacity 1, etc.) and the facility interface combination. When ordering to a Hub, no interface combinations are required but Hub functions must be specified. For multipoint services, the facility interface at each End User's premises may be different, but they must all work in combination with a common facility interface at the IC terminal location.

- The IC must always specify how Special Access Service is to be used so that the Telephone Company may determine the appropriate application of the Special Access Service Surcharge. The surcharge and its applications are described in Section 7, Paragraph 7.4.2, following.

- For Dedicated Access Lines, the IC must specify the End User's premises, the type of facility (i.e., two-wire or four-wire), the type of calling (i.e., originating or terminating) and the type of supervisory signaling. When the necessary screening functions are not provided at the End User's serving wire center, the IC may specify, with the agreement of the Telephone Company, a specific foreign serving wire center where capacity exists.

5.2.1 Access Order Service Date Intervals

Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval
- Short Notice Interval

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

(RT) B. Feature Group B (FGB), Feature Group D (FGD) or Circuit Switched-Trunk Side BSA Alternatives B or D
(RT) (BSA-B or BSA-D) Switched Access Service (Continued)

When the customer orders trunk quantities to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements. Traffic estimates to end offices served by remote switching offices should be uniquely identified and not included in traffic estimates to the host. The traffic type must also be specified using the categories described in 6.7.1 of Tariff FCC No. 73 (Manner of Provisioning), to enable efficient provisioning and billing functions.

When ordering FGB or BSA-B, the customer shall specify the Interexchange Carrier to which the FGB or BSA-B service is connected or, in the alternative, specify the means by which the FGB or BSA-B access communication is transported to another state.

When FGD or BSA-D Switched Access Service is ordered for the provision of MicroLink I Access Capability, the customer must have digital facilities between the customer designated premises and the access tandem or end office for originating and terminating traffic. The customer must also specify the traffic type as described in 6.7.1 of Tariff FCC No. 73 (Manner of Provisioning).

(RT) When ordering FGB, FGD, BSA-B or BSA-D, the customer must also specify if new or existing Switched Transport facilities, interconnection cross connect or switched transport connection will be used. If a new Switched Transport facility or facilities are specified, additional information as set forth in (C) following is also required. If an existing Switched Transport facility or facilities are specified, such facilities must have a compatible interface and available capacity to install the service. If a new interconnection cross connect or switched transport connection is to be used, the customer must provide the Telephone Company with information sufficient to identify the interconnection cross connect or switched transport connection. In
(RT) addition, the customer must also specify the circuit facility assignment for the FGB, FGD, BSA-B or BSA-D service being installed.

C. Switched Transport and Directory Transport Services

When the customer orders Switched Transport Service or Directory Transport Service, the customer must designate at least one line side or trunk side Switched Access Service or Directory Assistance Access Service that will use the transport facility or facilities.

When a customer orders Switched Transport Service or Directory Assistance Access Service and specifies that the facility is to be interconnected with another transport facility, the customer must specify compatible channel interfaces.

The minimum information required to order Switched Transport Service or Directory Transport Service is set forth in (1) through (3) following. Such information is in addition to the information required to order line side or trunk side Switched Access Service or Directory Assistance Access Service.

CANCELLED - Missouri Public Service Commission - 05/01/2024 - TN-2024-0278 - JI-2024-0140

(AT) B. Feature Group B (FGB), Feature Group C (FGC), Feature Group D (FGD) or Circuit Switched-Trunk Side BSA Alternatives B, C or D (BSA-B, BSA-C or BSA-D) Switched Access Service (Continued)

When the customer orders trunk quantities to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements. Traffic estimates to end offices served by remote switching offices should be uniquely identified and not included in traffic estimates to the host. The traffic type must also be specified using the categories described in 6.7.1 of Tariff FCC No. 73 (Manner of Provisioning), to enable efficient provisioning and billing functions.

When ordering FGB or BSA-B, the customer shall specify the Interexchange Carrier to which the FGB or BSA-B service is connected or, in the alternative, specify the means by which the FGB or BSA-B access communication is transported to another state.

When FGD or BSA-D Switched Access Service is ordered for the provision of MicroLink I Access Capability, the customer must have digital facilities between the customer designated premises and the access tandem or end office for originating and terminating traffic. The customer must also specify the traffic type as described in 6.7.1 of Tariff FCC No. 73 (Manner of Provisioning).

When ordering FGB, FGC, FGD, BSA-B, BSA-C or BSA-D, the customer must also specify if new or existing Switched Transport facilities, interconnection cross connect or switched transport connection will be used. If a new Switched Transport facility or facilities are specified, additional information as set forth in (C) following is also required. If an existing Switched Transport facility or facilities are specified, such facilities must have a compatible interface and available capacity to install the service. If a new interconnection cross connect or switched transport connection is to be used, the customer must provide the Telephone Company with information sufficient to identify the interconnection cross connect or switched transport connection. In addition, the customer must also specify the circuit facility assignment for the FGB, FGC, FGD, BSA-B, BSA-C or BSA-D service being installed.

C. Switched Transport and Directory Transport Services

When the customer orders Switched Transport Service or Directory Transport Service, the customer must designate at least one line side or trunk side Switched Access Service or Directory Assistance Access Service that will use the transport facility or facilities.

When a customer orders Switched Transport Service or Directory Assistance Access Service and specifies that the facility is to be interconnected with another transport facility, the customer must specify compatible channel interfaces.

The minimum information required to order Switched Transport Service or Directory Transport Service is set forth in (1) through (3) following. Such information is in addition to the information required to order line side or trunk side Switched Access Service or Directory Assistance Access Service.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When ordering FGB or BSA-B capacity to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements. Traffic estimates to end offices served by remote switching offices should be uniquely identified and not included in traffic estimates to the host. The traffic type must also be specified using the same categories as described in Paragraph 6.1.1, following, to enable efficient provisioning and billing functions.

For FGC, FGD, BSA-C and BSA-D Switched Access Service, the customer s hall specify the number of busy-hour minutes of capacity (BHMC) from the IC terminal location to end offices (including those served by an RSS or RSM),
by Feature Group or BSA and traffic type. The Telephone Company shall design and determine the routing, including the selection of the entry switch in accordance with Section 6, Paragraph 6.8.2, following. This information is used to determine the number of transmission paths as set forth in Section 6, Paragraph 6.8.5, following. The customer then specifies the Local Transport and Local Switching features.

Customers may, at their option, order FGD or BSA-D by specifying the number of trunks desired between the customer's premises and an entry switch. When ordering by trunk quantities to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements.

When a customer orders FGD or BSA-D Switched Access Service, the capacity ordered in an Access Tandum Network must be ordered in either BHMCs of
(AT) trunks and cannot be mixed. When ordering FGD or BSA-D trunks with SS7 Signaling, in
| addition to the other information listed in Section 5, the customer shall specify the switching point
| codes and trunk circuit identification codes. The customer must also identify the Common
| Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service link
(AT) associated with the FGD or BSA-D trunk group.

Remote switching office to host relationships are provided to all customers by the Telephone Company. This information is contained in the Southwestern
Bell End Office Profile report.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

(AT) C. Switched Transport and Directory Transport Services (Continued)

(1) Entrance Facility

If the Entrance Facility is new, the customer must specify the customer premises, the connection type (Voice Grade, DS1 or DS3), the interface group and the Switched Transport features (including multiplexing, if this feature is desired at the serving wire center).

If the Entrance Facility is existing, the customer must provide the information set forth in 5.2 and 5.2 of this intrastate tariff.

(2) Direct-Trunked Transport

If the Direct-Trunked Transport is new, the customer must specify the connection type (Voice Grade, DS1 or DS3), the channel interface and the Switched Transport features desired (including multiplexing). If multiplexing is requested, the customer must specify the type of multiplexing required and each hub where the multiplexer or multiplexers are to be installed.

The customer must also specify the Entrance Facility or interconnection cross connect to which the Direct-Trunked Transport is interconnected and whether or not the Entrance Facility or interconnection cross connect is new or existing. The Entrance Facility must have an interface that is compatible with the Direct-Trunked Transport being requested.

If the Entrance Facility to which the Direct-Trunked Transport is to be interconnected is new, additional information as specified in (C)(1), is required. If either the Direct-Trunked Transport or the Entrance Facility (to which the Direct-Trunked Transport is to be interconnected) is existing, additional information, as set forth in 5.2 A and 5.2 B of this intrastate tariff.

(3) Tandem-Switched Transport

If the Tandem-Switched Transport is new, the customer must specify the connection type (Voice Grade, DS1 or DS3) to be used between the end office and the access tandem. The customer must also specify the Switched Transport features desired (including multiplexing). If multiplexing is requested, the customer must specify the type of multiplexing required and each hub where the multiplexer or multiplexers are to be installed.

D For the DNAL Switched Access BSA, the customer shall specify the designated customer premises, the (AT) channel interface and the line side or trunk side Switched Access BSA to be associated with the DNAL.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

(AT) C. Switched Transport and Directory Transport Services (Continued)

(1) Entrance Facility

If the Entrance Facility is new, the customer must specify the customer premises, the connection type (Voice Grade, DS1 or DS3), the interface group and the Switched Transport features (including multiplexing, if this feature is desired at the serving wire center).

If the Entrance Facility is existing, the customer must provide the information set forth in 5.2 and 5.2 of this intrastate tariff.

(2) Direct-Trunked Transport

If the Direct-Trunked Transport is new, the customer must specify the connection type (Voice Grade, DS1 or DS3), the channel interface and the Switched Transport features desired (including multiplexing). If multiplexing is requested, the customer must specify the type of multiplexing required and each hub where the multiplexer or multiplexers are to be installed.

The customer must also specify the Entrance Facility or interconnection cross connect to which the Direct-Trunked Transport is interconnected and whether or not the Entrance Facility or interconnection cross connect is new or existing. The Entrance Facility must have an interface that is compatible with the Direct-Trunked Transport being requested.

If the Entrance Facility to which the Direct-Trunked Transport is to be interconnected is new, additional information as specified in (C)(1), is required. If either the Direct-Trunked Transport or the Entrance Facility (to which the Direct-Trunked Transport is to be interconnected) is existing, additional information, as set forth in 5.2 A and 5.2 B of this intrastate tariff.

(3) Tandem-Switched Transport

If the Tandem-Switched Transport is new, the customer must specify the connection type (Voice Grade, DS1 or DS3) to be used between the end office and the access tandem. The customer must also specify the Switched Transport features desired (including multiplexing). If multiplexing is requested, the customer must specify the type of multiplexing required and each hub where the multiplexer or multiplexers are to be installed.

(AT) D For the DNAL Switched Access BSA, the customer shall specify the designated customer premises, the channel interface and the line side or trunk side Switched Access BSA to be associated with the DNAL.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

For 900 Access Service, customers must have LATA-wide Switched Access Service and shall specify the LATAs that they wish to receive originating 900 Access Service calls from, the 900-NXX codes that are to be activated in a given LATA and the desired due date of the order. 900 Access Service calls originating in LATAs which the customer has not ordered will be blocked.

(RT) 1+900 Access Service will be combined with either FGB, FGD, BSA-B or BSA-D Switched Access Service.
(RT) The customer shall designate which FGB, FGD, BSA-B or BSA-D Switched Access Service trunk groups are to be associated with 900 Access Service. However, when FGD or BSA-D Switched Access Service becomes available in an end office, 1+900 Access Service traffic originating from that end office must be provided with FGD or BSA-D Switched Access Service.

0+900 Access Service is available only when combined with 1+900 Access Service provided with FGD or BSA-D.

Information regarding 900 Access Service Screening Offices is contained in the Southwestern Bell End Office Profile report. Customers wishing to receive this report may obtain ordering information from the Reference to Technical Publications section of Southwestern Bell's Tariff, FCC No. 73.

For 800 Number Portability Access Service (NPAS), direct routing will be provided from SSP equipped end offices, i.e., end offices equipped to provide customer identification. All 800 traffic originating from end offices not equipped to provide customer identification will require routing to an access tandem where the customer identification function is available. Information regarding 800 NPAS identification function is contained in the Southwestern Bell End Office Profile report. Customers wishing to receive this report may obtain ordering information from the Reference to Technical Publications Section of Southwestern Bell Telephone Company's Interstate Tariff, FCC No. 73.

800 NPAS requires FGD or BSA-D Switched Access Service. The customer shall designate which originating FGD or BSA-D Switched Access Service trunk groups are to be associated with 800 NPAS. Calls originating from an Area of Service in which the Customer has not ordered sufficient originating FGD or BSA-D Switched Access Service will be blocked.

CANCELLED - Missouri Public Service Commission - 05/01/2024 - TN-2024-0278 - JI-2024-0140

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

For 800 Access Service and 900 Access Service, customers shall specify the LATAs that they wish to receive originating 800 Access Service and 900 Access Service calls from, the 800-NXX and 900-NXX codes that are to be activated in a given LATA and the desired due date of the order. 800 Access Service and 900 Access Service calls originating in LATAs which the customer has not ordered will be blocked.

(AT) 800 Access Service and 900 Access Service will be combined with either FGB,
(AT) FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service. The customer must have LATA-wide Switched Access Services in order to receive 800 Access Service and 900 Access Service traffic. The customer shall designate which
(AT) FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk groups are to be associated with 800 Access Service and 900 Access Service.
(AT) However, when FGD or BSA-D Switched Access Service becomes available in an end office, 800 Access Service and 900 Access Service traffic originating
(AT) from that end office must be provided with FGD or BSA-D Switched Access Service. The customer must specify whether the 800 Access Service and 900 Access Service to be provided will be joint provided or non-joint provided.

Information regarding 800 Access Service and 900 Access Service Screening Offices is contained in the Southwestern Bell End Office Profile report. Customers wishing to receive this report may obtain ordering information from the Reference to Technical Publications section of Southwestern Bell's Tariff, FCC No. 68.

For Directory Assistance Service, the customer shall specify the number of busy-hour minutes of capacity (BHMC) from the customer's premises to the Directory Assistance location. If the Directory Assistance Service is to be
(AT) comnbined with a FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the customer shall also specify which FGB, FGC, FGD, BSA-B, BSA-C
(AT) or BSA-D Switched Access Service trunk group is to be associated with the Directory Assistance Service. This information is used to determine the number of transmission paths as set forth in Section 9.2, E.3., following. The customer then specifies the Directory Transport features.

For all Special Access Services, the customer must specify the customer-designated premises or hubs involved, the type of service (e.g., Voice Grade, High Capacity, etc.), the channel interface, technical specification package and features desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be different, but all such interfaces shall be compatible.

5.2 Access Order-(Continued)

(MT) For Directory Assistance Service, the customer shall specify the number of busy-hour minutes of capacity (BHMC) from the customer's premises to the Directory Assistance location. If the Directory Assistance Service is to be combined with a FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the customer shall also specify which FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk group is to be associated with the Directory Assistance Service. This information is used to determine the number of transmission paths as set forth in Section 9.2, E.3., following. The customer then specifies the Directory Transport features.

For all Special Access Services, the customer must specify the customer-designated premises or hubs involved, the type of service (e.g., Voice Grade, High Capacity, etc.), the channel interface, technical specification package and features desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be
(MT) different, but all such interfaces shall be compatible.

For WATS Access Line Service the customer must also specify the type of calling (i.e., originating or terminating) for which the service is to be provided, the type of WAL (i.e., non-joint provided or joint provided, WAL), the type of address signaling and the type of supervisory signaling.

Additionally, when the necessary screening functions are not provided at the wire center which serves the customer premises, the Telephone Company will provide the service to the nearest wire center where capacity exists. In these circumstances, the customer will be so notified and the order will be changed to designate the appropriate premises. No charge will apply for the order modification. In addition, the customer must specify that the WATS Access Line is to be provided with an extension in the same or a different LATA, if applicable. When such an extension is specified, the customer must provide either (1) the end user premises (for an intraLATA extension) or (2) the customer-designated premises (for an extension in a different LATA) to which the extension is to be provided.

For Operator Call Processing, the customer must specify the specific LATAs where the customer desires Operator Call Processing and whether O-Transfer Inward Assistance, or both are to be provided. The customer must also specify if FGC, FGD, BSA-C or BSA-D Switched Access Service will be used to interconnect between the OSS Tandem(s) and the customers premises and whether or not operator functionality, coin station control, or both are to be provided by the customer.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

Operator Service System (OSS) Tandem interconnection requirements are specified in Section 17, Paragraph 17.2, following. Information regarding OSS Tandem locations is contained in the Southwestern Bell Interexchange Customer Information Handbook.

(AT) Carrier Identification Code Parameter (CIP)

The customer must specify per trunk group or tandem, and all associated Carrier Identification Codes, the end offices that will be used to pass originating Carrier Identification Code Parameter (CIP) to the customer's designated premises. The customer's end office must be equipped with SS7 Signaling and is provided in conjunction with Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnnection Service as set forth in Section 23. End offices so equipped may be
(AT) found in NECA Tariff F.C.C. No. 4.

- For Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service, the customer must provide the following information to the Telephone Company at the time of ordering:

- Number of access links
- Link Type
- Signaling Link Code
- Customer Signaling Point Code
- Common Language Location Identifier (CLLI) code of the Telephone Company interconnecting Signal Transfer Point
- Contact telephone number for installation and maintenance of the customer's designated premises

When ordering CCS/SS7 Interconnection Service, the customer will provide an estimate of total annual volume and busy hour busy month volume projected for a period of three years. The forecast should be itemized by message type. The Telephone Company will utilize this forecast in its own efforts to project further facility requirements.

- For LIDB Validation Service, the customer shall provide a LIDB Validation Service Order Form which specifies the OPCs of the customer's designated OSSs sending the query or queries, the PIU per OPC of the customer's OSS location, and the desired due date of the order.

LIDB Validation Service is provided in conjunction with CCS/ SS7 Interconnection Service, as set forth in Section 20. In order to utilize LIDB Validation Service, the customer must have CCS/SS7 Interconnection Service to the two Telephone Company STPs designated by the Telephone Company as the interconnecting STP pair to be utilized for interconnection to the CCS/SS7 network. The Telephone Company's STP locations are provided in the National Exchange Carriers Association, Inc. Tariff F.C.C. No. 4.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

The BHMC may be determined by the customer in the following manner. For each day, the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour), pick the 20 consecutive business days in a calendar year which add up to the largest number of minutes of use. The customer shall then determine the average busy-hour minutes of capacity (i.e., BHMC) by dividing the largest number of minutes-of-use figure for the same hour period for the consecutive 20-day period by 20. This computation shall be performed to establish the BHMC's for each end office the customer wishes to serve. These determinations thus establish the forecasted BHMC for each end office.

Where the Special Access Service is exempt from the Special Access Surcharge as set forth in Paragraph 7.3.2, following, and the customer desires an exemption from the surcharge, it shall furnish with the order the certification as set forth in Paragraph 7.3.2, following.

For Frame Relay Service (FRS), the customer must specify the customer's designated premises, the Primary Market Area (PMA) involved and the type of access termination. For each access termination requested, the customer must specify the data transmission speed.

In addition, the customer must provide both points connected by a Logical Link, along with the data link connection identifier (DLCI), or address, assigned for each point when establishing the permanent virtual circuit.

When ordering from a point outside the PMA, the Telephone Company shall determine the frame relay switch(es) within the PMA as well as the nearest serving wire center within the PMA.

(AT) When FGD or BSA-D Switched Access Service is ordered for the pro vision of Multiple 64 CCC, the customer must have direct routed digital transport facilities between the customer designated premises and the Multiple 64 CCC end office for originating and terminating traffic. To ensure availability of transporting Multiple 64 CCC rates at speeds up to 1536 Kbps, the customer must, at a minimum, order 24 FGD or BSA-D trunks or contiguous increments of 24 FGD or BSA-D trunk groups, equipped with the following:

- SS7 Signaling
- 64 CCC
(AT) - Multiple 64 CCC

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

In addition, the customer must specify one of three trunk allocation schemes: fixed, floating or flexible. In the fixed allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous and the first FGD or BSA-D trunk is constrained to certain fixed starting points. In the floating allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous, but the position of the first trunk can float. For the flexible allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call may occupy non-contiguous positions within a group of 24 FGD or BSA-D trunks.

Customers may segregate their originating and terminating Multiple 64 CCC traffic by specifying dedicated Multiple 64 CCC trunk group(s) on the order. A Multiple 64 CCC trunk group(s) represents access capacity for carrying only Multiple 64 CCC traffic.

For Advanced Carrier Identification Service (ACIS), the customer must have LATA-wide Switched Access in order to receive originating ACIS routed traffic. The customer must specify the:

- LATAs from which they wish to receive originating ACIS calls,
- the ACIS Access Code(s) to be activated in a given LATA,
- the Carrier Identification Code (CIC) of each ACIS Code in a given LATA, and
- the desired due date of the order.

Originating ACIS routed calls from LATAs in which the customer h as not ordered ACIS will be blocked.

(RT) (RT) Originating traffic that is to be routed using ACIS may be combined with either FGB, BSA-B or BSA-D Switched Access Service. The customer shall designate which FGB, FGD, BSA-B or BSA-D Switched Access Service trunk groups are to be associated with ACIS. However, when FGD or BSA-D Switched Access Service becomes available in an end office, ACIS traffic originating from that end office must be provided with FGD or BSA-D Switched Access Service.

CANCELLED - Missouri Public Service Commission - 05/01/2024 - TN-2024-0278 - JI-2024-0140

No Supplement to this tariff will be issued except for the purpose of canceling this tariff.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

In addition, the customer must specify one of three trunk allocation schemes: fixed, floating or flexible. In the fixed allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous and the first FGD or BSA-D trunk is constrained to certain fixed starting points. In the floating allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call are contiguous, but the position of the first trunk can float. For the flexible allocation scheme, the FGD or BSA-D trunks selected for a Multiple 64 CCC call may occupy non-contiguous positions within a group of 24 FGD or BSA-D trunks.

Customers may segregate their originating and terminating Multiple 64 CCC traffic by specifying dedicated Multiple 64 CCC trunk group(s) on the order. A Multiple 64 CCC trunk group(s) represents access capacity for carrying only Multiple 64 CCC traffic.

(AT) For Advanced Carrier Identification Service (ACIS), the customer must have LATA-wide Switched Access in order to receive originating ACIS routed traffic. The customer must specify the:

- LATAs from which they wish to receive originating ACIS calls,
- the ACIS Access Code(s) to be activated in a given LATA,
- the Carrier Identification Code (CIC) of each ACIS Code in a given LATA, and
- the desired due date of the order.

Originating ACIS routed calls from LATAs in which the customer h as not ordered ACIS will be blocked.

Originating traffic that is to be routed using ACIS may be combined with either FGB, FGC, BSA-B, BSA-C or BSA-D Switched Access Service. The customer shall designate which FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk groups are to be associated with ACIS. However, when FGD or BSA-D Switched Access Service becomes available in an end office, ACIS traffic originating from that end office must be provided with FGD or BSA-D Switched Access Service. (AT)

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE (cont'd)

REC'D DEC 20 2002

5.2.1 Access Order Service Date Intervals

The time required to provision the service (i.e., the interval between the Application Date and the Service Date) is known as the service interval. Such intervals will be established in accordance with published service date interval guidelines and, where possible, will reflect the customer's requested service date.

(RT)

(AT) Schedules that specify installation intervals will also specify the services and quantities of the services that can be provided as specified in Section 5.2.2.1(B) and (C). The Telephone Company will adhere to the intervals as specified in Section 5.2.3(C)(1), except during circumstances beyond its direct control.

A schedule of intervals applicable for Expanded Interconnection is located in the Telephone Company's Technical Publication for Expanded Interconnection. The Telephone Company's intervals for equipment are subject to equipment availability from the manufacturer and the published intervals will be adhered to except:

- During circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppages and civil commotions) and
- When an interconnector designates equipment that is not used by the Telephone Company to provision its other access services and the Telephone Company must, therefore, first obtain training regarding the installation, maintenance and administration of the equipment designated as well as obtain the equipment itself. (AT)

Access Services provided will be installed during Telephone Company business days. If an IC requests that installation be done outside of scheduled work hours, and the Telephone Company agrees to this request, the IC will be subject to applicable Additional Labor Charges as set forth in Section 13, following.

5.2.2 Access Order Charge

An Access Order Charge will apply per LIDB Validation Service Order for the installation, addition, change or rearrangement of LIDB Validation Service.

5.2 Access Order-(Continued)

The BHMC may be determined by the customer in the following manner. For each day, the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour), pick the 20 consecutive business days in a calendar year which add up to the largest number of minutes of use. The customer shall then determine the average busy-hour minutes of capacity (i.e., BHMC) by dividing the largest number of minutes-of-use figure for the same hour period for the consecutive 20-day period by 20. This computation shall be performed to establish the BHMC's for each end office the customer wishes to serve. These determinations thus establish the forecasted BHMC for each end office.

Where the Special Access Service is exempt from the Special Access Surcharge as set forth in Paragraph 7.3.2, following, and the customer desires an exemption from the surcharge, it shall furnish with the order the certification as set forth in Paragraph 7.3.2, following.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.1 Access Order Service Date Intervals-(Continued)

To the extent the Access Service can be made available with reasonable effort, the Telephone Company will provide the Access Service in accordance with the IC's requested interval, subject to the following conditions:

A. Standard Interval

The Telephone Company shall publish and make available to all IC's, a schedule of Standard Intervals applicable for Switched and Special Access Services. This schedule shall specify which services and the quantities of services that can be provided within the standard intervals.

Access Services provided in a Standard Interval will be installed during normally scheduled Telephone Company work hours. If an IC requests that installation be done outside of scheduled work hours, and the Telephone Company agrees to this request, the IC will be subject to applicable Additional Labor Charges as set forth in Section 13, following.

B. Negotiated Interval

The Telephone Company will negotiate a service date interval with the IC when:

1. There is no Standard Interval for the service, or

2. The Short Notice Interval is not applicable, or

3. The IC requests a service date beyond the applicable Standard Interval service date.

(CP)ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications

The customer may request a modification of its Access Order at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per-occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service busy-hour minutes of capacity will be treated as a new Access Order (for the increase amount only).

If the Telephone Company specifies that order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer (e.g., the upgrading by the Telephone Company of the channel termination from effective two-wire to effective four-wire) and the customer authorizes the suggested order modifications, these changes will be made without order modification charges being incurred by the ICSE. However, charges for the Special Access Service provided to the customer will apply.

A. Service Date Change Charge

Access Order service dates for the installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than 45 calendar days. When, for any reason, the customer indicates that service can not be accepted for a period not to exceed 45 calendar days beyond the original service date, and the Telephone Company accordingly delays the start of service, a Service Date Change Charge will apply. If a Design Change has been requested as set forth in 5.2.3, C., following, and the engineering review cannot be completed within the 45-calendar-day time frame, the new service date may exceed the original service date by more than 45 calendar days. In all other cases, if the customer-requested service date exceeds the allowable service date change period previously described, the order will be canceled by the Telephone Company,

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.3 Access Order Modifications

The customer may request a modification of its Access Order at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per-occurrence basis.

(AT) Any increase in the number of DNAL Channels, Special Access Service channels, CCS/SS7 STP Port Terminations, STP Access Connections or Switched Access Service busy-hour minutes of capacity will be treated as a new Access Order (for the increased amount only).

If the Telephone Company specifies that order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer (e.g., the upgrading by the Telephone Company of the channel termination from effective two-wire to effective four-wire) and the customer authorizes the suggested order modifications, these changes will be made without order modification charges being incurred by the IC. However, charges for the Special Access Service provided to the customer will apply.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE (cont'd)

5.2 Access Order (cont'd)

5.2.3 Access Order Modifications (cont'd)

A. Service Date Change Charge/Dispatch Charge (cont'd)

(AT) (1) (cont'd)

If the customer reschedules the service date, a Service Date Change Charge, as set forth following will also apply. If the customer cancels the service date, cancellation charges will also apply in accordance with terms and conditions for cancellation charges as set forth in
(AT) Section 5.3.3. Cancellation of the order will not preclude the application of the Service Date Change Charge and/or the Service Date Change Dispatch Charge assessed for prior occurrences on the same order.

A Service Date Change Charge will apply, on a per-order, per-occurrence basis, for each service date changed. A Service Date Change Dispatch Charge will apply per occurrence when a technician is dispatched to the customer's premises and the customer is not ready for service. The applicable charge is;

	USOC	Charge
Service Date Change Charge, per Order	OMC	$ 13.00
Service Date Change Dispatch Charge	VT6DN	200.00

(AT) (2) An exception to the Service Date Change Charge provisions in Section 5.3.2.A(1) applies for AT&T Switched Ethernet Service. The following provisions apply:

If a customer is unable to accept service on the original due date, the customer may issue one or more supplements to an Access Order to change the original due date to a date no more than 120 calendar days after the original due date. When such requests are made, the Telephone Company will accordingly delay the start of service and the customer will incur a Service Date Change Charge. The first supplement to the access order must be received by the Telephone Company on or before 30 calendar days after the original due date.

If a customer issues a supplement to an access order to extend the original due date but is unable to accept service within 121 calendar days after the original due date, one of the following will apply:

- If service has not been fully provisioned, the Telephone Company will cancel the order on the 121st calendar day after the original due date and the charges specified in Section 5.2.3.A(1) will apply, or
- If service has been fully provisioned, the Telephone Company will begin billing
(AT) for the Service on the 121st calendar day after the original due date

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE (cont'd)

5.2 Access Order (cont'd)

5.2.3 Access Order Modifications (cont'd)

(AT) A. Service Date Change Charge/Dispatch Charge (cont'd)

If the customer reschedules the service date, a Service Date Change Charge, as set forth following will also apply. If the customer cancels the service date, cancellation charges will also apply in accordance with terms and conditions for cancellation charges as set forth in 5.3.3 following. Cancellation of the order will not preclude the application of the Service Date Change Charge and/or the Service Date Change Dispatch Charge assessed for prior occurrences on the same order. (AT)

(MT) A Service Date Change Charge will apply, on a per-order, per-occurrence basis, for each (AT) service date changed. A Service Date Change Dispatch Charge will apply per occurrence (AT) when a technician is dispatched to the customer's premises and the customer is not ready for (MT) service. The applicable charge is;

		USOC	Charge
(MT)	Service Date Change Charge, per Order	OMC	$ 13.00
(AT)	Service Date Change Dispatch Charge	VT6DN	200.00

B. Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone Company personnel of the service ordered and the requested changes, to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes to a pending order include such things as the addition or deletion of features, BSEs, or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of interface group or technical specification package. Design changes do not include a change of customer premises, End User premises, End Office Switch, Feature Group type, BSA type, or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

(FC) B. Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone Company personnel of the service ordered and the requested changes, to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes to a pending order include such things as the addition or deletion of features, BSEs, or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of interface group or technical specification package. Design changes do not include a change of customer premises, End User premises, End Office Switch, Feature Group type, BSA type, or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

The Telephone Company will review the requested change, notify the customer whether the change is a design change, if it can be accommodated and if a new service date is required. If the customer authorized the Telephone Company to proceed with the design change, a Design Charge will apply. The Design Change Charge will apply on a per-order, per-occurrence basis, for each customer-issued order requiring a design change. The applicable charge is:

	USOC	Rate
Design Change Charge, per Order	H28	$22.00

If a change of service date is required, the Service Date Change Charge as set forth in Paragraph 5.2.3, A., preceding, will also apply.

C. Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone Company personnel of the service ordered and the requested changes, to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes to a pending order include such things as the (AT) addition or deletion of features, BSEs, or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of interface group or technical specification package. Design changes do not include a change of customer premises, End User (AT) premises, End Office Switch, Feature Group type, BSA type, or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

The Telephone Company will review the requested change, notify the customer whether the change is a design change, if it can be accommodated and if a new service date is required. If the customer authorized the Telephone Company to proceed with the design change, a Design Charge will apply. The Design Change Charge will apply on a per-order, per-occurrence basis, for each customer-issued order requiring a design change. The applicable charge is:

	USOC	Rate
Design Change Charge, per Order	H28	$22.00

5.2.3 Access Order Modifications (cont'd)

C. Expedited Order Charge

(1) Analog (Metallic, Telegraph, and Wideband Analog), Voice Grade, DS0 (Wideband Data, MegaLink Data and DovLink) and DS1 Access Services

If a customer desires that service be provided on a due date earlier than the standard interval, the customer may request that service be provided on an expedited service interval. To qualify for an expedited interval the customer must provide End User premises access, where needed, until 11PM (CT), Monday-Friday.

If, upon reviewing availability of equipment, facilities and scheduled workload, the Telephone Company agrees to provide service on an expedited basis and the customer accepts this proposal, an Expedite Order Charge will apply.

The maximum number of circuits, which may be expedited, is limited to twelve (12) two-point or six (6) multi-point Analog/DS0 circuits at the same location, and a limit of nine (9) DS1 circuits at the same location. When the number of access circuits exceeds the maximum threshold the interval will be negotiated and expediting will not be an option.

If the Telephone Company determines that service can be provided on an expedited basis, the following charges will apply based upon agreed upon expedited service interval. The Expedited Order Charge applies on a per order basis, regardless of the number of circuits on the order.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.1 Access Order Service Date Intervals-(Continued)

C. Short Notice Interval-(Continued)

3. For Short Notice Interval Access Orders, the nonrecurring charge is two times the appropriate nonrecurring charges for the service provided as set forth in other sections of this Tariff.

5.2.2 Access Order Modifications

An Access Order may be modified by the IC prior to the service date as set forth following. One or more of the following charges will apply when such modifications are undertaken. When modifications are undertaken, the Telephone Company may specify that the service date will be changed. All charges for Access Order modifications will apply on a per-occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service busy-hour minutes of capacity will be treated as a new Access Order (for the increase amount only).

If order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by an IC, these changes will be made without order modification charges being incurred by the IC.

A. Service Date Change Charge

Access Order service dates may be changed, but the new service date may not exceed the original service date by more than 30 calendar days. If the IC-requested service date is more than 30 calendar days after the original service date, the order will be cancelled by the Telephone Company and reissued with the appropriate cancellation charges applied. With the agreement of the Telephone Company, a new service date may be established that is prior to the original standard or negotiated interval service date.

A Service Date Change Charge will apply, on a per-order, per-occurrence basis, for each service date changed. The applicable charge is:

(2) For all Access Service, excluding Analog, Voice Grade, DS0 and DS1 Access Services

If the customer desires that service be provided on an earlier date than that which has been established for the Access Order or the provision of the Access Service, the customer may request that service be provided on an expedited basis. If the Telephone Company determines that service can be provided on the requested date and that additional labor cost or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided with an estimate of the additional charges involved. The total charge to the customer for the Additional Engineering may not exceed the estimate amount by more than 10%. If the customer instructs the Telephone Company to proceed, such additional charges will be determined and billed to the customer as follows:

To calculate the additional labor charges, the Telephone Company will, upon authorization from the customer to incur the additional labor charges, keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable Additional Labor charges as set forth in 13.2.6, following.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.4 Cancellation of An Access Order

A. A customer may cancel an Access Order at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The cancellation (RT)
date is the date the Telephone Company receives written notice from the customer that (RT)
the order is to be cancelled.

B. When Cancellation Charges Apply

If a customer or the customer's end user is unable to accept Access Service and the new service date requested is beyond the allowable service date (AT)
change time period described in Paragraph 5.2.3. A., the Access Order will be cancelled. When the customer cancels an access order on or after the application date, a Cancellation Charge will apply as specified below in addition to any other (AT)
applicable charges specified in Section 5.2.3.

(CT) 1. For Access Services, excluding those set forth in Section 5.2.4.D, the Cancellation Charge equals:

The number of business days from the access order application date through the access order cancellation date (i.e., the service interval)

Multiplied by the average daily charge

Plus the access order charge.

The service interval is the number of business days fro m the access order application date through the access order cancellation date with the application date being day 1. Service installation costs incurred by the Telephone Company start on the application date.

If the customer has requested a service date change beyond the original service date, the number of business days beyond the original service date are included in the service interval.

Average daily charge equals installation charges plus rearrangement charges divided by the number of business days in the service interval.

CANCELLED - Missouri Public Service Commission - 05/01/2024 - TN-2024-0278 - JI-2024-0140

No Supplement to this tariff will be issued except for the purpose of canceling this tariff.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.4 Cancellation of An Access Order

(CT) A. A customer may cancel an Access Order at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The cancellation date is the date the
(CT) Telephone Company receives written or verbal notice from the customer that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

(AT) B. When Cancellation Charges Apply

(CT) If a customer or the customer's end user is unable to accept Access Service
(RT) and the new service date requested is beyond the allowable service date change time period described in Section 5.2.3, A., preceding, the
(CT) Access Order will be cancelled. When the customer cancels an access order on or after the application date, a Cancellation Charge will apply as specified below in addition to any other applicable charges specified in Paragraph 5.2.3.

1. For all Access Services, the Cancellation Charge equals:

The number of business days from the access order application date through the access order cancellation date (i.e., the service interval)

Multiplied by the average daily charge

Plus the access order charge.

The service interval is the number of business days fro m the access order application date through the access order cancellation date with the application date being day 1. Service installation costs incurred by the Telephone Company start on the application date.

If the customer has requested a service date change beyond the original service date, the number of business days beyond the original service date are included in the service interval.

Average daily charge equals installation charges plus rearrangement
(CT) charges divided by the number of business days in the service interval.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.3 Cancellation of an Access Order

A. An IC may cancel an Access Order for the installation of service at any time prior to the service date or notification by the Telephone Company that service is available for the customer's use, whichever is later. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the order is to be canceled. The verbal notice must be followed by written confirmation within 10 days.

If an IC or its End User is unable to accept Access Service and the new IC requested service date is beyond the allowable service date change time period described in Section 5.2.2, A., preceding, the Access Order will be cancelled and the charges set forth in Paragraph B., following will apply.

B. When a customer cancels an Access Order for the installation of service, a Cancellation Charge will apply as follows:

(1) Costs incurred by the Telephone Company in conjunction with the installation of Switched or Special Access Service, start on the Application Date. The Application Date is described in Paragraph 5.1, preceding. This date is also known as the order date.

(2) Where the customer cancels an Access Order prior to the Application Date, no charges shall apply.

(3) When the customer cancels an Access Order on or after the Application Date, a cancellation charge will be calculated as follows:

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWTICHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

A. Service Date Change Charge-(Continued)

	USOC	Charge
Service Date Change Charge, per order	OMC	$29.59

If the service date is changed to an earlier date, an Expedited Order Charge as set forth in Paragraph 5.2.2, D., following, will apply in addition to the Service Date Change Charge.

B. Partial Cancellation Charge

Any decrease in the number of Special Access Services, Switched Access Service busy-hour minutes of capacity or Dedicated Access Lines will be treated as a partial cancellation.

An IC may cancel any number of Special Access Services. For Switched Access Service busy-hour minutes of capacity, the amount cancelled cannot cause the order to drop below the minimum requirements as set forth in Paragraph 5.1.1, preceding, and Paragraph 5.5, following. When the capacity cancelled brings the ordered capacity below these minimum requirements, the entire order will be cancelled.

A Cancellation Charge will apply on a per-order, per-occurrence basis for the quantity cancelled. The applicable Cancellation Charge is computed as set forth in Paragraph 5.2.3, following.

C. Design Change Charge

The IC may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. A design change may include such things as the addition or deletion of optional features or functions or a change in the type of Transport Termination (Switched Access only), type of facility interface, type of facility or type of access connection interface group. It may not include a change of IC terminal location, End User's premises, end office switch or Feature Group type.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

C. Design Change Charge-(Continued)

Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate charges applied. The Design Change Charge will apply to all Special Access Service, channels or Switched Access Service busy-hour minutes of capacity.

The Telephone Company will review the requested change, notify the IC whether the change can be accommodated and specify if a new service date is required. If the IC authorizes the Telephone Company to proceed with the design change, a Design Change Charge will apply. If the change involves the addition or deletion of optional features for which nonrecurring charges are stated, the Design Change Charge is equal to one-half the nonrecurring charge for each feature being added or deleted. When there is no nonrecurring charge associated with the change being made, the Design Change Charge is equal to one-half of the nonrecurring charges for the Access Service ordered. If multiple changes are made on a single order, some of which have separately stated nonrecurring charges and others which do not, both of the above charges will apply. The Design Change Charge will apply on a per-order, per-occurrence basis.

If a change of service date is required, the Service Date Change Charge as set forth in Paragraph 5.2.2, A., preceding, will also apply.

D. Expedited Order Charge

When placing an Access Order, an IC may request a service date that is prior to the standard interval service date. An IC may also request an earlier service date on a pending standard or negotiated interval Access Order. If the Telephone Company agrees to provide service on the requested date, an Expedited Order Charge will apply.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.5 Selection of Planned Facilities for Access Orders

A. When there are analog or digital high-capacity facilities to the first point of switching for switched access or to a hub for special access, or when there are digital high-capacity facilities to an interconnecting Signal Transfer Point (STP) for CCS/SS7 Interconnection Service, the customer must specify a channel assignment for each service ordered. In addition, when a customer requests a Rollover, the Connecting Facility Assignments (CFA's) must be specified for the facilities involved in the Rollover for each service. The customer will provide this information to the Telephone Company during the order process.

B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

5.2.6 Minimum Period

(CT) The minimum period for which Access Service is provided and for which charges are applicable is set forth in each section of this tariff.

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory. This terminology does not refer to when billing is stopped, but rather distinguishes a disconnect from a service rearrangement.

Service arrangements may be made without a change in minimum period
(CT) requirements where so specified in this tariff.

5.2.5 Selection of Planned Facilities for Access Orders

A. When there are analog or digital high-capacity facilities to the first point of switching for switched access or to a hub for special access, or when there are digital high-capacity facilities to an interconnecting Signal Transfer Point (STP) for CCS/SS7 Interconnection Service, the customer must specify a channel assignment for each service ordered. (AT) In addition, when a customer requests a Rollover, the Connecting Facility Assignments (CFA's) must be specified for the facilities involved in the (AT) Rollover for each service. The customer will provide this information to the Telephone Company during the order process.

B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

CANCELLED

BY P.S.C. MO. No. 10
Public Service Commission
MISSOURI

5.2.6 Minimum Period

A. Except as set forth in Paragraph 9.4, A., following, the minimum period for which Access Service is provided and for which charges are applicable is one month. For the application of minimum period charges for switched Access Service FGB, FGC, FGD, BSA-B, BSA-C and BSA-D, it is assumed that the last identical capacity placed in service is the first one discontinued.

B. Service Rearrangements as set forth in 6.10.1, C.4, and 7.3.1, B.3, following, may be made without a change in minimum period requirements.

5.2.7 Minimum Period Charges

When Access Service is discontinued prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory.

The Minimum Period Charge for monthly billed services will be determined as follows:

A. For Switched Access Service, the charge for a month or fraction thereof is equal to the applicable minimum monthly charge for the capacity as set forth in Section 6, Paragraph 6.10.4, following.

B. For Special Access Service, the charge for a month or fraction thereof is the applicable monthly rates for the service as set forth in Section 7, Paragraph 7.4, following.

5.2.5 Selection of Planned Facilities for Access Orders

A. When there are analog or digital high-capacity facilities to the first point of switching for switched access or to a hub for special access, or when there are digital high-capacity facilities to an interconnecting Signal Transfer Point (STP) for CCS/SS7 Interconnection Service, the customer must specify a channel assignment for each service ordered. This information will be provided to the Telephone Company during the order process.

B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

5.2.6 Minimum Period

(CT) The minimum period for which Access Service is provided and for which charges are applicable is set forth in each section of this tariff.

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory. This terminology does not refer to when billing is stopped, but rather distinguishes a disconnect from a service rearrangement.

(CT) Service rearrangements may be made without a change in minimum period requirements where so specified in this tariff.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.2 Access Order Modifications-(Continued)

D. Expedited Order Charge-(Continued)

To calculate the Expedited Order Charge, the total of all the nonrecurring charges associated with the order is divided by the number of days in the service date interval. The charge is then applied on a per day (i.e., calendar day) of improvement basis, per order. When the request for expediting occurs subsequent to the issuance of the Access Order, a service date change charge as set forth in Paragraph 5.2.2, A., preceding, also applies.

When expediting causes the Telephone Company to incur extraordinary costs that are not recovered by the Expedited Order Charge, the IC will be billed, on an individual-case basis, an amount equal to the costs incurred in lieu of an Fxpedited Order Charge.

E. Other Modification Charge

Modifications other than those described in Paragraphs 5.2.2, A., B., C. and D., preceding, may be requested by the IC. If the modification can be accommodated and implemented by the Telephone Company, an Other Modification Charge will apply on a per-order, per-occurrence basis.

Some of the types of modifications for which this charge will apply include, but are not limited to, the following:

- Change of billing address.
- Change of telephone number.
- Change in Hunt Group Arrangement.
- Change in Nonhunting Number of Hunt Group Arrangement.
- Change of Jurisdiction (i.e., breakdown between intrastate and interstate minutes of use for Switched Access Services).

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.3 Cancellation of an Access Order

A. An IC may cancel an Access Order for the installation of service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

If an IC or an End User is unable to accept Access Service within 30 calendar days of the original service date, the IC has the choice of the following options:

- The Access Order shall be cancelled, and charges set forth in Paragraph 5.2.6, C., following, will apply, or

- Billing for the service will commence.

In such instances, the cancellation date or the billing date, depending on which option is selected by the IC, shall be the 31st day beyond the original service date of the Access Order.

B. Access Order costs are considered to have started when the Telephone Company incurs any cost in connection therewith or in preparation thereof which would not otherwise have been incurred. These costs include but are not limited to preliminary engineering, orders to suppliers and other similar items of cost. For purposes of determining Cancellation Charges, the costs are considered to have started on the order date (i.e., the day the Telephone Company gives a firm order confirmation to the IC).

C. When an IC cancels an Access Order for the installation of service, a Cancellation Charge will apply on a per-order basis. The Cancellation Charge is calculated by multiplying the total of the nonrecurring charges associated with all items on the Access Order by the number of calendar days elapsed since the order date and dividing that figure by the number of days in the service interval (i.e., the number of days between the order date and the service date). The resulting amount is the Cancellation Charge. When determining the charge for a partial cancellation as set forth in Paragraph 5.2.2, B., preceding, only those nonrecurring charges associated with the portion of the order being cancelled are used in computing the charge.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.3 Cancellation of an Access Order-(Continued)

D. When an IC cancels an order for the discontinuance of service, no charges apply for the cancellation.

5.2.4 Selection Of Planned Facilities For Access Orders

A. When there are facilities in the activated state for its use under a Planned Facilities Order or analog or digital high capacity services or a Hub in the Access Service state, an IC may request a specific channel or transmission path be used to provide the Switched or Special Access Service requested in an Access Order. The Telephone Company will make a reasonable effort to accommodate the IC's request. If the Telephone Company determines that the request cannot be met with reasonable effort, and another facility is activated for the IC's use, the Telephone Company will specify the use of that facility and notify the IC accordingly.

B. For all other Access Orders, the option to request a specific transmission path or channel is not provided, except as provided for under Special Facilities Routing as set forth in Section 11, following.

5.2.5 Minimum Period

A. Except as set forth in Paragraph 5.2.5, B. and C., following, the minimum period for which Access Service is provided and for which charges are applicable is six months. For the application of minimum period charges for Switched Access Service Feature Groups B, C and D, it is assumed that the last identical capacity placed in service is the first one discontinued.

B. The minimum period for which Access Service ordered under a short Notice Interval is provided and for which charges are applicable is one month.

C. The minimum period for analog and digital high capacity services (facilities) to a Hub (service date and activation date are always the same) is 24 months and applies as set forth in Paragraph 5.4.9, A., following.

5.2.6 Minimum Period Charges

When Access Service is discontinued prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory.

The Minimum Period Charge for monthly billed services will be determined as follows:

A. For Switched Access Service, the charge for each remaining month and/or fraction thereof is equal to the applicable minimum monthly charge for the capacity as set forth in Section 6, Paragraph 6.7.4, following.

B. For Special Access Service, the charge for each remaining month and/or fraction thereof is the applicable monthly rates for the service as set forth in Section 7, Paragraph 7.5, following.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

5.2.7 Shared Use Facilities

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital high capacity facilities) is allowable only for existing services and to fill out existing systems. Only Switched Access Service busy-hour minutes of capacity may be added to fill out existing systems. When Switched or Special Access Services provided over a shared use facility are disconnected, only Switched Access Service busy-hour minutes of capacity can be ordered by the IC to backfill the system.

5.3 Available Inventory

Available inventory is limited and does not include facilities previously ordered or reserved. Available inventory also does not include analog or digital high capacity facilities. All Access Orders for analog or digital high capacity services or interface groups (i.e., Group, Supergroup, Mastergroup, DS1, DS1C, DS2, DS3 and DS4) require the use of Planned Facilities.

To the extent they can be provided, the Telephone Company will provide other than high capacity Access Services from an available inventory, except when the IC has Planned Facilities activated for its use and requests the Telephone Company to use such Planned Facilities in providing the requested services.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order

5.4.1 General

A. An IC may place a Planned Facilities Order for the provision of Planned Facilities. Planned Facilities provided for Special Access Service include Access Connections, Special Transport, Features and Functions and Special Access Lines as described in Section 7, Paragraph 7.1, following. Planned Facilities provided for Switched Access Service include Access Connections, Local Transport and End Office functions as described in Section 6, Paragraph 6.1, following. Planned Facilities will be made available by the Telephone Company for the IC's use on an established activation date. The combinations which may be ordered and made available for the IC's use on the activation date are set forth in Paragraph 5.4.2, following.

B. Planned Facilities Orders must be placed separately for each activation date for Special Access Service and Switched Access Service. For Switched Access Service, a separate order must be placed for each IC terminal location to end office (by Feature Group type) ordered.

For Special Access Service, separate orders must be placed for each IC terminal location to End User's premises, IC terminal location to IC terminal location and IC terminal location to Hub serving wire center, End User's premises to End User's premises or End User's premises to WATS or WATS-type serving office.

Metallic facilities between the IC terminal location and the IC serving wire center may be ordered for use with Switched Access Service or Special Access Service. A separate order must be placed for each request for such facilities.

C. To the extent that Planned Facilities can be made available, and unless Special Construction Charges apply as set forth in Paragraph 5.4.1, D., following, the Planned Facilities ordered will be available to the IC at rates and charges as set forth in Paragraph 5.4.11, following, on the activation date. Except as set forth following, the activation date may be set for any working day at least 24 months but not more than 36 months after the order date.

5.4 Planned Facilities Order-(Continued)

5.4.1 General-(Continued)

C. (Continued)

With the agreement of the Telephone Company, the Planned Facilities activation date may be scheduled for a date earlier than 24 months from the order date. If an IC requests an activation date more than 36 months after the order date, the Telephone Company will determine if such requests can be accommodated. When they can be, orders shall be accepted.

D. Planned Facilities for which the Telephone Company has no foreseeable reuse, may be subject to Special Construction Charges as set forth in Section 14, following, in addition to the rates and charges set forth in Paragraph 5.4.11, following.

The Telephone Company shall determine whether Special Construction Charges apply and will so notify the IC prior to establishing a firm order.

5.4.2 Planned Facilities Provided

The IC may order Planned Facilities as follows:

A. For Switched Access Service

1. Two-wire and four-wire metallic facilities between the IC terminal location and the IC serving wire center. These must be ordered in 100 pair units.

2. Busy-hour minutes of capacity (BHMC) between an IC terminal location and an end office (by Feature Group and type of BHMC). Optional features may also be specified by the IC.

5.4.2 Planned Facilities Provided-(Continued)

A. For Switched Access Service-(Continued)

Only those rate elements included on the Planned Facilities Order will be made available to the IC on the activation date.

B. For Special Access Service

1. Two-wire and four-wire metallic facilities between the IC terminal location and the IC serving wire center. These must be ordered in 100 pair units.

2. Analog and digital high capacity (i.e., Group, Supergroup, Mastergroup, DS1, DS1C, DS2, DS3 and DS4) facilities between an IC terminal location and a Hub serving wire center. Hub functions may also be specified by the IC.

3. Analog and digital high capacity (i.e., Group, Supergroup, Mastergroup, DS1, DS1C, DS2, DS3 and DS4) facilities between two IC terminal locations. One of the IC terminal locations will be treated as an End User's premises. Facility interface combinations and optional features may also be specified by the IC.

4. Narrowband, Voice Grade, Program Audio, Wideband Analog, Wideband Digital, Digital Data Access and High Capacity 1 (HC1) facilities between an IC terminal location and an End User's premises. Features and functions (e.g., facility interface combinations and optional features) may also be specified by the IC.

5. Dedicated Access Line Service two-wire or four-wire facilities between an End User's premises and a WATS or WATS-like serving office. Optional features may also be specified by the IC.

Only those rate elements included on the Planned Facilities Order will be made available to the IC on the activation date.

5.4.3 Advance Payments

Planned Facilities Orders are subject to advance payments by the IC. Three advance payments are required during the Order Interval, i.e., interval between the order date and the original activation date. These are set forth in Paragraphs 5.4.3, A., B. and C., following. Each advance payment is based on the monthly charge as described in Paragraph 5.4.11, following.

A. The first advance payment is due to the Telephone Company 30 days after the order date. The payment shall be an amount equal to three times the monthly charge.

B. The second advance payment is due to the Telephone Company on the last day of the month that is specified in the following table:

Order Interval In Months	Month After Order Date Second Payment Is Due
up to 19	1st
over 19 to 20	2nd
over 20 to 21	3rd
over 21 to 22	4th
over 22 to 23	5th
over 23 to 24	6th
over 24	7th

The payment shall be an amount equal to six times the monthly charge.

5.4 Planned Facilities Order-(Continued)

5.4.3 Advance Payments-(Continued)

C. The third advance payment is due to the Telephone Company on the last day of the month that is specified in the following table:

Order Interval In Months	Month After Order Date Third Payment Is Due
up to 12	1st
over 12 to 13	2nd
over 13 to 14	3rd
over 14 to 15	4th
over 15 to 16	5th
over 16 to 17	6th
over 17 to 18	7th
over 18 to 19	8th
over 19 to 20	9th
over 20 to 21	10th
over 21 to 22	11th
over 22 to 23	12th
over 23 to 24	13th
over 24	14th

The payment shall be an amount equal to three times the monthly charge.

If any advance payment is not received by the Telephone Company by the end of the first working day of the next month, the Telephone Company will cease all work on the Planned Facilities Order involved and Cancellation Charges as set forth in Paragraph 5.4.6, following, will apply.

In those cases where the activation date is less than 24 months, the second and possibly the third advance payment may be due at the same time as the first advance payment.

The advance payments will be credited against money owed by the IC for activated Planned Facilities for Access Service of the same type, i.e., Switched Access Feature Group accounts or Special Access accounts, on the activation date for the facility for which the advance payment was taken.

5.4 Planned Facilities Order-(Continued)

5.4.3 Advance Payments-(Continued)

C. (Continued)

Should the Planned Facilities Order be cancelled by the IC, the amount of the advance payments will be credited to the IC's account, and any remaining credit balance will be refunded. The fact that advance payments have been made in no way relieves the IC from complying with the Telephone Company's regulations as to other payments or the prompt payment of bills.

5.4.4 Hub Serving Wire Centers

Planned Facilities Hub serving wire centers for Special Access may be established by the Telephone Company at designated locations in a LATA. A Hub is a Telephone Company office where facilities will be available to reach a specified set of serving wire centers and End User's premises. The location of Hubs, if any, in a LATA will be specified by the Telephone Company. Different serving wire centers may be designated as Bridging Hubs and Multiplexing Hubs. The wire centers served by the Hub serving wire center will also be specified by the Telephone Company.

5.4.5 Modifications of Planned Facilities Orders

Modifications of Planned Facilities Orders may be made by the IC without charge prior to acceptance by the Telephone Company of the Planned Facilities Order. The date when the order is accepted is known as the order date. After the order date, modifications may be made as set forth following:

A. Change in Number of Facilities

After the order date, any increase or decrease in the number or type of facilities ordered will be treated as follows:

1. An increase in the number of facilities ordered will be treated as a new Planned Facilities Order (for the increased amount only).

2. Any decrease in the number of facilities ordered will be treated as a cancellation (for the decreased amount only) and will be subject to the regulations and charges set forth in Paragraph 5.4.6, following.

B. Activation Date Changes

With the agreement of the Telephone Company, the IC may change the activation date of a Planned Facilities Order subject to the following conditions:

1. No activation date may be established that is more than 12 months beyond the activation date specified on the original order. If the IC is unable to accept the facilities within 12 months of the original activation date, the IC has the choice of the following options:

   a. The Planned Facilities Order shall be cancelled and charges set forth in 5.4.6, B., following, will apply or

   b. Billing for the facilities will commence.

2. If the requested date is prior to the original activation date, Additional Engineering, Additional Labor and/or special construction charges may apply in order to meet the date. The Telephone Company will determine whether such charges apply and will notify the IC accordingly.

3. A Planned Facilities Order Modification Charge as set forth in Paragraph 5.4.5, D., following, will apply for each activation date change.

C. Other Modifications

1. With the agreement of the Telephone Company, other modifications may be made prior to the activation date. The types of modifications that may be made include, but are not limited to:

   - Change in facility interface
   - Addition or deletion of optional features
   - Change in type of Transport Termination (Switched Access only)
   - Change from two-wire facilities to four-wire facilities or from four-wire facilities to two-wire facilities

- Change in location, i.e., the IC terminal location, the Hub location, the end office or the End User's premises
- Change in type of facilities other than from two-wire facilities to four-wire facilities or four-wire facilities to two-wire facilities

Cancellation Charges as set forth in Paragraph 5.4.6, following, will apply in these cases.

D. Planned Facilities Order Modification Charge

The Planned Facilities Order Modification Charge is applied on a per-order, per-occurrence basis. The applicable charge is:

	USOC	Charge
Planned Facilities Modification Charge, per order.	OMC	$29.59

If more than one change is being made at the same time, only one charge applies.

5.4.6 Cancellation of a Planned Facilities Order

A. A Planned Facilities Order may be cancelled after the order date. Cancellation Charges will apply as set forth in Paragraphs 5.4.6 B and C.. following. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the capacity or channels ordered are to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

FILED
JAN 1 1984
Public Service Commission

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.7 Activation of Planned Facilities

The Planned Facilities ordered are made available for the IC's future service needs on the activation date. Special or Switched Access Service using the Planned Facilities will be provided pursuant to standard, negotiated or short-notice service date intervals, under an Access Order as set forth in Paragraph 5.2.1, preceding. The service date on such orders may be the same as, or later than, the Planned Facilities Order activation date. For analog and digital high capacity planned facilities order to a Hub, the service date and activation date are always the same. When the service and activation dates are the same, the Access Order charges apply and the Planned Facilities charges do not. If the service is disconnected prior to the expiration of the minimum-period requirements for the Planned Facilities Order, the facilities will be returned to the activated status and Planned Facilities Order minimum-period charges will commence and will apply until such time as the minimum-period requirements are fulfilled.

5.4.8 Delayed Activation Credit

The Telephone Company will make every effort to provide the Planned Facilities to the IC on the established activation date. If the date is missed, unless for reasons beyond the control of the Telephone Company as set forth in Section 2, Paragraph 2.1.3, preceding, and Paragraphs 5.4.12, following, a Delayed Activation Credit will apply and will be credited to the IC's account.

The Delayed Activation Credit will be 1/30 of the monthly charge as specified in Paragraph 5.4.11, following, for each day the date is missed.

5.4.9 Minimum Period

A. The minimum period for which Planned Facilities are activated for the IC's use and for which charges are applicable is 24 months. Beginning on the activation date, the appropriate charges as specified in Paragraph 5.4.11, following, will apply.

5.4 Planned Facilities Order-(Continued)

5.4.9 Minimum Period-(Continued)

B. Facilities in the activated status for which the minimum period has ended will be treated as follows:

1. Subject to Paragraph 5.4.9, C., following, the IC may retain the facilities in the activated status, and the charges as set forth in Paragraph 5.4.11, following, will apply.

2. Subject to the provisions of Paragraph 5.5, following, the IC may return the facilities to the Telephone Company upon 30-days' notice. All availability for use by the IC will cease as of that date.

C. Facilities in the activated status for which the minimum period has ended, and for which there are no currently pending Access Orders, except those where special construction applies, may be taken by the Telephone Company for its use upon written 90-days' notice to the ordering IC. If the IC does not submit Access Orders for the use of such Planned Facilities prior to the end of the 90-day notice period, all availability for use by the IC will cease as of that date or other date mutually agreeable to the Telephone Company and the IC, and charges as set forth in Paragraph 5.4.11, following, will cease.

D. Planned Facilities provided by special construction will be subject to liabilities and charges as set forth in Section 14, following, in addition to Paragraphs 5.4.9, A, through C., preceding.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.10 Minimum Period Charges

When Planned Facilities are returned to the Telephone Company prior to the expiration of the minimum period, charges are applicable for the remainder of the minimum period. The charge for the quantity returned will be an amount equal to the applicable monthly charge times the number of months and/or fraction thereof between the return date and the end of the minimum period. The monthly charge is set forth in Paragraph 5.4.11, following.

5.4.11 Monthly Charge

Monthly charges are applicable for activated Planned Facilities. The monthly charge will apply from the activation date until such time as the facilities are used to provide Access Service via an Access Order or until the minimum period requirements have been satisfied. If the minimum period requirement has been satisfied and the IC chooses to retain the facilities in the activated status, the monthly charge will continue to apply. If the IC requests the Planned Facilities be used to provide Access Service and they are so used, the Planned Facilities monthly charge will cease, and the appropriate Switched or Special Access Service rates and charges set forth in Section 6, Paragraph 6.8 and Section 7, Paragraph 7.5, respectively, will apply.

The monthly charge will serve as the basis for advance payments and Cancellation Charges, as well as for the monthly charge to be billed for activated Planned Facilities.

The monthly charges are as follows:

A. For Switched Access

Activated Switched Access Planned Facilities between the IC terminal location and the end office will be billed at the rates established for Minimum Monthly Usage Charge (MMUC) as set forth in Section 6, Paragraph 6.7.5, following.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.11 Monthly Charge-(Continued)

B. For Special Access

Activated Special Access Planned Facilities will be billed at the monthly rates in Section 7, Paragraphs 7.5.1, 7.5.2 and 7.5.4, following, for the Access Connections, Special Transport and Special Access Lines, respectively.

Bridging functions, if specified on the Planned Facilities Order, will be billed at the monthly rates set forth in Section 7, Paragraph 7.5.3, C., following. Billing for all other Features and Functions, including Facility Interface Combinations, even if specified on the order, will not commence until placed in service via an Access Order. The monthly rate is the total of all the items included on the order for which charges are to apply while in the activated status.

C. For Metallic Facilities

Two-wire and four-wire metallic facilities between an IC terminal location and the IC serving wire center, whether ordered as Switched Access or Special Access, will be billed at the monthly rates set forth in Section 7, Paragraph 7.5.1, following, for two-wire and four-wire Special Access Service Access Connections.

5.4.12 Planned Facilities Test and Line Up

A. Prior to the activation date, the Telephone Company will test and line up the facilities provided, as appropriate. Test and line up will be made by the Telephone Company using the IC facilities which are installed at the IC terminal location to terminate the capacity or services provided. The IC shall provide personnel and equipment and shall have its facilities available to complete the testing and line up during the period specified. If the personnel, equipment and facilities are not provided by the IC, and the activation date is missed, no Delayed Activation Credit applies.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.4 Planned Facilities Order-(Continued)

5.4.12 Planned Facilities Test and Line Up-(Continued)

B. Testing and line up as set forth in Paragraph 5.4.12, A., preceding, may begin up to 30 days prior to the scheduled activation date. The Telephone Company will notify the IC of the scheduled start date at least ten working days prior to such date. If this date is mutually agreeable, the Telephone Company will begin testing on the scheduled date. If this date is not agreeable to the IC and another date is agreed upon, no Delayed Activation Credit will apply if the facilities are not available on the activation date.

5.5 Switched Access Service Minimum Capacity Requirements

5.5.1 When Switched Access Service Access Connections are ordered under Planned Facilities Orders or Access Orders, they will be provided subject to the minimum capacity provisions set forth in Paragraph 5.1.1, preceding, and Paragraphs 5.5.2 through 5.5.7, following.

5.5.2 There is no minimum capacity for Interface Groups 1 and 2, except as set forth in Paragraphs 5.4.2, A. 1., preceding. The minimum capacity provided for Interface Groups 3 through 10 and for which charges are applicable is set forth in Paragraph 5.5.6, following.

5.5.3 When additional busy-hour minutes of capacity are ordered, they may be provided using activated or in-service Access Connection Interface Groups. Such busy-hour minutes of capacity, up to and including the number that brings the Interface Group to its designated capacity, will be provided without being subject to the minimum capacity provisions as set forth in Paragraph 5.5.6, following. Any additional busy-hour minutes of capacity ordered will be subject to the minimum capacity provisions, unless they are provided under an Access Order using Planned Facilities.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.5 Switched Access Service Minimum Capacity Requirements-(Continued)

5.5.4 When an IC requests high frequency analog or Digital interface groups, the IC is required to order at a minimum, sufficient capacity to utilize 70 percent of the channels.

5.5.5 For the purpose of administering the minimum capacity provisions, Access Orders for Access Connection Interface Groups for different Feature Groups may be grouped together if the facilities provided for all the connections are the same and terminate in the same facilities terminal in the same end office.

5.5.6 The following table provides the total capacity of the interface and the threshold for minimum order requirements:

Interface Type	Interface Name	Total Capacity (Channels)	Minimum Capacity (Channels)
Analog	Group	12	9
Analog	Supergroup	60	42
Analog	Mastergroup	600	420
Digital	DS1	24	17
Digital	DS1C	48	34
Digital	DS2	96	68
Digital	DS3	672	471
Digital	DS4	4032	2823

The Telephone Company will not provide these Interface Groups when less than 70 percent of the capacity is ordered. For purposes of grouping as set forth in Paragraph 5.5.5, preceding, it shall be assumed that Feature Groups A, B, C or D minutes may be combined.

5.5.7 When Switched Access Service provided from available inventory is disconnected and the disconnect causes the in-service capacity to fall below the minimum requirements, the Telephone Company will at the option of the IC:

A. Disconnect all the service subject to the minimum capacity requirements, and all appropriate charges will apply, or

5.5 Switched Access Service Minimum Capacity Requirements-(Continued)

5.5.7 (Continued)

B. Establish a Planned Facilities Order for the minimum capacity as of the disconnect date, and all facilities not in service required to meet the minimum requirements will be established as activated Planned Facilities, with appropriate charges applying.

When a return of Planned Facilities to the Telephone Company causes the activated capacity to fall below the minimum, the Telephone Company will take back all Planned Facilities involved and all appropriate charges will apply.

5.6 Record Modification and Charges

An IC may request a record modification for existing Access Service or activated Planned Facilities. Record modifications include the following types of changes:

- Billing name
- Billing address
- Contact telephone number
- Rearrange account structure
- Change designation of IC serving wire center (applies only to the application of the five-mile rule as set forth in Paragraph 6.7.13, B., following).

The charges to be applied for record modifications are as follows:

- For changes to existing Access Service, a charge equal to the amount of the Other Modification Charge set forth in Paragraph 5.2.2, E., preceding, will apply.
- For changes to activated Planned Facilities, a charge equal to the amount of the Planned Facilities Order Modification Charge set forth in Paragraph 5.4.5, D., preceding, will apply.
