

EC-2024-0217

Brett Felber  
VS  
Ameren Missouri

Since it is apparent that the Commission has no respect or values in any of my Motions or requests, I think it is best just to dismiss this matter for a final time.

This is not me giving up at all, I disagree with everything Ameren is trying to do, furthermore, the Commission has placed me in a bad spot with infringing my rights as a person.

I do not agree with the deposit. They openly admitted to altering documents, they did openly alter documents and submitted a counterfeit document with a bogus email address. I also do not agree with the overcharging on my account.

Since the Commission doesn't want to openly discuss the matter of the bogus email address, I have no interest in further discussing it between the Commission or Ameren Missouri.

I didn't get a fair hearing in EC-2023-0395, I didn't get a fair matter in EO-2024-0244 and I still do date haven't in EC-2024-0217.

The Commission is protecting Ameren Missouri, further allowing them to submit counterfeit documents with bogus email addresses and fraudulent email address.

I don't need an answer or response from cowards to already know the truth. The cowards involved in this matter know the truth, more importantly they continue to be cowards, because they feel privileged thinking they are experts because they are "lawyers". I hardly call cowards, lawyers.

Attorneys that abuse their power and ability are known as predator attorney's and grifters who decide to scam people.

Plus, I already know the answer to the questions I've asked, regardless of what the Commission says. Even Jesus Christ himself knows the truth.

While I don't have to, I forgive Ameren for what they have lowered themselves to as a business. I want to move on and don't wish to proceed any longer within the Commission for my complaint, as I've been discriminated against, by both the Commission and Ameren Missouri.

However, keep in mind, just because I am dismissing my complaint, doesn't mean that I agree with the deposit or the excess fees or the counterfeit document.

Ameren Missouri still must decide on that. However, if Ameren Missouri continues to submit counterfeit documents, continues to try and bill me for the deposit after the closure of my dismissed complaint and continues with their threats against me or harasses me for unfair balances, I won't file a Commission Complaint, but I will file a lawsuit in Circuit Court to have them deregulated and file suit against the Commission to have their authority of certification revoked in matters.

I've found my inner peace and maybe one day the Commission and Ameren Missouri can find their inner peace in not taking advantage of people. I don't have the time and energy to continue arguing about a single document that clearly shows Ameren and more importantly the Commission at responsibility and fault.

I believe Ameren Missouri will go back to their harassing ways after the complaint is dismissed and it is up to them to prove me wrong.

Please be advised, if Ameren Missouri decides to force me to pay a deposit or the excess billing amounts or double billing amount. I will file a suit against not only Ameren Missouri, but the Commission itself for allowing it to continue happening.

In addition, I will use every single strategy in seeking that not only is Ameren Missouri fined and punished, but the Commission for their partake in allowing Ameren Missouri to utilize counterfeit documents.

Please leave me alone. To the Commission and the Regulatory Judge. Please tell Ameren Missouri to leave me alone. I want to move on.
