CONFERENCE TELEPHONE SERVICE-LOCAL

3.1 DEFINITION

3.1.1 Local Conference Service is the furnishing of simultaneous connection between three or more exchange access arrangements. If Long Distance Message Telecommunications Service rates would apply on a connection between any two of the exchange access arrangements so connected, conference service will be furnished in accordance with the Long Distance Message Telecommunications Service Tariff.

3.2 CONDITIONS UNDER WHICH SERVICE IS FURNISHED

- 3.2.1 Service is furnished where and to the extent that facilities permit.
- 3.2.2 The connections will be established on either a person-to-person or station-to-station basis.
- 3.2.3 The Telephone Company will, upon request, attempt to establish the conference connections at a specified time.

3.3 RATES

The total charge for the conference connection is the sum of the set-up charge and the usage charge for total conversation time.

- A. Set-up charge is \$1.60 for each Exchange Access Arrangement included in the conference call.
- (CT) B. The charge for conversation time will consist of the total minutes of conversation multiplied by the appropriate usage charge per minute applying to the conference call.
- (AT) C. The appropriate usage charge for each exchange access arrangement is as follows:
- (CT)

Mileage Between The Two Most Distant Service Points	Initial Minute Rate	Each Additional Minute Rate
0-14	\$.04	\$.01
15-28	.05	.02
Over 28	.06	.03

- 1. The method of applying usage charges:
  - initial period rates indicated in Paragraph 3.3, B., preceding, are for connections of one minute or any fraction thereof.

CONFERENCE TELEPHONE SERVICE-LOCAL

3.3 RATES-(Continued)

B. (Continued)

1. (Continued)

- all additional minute rates indicated in Paragraph 3.3, B., preceding, are for each additional minute or any fraction thereof that the connection continues beyond the initial period.

C. Timing of Messages

- The chargeable duration of the message is the elapsed time between the start of conversation, with all points on the conference connection and the time at which the disconnect signal is received from the originating exchange access arrangement, except as follows:

When the originating customer requests that one or more exchange access arrangements be added to or disconnected from a conference call on which conversation is in progress, that call is considered terminated and a new call is considered initiated to the revised group of Exchange Access Arrangements.

- Chargeable time does not include time lost because of faults or defects in the service.

3.3 RATES-(Continued)

D. Discount Periods

The following percentages will apply to local conference calls made during the discount periods:

	Mon.	Tue.	Wed.	Thu.	Fri	Sat.	Sun.
8:00 AM to 5:00 PM	Day Rate Period Full Rate						
5:00 PM to 11:00 PM	Evening Rate Period 20% Discount						Eve. Rate 20%
11:00 PM to 8:00 AM	Night Rate & Weekend Rate Period 35% Discount						

- Discounts are applied by discount period to the total number of initial minutes and additional minutes accumulated during the call.
- When the application of the discount results in a fractional charge, the amount will be rounded to the nearest cent.
- In cases where a message begins in one rate period and ends in another, the rate in effect at the time the connection is established applies.

## CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

### 4.1.1 GENERAL PROVISIONS

#### A. General

Terminal equipment and communications systems may be connected at the customer's premises to telecommunications services furnished by the Telephone Company where such connections are made in accordance with the provisions of this section. Telecommunications services, as used herein, include exchange service, Long Distance Message Telecommunications Service (LDMTS) and Wide Area Telecommunications Service (WATS).

#### B. Responsibility of the Customer

1. The customer shall be responsible for the installation, operation and maintenance of any terminal equipment or communications system. No combinations of terminal equipment or communications systems shall require change in or alteration of the equipment or services of the Telephone Company, cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment or degradation of service to persons other than the user of the subject terminal equipment or communications system, his calling or called party. Upon notice from the Telephone Company that terminal equipment or a communications system is causing such hazard, damage, malfunction or degradation of service, the customer shall make such changes as shall be necessary to remove or prevent such hazard, damage, malfunction or degradation of service.
- (CT) 2. The customer shall be responsible for the payment of a Customer-Owned Equipment Trouble Isolation Charge, as provided in the Restoration of Service Section of this Tariff, for visits by a Telephone Company employee to the customer's premises when a service difficulty or trouble report results from the use of terminal equipment or a communications system.
- (CT) 3. The customer who provides the premises wiring of communications systems subject to the Federal Communications Commission's Rules and Regulations shall be responsible for the payment of an Institutional Program for Premises Wiring Charge as provided following for activities performed by Telephone Company employees at the customer's premises when the premises wiring in question has failed acceptance tests monitored by, or participated in by, the Telephone Company and/or has been revealed to be not in conformance with the information provided in the related affidavit which was provided and/or has resulted in a harm to the network.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS-(Continued)

B. Responsibility of the Customer-(Continued)

3. (Continued)

The Institutional Program for Premises Wiring Charge provided for pre-ceding is comprised of the first, or a combination of both rate elements described below, as appropriate:

Element 1 - for the first 15 minutes, or fraction thereof, of total time spent by Telephone Company employees in related monitoring or participation in acceptance tests and/or in related inspection of customer-provided premises wiring for Communications Systems subject to the Federal Communications Commission's Rules and Regulations and for administrative expenses including the visit to the customer's premises - USOC: EPC1E ..... (CR) \$57.50

Element 2 - for each additional 15 minutes, or major fraction thereof, of total time spent by Telephone Company employees in performing the related customer premises activities described in Element 1, preceding - USOC: EPCAE ..... (CR) \$11.75

C. Responsibility of the Telephone Company

- 1. The Telephone Company shall not be responsible for the installation, operation or maintenance of any terminal equipment or communications system. In addition to the provisions contained in the Rules and Regulations Applying to All Customer's Contracts Section of this Tariff, telecommunications services are not represented as adapted to the use of terminal equipment or communications systems. Where terminal equipment or communications systems are used with telecommunications services, the responsibility of the Telephone company shall be limited to the furnishing of service components suitable for telecommunications services and to the design, maintenance and operation of service components in a manner proper for such services.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS-(Continued)

C. Responsibility of the Telephone Company-(Continued)

1. (Continued)

Subject to this responsibility, the Telephone Company shall not be responsible for (1) the through transmission of signals generated by the terminal equipment or communications systems or for the quality of, or defects in, such transmission, or (2) the reception of signals by terminal equipment or communications systems or (3) address signaling where such signaling is performed by signaling equipment.

2. The Telephone Company will, at the customer's request, provide information concerning interface parameters, including the number of ringers which may be connected to a particular telephone line needed to permit terminal equipment to operate in a manner compatible with telecommunications services.

3. The Telephone Company may make changes in its telecommunications services, equipment, operations or procedures where such action is not inconsistent with the Federal Communications Commission's Rules and Regulations. If such changes can be reasonably expected to render any customer's terminal equipment or communications system incompatible with telecommunications services, or require modification or alteration of such terminal equipment or communications systems, or otherwise materially affect its use or performance, the customer will be given adequate notice, in writing, to allow the customer an opportunity to maintain uninterrupted service.

D. Recording of Two-Way Telephone Conversations

Telecommunications services are not represented as adapted to the recording of two-way telephone conversations. However, voice recording equipment may be directly, acoustically or inductively connected with telecommunications services in accordance with Paragraph 4.1.2 or 4.1.3, following, subject to the following conditions:

1. A distinctive recorder tone that is repeated at intervals of approximately 15 seconds is required to alert all parties when recording equipment is in use and is connected with services of the Telephone Company, or

(AT) The recording party gives verbal notification in a clear, unambiguous manner which is recorded at the beginning and as part of the call, or

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.1 GENERAL PROVISIONS-(Continued)

D. Recording of Two-Way Conversations-(Continued)

1. (Continued)

(MT)

- e. When used by the United States Nuclear Regulatory commission of The Department of Energy with respect to the telephone systems located at its Operations Center for recording of two-way telephone conversations.
- f. Recordings of calls made for patently unlawful purposes, such as bomb threats, kidnap ransom requests and obscene telephone calls. Outgoing calls made in immediate response to such calls are also excepted.
- g. Recordings of calls made by federal, state or local law enforcement authorities, or federal intelligence authorities, acting under color of law.

2. The voice recording equipment shall be so arranged that at the will of the user, it can be physically connected to and disconnected from the services of the Telephone Company or switched on and off.

E. Violation of Regulations

When any customer-provided terminal equipment or communications system is used with telecommunications services in violation of any of the provisions in this section, the Telephone Company will take such immediate action as necessary for the protection of the telecommunications network and Telephone Company employees and will promptly notify the customer of the violation. The customer shall discontinue such use of the terminal equipment or communications system or correct the violation and shall confirm in writing to the Company within ten days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Telephone Company within the time stated above shall result in suspension of the customer's service until such time as the customer complies with the provisions of this Tariff.

## CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

### 4.1.2 CONNECTIONS OF REGISTERED EQUIPMENT

#### A. Registered Terminal Equipment, Registered Protective Circuitry and Registered Communications Systems

Terminal equipment, protective circuitry and communications systems that are registered may be directly connected at the customer's premises to the telecommunications network, subject to the Federal Communications Commission's Rules and Regulations, 4.1.1, preceding, and the following:

1. All combinations of registered equipment and associated nonregistered terminal equipment (including but not limited to wiring) shall be installed, operated and maintained so that the requirements of the Federal Communications Commission's Rules and Regulations are continually satisfied.

---

Issued: December 29, 1983

and Original Sheet 8

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.2 CONNECTIONS OF REGISTERED EQUIPMENT-(Continued)

A. Registered Terminal Equipment, Registered Protective Circuitry and Registered Communications Systems-(Continued)

1. (Continued)

The Telephone Company may discontinue service or impose other remedies as provided for in the Federal Communications Commission's Rules and Regulations for failure to comply with these provisions.

2. The customer shall notify the Telephone Company of each line to which registered equipment is to be connected in advance of such connection and shall notify the Telephone Company when such registered equipment is permanently disconnected. The customer shall provide the Telephone Company, upon request, the Registration Number and Ringer Equivalence Number for the registered equipment and the Universal Service Order Code (USOC) for the required Telephone Company-provided standard jack. The customer shall also provide, when appropriate, the off-premises station port signaling capability of a PBX system.

3. The customer shall not connect registered equipment to a Telephone Company line if:

- a. The Ringer Equivalence of such equipment in combination with the total Ringer Equivalence of other equipment connected to the same line exceeds the allowable maximum of five or as otherwise determined by the Telephone Company.
- b. The ringer type is not a ringer type designated by the Telephone Company as suitable for that particular line.

4. Unless a specific waiver has been granted by the Federal Communications Commission or except as otherwise provided in 5., following, all connections of registered equipment to services furnished by the Telephone Company will be made through a point of demarcation. In most cases this will be through a Telephone Company provided standard jack. For simple wiring where there is no Telephone Company provided standard jack at the Demarcation Point, customers may make connections by direct attachment to Company installed wiring at points on the customer's side up to and including at the Demarcation Point. In the case of registered communications systems utilizing complex wiring, a method of connection, jacks, terminal strips, etc., will be provided by the Telephone Company.

5. The requirement for the use of a standard jack as described in 4., preceding, is waived for registered equipment which is located in hazardous or inaccessible locations.

B. Premises Wiring Associated With Registered Communications Systems

1. Premises Wiring is wiring which connects separately-housed equipment entities or system components to one another, or wiring which connects an equipment entity or system component with the telephone network interface, located at the customer's premises and not within an equipment housing.

a. Fully-Protected Premises Wiring is premises wiring which is:

- (1) No greater than 25 feet in length (measured linearly between the points where it leaves equipment or connector and registered as a component of and supplied to the user with the registered terminal equipment or protective circuitry which it is to be used.
- (2) A cord which complies with (1) preceding and once by a registered extension cord. Extension cord should be used as a substitute for wiring which for safety reasons should be affixed to or embedded in a building's structure.
- (3) Wiring located in an equipment room with restricted access, provided that this wiring remains exposed for inspection and is not concealed or embedded in the building's structure, and that it conforms to the Federal Communications Commission's Rules and Regulations.
- (4) Electrically behind registered equipment, system components or protective circuitry which assure that electrical contact between the wiring and commercial power wiring or earth ground will not result in hazardous voltages or excessive longitudinal imbalance at the telephone network interface.

**CANCELLED**

B. Connections Through Connecting Arrangements Provided by the Telephone Company-(Continued)

3. Grandfathered Connections of Communications Systems-(Continued)

- b. The provisions relating to minimum protection criteria set forth in C., following, shall apply to the connection of communications systems.

C. Minimum Protection Criteria for Electrical Connections

1. To prevent excessive noise and crosstalk in the network, it is necessary that the power of the signal at the central office not exceed 12dB below one milliwatt when averaged over any three-second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the equipment to the Telephone Company interface located on the customer's premises will be specified for each customer location, but in no case shall it exceed one milliwatt.
2. To protect other services, it is necessary that the signal which is applied by the equipment to the Telephone Company interface located on the customer's premises meets the following limits:
  - a. The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in (1) above.
  - b. The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 16dB below one milliwatt.
  - c. The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24dB below one milliwatt.
  - d. The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36dB below one milliwatt.
  - e. The power in the band above 40,000 Hertz shall not exceed 50dB below one milliwatt.

C. Minimum Protection Criteria for Electrical Connections-(Continued)

3. To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the equipment to the Telephone Company interface located on the customer's premises at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

D. Attested Equipment Connected Prior to July 1, 1980

1. Until July 1, 1980, headsets and nonpowered conferencing equipment which meet the standards and procedures set forth by the Telephone Company in Technical References for Attested Equipment may be connected at the customer's premises to the telecommunications network in accordance with a. through e. following. Such equipment may remain connected and be moved and reconnected in accordance therewith for the life of the equipment unless subsequently modified.
  - a. The connection shall be made through an interface termination (e.g., headset jack) provided by the Telephone Company.
  - b. The Identification Number issued by the Telephone Company to the manufacturer or supplier must appear on each unit of Attested Equipment utilized.
  - c. Customers must notify the Telephone Company of their intention to connect Attested Equipment. Such notification must include the Identification Number of the equipment and the location at which that equipment is to be used.
  - d. Attested Equipment may not:
    - (1) Be connected to a source of electrical power which is external to the telecommunications network;

JUL 1 1986

BY L.R.S. 33.02  
PUBLIC SERVICE COMMISSION  
OF MISSOURI

Issued: NOV 30 1984

Effective: DEC 31 1984

By R. D. BARRON, President-Missouri Division  
Southwestern Bell Telephone Company  
St. Louis, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff  
Section 4  
Original Sheet 34

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS

A. Direct Electrical Connection

Customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations may be connected with telecommunications services on a direct electrical basis at the customer's premises provided that:

1. The connection is made through:

- a. a connecting arrangement furnished by the Telephone Company, or
- b. registered or grandfathered terminal equipment, protective circuitry or communications system subject to the Federal Communications Commission's Rules and Regulations which, either singularly or in combination, assure that the requirements of the Federal Communications Commission's Rules and Regulations are met at the network interface.

In lieu of these requirements for total hardware protection, an optional, alternative method is available as described in B., following, for the control of signal power only.

2. The connection is:

- a. through switching equipment, or
- b. to a customer-provided communications system not subject to the Federal Communications Commission's Rules and Regulations that is arranged to promptly return the network service to an idle (on-hook) state should the communications system fail. In addition, the customer must notify the Telephone Company when the communications system fails.

Issued: December 29, 1983

Effective: January 01, 1984

By R. D. BARRON, Vice President-Missouri  
Southwestern Bell Telephone Company  
St. Louis, Missouri

CANCELLED - Missouri Public Service Commission - 02/16/2003 - IN-2003-0247

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff  
Section 4  
Original Sheet 35

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS-(Continued)

A. Direct Electrical Connection-(Continued)

3. Minimum protection criteria set forth in 4.1.3, C., preceding, are complied with when the connection is made through equipment or systems that are not registered.
4. When the connection is to WATS service, the customer has a requirement to communicate over a WATS line to or from premises of that customer located in the same rate state as that for which the WATS initial period rate applies. Customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations which are not connected through switching equipment must terminate only in that WATS rate state in terminal equipment or communications systems subject to the Federal Communications Commission's Rules and Regulations.

B. Institutional Procedures for Signal Power Control

1. When customer-provided communications systems not subject to the Federal Communications Commission's Rules and Regulations are connected through (a) a Telephone Company-provided connecting arrangement or (b) registered or grandfathered terminal equipment, communications system or protective circuitry which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface, no further action is required. However, when a customer elects to connect such a communications system to the telecommunications network and the registered or grandfathered equipment, system or protective circuitry through which the connection is made does not provide protection for signal power control, the customer must comply with the following institutional procedures:
  - a. The customer-provided communications system must be installed, operated and maintained so that the signal power (within the frequency range of 200-4000 Hertz) at the telecommunications network interface continuously complies with the Federal Communications Commission's Rules and Regulations.
  - b. The operator(s)/maintainer(s) responsible for the establishment, maintenance and adjustment of the voice frequency signal power present at the telecommunications network interface must be trained to perform these functions by successfully completing one of the following:

4.1.4 CONNECTIONS OF CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS NOT SUBJECT TO THE FEDERAL COMMUNICATIONS COMMISSION'S RULES AND REGULATIONS-(Continued)

B. Institutional Procedures for Signal Power Control-(Continued)

1. (Continued)

a. (Continued)

- (1) a training course provided by the manufacturer of the equipment used to control voice frequency signal power; or
- (2) a training course provided by the customer or authorized representative, who has responsibility for the entire communications system, using training materials and instructions provided by the manufacturer of the equipment used to control the voice frequency signal power; or
- (3) an independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the equipment used to control the voice frequency signal power; or
- (4) in lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with (1) through (3) preceding.

Upon request, the customer is required to provide the proper documentation to demonstrate compliance with the requirements in B.1.b.

c. At least 10 days advance notice must be given to the Telephone Company in the form of a notarized affidavit before the initial connection of the customer-provided communications system. A copy of the affidavit must also be maintained at the customer's premises. The affidavit must contain the following information:

- (1) The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation and maintenance of the communications system.
- (2) The line(s) which the communications system will be either connected to or arranged for connection to.
- (3) A statement that all operations associated with establishment, maintenance and adjustment of the signal power present at the telecommunications network interface will comply with the Federal Communications Commission's Rules and Regulations.

c. (Continued)

- (4) A statement describing how each operator/maintainer of the communications system will meet and continue to meet the training requirements for persons installing, adjusting or maintaining the communications system.

2. Extraordinary Procedures

- a. The Telephone Company may invoke extraordinary procedures to protect the telecommunications network where one or more of the following conditions are present:

- (1) Information provided in the affidavit gives reason to believe that a violation of the Federal Communications Commission's Rules and Regulations or the Institutional Procedures set forth in B.1., preceding, is likely.
- (2) Harm has occurred and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in B.1., preceding.

- b. The extraordinary procedures which can be invoked by the Telephone Company include:

- (1) Requiring the use of protective apparatus which either protects solely against signal power or which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface. This protective apparatus may be provided by either the Telephone Company or the customer.
- (2) Disconnecting service.

- c. A charge equal to the Maintenance of Service charge, as provided in the Restoration of Service Section of the Tariff, will apply when:

B. Institutional Procedures for Signal Power Control-(Continued)

2. Extraordinary Procedures-(Continued)

c. (Continued)

- (1) It is necessary to send a Telephone Company employee to the premises where the connection is made because a condition set forth in a., preceding, exists, and
- (2) A failure to comply with the Federal Communications Commission's Rules and Regulations or the Institutional Procedures for signal power control in B.1., preceding, is disclosed.

4.1.5 CONNECTIONS OF CUSTOMER-PROVIDED TERMINAL EQUIPMENT TO SERVICES SPECIFICALLY EXEMPTED FROM THE FEDERAL COMMUNICATIONS COMMISSION'S REGISTRATION PROGRAM

A. Customer-provided terminal equipment may be connected at the customer's premises to semi-public coin services of the Telephone Company in accordance with the following:

- 1. The connection shall be through a network control signaling unit and connecting arrangement furnished by the Telephone Company.
- 2. The customer-provided terminal equipment must comply with the minimum protection criteria set forth in Paragraph 4.1.3, C., preceding.

B. Customer-provided terminal equipment may be connected at the customer's premises to party line services of the Telephone Company in accordance with provisions in the Local Exchange Tariff, Paragraph 1.2.14.

## CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

### 4.2 CONNECTIONS WITH CUSTOMER-PROVIDED COMMUNICATIONS SYSTEMS

#### 4.2.1 Local Exchange Access Line Charges

##### A. Application of Business Local Exchange Access Line Charges

1. The PBX trunk rate applies for use in providing access to communication systems which perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
2. The multiline rate applies for use in providing access to communication systems which do not perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis, but do provide for facilitating pick-up of two or more business exchange lines. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
3. The individual line rate applies for use in providing access in all other cases. See the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.

##### B. Application of Residence Local Exchange Access Line Charges

1. The PBX trunk rate applies for use in providing access to communication systems which perform switching functions and/or connect with the Local Exchange access lines on a pooled-access basis. Refer to the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.
2. The individual line rate applies for use in providing access in all other cases. See the Local Exchange Tariff for applicable Local Exchange Rates and the Service Connection Charges Section of this Tariff for applicable Service Connection Charges.

4.3 CONNECTIONS WITH TELEPHOTOGRAPH EQUIPMENT USED BY THE PRESS, LAW ENFORCEMENT AGENCIES, THE ARMED FORCES, CIVILIAN DEFENSE AGENCIES AND THE UNITED STATES WEATHER BUREAU

A. Regulations

1. Telephotograph equipment provided by the press may be connected to lines of the Telephone Company for use by the press for the transmission and reception of pictures and similar material for publication. Telephotograph equipment provided by law enforcement agencies may be connected to lines of the Telephone Company for use by law enforcement agencies for the transmission and reception of fingerprints, ballistic data, identification photographs and similar law enforcement material. Telephotograph equipment provided by the armed forces of the United States may be connected to lines of the Telephone Company for use by the armed forces of the United States for transmission and reception of information of military necessity essential to the national defense. Telephotograph equipment provided by civilian defense agencies may be connected to lines of the Telephone Company for use by civilian defense agencies for the transmission and reception of information essential for the discharge of their responsibilities in emergencies. Telephotograph equipment provided by the United States Weather Bureau may be connected to lines of the Telephone Company for use by the United States Weather Bureau for the transmission and reception of weather information.
2. Customer telephotograph equipment may be connected by direct physical connection by means of protective connection equipment furnished by the Telephone Company. The connection of the telephotograph equipment may be made by the customer only to the terminals of the protective connection equipment, subject to the provisions of 4.1.2 and 4.1.3, B.2.a preceding.
3. Portable protective equipment will be furnished, if desired, for use with portable telephotograph equipment of the customer, subject to the provisions of 4.1.3, A.2. preceding.

## CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

### 4.11 CONNECTIONS OF CUSTOMER-PROVIDED TEST EQUIPMENT

#### A. Totally Protective Connections

Customer-provided test equipment may be connected to the telecommunications network at the premises of the customer through registered or grandfathered terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations which, either singularly or in combination, assure that all of the requirements of the Federal Communications Commission's Rules and Regulations (total protection) are met at the telecommunications network interface.

#### B. Program for Connections of Customer-Provided Test Equipment

Customer-provided test equipment may also be connected at the premises of the customer either (a) directly at the telecommunications network inter-face or (b) through terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations which does not provide protection for signal power control under the following program provided that:

1. The customer-provided test equipment is limited to transmission signal power generating and/or detection devices, or similar devices, utilized by the customer for the detection and/or isolation of a communications service fault.
2. The customer-provided test equipment is of a type that was lawfully directly connected to the telecommunications network as of March 6, 1981. Such test equipment may remain connected, be moved or reconnected during the life of the test equipment unless it has been subsequently modified.
3. Direct connections of customer-provided test equipment are made through Telephone Company-provided jacks or as otherwise authorized by the Telephone Company.
4. Customer-provided test equipment must be operated in accordance with the Institutional Procedures for Signal Power Control as specified in 4.11, C., following.

CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

4.11 CONNECTIONS OF CUSTOMER-PROVIDED TEST EQUIPMENT-(Continued)

B. Program for Connections of Customer-Provided Test Equipment

5. The customer notifies the Telephone Company of each telecommunications network service at each premises to which the customer-provided test equipment will be connected in advance of the initial connection. The customer must also notify the Telephone Company when such test equipment is permanently disconnected at each premises.
6. No customer-provided test equipment or combination of test equipment with terminal equipment, protective circuitry or communications systems subject to the Federal Communications Commission's Rules and Regulations (including but not limited to wiring) may cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment, or degradation of service to persons other than the user of the subject test equipment or the user's calling or called party.

C. Institutional Procedures for Signal Power Control

1. In accordance with 4.11, B.4., preceding, the customer must comply with the following Institutional Procedures:
  - a. The customer must install, operate and maintain the test equipment so that its signal power at the telecommunications network interface complies with the Federal Communications Commission's Rules and Regulations.
  - b. The operator(s)/maintainer(s) responsible for the test equipment signal power present at the telecommunications network interface must be trained to perform these functions by successfully completing one of the following:
    - (1) A training course provided by the manufacturer of the test equipment, or
    - (2) A training course provided by the customer, or authorized representative of the customer, using training materials and instructions provided by the manufacturer of the test equipment, or

1. (Continued)

b. (Continued)

- (3) An independent training course (e.g., trade school or technical institution) recognized by the manufacturer of the test equipment, or
- (4) In lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with 4.11, C.1.b.(1) through (3), preceding.

Upon request, the customer is required to provide proper documentation to demonstrate compliance with the requirement in 4.11, C.1.b.

- c. Advance notice must be given to the Telephone Company in the form of a notarized Affidavit before the initial connection of the customer-provided test equipment at each premises after April 9, 1981. A copy of the Affidavit must also be maintained at the customer's premises. The Affidavit must contain the following information:
  - (1) The full name, business address, business telephone number and signature of the customer or authorized representative who has responsibility for the operation of the test equipment.
  - (2) The line(s) to which the test equipment will be either connected to or arranged for connection to.
  - (3) A statement that all operations associated with the establishment, maintenance and adjustment of the test equipment signal power present at the telecommunications network interface will comply with the Federal Communications Commission's Rules and Regulations.

c. (Continued)

(4) A statement describing how each operator of the test equipment will meet and continue to meet the training requirements for persons installing, connecting, adjusting or maintaining the test equipment.

2. Extraordinary Procedures

a. The Telephone Company may invoke extraordinary procedures to protect the telecommunications network where one or more of the following conditions are present:

(1) Information provided in the Affidavit gives reason to believe that a violation of the Federal Communications Commission's Rules and Regulations or the Institutional Procedures set forth in 4.11, C.1., preceding, is likely.

(2) Harm has occurred, and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in Paragraph 4.11, C.1., preceding.

b. The extraordinary procedures which can be invoked by the Telephone Company include:

(1) Requiring the use of protective apparatus which either protects solely against excessive signal power or which assures that all of the requirements of the Federal Communications Commission's Rules and Regulations are met at the telecommunications network interface.

(2) Disconnecting service.

## CONSTRUCTION CHARGES

### 5.1 GENERAL REGULATIONS

- 5.1.1 The charges, deposits and regulations specified below apply in connection with all classes of service, facilities or equipment furnished by the Telephone Company and are in addition to the Installation charges applying in connection with particular classes of service, equipment or facilities and in addition to Service Connection charges which are covered separately in the other sections of this Tariff or in the Local Exchange Tariff for each Exchange.
- 5.1.2 Construction charges may be payable, at the option of the Telephone Company, at the time the application is made.
- 5.1.3 When a deposit or a portion of a deposit is refunded in accordance with the plan for extension to new real estate additions (Paragraph 5.2.2, D.), interest will be paid at the rate of 9 percent per annum on the refunded portion of the deposit for the period held if it has been held 30 days or more. Interest on the refunded portion of the deposit is payable at the same intervals at which refunds are made.
- 5.1.4 Plant extensions made by the Telephone Company in accordance with these rules, however financed, shall be and remain the property of the Telephone Company or may be owned by some other company with whom the Telephone Company has a joint use agreement.

### 5.2 RULES FOR EXTENSIONS OF PERMANENT DISTRIBUTING PLANT FOR COMPANY MAIN STATION SERVICE AND PRIVATE BRANCH EXCHANGE TRUNKS

- 5.2.1 Within the basic service area, the Telephone Company will extend its distributing plant to furnish the designated service of the appropriate basic service area to any applicant without requiring a construction charge, except for temporary service.
- 5.2.2 Outside the basic service area, but within the exchange area, the Telephone Company will extend its distributing plant to applicants in areas where facilities are not available under the following conditions:
  - A. New pole line extensions required for furnishing Company main service will be constructed along public highways by the Telephone Company under the following conditions:

### CONSTRUCTION CHARGES

#### 5.2 RULES FOR EXTENSIONS OF PERMANENT DISTRIBUTING PLANT FOR COMPANY MAIN STATION SERVICE AND PRIVATE BRANCH EXCHANGE TRUNKS-(Continued)

##### 5.2.2 (Continued)

##### A. (Continued)

An allowance of 5/10 mile, route measurement, per applicant will be made for such pole line extensions without the application of a construction charge.

Applicants may, at the option of the Telephone Company, be required to execute a termination agreement in an amount equal to 12 months exchange service in cases where no construction charges are applicable.

For the construction in excess of the allowance stated above, applicants for service are required to pay a construction charge of \$106.50 per 1/10 mile or fraction thereof, route measurement, except where natural or other barriers are encountered which require undue circuitous routing or abnormal construction costs. In the latter cases, the construction charges may reflect the abnormal costs incurred by the company.

##### B. Circuits on existing pole lines required for furnishing company main service or a better grade of service will be constructed along public highways by the Telephone Company without the application of a construction charge.

Applicants may, at the option of the Telephone Company, be required to execute a minimum period service agreement in an amount equal to 12 months exchange service.

##### C. Extensions of plant required for furnishing company main service will be made on private property for an individual customer provided suitable right-of-way can be obtained under the following conditions:

An allowance of 2/10 mile, route measurement, per applicant will be made for such plant extension without the application of a construction charge.

Section 5  
Original Sheet 3

CONSTRUCTION CHARGES

5.2 RULES FOR EXTENSIONS OF PERMANENT DISTRIBUTING PLANT FOR COMPANY MAIN STATION SERVICE AND PRIVATE BRANCH EXCHANGE TRUNKS-(Continued)

5.2.2 (Continued)

C. (Continued)

For construction in excess of the allowance stated in the preceding paragraph, an applicant for service will be required to pay a construction charge as specified in Paragraph 5.2.2, A.

Where more than one applicant will be served by plant extensions on private property, the construction will be considered as pole line extensions on a public highway.

D. The period for which construction charges will be applicable to a circuit construction project will be five years from the date service is first established on the project. After the expiration of the initial five- year period, the facilities included in the project will be considered as existing.

When a new applicant can be served from an existing circuit project during the initial five-year period, the construction charge applicable to the group or groups in the project will then be refigured on the basis of the number of customers having paid or then paying a construction charge.

E. Extensions for mobile home or trailer park additions.

In mobile home or trailer park additions, when the promoters desire to have telephone service made available for prospective residences without costs other than the regular service charges, and when in the judgment of the Telephone Company, the financial risk involved in the plant extensions does not warrant the expenditure, the promoters may make the following arrangements.

Deposit with the Telephone Company the cost of providing pole line and cable for a distributing plant within the addition of

sufficient capacity to serve an agreed upon ultimate number of customers in the addition, less the estimated net salvage obtainable if the plant should be removed in three years.

Refunds will be made to the promoter over a three-year period on the following basis:

At the end of each six-month period, a refund will be made for each customer attached to the system during that half-year period, which is a net main station gain over and above the greatest half-year total of main stations for which a refund was previously made provided the refund does not exceed the total amount of the deposit. The amount of the refund is Determined by dividing the total amount of the deposit by the agreed upon ultimate number of customers.

#### 5.3 RULES FOR PLANT ON PRIVATE PROPERTY USED IN PROVIDING SERVICE EITHER WITHIN THE BASE RATE AREA OR OUTSIDE THE BASE RATE AREA

- 5.3.1 Supporting structures, including either poles or underground conduit and opening and closing of trenches, used only in providing service and located on private property of the customer must be furnished and maintained by or at the customer's expense and must conform with the Telephone Company's standard specifications. Ownership of such supporting structures is vested in the customer, except that such facilities may be owned, furnished and maintained by another wire-using company in which case any cost assessed against the Telephone Company for occupancy of such supporting structures must be borne by the customer.

5.3 RULES FOR PLANT ON PRIVATE PROPERTY USED IN PROVIDING SERVICE EITHER WITHIN THE BASE RATE AREA OR OUTSIDE THE BASE RATE AREA-(Continued)

5.3.2 Supporting structures, including either poles or underground conduit and opening and closing of trenches, used in providing both Exchange Service or Private Branch Exchange trunk service and located on private property of the customer will be provided, owned, maintained and replaced by the Telephone Company under the conditions discussed in Paragraph 5.2.2, C., preceding.

Circuits on supporting structures owned by the customer or another wire-using company as discussed in Paragraph 5.3.1, preceding, are owned and maintained by the Telephone Company.

5.4 SPECIAL CONSTRUCTION

5.4.1 When a special type of construction is furnished to a customer, an additional charge is made equal to the difference between the estimated cost of the special type of construction and the estimated cost of standard construction. Charges will include materials, contract services, and loaded labor.(1) The customer is required to bear unusual maintenance costs for the special construction.

5.4.2 Where either underground or aerial construction of facilities is required (other than by choice of the Telephone Company), an additional charge shall be made if the estimated cost of the type of construction required (underground or aerial) exceeds the estimated cost of the other type of construction. This charge shall be the difference between the two.

5.4.3 The Telephone Company will provide an estimate of actual charges to the customer prior to the start of construction.

(AT) 5.4.4 At the customer's request, the Telephone Company will provide additional regulated entrance facilities and/or demarcation arrangements beyond the one provisioned at the normal tariffed rate. In such cases, charges will include the actual cost of time and materials required.  
(AT)

(1) Overhead loading of labor is calculated with a composite allocation factor that is based on general office salaries and expenses, reliefs and pensions, and Social Security taxes. This factor is developed annually by determining the relationship of these three expense items to the total payroll base. It is applied to expenses for construction, removals, test desk, and central office maintenance.

CONSTRUCTION CHARGES

5.5 CONCEALED WIRING

5.5.1 The standard method of wiring buildings is to use exposed wiring. When concealed wiring is furnished, an additional charge is made equal to the difference between the estimated cost of installation and the average cost of an exposed wiring installation, except that if suitable interior conduit is provided by the customer, the wiring is installed in the conduit by the Telephone Company without additional charge.

5.5.2 Wiring run in grooves of baseboards, mouldings, wainscoting, exposed rubber or metal floor duct, etc., is not considered concealed wiring.

5.6 TEMPORARY SERVICE

Where plant construction (either inside or outside the base rate area) is required to provide any service or facility, temporary in character, or where it is necessary to place temporary construction in advance of permanent construction(1) in order to meet the customer's requirements or when, in the judgment of the Telephone Company, the service or facilities cannot be reused in the event the customer disconnects the service or facilities, the Telephone Company may require the applicant to pay the nonrecoverable costs of the temporary construction or to contract for service beyond the initial period, or both.

U.S. DEPT. OF JUSTICE

5.7 PREWIRING

JAN 1 1987

5.7.1 General

BY 1st P.S.#6  
PUBLIC SERVICE COMMISSION

A. Prewiring provides for the installation of non-key ~~inside~~ wiring associated with standard residence or standard business service during the initial construction of the premises.

B. Prewiring is not to be provided where construction is too far advanced or the type of construction makes such wiring impracticable. The final decision as to the feasibility of providing and the type and method of prewiring a building will rest at all times with the Telephone Company.

C. The Telephone Company is not required to provide service using the prewiring if the prewiring is damaged during the construction of the building. Installations of telephone service will be completed on a standard basis on either initial or any subsequent installations if it is determined that prewiring is damaged.

(1) Temporary construction in advance of permanent construction consists of drops, cable leads and other facilities that would not be required to provide service on a permanent basis.

CONSTRUCTION CHARGES

5.8 PREINSTALLATION OF JACKS

5.8.1 The Telephone Company may provide preinstallation of jacks (advance jacking) at prewired residential or business premises prior to the initial establishment of service. Premises Work Charges, as found in Section 19 of this Tariff will apply.

5.9 SERVICE PROVIDED TO MOVABLE PREMISES

5.9.1 When telephone service is provided to movable premises by means of aerial plant, a clearance pole shall be provided if needed in the opinion of the Telephone Company. The customer shall place, own and maintain the pole. However, if the customer elects, the Telephone Company will place, own and maintain the pole and bill the customer the cost of placing the pole.

5.9.2 The clearance pole must comply with specifications determined to be applicable by the Telephone Company.

CONSTRUCTION CHARGES

(FC) 5.7 INSTALLATION OF TELEPHONE LINES WITHIN SUBDIVISION(1)

(FC) 5.7.1 Telephone lines constructed, installed and owned by the Telephone Company in subdivisions shall be installed underground.

(FC) 5.7.2 The following definitions are used in this section of the Tariff.

APPLICANT

The developer, builder or other person, partnership, association, firm, private or public corporation, trust, estate, political subdivision, governmental agency or other legal entity recognized by law, applying for the construction of a telephone distribution system in a subdivision.

BUILDING

A single structure roofed and enclosed within exterior walls, built for permanent use, erected, framed of component structural parts and unified in its entirety both physically and in operation for single-family residential occupancy in a subdivision (definition excludes mobile home).

SUBDIVISION

A lot, tract or parcel of land divided into two or more lots, plots, sites or other divisions for use for new residential buildings or the land on which is constructed new multiple-occupancy buildings per a recorded plot thereof if such recordation is required by law.

(FC) 5.7.3 The Telephone company, upon receipt of the applicant's proper application, will install an underground telephone system with suitable materials to assure that the applicant will receive reasonably safe and adequate telephone service. The provision of the underground telephone system will
