Missouri Public Service Commission

ADOPTION NOTICE

RECTO DEC 27 2001

Southwestern Bell Telephone, L.P. hereby adopts, ratifies, and makes its own, in every respect as if the same had been originally filed by it, all schedules, rules, notices, concurrences, schedule agreements, divisions, authorities or other instruments whatsoever filed with the Public Service Commission, State of Missouri, by Southwestern Bell Telephone Company prior to December 30, 2001, the beginning of Southwestern Bell Telephone, L.P.'s possession. By this notice, Southwestern Bell Telephone, L.P. also adopts and ratifies all supplements or amendments to any of the above schedules, etc., which Southwestern Bell Telephone Company has heretofore filed with said Commission.

## APPLICATION OF TARIFF

This Tariff applies to Private Line Services furnished or made available by the Southwestern Bell Telephone Company, hereinafter referred to as the Telephone Company, and for Private Line Services furnished jointly with a connecting company, to the portion of such Private Line Services furnished by the Telephone Company to the point of connection with the facilities of another company for which that company's rates and regulations apply, over facilities wholly within or partly within and partly without the State of Missouri, between two or more points, all of said points being within the State of Missouri.

(CP) In the event that a connecting company, jointly furnishing Private Line Services with the Telephone Company, does not have the requisite terminal equipment in stock or available, the Telephone Company may negotiate a contract with the connecting company whereby the connecting company will install and maintain the Telephone Company's terminal equipment, or if such contractual arrangement cannot be agreed upon with the connecting company, the Telephone Company may, with the consent of the connecting company, elect to directly install and maintain said terminal equipment itself, or contract said installation and maintenance with a third party. In either case, the schedule of rates and specific regulations as set forth in this Tariff shall be applicable to the provision of terminal equipment by the Telephone Company in the connecting carrier's certificated area when the connecting carrier is unable to do so.

The schedules of rates and specific regulations are set forth in this Tariff.

This Tariff supersedes Southwestern Bell Telephone Company's General Private Line Services and Channels Tariff in its entirety.

#### **REGULATIONS**

#### 1.1 UNDERTAKING OF THE TELEPHONE COMPANY

#### 1.1.1 Scope

- A. This Tariff section contains the general regulations and definitions governing Private Line Services furnished by the Telephone Company except as otherwise specified, or unless the terms and conditions of an individual customer agreement provided pursuant to the Customer Specific Pricing Plan Tariff, P.S.C. Mo.-No.37 apply.
- B. Private Line Service is the furnishing of Telephone Company service components for communication between specified locations all within Local Access and Transport Area's (LATA's) of the State of Missouri, 24 hours daily, seven days per week. Service components may be those of the Telephone Company only or those of the Telephone Company and other telephone companies.
- C. The Telephone Company does not undertake to transmit messages, but offers the use of its service components, where available, to customers for such purposes.
- D.Services provided under this Tariff shall be used by private line customers for use in obtaining end-to-end Private Line Services. Interexchange Customers may use services found in this Tariff that will meet their administrative needs; however, an Interexchange Customer is restricted from utilizing services found in this Tariff to furnish a portion of their authorized service offerings.
- (AT) E. These services are competitively classified

## 1.1.2 Limitations

- A. The furnishing of service under this Tariff will require certain physical arrangements of the service components of the Telephone Company and is, therefore, subject to the availability of such service components.
- B. The use and restoration of service shall be in accordance with P.S.C. Mo.-No. 38, Digital Link Services Tariff, Section 7, which specifies the priority system for such activities.
- C. Subject to compliance with Paragraph 1.1.2, B., preceding, where a shortage of channels or equipment exists at any time, either for temporary or protracted periods, the establishment of Long Distance Message Telecommunications Service and/or regular Exchange Telephone Service shall take precedence over all other services.

- B. Private Line service is the furnishing of Telephone Company facilities for communication between specified locations all within the State of Missouri, 24 hours daily, seven days per week. Facilities may be those of the Telephone Company only or those of the Telephone Company and other telephone companies.
- C. The Telephone Company does not undertake to transmit messages, but offers the use of its facilities where available to customer for such purposes.

#### 1.1.2 Limitations

- A. In case a shortage of facilities exists at any time, either for temporary or protracted periods, the establishment of Long Distance Message Telecommunications service and/or regular Exchange Telephone service shall take precedence over all other services and uses.
- B. The furnishing of service under this Tariff will require certain physical arrangements of the facilities of the Telephone Company and is therefore subject to the availability of such facilities.

(RT)

- A. In view of the fact that the customer has exclusive control of his communications over the service components furnished him by the Telephone Company and of the other uses for which service components may be furnished him by the Telephone Company, and because of unavoidable errors incidental to the services and to the use of such service components of the Telephone Company, the services and service components furnished by the Telephone Company are subject to the terms, conditions and limitations herein specified and to such particular terms, conditions and limitations as set out in Section 2 of this Tariff governing the respective services.
- B. The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing service, whether the result of negligence of the Telephone Company or other causes shall in no event exceed an amount equivalent to the proportionate charge to the customer for the service during the period in which such mistakes, omissions, interruptions, delays, errors or defects in transmission occur and continue. No other liability shall in any case attach to the Telephone Company in consideration of such interruptions.
  - However, any such mistakes, omissions, interruptions, delays, errors or defects in transmission or service which are caused or contributed to by the negligence or willful act of the customer, or which arise from or in connection with the use of customer-provided service components or premises equipment shall not result in the imposition of any liability whatsoever upon the Telephone Company.
- C. The customer indemnifies and saves the Telephone Company harmless against claims for libel, slander or the infringement of copyright arising from the material transmitted over the service components, against claims for the infringement of patents arising from, combing with or used in connection with service components of the Telephone Company, apparatus and systems of the customer and against all other claims arising out of any act or omission of the customer in connection with the service components provided by the Telephone Company.

#### REGULATIONS

- 1.1 UNDERTAKING OF THE TELEPHONE COMPANY-(Continued)
- 1.1.4 Provision of Service Components-(Continued)
- (AT) B. Maintenance and Repairs--All ordinary expense of maintenance and repair associated with network facilities and equipment, unless otherwise specified in this Tariff, is borne by the Telephone Company. The customer agrees to take good care of the network equipment and facilities provided. In case of damage to or destruction of any of the Company's network equipment or facilities not due to ordinary wear and tear, the customer is held responsible for the cost of replacing the Company's network equipment destroyed or for the cost of restoring the Company's network equipment to its original condition, except where such damage is not occasioned by the negligence of the customer.
- (FC) C. The charges specified in this Tariff do not contemplate installation, maintenance or repair work being performed by the Telephone Company employees involved at a time when overtime wages apply as a result of customer requests, nor do they contemplate work once begun being interrupted by the customer.

If the customer requests that labor be performed at hours of the day or days of the week other than normal work hours or days, or on holidays, or interrupts work once begun, an additional charge based on the additional costs involved applies. Such charges do not apply if sufficient advance notice is given so that employees' work schedules can be changed. The additional charge does not apply to overtime or premium time worked at the Telephone Company's convenience.

In situations where the customer requests that "stand-by" Telephone Company personnel be provided for installation or maintenance irrespective of when such "stand-by" workmen are provided, the additional estimated cost of providing such "stand-by" personnel will be billed to the customer.

Such charges do not apply if sufficient advance notice is given so that employees' work schedules can be changed. The additional charge does not apply to overtime or premium time worked at the Telephone Company's convenience.

In situations where the customer requests that "standby" Telephone Company personnel be provided for installation or maintenance irrespective of when such "standby" workmen are provided, the additional estimated cost of providing such "standby" personnel will be billed to the customer.

  - C. The customer is responsible for compliance with Tariff regulations by each participant in a sharing arrangement.
  - D. The Telephone Company is not responsible for procuring participants for a sharing arrangement.
  - E. Sharing arrangements must be nonprofit. The total charges to all participants in a sharing arrangement may not exceed the sum of the Telephone Company's charges for the Private Line Service. The allocation of charges to each participant should be on a nonprofit pro-rata basis. Where the customer for a sharing arrangement is organized as a nonprofit entity, a not-for-profit fee, charged solely for the management, may be allocated by the customer among the sharing participants.
  - F. The Telephone Company shall not be responsible for the allocation of usage of, or charges for, shared Interexchange Private Line Service. Orders, including those which involve the start, rearrangement, release or discontinuance of service, will be accepted by The Telephone Company only from the customer.
  - G. Sharing of Private Line Service may not encompass the conversion of that Private Line Service into Local Exchange Service, Message Telecommunications Service, Wide Area Telecommunications Service or the equivalents thereof.

REGULATIONS

1.2 USE-(Continued)

(CP) 1.2.4 Shared Use of Private Line Service

JAN 12 1983

Interexchange Private Line Service may be shared in a long term arrangement between the customer and users subject to the following regulations.

- A. The customer may, but does not have to, use the Private Line Service.
- B. The customer is responsible for payment of all charges incurred, whether such charges are associated with the service and equipment utilized by the customer or sharing arrangement participants.
- C. The customer is responsible for compliance with Tariff regulations by each participant in a sharing arrangement.
- D. The Telephone Company is not responsible for procuring participants for a sharing arrangement.
- E. Sharing arrangements must be non-profit. The total charges to all participants in a sharing arrangement may not exceed the sum of the Telephone Company's charges for the Private Line Service, plus the charges for any ancillary equipment that may be connected to such service. The allocation of charges to each participant should be on a non-profit pro-rata basis. Where the customer for a sharing arrangement is organized as a non-profit entity, a not-for-profit fee, charged solely for the management, may be allocated by the customer among the sharing participants.
- F. The Telephone Company shall not be responsible for the allocation of usage of, or charges for, shared Interexchange Private Line Service. Orders, including those which involve the start, rearrangement, release or discontinuance of service, will be accepted by The Telephone Company only from the customer.

G. Sharing of Private Line Service may not encompass the conversion of that Private Line Service into Local Exchange Service, Message Telecommunications Service, Wide Area Telecommunications Service or the equivalents thereof.

1.4.2 Cancellation for Cause-(Continued)

A. Residence Customer

Upon non-payment of any undisputed sum due the Telephone Company, or upon illegal use of any service or facility, or upon a violation of any of the conditions governing the furnishing of service or facilities, the Telephone Company may, after five days' written notice has been furnished to the customer, without incurring any liability, forthwith discontinue the furnishing of said service. Service shall not be discontinued on a day when the offices of the Telephone Company are not available to facilitate reconnection of service, or on a day immediately preceding such a day.

At least 24 hours preceding a discontinuance, the Telephone Company shall make reasonable efforts to contact the customer to advise them of the proposed discontinuance and what steps must be taken to avoid it.

The Telephone Company shall postpone a discontinuance for a time not in excess of twenty-one days if the Telephone is necessary to obtain emergency medical assistance for a person who is a member of the household where the service is provided and where such a person is under the care of a physican. Any person who alleges such emergency shall, if requested, provide the Telephone Company with reasonable evidence of such necessity.

When the customer incurs charges not covered by a deposit or guaranty and evidences an intent not to pay such charges when due, services may be discontinued at any time after written notice has been sent, certified mail, to such customer at his last known address and at the address where the service to be discontinued is provided. The written notice shall state how a customer has evidenced an intent not to pay charges when due.

#### REGULATIONS

# 1.4 PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES-(Continued)

- 1.4.3 Minimum and Fractional Rates and Charges
  - A. The minimum service period is one month, except when the cost of special construction is such as to necessitate a longer contract period.
- B. When rates are on a "per month" basis, the minimum charge will be for one month. If the period of use exceeds one month, the charges for the fractional part of a month following and consecutive with a full month will be a proportionate part of the monthly charges based on the actual number of days the service components are furnished. For the purpose of administering this regulation with respect to the determination of charges for a fractional part of a month, every month is considered to have 30 days.
- C. In applying a rate involving a fraction of a cent, the fraction is carried through the entire computation of the charge for the service. When the charge so computed includes a fraction of a cent, a fraction of less than one-half cent is disregarded, and a fraction of one-half cent or more is treated as one cent.

#### 1.5 DEFINITIONS

Certain terms used throughout this Tariff are defined as follows:

- <u>Authorized Protective Connecting Module</u> Denotes a protective unit designed by the Telephone Company and manufactured under the control of the Telephone Company quality assurance procedures which unit is to be incorporated in a conforming answering device.
- <u>Base Rate Area</u> The portion of the exchange area in which exchange service is furnished at scheduled rates for each class of service without mileage or construction charges.
- <u>Baud</u> Denotes a unit of signaling speed. It is the reciprocal of the time duration in seconds of the shortest signal element (mark or space) within a code signal. The speed in bauds is the number of signal elements per second.
- <u>Bit</u> A bit is the smallest unit of information in the binary system of notation.
- <u>Bridging</u> The connection of a channel or channels to another channel or the common point where more than two channels of any type connect.
- <u>Building</u> "Same Building" is a structure under one roof or two or more structures on the same premises which are connected by an enclosed passageway in which the wires or cables of the Telephone Company may be placed without exposure to outside electrical circuits or the weather. In no case can conduit be considered as an enclosed passageway. The term "same building" does not include those premises connected by a covered public mall (see Premises).

## 1.5 DEFINITIONS

Certain terms used generally throughout this Tariff are defined as follows:

Accessories - Denotes devices which are mechanically attached to, or used with, the facilities furnished by the Telephone Company and which are independent of, and not electrically, acoustically, or inductively connected to the conductors in the communications path of the Telephone Company facilities.

Authorized Protective Connecting Module - Denotes a protective unit designed by the Telephone Company and manufactured under the control of the Telephone Company quality assurance procedures, which unit is to be incorporated in a conforming answering device.

Authorized User - Denotes a person, firm, or corporation who is authorized by the customer to be connected to the service of the customer for the purpose of transmitting communications to or from the customer and relating directly to the customer's business. An authorized user must be specifically named in the application for service and a station must be located on his premises.

Base Rate Area - The portion of the exchange area in which exchange service is furnished at scheduled rates for each class of service without mileage or construction charges.

Baud - Denotes a unit of signaling speed. It is the reciprocal of the time duration in seconds of the shortest signal element (mark or space) within a code signal. The speed in bauds is the number of signal elements per second.

Bridging - The connection of a channel or channels to another channel or the common point where more than two channels of any type connect.

Building - "Same Building" is a structure under one roof, or two or more structures on the same premises which are connected by an enclosed passageway in which the wires or cables of the Telephone Company may be placed without exposure to outside electrical circuits or the weather. In no case can conduit be considered as an enclosed passageway. The term "same building" does not include those premises connected by a covered public mall. (See Premises)

#### REGULATIONS

### 1.5 DEFINITIONS-(Continued)

- <u>Customer Premises Equipment</u> Devices, apparatus and their associated wiring, provided by a customer or user for use with service components furnished by the Telephone Company for Private Line Service and does not include customer-provided communications systems.
- <u>Customer-Provided Test Equipment</u> Denotes test equipment located at the premises of the customer or user that is used by the customer or user for the detection and/or isolation of a communications service fault.
- <u>Data Access Arrangement</u> Denotes a protective connecting arrangement for use with the network control signaling unit or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective service components and procedures to determine compliance with criteria set forth in this tariff.
- Demarcation Point The point (referred to as Demarc Point or Network Interface) of interconnection between the Telephone Company's facilities and the wiring at the subscriber's premises. The Demarc Point shall consist of wire or a jack conforming to Subpart F of Part 68 of the Federal Communications Commission's Rules and Regulations. The Demarc Point will generally be within twelve inches of the protector or, absent a protector, within twelve inches of the entry point to the customer's premises. If conforming to the twelve inches is unrealistic or technically impossible, the Demarc Point will be the most practicable minimum point of entry to the customer's premises.

The network interface may be located at a point other than the normal demarcation point where the network interface is already established by the presence of network equipment with the effective date of this tariff. For multiunit structures (e.g., apartments, college campuses, shopping centers) the structure owner shall make the final decision on whether the structure shall be treated as a multipremise structure with one demarcation point per premises or, as a single premise with one demarcation point for the entire structure. The structure owner shall have the option of having the demarcation point placed at a location other than that determined by the Telephone Company provided the structure owner pays any additional construction cost and such location is consistent with the minimum point of entry standard.

Upon request of the subscriber or their agent, the Telephone Company shall provide additional regulated network entrance facilities and/or demarcation arrangements in single tenant multiunit or multibuilding situations. Such arrangements shall be made in accordance with Section 5, Paragraph 5.4, (Special Construction), of the General Exchange Tariff. Each additional regulated network entrance facility will terminate in a demarcation arrangement located at a minimum point of entry within a specified designated telecommunications equipment space.

With regard to premises for any structure that is built to be mobile (e.g., mobile homes, recreational vehicles), the Telephone Company may place the Demarc Point on a post or pole at or near the pad where such structure is intended to rest. Boat docks and similar premises may be treated by the Telephone company as single unit premises, with the Demarc Point being placed on the shore.

## 1.5 DEFINITIONS-(Continued)

APR 27 1983

REGEIVED

Customer-Provided Terminal Equipment - Devices, apparatus and their associated wiring, provided by a customer, authorized user or joint user for usel with facilities furnished by the Telephone Company for Prince Commission Service and does not include customer-provided communications-systems.

(AT) Customer-Provided Test Equipment - Denotes test equipment located at the premises of the customer that is used by the customer for the detection and/or isolation of a communications service fault.

Data Access Arrangement - Denotes a protective connecting arrangement for use with the network control signaling unit or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria set forth in this Tariff.

<u>Direct Electrical Connection</u> - Denotes a physical connection of the electrical conductors in the communications path.

<u>Distribution Center</u> - Indicates amplifying and bridging equipment required to connect the various local sections of a music network or to connect local sections to an interexchange section of that network.

<u>Duplex Service</u> - Denotes service which permits customers, authorized users or joint users to communicate in both directions simultaneously.

Entrance Facilities - Denotes the facilities required to extend customerprovided channels to a service point of the customer or authorized user.

Equalized - Denotes a procedure which provides for the component frequencies of the material transmitted having about the same relationship at the two ends of the channel.

Equipment-to-Equipment Connection - Denotes the connection of add-on or substitute equipment to host terminal equipment or communications systems. These connections are not within the scope of the Federal Communications Commission's Registration Program. The resulting combination of host and add-on or substitute equipment may be registered and must comply with the Federal Communications Commission's Rules and Regulations in Commission's communications network.

## REGULATIONS

## 1.5 DEFINITIONS-(Continued)

Inside Wire and Cable - Those facilities which are confined to the inside wiring and cable furnished in connection with Private Line services from the building main or floor terminal, frame, or protector to the station equipment on the customer's premises. This does not include cable which is a part of switching equipment for Key Telephone systems, PBX Switchboards or other Exchange Tariff offerings.

Interexchange Channel - That portion of a Private Line service which interconnects two primary serving offices in different exchanges or metropolitan exchanges.

Interexchange Service - A Private Line service where station locations are in different exchanges or metropolitan exchanges.

Interface - Denotes that point on the premises of the customer, authorized user, or joint user at which provision is made for connection of other than Telephone Company-provided facilities to facilities provided by the Telephone Company.

Interoffice Channel - That portion of a Private Line service which interconnects, (1) local channels in different serving offices associated with intraexchange service; or, (2) interexchange channels with local channels.

Intraexchange Service - A Private Line service where all the station locations are wholly within an exchange or a metropolitan exchange as defined in the Local Exchange Tariff.

Joint User - The person, firm, or corporation who is designated by the customer as a user of a Private Line service of the customer in accordance with Tariff provisions who would not otherwise be entitled to use the customer's service.

Local Channel - That portion of a Private Line service which interconnects a station location to (1) an interexchange or interoffice channel; or (2) another station location on a different premises in the same serving area, via another local channel to the station on a different premises.

Multipoint Service - Denotes a service arrangement which provides communication capability between more than two private line station locations constituting a common dedicated communications system.

### REGULATIONS

1.6 CONNECTIONS

### 1.6.1 General

- A. In addition to the regulations and definitions applicable to Private Line services as set forth in this Tariff, the following regulations apply to the connections of customer-provided facilities.
- B. Customer-provided terminal equipment and customer-provided communications systems may be connected with facilities furnished for Private Line service by the Telephone Company where such connection is made in accordance with the Tariffs of this Company governing the furnishing of Private Line service.
- C. Since Telephone Company Private Line services utilize Telephone Company facilities in common with other services, it is necessary, in order to prevent excessive noise and crosstalk, that the power of the signal applied to the Telephone Company lines be limited.

To protect Telephone Company facilities and the services furnished to the general public by the Telephone Company from harmful effects, the signals applied to Telephone Company facilities by equipment or systems provided by a customer, authorized user, or joint user must comply with the applicable minimum protection criteria as stated in Paragraph 1.6.5, except as provided in Paragraph 1.6.1F, following.

D. Where terminal equipment (except where connected with a DATA-PHONE Data Set) or communications systems provided by a customer, authorized user, or joint user, except as provided in Paragraph 1.6.1F, following, are connected with facilities furnished for Private Line service by the Telephone Company and there is connection of such facilities to Long Distance Message Telecommunications service, Local Exchange service or WATS access line, such terminal equipment or communications systems must comply with the minimum network protection criteria as set forth in the General Exchange or WATS Tariffs. The power of the signal which may be applied by the equipment or system provided by a customer, authorized user, or joint user to the Telephone Company interface located on the premises of a customer, authorized user, or joint user will be specified by the Telephone Company for each application to be consistent with the signal power allowed on the telecommunications network.

#### REGULATIONS

1.6 CONNECTIONS-(Continued)

1.6.1

General-(Continued) E. Where terminal equipment or communications systems provided by a customer,

authorized user, or joint user, except as provided herein, are connected with facilities furnished for Private Line service by the Telephone Company and there is connection of such facilities to Long Distance Message Telecommunications service, Local Exchange service or WATS access line or where such equipment or communications systems are connected to a private line terminated in a CENTREX system, the connection shall be such that the function of network control signaling, (except customerprovided tone-type address signaling through a Telephone Company-provided connecting arrangement or signaling functions performed by customer-provided equipment pursuant to the provisions of Paragraph 1.6.13, following) is performed by equipment furnished, installed and maintained by the Telephone Company.

Customer-provided tone-type address signaling is permitted through acoustic or inductive connections provided such connections are effected externally to a Telephone Company network control signaling unit. However, the facilities of the Telephone Company are not designed for such use and the Telephone Company makes no representation as to the reliability of address signaling which is performed in such manner.

- Minimum protection criteria stated in Paragraph 1.6.5 are not applicable where customer-provided terminal equipment is connected with a DATA-PHONE Data Set furnished by the Telephone Company or a high speed TELPAK data channel terminal as indicated in Section 2 of this Tariff. Due to the nature of the service provided and/or the type of facility used, minimum protection criteria are not applicable where customer-provided terminal equipment or communications systems are connected with the following channels.
  - Channels provided for Series 200 services.
  - 2. Channels provided for Medium Speed Facsimile.

3. Channels provided for Series 600 service.

Channels provided for Bell and Lights Civil Air Defense Warning systems; Series 100.

#### REGULATIONS

1.6 CONNECTIONS-(Continued)

1.6.4 Violation of Regulations

> Where any terminal equipment or communications systems provided by a customer, authorized user, joint user, or other common carrier listed in Paragraph 1.6.19 is used with Private Line services furnished by the Telephone Company and any of the provisions of this Tariff are violated, the Telephone Company will take such immediate action as necessary for the protection of its facilities, and will promptly notify the customer of the violation. The customer shall discontinue such use of the equipment or system or correct the violation and shall confirm in writing to the Company within 10 days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Telephone Company within the time stated above shall result in disconnection of the customer's Private Line service until such time as the customer complies with the provisions of this Tariff.

- 1.6.5 Minimum Protection Criteria
  - Direct Electrical Connection
    - Customer-provided terminal equipment or communications systems which are connected to facilities furnished for Private Line service by the Telephone Company, except as provided in Paragraph 1.6.1F preceding, must comply with the following minimum protection criteria:
      - Because each Private Line service is individually engineered, a single valued limit for all applications cannot be specified. Therefore, the power of the signal which may be applied by the customer-provided equipment to the interface will be specified by the Telephone Company for each application to be consistent with the signal power allowed on the telecommunications network.

#### REGULATIONS

- 1.6 CONNECTIONS-(Continued)
- 1.6.5 Minimum Protection Criteria-(Continued)
  - A. Direct Electrical Connection-(Continued)
    - 1. (Continued)
      - b. To protect other services from interference at frequencies which are above the band of service provided, the Telephone Company will specify the acceptable signal power in the following bands to be applied by the customer-provided equipment to the interface to ensure that the input to the Telephone Company line does not exceed the limits indicated:
        - The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18db below the power of the signal as specified in Paragraph 1.6.5A.la preceding.
          - The power in the band from 4,000 Hertz to 10,000 Hertz shall not exceed 16db below one milliwatt.
          - The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24db below one milliwatt.
          - The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36db below one milliwatt.
          - The power in the band above 40,000 Hertz shall not exceed 50db below one milliwatt.
      - c. Where there is connection to Long Distance Message Telecommunications service, Local Exchange service, or a WATS access line, to prevent interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided equipment to the interface at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.
