G. Conditioning Options - Available for Types 414B, 414C, 420 and 422.

The types and description of the available conditioning options at rates and charges specified in 2.2.16, following, are as follows:

- 1. Type C - Conditioning provides assured transmission quality for frequency response and envelope delay distortion as specified below.

Type C1 (2) - For a two-point or multi-point channel:

- The envelope delay distortion shall not exceed:
Between 1000 and 2400 Hz, a maximum difference of 1000 microseconds.
- The loss deviation with frequency (from 1000 Hz, reference) shall not exceed:
Between 1000 and 2400 Hz, -1dB to +3dB. Between 300 and 2700 Hz, -2dB to +6dB.
(+ means more loss)

- (1) Obsolete-applicable to existing service installations at existing locations for existing customers.
- (2) Type C1 and C2 Channel Conditioning Service will be provided subject to these restrictions: with customer Premises Equipment, the conditioned channel is restricted to no more than five (5) points and/or 4000 miles on "two-wire" service and no more than twenty (20) points and/or 4000 miles on "four-wire" circuits. These restrictions do not apply to one-way simultaneous transmission from a master service point to all other service points such as broad-cast-type multi-point service.

2.2 DESCRIPTION OF SERVICES-(Continued)

MO. PUBLIC SERVICE COMM

2.2.3 Voice Grade Service-Series 300(1) and 400-(Continued)

I. Foreign Serving Office and Centrex (with switching equipment located on Telephone Company premises) Station Service.

1. This service is furnished to a maximum of two serving offices (in addition to the serving office in which the Exchange Service is furnished) within the exchange or metropolitan exchange in which the exchange service is furnished.
2. Service is furnished on the condition that additional costs to the Telephone Company may be necessary to provide a type of signaling suitable for operation with the serving office from which service is furnished, or to provide, at the customer's request, a type of signaling other than the type the Telephone Company would elect to furnish. In such cases, additional charges shall apply.
3. Customers, for the exchange portion of the service, are subject to exchange charges, rules and regulations; and for the private line portion of the service, are subject to the private line charges, rules and regulations in this Tariff.
4. Off-premises extensions are provided only where service components and conditions permit. Type 415 (1LLRY) (1LLHY) local channel charges apply for off-premises extensions.

5. Rates	<u>Monthly Rate</u>	<u>Service Charge</u>
Point of Termination in one foreign serving office(2)(4) (T21FS).....	None	\$205.00
Point of Termination in two foreign serving offices(3)(4) (T1SFS).....	\$30.75	205.00
Interoffice Channel Terminal, each (two required per interoffice channel) (PMNFS)	14.10	None

- (1) Obsolete-applicable to existing service installations at existing locations for existing customers.
- (2) In addition, private line charges as set forth in Paragraph 2.2.3, preceding, apply between the serving office of the customer premises and the serving office from which the Exchange Service is provided. Local channel charges do not apply to the main station but do apply to Centrex Main Stations and extensions.
- (3) Local channel charges do not apply to the main station and one extension but do apply to Centrex Main Stations and extensions.
- (4) Local channel charges do not apply when the exchange service terminates in a channel port of an Access Advantage Plus Service.

J. Four-Wire Service Access Arrangement (2)

1. General

- a. The Four-Wire Service Access Arrangement provides access from switching equipment that is designed to use four-wire terminations to be connected to the Telephone Company's service components for network access. The offering provides four-wire service components between the local serving central office of the customer and the premises switching equipment.
- b. The Four-Wire Service Access Arrangement is not represented as adapted to the use of customer-provided terminal equipment, switching equipment or communications systems. Where such terminal equipment or communications systems are used with such services, the responsibility of the Telephone Company shall be limited to the furnishing of service components suitable for the Four-Wire Service Access Arrangement and to the maintenance and operation of service components in a manner proper for such services.
- c. No combination of customer-provided terminal equipment, switching equipment or communications system shall require change in or alteration of the Four-Wire Service Access Arrangement.

2. Rates and Charges

- a. The following rates and charges are for the additional service components necessary to provide the Four-Wire Service Access Arrangement and are in addition to applicable rates and charges for the Private Line Services with which it is associated.

	<u>USOC</u>	<u>Monthly Rate</u>	<u>Service Charge</u>
Foreign Exchange (FX) or Foreign Serving Office (FSO) Four-Wire Service Access Arrangement, each	4WF	(CR)\$33.80	\$26.90

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.4 TELPAK Channels and Services-Series 500(1)

In addition to the general regulations and definitions applicable to Private Line Services as set forth in Section 1 of this Tariff, the regulations hereinafter set forth apply to TELPAK channels and services. Except as otherwise provided herein, the regulations applicable to derive channels and services are as set forth for channels and services of the same type and furnished for the same purposes under Paragraphs 2.2.2 and 2.2.3, preceding.

A. Description of Channels and Classifications

- (CT) 1. TELPAK service provides communications paths of various widths (TELPAK channels) which are capable of transmitting various forms of electrical communications. The Telephone Company will terminate the entire TELPAK channel for use as a broadband transmission medium or will provide channelizing equipment to subdivide TELPAK channels into channels of lesser width (derive channels). These channels may be furnished by such physical service component arrangements appropriate for the forms of communications specified as the Telephone Company may elect for efficient utilization of available physical service components, whether or not in the form of a single carrier spectrum assignment and whether or not the entire TELPAK channel or all derived channels are on the same physical service component.

TELPAK channels as described in Paragraph 2.2.4, A.2., following, are furnished between specified locations for telephone, teletypewriter, remote metering, supervisory control, miscellaneous signaling and for other purposes for which channel terminals are provided under Paragraph 2.2.4, A.3., following.

(CP) The Telephone Company will provide TELPAK Service only when the originating service point(s) and terminating service point(s) of the entire TELPAK channel, including derived channels, are within the LATA.

A TELPAK channel may be used as a single channel or may be subdivided into a group of channels of lesser band width, hereinafter referred to as derived channels, only through the use of channel terminals or connecting arrangements provided by the Telephone Company, except that the customer may create additional channels from a derived voice grade channel to the same extent permitted under this Tariff. The customer may order as many derived channels arranged for use as he requires. Additional derived channels up to the full capacity of the TELPAK channel, as specified in Paragraph 2.2.4A.2 following, are, if later ordered, furnished subject to the availability of suitable terminating service components at the time the additional channels are ordered.

(CT)

Channels or derived channels are furnished on a two-point basis and are suitable for transmission in either direction or for simultaneous or non-simultaneous transmission in both directions. Service components are furnished on a seven day per week, twenty-four hour per day basis only and for a minimum period of one month.

(CT)

2. TELPAK channels are furnished under the following classifications:

D. Intrastate - Interstate Services and Channels

If a customer has a TELPAK channel connecting two or more exchanges with derived services or channels, some of which carry interstate traffic and some of which carry only intrastate traffic, the TELPAK channel charge for the intrastate portion is determined by multiplying the charge computed in accordance with Paragraph 2.2.4F following, by the ratio of the number of equivalent telephone-derived intrastate channels divided by the total number of equivalent telephone-derived channels in use. Each two-point section is separately computed.

For other items associated with such intrastate-derived services and channels, the rates specified in Paragraphs 2.2.4F.3, 2.2.4F.4, 2.2.4F.5 and 2.2.4F.6 apply.

Interoffice channels and interoffice channel terminals, when applicable, will be provided at the rate for interexchange service.

F. Rates

MISSOURI Public Service Commission

The rates shown below apply for channels and services involving the Telephone Company exchanges and also for channels and services in exchanges of other companies to the extent specified below. TELPAK rates are determined by a percentage discount of Series 300(1) and 400 inter-exchange channel mileage as found in this tariff. The rate assumes full utilization of TELPAK channel capacity.

1. TELPAK Channel Rates Percent Discount from Series 300(1) and 400 Interexchange Channel Mileage Rates

a. Effective rates through June 30, 1983.

TELPAK A (1LKA4)	10%
TELPAK B (1LKB4)	20%
TELPAK C (1LKC4)	30%
TELPAK D (1LKD4)	40%

b. Effective rates from July 1, 1983, through December 31, 1984. Percent Discount from Series 300(1) and 400 Interexchange Channel Mileage Rates

BY 5th RS 47 PUBLIC SERVICE COMMISSION OF MISSOURI

2. Mileage Measurements

a. Two-Point Service

The interexchange pricing mileage is the V-H mileage (fractional miles being considered as full miles) between the rate centers of the service points or between the rate centers of a service point and the point of connection with the service components of another company in those cases where "other line" charges of another company are applied. In those cases where "other line" charges are applied, the Telephone Company's maximum interexchange pricing mileage shall be the V-H mileage between the rate centers of the service points.

b. Multi-Point Service

The rate mileage is the shortest combination of V-H mileages connecting rate centers of service points in the sequence specified by the customer, each section being determined as specified in Paragraph 2.2.4, F.2.a, preceding.

2.2.5 Channels for Program Transmission in Connection with Loudspeakers and Sound Recording - Series 600

A. Description of Series 600 Channels and Schedule Classifications

1. Facilities, specially equipped and operated for program transmission in connection with loud-speakers and sound recording are furnished for the transmission in one direction of music or speech.
2. Program transmission channels in connection with loudspeakers may be interconnected at Telephone Company premises to form a network for the distribution of program material to a number of loud-speaker locations. The points at which such interconnection of such channels are made are called "distributing centers."
3. The channel facilities covered in Paragraph 2.2.5 are the only channel facilities furnished by the Telephone Company for program transmission in connection with loud-speakers and sound recording. Such channels may not be used for on-the-air audio broadcasting or for pickup for a live audio broadcast.
4. Channels furnished in connection with loud-speakers may be connected with paging systems. Channels furnished in connection with loud-speakers and sound recording may be interconnected with channels furnished in connection with radio broadcasting.

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.5 Voice Grade Service-Series 600

A. General

Series 600 channels are furnished on a two-point or multi-point basis for use with customer premises equipment for one way, closed circuit Wired Music distribution. These are the only channels expressly provided for transmission of Wired Music signals.

B. Regulations

1. Distribution amplifiers are required to receive signals from a source provided by the customer (studio) and to transmit the appropriate signal level to the wired music service point locations (patron).

Telephone Company-provided distribution amplifiers are normally located in a Telephone Company serving office. However, the Telephone Company may agree to provide a distribution amplifier at other locations designated by the customer from which point separate channels will be furnished to service point locations (patrons) of the customer, subject to the following:

- a. all premises are located in the same building(1), or
- b. all premises are on the same continuous property, which is owned or operated by a single agency or association, e.g., malls, shopping centers, etc.(1)

Series 600 channels may be connected to a customer-provided distribution amplifier at a location other than the Telephone Company serving office from which point the customer will provide channels to service point locations (patrons).

- (CT) 2. Channel Types 610, 611, 612 and 613 are only provided between the Demarcation Point located at the
- (CT) customer's studio and the distribution amplifier(s) or between two Telephone Company-provided distribution amplifiers or between a Telephone Company-provided distribution amplifier and a customer-provided distribution amplifier.

Channel Types 610, 611, 612 and 613 may also be provided as two-point service, without a Telephone Company-provided distribution amplifier, between two premises.

Type 613 channels are only provided in the same exchange as the customer's studio.

- (1) Obsolete to existing service installations at existing locations for existing customers.

Series 600 channels may be connected to a customer-provided distribution amplifier at a location other than the Telephone Company serving office from which point the customer will provide channels to station locations (patrons).

2. Channel Types 610, 611, 612 and 613 are only provided between the customer's studio and the distribution amplifier(s) or between two Telephone Company-provided distribution amplifiers or between a Telephone Company-provided distribution amplifier and a customer-provided distribution amplifier.

Channel Types 610, 611, 612 and 613 may also be provided as two-point service, without a Telephone Company-provided distribution amplifier, between two premises.

Type 613 channels are only provided in the same exchange as the customer's studio.

SERVICES AND RATES

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.5 Channels for Program Transmission in Connection with Loudspeakers and Sound Recording - Series 600-(Continued)

A. Description of Series 600 Channels and Schedule Classifications-(Continued)

- 5. All station equipment and station wiring, other than any equipment necessary for the suitable termination of the channel facilities on the customer's or his patron's premises shall be provided by the customer. Program channel wiring on the property owned or leased by the customer or his patron and upon which the station is located may be included as station wiring.
- 6. Channels for program transmission in connection with loud-speakers and sound recording may be used only by the customer, except that emergency civil defense warning announcements may be made by authorized civil defense officials. Where such announcements are to be made from the civil defense office, they are to be made by means of program transmission channels between the civil defense office and the customer's studio.
- 7. Channels for program transmission in connection with loud-speakers and sound recording are furnished only directly to the customer originating the program material. The Telephone Company does not allocate charges between, nor collect charges from, the patrons of the customer. The customer is responsible for the payment of all charges for channels furnished to him by the Telephone Company.

SERVICES AND RATES

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.5 Voice Grade Service - Series 600-(Continued)

B. Regulations-(Continued)

2. (Continued)

A Telephone Company-provided distribution amplifier is required when two or more Type 610, 611, 612 or 613 channels are connected at a serving office to form a multipoint circuit.

3. Channel Types 614, 615 and 616 are only furnished between a Telephone Company-provided distribution amplifier and a station location (patron).
4. Nonequalized and equalized channels may be combined to form a multipoint circuit. Transmission parameters of individual channels cannot exceed those of the channel(s) between the studio and the distribution amplifier(s).

C. Channels are provided at different levels of fidelity as follows:

Type 610 A nonequalized two-wire service engineered for a 1000 Hertz maximum loss of 12dB.

Type 611 A two-wire service engineered for a 1000 Hertz maximum pre-equalized loss of 32dB and equalized to ± 3 dB of the 1000 Hertz loss from approximately 100 to 5000 Hertz.

Type 612 A two-wire service engineered for a 1000 Hertz maximum pre-equalized loss of 32dB and equalized to ± 3 dB of the 1000 Hertz loss from approximately 50 to 8000 Hertz.

Type 613 A two-wire service engineered for a 1000 Hertz maximum pre-equalized loss of 32dB and equalized to ± 3 dB of the 1000 Hertz loss from approximately 50 to 15,000 Hertz.

Type 614 A nonequalized two-wire service engineered for a 1000 Hertz maximum loss of 14dB.

Type 615 A two-wire service engineered for a 1000 Hertz maximum pre-equalized loss of 34dB and equalized to ± 4 dB of the 1000 Hertz loss from approximately 100 to 5000 Hertz.

Type 616 A two-wire service engineered for a 1000 Hertz maximum pre-equalized loss of 34dB and equalized to ± 4 dB of the 1000 Hertz loss from approximately 50 to 8000 Hertz.

Southwestern Bell Telephone Company
St. Louis, Missouri

80-256

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

Private Line Service Tariff
Section 2
Original Sheet 53

SERVICES AND RATES

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.5 Channels for Program Transmission in Connection with Loudspeakers and Sound Recording - Series 600-(Continued)

B. Mileage Measurements

1. Interexchange Channels

a. Interconnection Networks

- (i) Two or more interexchange networks or sections of networks will be connected at a service point designated by the customer, or when such service point is not so designated, at the service point which will result in the lowest total charge to the customer.
- (ii) When networks are interconnected, the mileages will be determined separately for each network.

b. Point of Connection with Intraexchange Channels in Program Exchange Areas.

In the program exchange areas as defined in Paragraph 2.2.5C interexchange channels from a service point outside of the program exchange area may terminate within the program exchange area at more than one service point. In such cases the interexchange mileage will be measured to that point which will result in the lowest total charges to the customer, taking into consideration the availability of suitable interexchange channels, the charges for intraexchange channels, connections and other items of facilities and services.

2. Intraexchange Channels

a. Two-Point Service

The local mileage is the airline distance (fractional quarter miles being considered as full quarter miles) measured on a standard map between two stations or between a station and the point of connection with an interexchange channel.

78-235

Issued: FEB 12 1980

Effective: MAR 13 1980

BY R. R. SHOCKLEY, Vice President-Missouri

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.5 Channels for Program Transmission in Connection with Loudspeakers and Sound Recording - Series 600-(Continued)

B. Mileage Measurements-(Continued)

2. Intraexchange Channels-(Continued)

b. Multi-Point Service

(i) Intraexchange mileage is the sum of the airline distances between the customer's studio (or point of connection with an interexchange channel) via its serving central office and the first distributing center, and between each distributing center and each station (or point of connection with an interexchange channel) served therefrom via the serving central office of the station and the shortest combination of airline distances connecting distributing centers.

(ii) When the customer requests that the distributing centers be connected in a specified sequence, the mileage between centers is the shortest airline mileage determined in accordance with (i) preceding which will connect the distributing centers in the desired sequence.

C. Program Exchange Areas

The program exchange area is the exchange, metropolitan exchange or extended area service exchange areas.

D. Interconnection of Facilities

Interconnections of channels as set forth following may be made by a customer (or arranged for by a customer) at a studio or audio broadcasting transmitter, provided that such interconnections will not result in the connection, either directly or indirectly, for through transmission of Telephone Company interexchange channels with interexchange channels of others, and further provided that no interference with or impairment of service rendered by the Telephone Company will result.

A. Regulations

General

In addition to the regulations and definitions applicable to Private Line services set forth in Section 1 of this Tariff, the following regulations apply to Bell and Lights Civil Air Defense Warning systems.

Bell and Lights Civil Air Defense Warning systems together with public warning siren control installations are services employing channels and equipment furnished by the Telephone Company to enable a customer to transmit air attack warning signals from a key point warning control station to bell and lights receiving stations and/or siren control receiving stations authorized for connection to the air raid warning system involved.

Station apparatus is located at each receiving station and at each control center and auxiliary control center. The bell and lights equipment requires no commercial power. One bell and lights is located at each control center as a monitoring device. The bell and lights equipment can activate auxiliary signals, such as gongs and horns, where the customer desires. A key to cut off and on the audible signals can be provided. The key signals and relays required to operate them will be provided at the rates quoted in Section 3 of the Tariff.

- (1) Mileage measurements are as provided in Paragraph 2.2.5, B.2.a., preceding.
- (2) Nonrecurring charge is applicable per point of termination.

2.2 DESCRIPTION OF SERVICES-(cont'd)

(AT) 2.2.9 DATAPHONE Select-a-Station Service (1) (cont'd)

A. Application

Except as otherwise specified below, the regulations for Select-A-Station (SAS) Service specified herein are in addition to the regulations contained in other sections of this Tariff.

B. Regulations

- 1. DATAPHONE SAS Service requires the use of equipment, as outlined below, and channels offered elsewhere in this Tariff.
- 2. The customer shall provide terminal equipment in accordance with inter-face specifications as described in the appropriate Bell System DATAPHONE SAS Technical Reference.
- 3. Definitions

- a. Data Station Selector (DSS) - A private line device located in a Telephone Company serving office which is capable of making connections between a four-wire input and up to 128 (125 for addressable operation) outputs, two-wire or four-wire, one at a time. DSSs are designated, as defined below, dependent upon the customer's service configuration:
 - i. Primary DSS (PDSS) - The DSS which is connected directly to the Selector Control Unit (SCU) provided by the customer.
 - ii. Secondary DSS (SDSS) - Any DSS which is connected to a PDSS in a tandem DSS arrangement.

(MT)

(MT)

- (AT) (1) Obsolete – applicable to existing service installations at existing locations for existing customers
- (AT) until September 1, 2003 when the service will be completely withdrawn.

2.2.9 DATAPHONE Select-a-Station Service

A. General

- 1. The regulations specified herein are in addition to the regulations contained in Section 1 and Section 2 of this Tariff.

(RT)

B. Description and Application of Service

- 1. DATAPHONE Select-a-Station service is a voiceband Private Line Data system designed for multi-station communication applications. It allows a single master station to communicate with a number of remote stations one at a time. Direct communication between remote stations is not possible, nor is simultaneous communication from the master station to more than one remote station.
- 2. The customer shall provide the terminal equipment at both the master station and remote station locations. The terminal equipment must be provided in accordance with interface specifications as described in the appropriate Bell System DATAPHONE Select-a-Station Technical Reference.
- 3. DATAPHONE Select-a-Station service is arranged for sequential mode of operation; consequently, the customer must specify, prior to installation, the order of connections from the Data Station Selector (DSS) to the remote stations. One of three DSS options shall be selected by the customer to accommodate customer operating procedures and circuit structure. These options are as follows:

Automatic Step - A DSS option in which the duration and order of connections are fixed.

B. Regulations-(Continued)

3. Definitions-(Continued)

c. DATAPHONE SAS stations are described as follows:

- i. Master Station - The one station of SAS Service located on a customer's premises which communicates with each remote station and may control the connections.
- ii. Remote Station - One of the many stations on SAS Service which is connected to the master station by DSS's.

d. SAS Service is provided in the following arrangements:

- i. Sequential Arrangement - An arrangement in which the order of connections made by the DSS from the master station to the remote station is fixed by the assignment of the DSS output ports at initial installation.
- ii. Addressable Arrangement - An arrangement in which the order of connections made by the DSS from the master station to remote stations is under control of the master station.

C. Description of Service

1. DATAPHONE SAS Service is a multistation, voice grade private line data service designed to establish point-to-point connections between a master station and a number of remote stations, one at a time. Direct transmission between remote stations is not possible, nor is simultaneous communication from the master to more than one remote station possible.

a. A DSS provides the connection between the master station and any one of up to 128 (125 for addressable operation) remote stations and/or other DSS's. Where more than one DSS is required, the DSS that is directly connected to the master station is termed the PDSS. Additional DSS's, designated SDSS's, may be connected to the PDSS.

Automatic Step and Reset - A DSS option in which the duration and order of connections are fixed, but the DSS will reset to the beginning of the connection cycle upon command from the master station.

Controlled Step - A DSS option which allows the customer to have in-service control over the duration of the connection. However, the connection sequence is fixed.

A DSS optioned for automatic step or automatic step with reset cannot be used as a Primary DSS in circuits utilizing a Secondary DSS.

- 4. A Selector Control Unit (SCU) will be provided at the master station location.
- 5. A Primary Data Station Selector (PDSS) provides the connection between the master station and any one of up to 128 two-wire, or four-wire, voice grade data channels. Where more than one DSS is required, the DSS that is directly connected to the master station SCU is termed the PDSS. Additional DSS's, designated Secondary Data Station Selectors (SDSS) connected to the PDSS, may be provided. DSS's will be provided in Telephone Company serving offices. Upon application for service, the customer shall designate the serving offices to be used for the PDSS and SDSS's.
