c. (cont'd)

iii. (cont'd)

(MT)

A DSS optioned for automatic step or automatic step with reset cannot be used as a PDSS in a tandem DSS arrangement.

d. SAS Service arranged for addressable operation provides a DSS arrangement in which the duration and order of connections are variables controlled by the master station.

e. Access from the customer provided SCU to the PDSS is obtained through a Type 443 channel. A PDSS located outside of the serving office area of the master station where the SCU is located will require voice grade interoffice and/or intraLATA interexchange channels and Type 443 channel terminals as described in Section 2, Paragraph 2.2.3. In all cases, one four-wire channel connection is required per PDSS to SCU access line (see Paragraph 2.2.9, D.1.c., following).

(MT)

f. Access to each remote station from the DSS (PDSS or SDSS as applicable) is obtained through a Type 442 or 443 channel and through the appropriate channel connection (see Paragraph 2.2.9, D.1.c. or D.2.c.). Remote stations located outside of the serving office area of the DSS will require Type 442 or 443 voice grade interoffice and/or intraLATA interexchange channels and channel terminals as described in Section 2, Paragraph 2.2.3.

(MT)

(MT)

(AT) (1) Obsolete – applicable to existing service installations at existing locations for existing customers
(AT) until September 1, 2003 when the service will be completely withdrawn.

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.9 DATAPHONE Select-a-Station Service-(Continued)

B. Description and Application of Service-(Continued)

7. Certain terms used in this Tariff in connection with DATAPHONE Select-a-Station Service are defined as follows:

Data Station Selector (DSS) - A private line data switching device located in a Telephone Company serving office which is capable of making connections between a four-wire input and up to 128 outputs, two-wire or four-wire, one at a time, under the control of a master station.

Master Station - The one station of a multi-station circuit, which communicates with each remote station and may control the connections.

Primary DSS (PDSS) - The DSS which is connected directly to the SCU.

Primary DSS Access Line - The communications path between the SCU and the PDSS.

Remote Station - One of the many stations on a multi-station circuit which is connected to the master station by DSS's.

Remote Station Access Line - The communications path between a remote station and a DSS.

Secondary DSS (SDSS) - Any DSS which is connected to a PDSS.

Secondary DSS Access Line - The communications path between a SDSS and the PDSS.

Selector Control Unit (SCU) - The equipment associated with the PDSS access line which is located at the master station for use by the customer to transmit control signals to and receive supervisory signals from DSS's.

2.2.10 Extension Services

A. Regulations

1. In addition to the general regulations and definitions applicable to private line services set forth in Section 2 of this Tariff, the following regulations apply to Extension Service.

(CP) a. Voice Grade Service (300(1) and 400 Series Channels)

Extension service is that of furnishing service components for one or more service points for each authorized connection to a private line voice grade service equipped for communication among three or more service points at a time, and furnished to a branch or agency of the United States Government for the collection and dissemination of information relating to air traffic control activities and similar information of public interest in connection with supervision of the flight of aircraft along civil airways.

b. Sub-Voice Grade Services (200 Series Channels)

- (CT) 1. Extension service is that of furnishing service components to allow connection with a private line sub-voice grade service furnished to a branch or agency of the United States Government for the collection and dissemination of weather information or miscellaneous airways information pertaining to the supervision of flight of air-craft along civil airways.

2. Connection may be made as follows:

- Receiving Only Service - for reception of weather and miscellaneous airways information transmitted over the Government service to which it is connected.

- Sending and Receiving Service - for transmission of flight plans to and acknowledgement of such plans from the Government service to which the connection is authorized.

- (AT) (1) Obsolete-applicable to existing service installations at existing locations for existing customers.

2.2.11 Special Bridging Service

A. Split Band Bridging Arrangement

1. Description of Service

This service provides for a four-wire frequency split common port and two-wire multiple port bridging arrangement intended for application in multipoint voice frequency, data or tone signaling networks.

Certain terms used in this Tariff in connection with Special Bridging Service are defined as follows:

- (CT) Master Station - In connection with Special Bridging Service, the one service point of a multipoint network located on a customer's premises, which communicates with each remote service point.
- (CT) Remote Station - In connection with Special Bridging Service, one of the many service points on a multipoint network which is connected to the master service point by a bridging arrangement.
- (CT) Access Line - In connection with Special Bridging Service, that dedicated channel or channels connecting the master service point, remote service point or interconnecting service point to a special bridge.
- (CT) Interconnecting Station - In connection with Special Bridging Service, one of the many service points on a multipoint network which is connected to a special bridge and is provided for connecting two special bridges together through customer-owned and maintained equipment located at a remote service point.

2. Application

Regulations applicable to Split Band Bridging Arrangements, except as otherwise specified below, are in addition to the regulations contained in other sections of this Tariff.

2.2.11 Special Bridging Service-(Continued)

B. Passive Bridging Arrangement

1. Description of Service

This service provides for a network of up to ten passive two-wire ten-port bridges. Each bridge is capable of connecting a combination of remote stations, interoffice channels or interbridge connections totaling nine to one master station, interconnect station, interoffice channel or interbridge connection. This service is intended for application in multi-point voice frequency, data or tone signaling networks.

2. Application

Regulations applicable to Passive Bridging Arrangements, except as otherwise specified below, are in addition to the regulations contained in other sections of this Tariff.

3. Regulations

- a. Passive Bridging Arrangements are provided on voice grade service with a transmission rate normally suitable for 75 baud, but can be utilized with equipment operating at rates up to a maximum of 400 baud.
- b. A maximum of ten (10) serving offices, each equipped with a Passive Bridge, is permitted on a multi-point network.
- c. A maximum of 90 remote stations is permitted on a multi-point network.
- d. Remote stations connected to a Passive Bridge are limited to the same serving office area in which the Passive Bridge is located.

e. One Master or Interconnecting Station or an interoffice voice-grade channel is required for each Passive Bridge except as provided for in Paragraph 2.2.11, B.3.f., following.

(CP)

(1) When an interoffice channel is used to connect Passive Bridges, voice grade interoffice and/or intraLATA interexchange channels and channel terminals having rates equivalent to type 423 will apply.

(2) When an interoffice channel is used to connect Passive Bridges, mileage will be determined in the order that the Passive Bridges are connected.

f. When more than one passive bridge is provided on a multipoint service in the same serving office, an interbridge connection charge applies to each subsequent bridge provided. This arrangement cannot be provided if two-way transmission is required.

g. All equipment located at a remote station required for connecting a Remote Station access line to an Interconnecting Station access line is to be provided by the customer.

h. Voice-grade interoffice (1LMFS) and/or intraLATA interexchange (1LHU4) channels and channel terminals (PMNFL/PINSS/PMNSS) equivalent to Type 423 are required when appropriate between the Master Station serving office and the Passive Bridge and between the Interconnecting Station serving office and the Passive Bridge it is connected to.

2.2.11 Special Bridging Service-(Continued)

B. Passive Bridging Arrangement-(Continued)

3. Regulations-(Continued)

i. Service can be provided under two circuit configurations as follows:

- (1) Data collective system provides one-way transmission from Remote Stations to the Master Station and is designed to provide an end-to-end loss of 16 dB relative to 1000 Hz.
- (2) Data polling system provides two-way transmission between the Master or Interconnect Station and Remote Stations and is designed to provide an end-to-end loss of 38 dB relative to 1000 Hz.

j. Transmission Parameters and Specifications as specified in 2.2.3.C are not guaranteed for this service.

k. Additional points of termination are not provided with Special Bridging Service.

SERVICES AND RATES

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.12 Local Area Data Service

A. Regulations

In addition to the Regulations specified previously in this Private Line Service Tariff, the following regulation applies to these services:

Provision of this service does not contemplate connection to the public switched message network.

(CT) B. Description of Service

Local Area Data Service will provide, subject to availability of service components, channels suitable for baseband transmission of data signals between two points on the same premises or different premises within the same serving office area. Service is limited to points that are not more than six (6) cable-route miles apart, as determined by the Telephone Company, using normal cable routing between the points to be served. This service is offered only for balanced transmission of data signals conforming to the signal power limitations and other parameters specified in the applicable Bell System Technical Reference.

1. Local Area Data Service channels require use of nonloaded cable service components. In the event that only loaded service components are available, the Telephone Company will, at the customer's request, deload service components as specified under the Special Construction provisions of this Tariff as provided in Section 1, Paragraph 1.4.4.

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.13 Customer Operating Center Service

A. Regulations

- (CP)
1. A customer who operates a Customer Operating Center requiring large, dedicated quantities of local channel types 101, 102, 415, 417, 420, 422,423 or 428 between their location and its normal serving office may, at this option, subscribe to Customer Operating Center Service.
 2. For the purpose of this Tariff, a Customer Operating Center is a customer premises:
 - a. Operated by the customer over which the customer has control and provides security.
 - b. From which the customer furnishes and administers services to multiple patrons in a geographical area. The term "patron" denotes a subscriber to the services offered by the operator of a Customer Operating Center.
 - c. At which a system, or a group of systems, operated by the customer to receive signals and messages which are recorded, maintained and supervised by the customer.
 - d. At which the customer has regularly scheduled observers, operators and/or equipment in attendance at all times, which upon receipt of a signal or message from a patron, take such action as shall be required under the rules established by the customer for their/its guidance.
 3. Ownership of service components provided in accordance with this offering remains with the Telephone Company.
- (CT)

B. Method of Applying Rates

1. Recurring Monthly Rates

- a. Dedicated cable - a monthly rate applies per cable of a specific quantity of pair and length.

- (1) Cable sizes available are 100, 200, 300, 400, 600, 900, 1200, 1500, 1800, 2100, 2400 and 2700.

3. Termination Liability Contract-(Continued)

c. The amount of the termination liability contract is equal to the estimated amount for:

(1) Cost of the installed facilities provided including costs incurred for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Installed cost includes the cost of:

- equipment and materials provided or used,
- engineering, labor and supervision,
- rights of way.

CANCELLED

JAN - 1 1984

(2) License preparation, processing and related fees
(3) Any other items of expense associated with the particular situation.

BY 4th R.S.# 83
PUBLIC SERVICE COMMISSION
OF MISSOURI

d. The five-year termination liability contract, as described above, applies per dedicated cable and is reduced by 1/60 for each month of the five-year period that the cable is in service from the date it is placed in service for a specific customer.

2.2 DESCRIPTION OF SERVICES-(Continued)

2.2.14 Served Direct Service

A. Regulations

1. This offering is for specified two-point intraexchange channel types between different buildings on different premises which do not route through a serving office.
 2. Served Direct Channel Charges apply:
 - (CT) a. When it is the economic decision of the Telephone Company to provide served direct service components.(1).
 - b. When there is a minimum billing of fifteen (15) channels per two-point configuration.
 - c. When the maximum airline distance between the two premises is one mile or less.
 - d. When the customer considers it economically feasible to change to Served Direct Service.
 3. A customer may request this service offering when it is not the economic decision of the Telephone Company; however, in such case, Special Construction Charges as specified in Section 1.4.4 shall apply in addition to the rates and charges found in this section.
 4. Termination Liability Contracts where applicable in a customer-initiated request for Served Direct Service would be equal to the costs incurred for rearrangements of existing service components and/or construction of new service components as appropriate, less net salvage. Installed cost includes any expense associated with this particular case.
 5. The service is limited to intraexchange channels, but can involve Served Direct Service between two separate Serving Office Areas.
- (1) A Basic Termination Liability Contract may be applicable in this case if the Telephone Company determines
- (CT) the service components are not reusable. The contract period will normally be 36 months, and the amount will be reduced by 1/36th for each month in service.

2.2.14 Served Direct Service

MAY 2 1981

A. Regulations

1. This offering is for specified two-point intraexchange channel types between different buildings on different premises which do not route through a serving office.
2. Served Direct Channel Charges apply:
 - a. When it is the economic decision of the Telephone Company to provide served direct facilities.(1)
 - b. When there is a minimum billing of fifteen two-point configuration.
 - c. When the maximum airline distance between the two premises is one mile or less.
 - d. When the customer considers it economically feasible to change to Served Direct Service.
3. A customer may request this service offering when it is not the economic decision of the Telephone Company; however, in such case, Special Construction Charges as specified in Section 1.4.4 shall apply in addition to the rates and charges found in this section.

Where a customer requests a quotation for Special Construction Charges associated with Served Direct Service and then elects not to subscribe to the service, a Quotation Charge for developing the charges shall apply. This charge will include all developmental hours associated with the design and preparation of an individual request.

4. Termination Liability Contracts where applicable in a customer-initiated request for Served Direct Service would be equal to the costs incurred for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Installed cost includes any expense associated with this particular case.
 5. The service is limited to intraexchange channels, Direct Service between two separate Serving Office Areas.
- (1) A Basic Termination Liability Contract may be applicable in this case if the Telephone Company determines the facilities are not reuseable. The contract period will normally be 36 months, and the amount will be reduced by 1/36th for each month in service.

Loop Signaling Options Per Local Channel on Type 428 when associated with station ports of a premises switching system.			
a. Type A capable of operation over loops with resis- tance in the range of 0-199 ohms (SALAL) (CR)	\$ 9.70	(SALAW) \$7.20 (CR)	\$40.00(1)
b. Type B capable of operation over loops with resis- tance in the range of 200-899 ohms (SAUBL) (CR)	11.10	(SAUBW) 7.70 (CR)	40.00(1)
c. Type C capable of operation over loops with resis- tance in the range of 900 ohms or more (SAYCL)	.45	(SAYCW) 2.35 (CR)	4.00(1)

The DC resistance specification does not imply a guaranteed end-to-end DC continuity. The customer can expect to be provided a loop meeting the same limits as the normal central office loop, (i.e., not exceeding 1300 ohms), exclusive of 200 ohm maximum terminal equipment resistance.

FILED

(1) The Service Charge applies only if the signaling option is installed subsequent to initial installation of the local channel.

The priority provisioning and restoration of services offered under this tariff relative to the National Security Emergency Preparedness (NSEP) Telecommunications Service Priority (TSP) System shall be pursuant to the regulations and rates as delineated in P.S.C. Mo.-No. 38, Digital Link Services Tariff, Section 7.

For application in this tariff, such regulations, rates and charges shall be interpreted to apply on a "per request, per circuit" basis.

(AT) 2.2.20 Network Reconfiguration Service (NRS)

Type 420, 422, 423, 424, 425 and 435 services in this tariff may be terminated into an NRS channel port in order for the customer to reconfigure portions of their dedicated services network. Regulations, rates and charges for NRS can be found in the Digital Link Services Tariff, P.S.C. Mo.-No. 38, Section 8.

When service from this tariff is included in a customer's NRS grid, only services jurisdictionally the same may be cross-connected. A customer may not connect an intraexchange private line service to an interexchange private line service. All jurisdictionally intraexchange private line services may be changed to interexchange service at the time of retermination into the NRS System and only one service charge will apply per circuit.

(AT) All services terminated into the NRS grid must also be those of the same customer ordering the NRS.

No supplement to this tariff will be issued except for the of canceling this tariff.

2.2 DESCRIPTION OF SERVICES-(Continued)

(NR) 2.2.19 MEGALINK III* - Wideband Digital Service/1.544 Mbps

A. General

MEGALINK III - Wideband Digital Service/1.544 Mbps is a two-point dedicated High Capacity Channel used for simultaneous two-way transmission of serial, bipolar, return-to-zero isochronous digital signals at a transmission speed of 1.544 Mbps. The channel design objective is to provide an average performance of at least 95 percent error-free seconds of transmission measured over a continuous 24-hour period through the Channel Service Unit or its functional equivalent as set forth in Technical Reference - PUB 62411 for High Capacity Digital Service channel Interface Specification.

B. Regulations

1. The regulations and rates specified herein are in addition to the applicable regulations found in other sections of this Tariff.

2. Availability of Service

MEGALINK III - Wideband Digital Service/1.544 Mbps can only be provided where digital facilities exist within the same LATA. Services between serving offices must have digital service components between all intermediate offices to have the ability to provide the service.

3. Provision of Service

- a. MEGALINK III - Wideband Digital Service/1.544 Mbps is available only on a two-point intraLATA basis.
- b. MEGALINK III - Wideband Digital Service/1.544 Mbps is furnished on a full-time basis (24 hours a day, seven days per week).
- c. Customer requests for MEGALINK III-Wideband Digital Service/1.544 Mbps where suitable service components are not available and the Company constructs the requested service components, when certain conditions exist, is considered special construction. The regulations, rates and charges applicable to special construction are found in Paragraph 1.4 of this Tariff. Service availability will be negotiated locally.

3. Provision of Service-(Continued)

g. (Continued)

(4) (Continued)

(d) Terminal equipment and multiline terminating systems that are connected under the Program may remain connected and be moved and reconnected for the life of the equipment or system, except as may be required in response to the Federal Communications Commission's Rules and Regulations.

(e) The Telephone Company may invoke extraordinary procedures to protect a MEGALINK III - Wideband Digital Service/1.544 Mbps. The extraordinary procedures applied will be the same as those for connection of a communications system to a circuit (see Extraordinary Procedures, Paragraph 1.6.14, C.2.).

(f) The Program will expire on adoption of the final Federal Communications Commission's Rules and Regulations, unless sooner canceled, changed or extended.

4. Customer Signal Constraint

All signals generated by the customer's terminal equipment must meet certain signal and formal constraints. Some of these constraints are as listed below. Additional details are set forth in Technical Reference - PUB 62411.

a. Data Rate: 1.544 Mbps +/- 75 bps.

b. Consecutive zeros may be generated no more than 15 consecutive zeros

c. Pulse density: At least 3 pulses in any 24 bit interval.

PRIVATE LINE SERVICE

2.2 DESCRIPTION OF SERVICES-(Continued)

(NR) 2.2.19 MEGALINK III - Wideband Digital Service/1.544 Mbps-(Continued) 1984

B. Regulations-(Continued)

5. Allowance for Interruptions

Credit allowances are determined in accordance with regulations set forth in Section 1 of this Tariff.

MEGALINK III - Wideband Digital Service/1.544 Mbps is considered interrupted when the customer reports that service continuity has been lost or that the service is operating at a performance level of 300 or more seconds of transmission containing errors in a consecutive 15-minute period.

C. Rates

There are six basic rate elements which apply to MEGALINK III - Wideband Digital Service/1.544 Mbps:

- Local Distribution Channels
- Intraexchange Interoffice Channel and Channel Terminals
- Interexchange Interoffice Channel and Channel Terminals
- Channel Service Unit
- Optional Service Functions
- Service Charge

1. Local Distribution Channel

A Local Distribution Channel is a channel between a customer's premises and the Telephone Company serving office serving that customer. Mileage used to rate the Local Distribution Channel is the direct air line distance measured in quarter mile increments between the customer's premises and the serving office.

2. Intraexchange Interoffice Channel

Intraexchange Interoffice Channel is defined as the component of the service between two serving offices or zones in the metropolitan exchanges for an Intraexchange Service. Charges include a fixed Channel Terminal charge and channel mileage which is based on the Vertical and Horizontal (V-H) distance

2. Intraexchange Interoffice Channel-(Continued)

between the serving offices, measured in whole miles. Fractional miles are rounded to the next whole mile.

Two Channel Terminal charges are required per Intraexchange Interoffice Channel.

3. Interexchange Interoffice Channel

Interexchange Interoffice Channel is defined as the component of the service between two serving offices where the serving offices are in different exchanges within the LATA. Charges include a fixed channel terminal charge and channel mileage which is based on V-H distance between the serving offices, measured in whole miles. Fractional miles are rounded to the next whole mile. Two Channel Terminal charges are required per Interexchange Interoffice Channel.

4. Channel Service Unit

A Channel Service Unit or its functional equivalent will be provided by the customer to terminate a MEGALINK III - Wideband Digital Service/1.544 Mbps at the customer's premises.

Channel service units installed, owned or on order by the Company prior to November 18, 1983, can be provided by Southwestern Bell. These embedded channel service units may be moved, rearranged or reconnected for the life of the equipment and are provided by the Telephone Company. One CSU charge applies per Local Distribution Channel.

5. Optional Service Functions

a. Automatic Protection Capability

The Automatic Protection Capability service function, when used in conjunction with compatible customer-provided APC at the customer's premises, provides protection for the Local Distribution Channel by automatically switching the Local Distribution Channel(s) to a spare Local Distribution

5. Optional Service Functions-(Continued)

a. Automatic Protection Capability-(Continued)

Channel. The customer is responsible for circuit compatibility with existing Central Office equipment.

Spare Local Distribution Channel(s) and/or Interoffice Channel(s) are not included with the Automatic Protection Capability. They must be ordered separately at the rates and charges specified in Paragraph 2.2.19, D., following.

b. Transfer Arrangement

The Transfer Arrangement service function permits a customer to transfer an Interoffice Channel between two Local Distribution Channels terminating in the same serving office. The two Local Distribution Channels must use the same signal format. The spare Local Distribution Channel is not included in the Transfer Arrangement. It must be ordered separately as specified in Paragraph 2.2.19, D., following.

A key activated control circuit is required to operate the transfer arrangement. A Special Signaling Channel between the customer-designated control station and the serving office may be obtained from this Tariff for this purpose. The control key must be provided by the customer.

6. Service Charge

A service charge applies per point of termination installed or moved as provided in Paragraph 2.2.19, D., following.
