

# Exhibit No. 14

	2018		2019	
	<i>pre-IS</i>	<i>post-IS</i>	<i>pre-IS</i>	<i>post-IS</i>
<b>Metro</b>	8.34%	7.57%	8.28%	7.51%
<b>MO West</b>	4.18%	3.80%	4.16%	3.77%

The reason for two load ratio shares per year is because of additional market participants (Integrated System, “IS”) that joined the Southwest Power Pool (“SPP”) in late 2015. SPP’s existing transmission customers did not want to pay for upgrades applicable to the IS for upgrades prior to them joining the SPP, so load ratio shares are tracked separately and applied to separate buckets of projects.
