Footnotes:

- (1) The first number group is provided as part of Centrex Service. A second listed number group is included in the rate for a third listed number group, etc.
- (2) No distinctive identification is provided for additional listed number groups with the Trunk Answer Any Station feature.
- (3) This is an attendant-controlled conference arrangement. This conferencing equipment provides for the simultaneous connection of several Centrex station lines on the same premises. Connection of lines other than as stated above is subject to the limitations of the equipment, and where such equipment can be connected to Telephone Company Exchange Service, Private Line Service or Long Distance Message Telecommunications Service, the responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for Exchange Service, Private Line Service or Long Distance Message Telecommunications Service and to the maintenance and operation of such facilities in a manner proper for such services.
- (4) The number of controlled access codes is determined by the customer.
- (5) In addition, apply standard Tariff rates for the following:
 - Control channel extending from the serving Central Office to the customer's premises for each key required, specified in the Private Line Service Tariff.
- (6) A Complex Installation/Move Charge of \$45.00 is applicable for changes or rearrangements in controlled access codes.
- (7) A Complex Installation/Move Charge applies only when the feature is installed subsequent to the initial Centrex Service.
- (8) A Complex Installation/Move Charge of \$45.00 applies if installed subsequent to initial installation of Attendant-Control Facilities.
- (9) See Sheet 38 for additional regulations applicable to Automatic Route Selection.
- (10) Applies per facility regardless of the number of patterns having access to that facility.

Automatic Route Selection-(Continued)

MO. PUBLIC SERVICE COMM.

Definitions for terms used in this Tariff are as follows:

CODE - is either the Numbering Plan Area (NPA) code or Central Office (NXX) code of the dialed telephone number. In 312-555-1212, 312 is the Numbering Plan Area code and 555 is the Central Office Code.

FACILITY - denotes a specific FX, CCSA - Off-Net, WATS circuit, Tie Line or OCC access line compatible with Automatic Route Selection and has senderized operation and uniform numbering that is consistent with the Message Telecommunications Network.

ROUTE - refers to an access path group of like facilities which are used to complete 7- or 10-digit calls between the same points. Examples of facility groups would be 7 FX trunks to Chicago or 1 Band 5 WATS. A route may be used in one or more patterns.

ROUTE SELECTION PATTERN - is a group of up to four routes arranged in a sequence determined by the customer.

SCREENING - is a process of scanning over Numbering Plan Area codes (NPA screening) or over Numbering Plan Area and Central Office codes (NPA/NXX screening). NPA screening also provides scanning over those NXX codes which are in the home NPA.

Regulations

All route and pattern assignments will be designated by the customer. The customer is responsible for notifying the Telephone Company of any changes required in his Automatic Route Selection feature.

All rates and charges for Automatic Route Selection are in addition to the rates and charges for the associated facilities. OCC services may be terminated in an Automatic Route Selection by the use of the universal tie line terminal at applicable Tariff rates in addition to the Automatic Route Selection rates and charges.

29.5 CENTREX C.O. OPTIONAL FEATURES--(Continued)

MO. PUBLIC SERVICE COMM.

Automatic Route Selection--(Continued)

Regulations--(Continued)

Patterns without final route to the Telecommunications Network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Telephone Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls.

The Telephone Company is not responsible for notifying the customer of new codes or changes in any local calling rates.

A pattern may have overflow to tone or overflow to the Telecommunication Network but not to both.

Where Central Office Code translation is required for more than one NPA per single facility group or route, rates and charges as specified in Paragraph 29.5, A.1.a. and b. apply.

Automatic Route Selection is a call routing capability in which all codes must be routed. Code blocking is not provided.

ARS Design Recommendation

At the request of the customer, the Telephone Company will provide an ARS Design Recommendation based upon the traffic data available and configured utilizing Telephone Company traffic engineering principles. The charges shown below for this service apply per occasion and include provision of the data to the customer in Telephone Company printed copy format. The accuracy of the recommendation provided to the customer is dependent upon the data available and the assumptions used and should not be construed as a guarantee of future performance. The customer is responsible to advise the Telephone Company of the ARS design to be used.

29.5 CENTREX C.O. OPTIONAL FEATURES-(Continued)

MAY 12 1993

Footnotes:

MO. PUBLIC SERVICE COMM.

- (1) When Call Forwarding-Busy Line and Don't Answer are provided on the same station, both must forward to the same address (either station line or attendant).
- (2) The customer must specify whether he wants Centrex intercom calls to be forwarded in addition to incoming calls.
- (3) A maximum of \$4.00 applies per station line when installing any three or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (4) A maximum of \$4.00 applies per station line when installing any three or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (5) These features are provided as a group per station line equipped; however, a station line must be equipped for Call Hold before it can be equipped for Call Pickup. When one station line in a Dial Pickup Group is equipped for Call Pickup, all station lines in that same group are automatically equipped with the same feature; therefore, the above rate and Complex Installation/Move Charge will apply to each station line in the Dial Pickup Group.
- (6) This feature is available to all station lines in a system and is provided only on a system basis. One Complex Installation/Move Charge is applicable per system.
- (7) This feature and rate includes Call Waiting-Terminating.
- (8) This Complex Installation/Move Charge applies only when the station line has not been previously equipped with Call Waiting-Terminating.
- (9) Complex Installation/Move Charge applies only to each Circle Hunt group established, not to each terminal within that group.
- (10) Regulations covering the provisions of this service are applicable as provided in Section 4 of this Tariff.
- (11) This is a station line-controlled conferencing arrangement. This conferencing equipment provides for the simultaneous connection of several Centrex station lines on the same premises. Connection of lines other than as stated above is subject to the limitations of the equipment, and where such equipment can be connected to Telephone Company Exchange Service, Private Line Service or Long Distance Message Telecommunications Service, the responsibility of the Telephone Company shall be limited to the furnishing of facilities suitable for Exchange Service, Private Line Service or Long Distance Message Telecommunications Service and to the maintenance and operation of such facilities in a manner proper for such service.

Electronic Tandem Switching

MO. PUBLIC SERVICE COMM.

A. General

Electronic Tandem Switching (ETS) features are provided only in association with Centrex Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Telephone Company premises and may be provided, subject to the availability of facilities, to Centrex Systems which are served by the same such equipment.

B. Regulations

1. Explanation of Terms

a. ETS Features

ETS features are Centrex optional features which are, except as specified in this Tariff, available on an individual basis. They include:

- Automatic Route Selection-Deluxe
- Time-of-Day Routing
- Authorization Codes
- Deluxe Queuing
- Station Message Detail Recording to Premises

- Facility Administration and Control
- Traffic Data to Customer (Pollable)
- Facility Assurance Reports
- Uniform Numbering/Automatic Alternate Routing

B. Regulations

1. Explanation of Terms

a. ETS Features

ETS features are Centrex optional features which are, except as specified in this Tariff, comprised of both Automatic Route Selection-Deluxe (ARS-D) and Facilities Restriction Levels (FRL) and, at the option of the customer, the following service features and arrangements:

- Time-of-Day Routing
- Authorization Codes
- Deluxe Queuing
- Station Message Detail Recording to Premises
- Account Codes
- Facility Administration and Control
- Traffic Data to Customer (Pollable)
- Facility Assurance Reports
- Uniform Numbering/Automatic Alternate Routing
- Automatic Overflow to DDD

Service features and arrangements as listed above are available only in conjunction with ETS and are not provided individually to Centrex customers.

29.5 CENTREX C.O. OPTIONAL FEATURES--(Continued)

Electronic Tandem Switching--(Continued)

B. Regulations--(Continued)

1. Explanation of Terms--(Continued)

b. Automatic Route Selection-Deluxe (ARS-D)

ARS-D provides for the origination of only ten-digit, off-network calls to a public network telephone number after the Centrex ARS-D access code (e.g., "8") automatically scans the digits and selects a first choice completing route when available or subsequent route if the first choice route is not available. Routes may include Foreign Exchange Trunk lines, Wide Area Telecommunications Service lines, exchange trunk lines to the toll network and access lines to Common Control Switching Arrangements or other arrangements where compatible with sendedized operation and uniform numbering.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other Centrex or PBX systems connected directly to the Centrex system may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant Centrex or PBX system if access is to be provided to other Centrex functions at the ARS-D equipped Centrex system. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant Centrex or PBX system equipped with an ARS-D-like capability for subsequent access to the toll network.

29.5 CENTREX C.O. OPTIONAL FEATURES-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

b. Automatic Route Selection-Deluxe (ARS-D)-(Continued)

The ARS-D feature provides all number translation and supervision necessary to route the call, "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.

Time-of-Day (TOD) Routing is an ARS-D option which permits pre-programmed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control Feature. The maximum number of programmed changes per week is 16.

c. Facilities Restriction Levels (FRL)

FRL is required in connection with ARS-D and is provided on each station or incoming or two-way tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or Centrex system equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

Authorization Codes are an FRL option which provides for a station user to dial a code which overrides the FRL associated with that station line or incoming tie line. The Centrex requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the station line or incoming tie line) has insufficient privileges to complete the call. The Authorization Code is recorded in the Station Message Detail Recording to Premises record of the call when the SMDR-P feature is provided.

d. Deluxe Queuing

Deluxe Queuing permits station user to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

- A Ring-back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.
- An Off-hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

e. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record, on magnetic tape equipment located at the customer's premises, of calls originating from Centrex station lines to locations outside the same Centrex system. Facility groups may also be designated as requiring originating and/or terminating records.

f. Facilities Administration and Control

Facilities Administration and Control permits customer control of parameters which determine user calling privileges, i.e., Authorization Codes and associated FRL. In addition, FRL associated with station, tie lines and Authorization Codes may be collectively upgraded or downgraded by invoking a predetermined set of FRL's identified as Controlled Alternate FRL's. Manual control (override) to TOD Pattern Groups and activation or deactivation of queuing is also provided.

g. Traffic Data to Customer (Pollable)

Traffic Data to Customer (Pollable) permits the customer to poll the switching equipment on a daily or hourly basis to obtain certain traffic measurements. Equipment must be provided at the customer's premises to record the traffic data.

Facility Assurance Reports (FAR) provides the customer the ability to obtain automatic circuit assurance data via the same equipment utilized to record traffic data. FAR includes, for example, the identity of facilities not accessed or facilities constantly off-hook during a specified period of time.

h. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

UN permits station users to place calls via tie lines using a uniform dialing plan. The user dials an access code followed by a seven-digit number which uniquely identifies a specific on-network station line. The number consists of a three-digit location code and a four-digit station line code. (When the same access code is followed by a ten-digit public network number, the call is routed via the ARS-D feature.) The feature provides the number translation and supervision necessary to route the call.

AAR provides automatic routing of on-network calls to alternate tie line routes when primary tie line routes are busy.

Automatic Overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

29.5 CENTREX C.O. OPTIONAL FEATURES--(Continued)

Electronic Tandem Switching--(Continued)

B. Regulations--(Continued)

2. Automatic Route Selection-Deluxe (ARS-D)--(Continued)

- k. The TOD routing feature permits up to 16 programmed changes in Pattern Groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges as specified in C. Rates, following, apply to each additional pattern.
- l. CCSA access lines (Off-Net calls) and access lines to other similar arrangements, compatible with ARS-D, may be included as routes in patterns.
- m. Centrex toll diversion and restriction does not function on calls routed via ARS-D.

3. Facilities Restriction Levels (FRL)

- a. FRL is only furnished in association with ARS-D.
- b. A maximum of eight FRL's are available for each Centrex system.
- c. A maximum of 20,000 Authorization Codes are available with each Centrex system.
- d. Authorization Codes must consist of a uniform number of digits, with a minimum of three digits and a maximum of six digits.
- e. Customer implementation of change of Authorization Codes or associated FRL's require the Facilities Administration and Control Feature.
- f. All station lines and incoming tie line terminations with access to ARS-D must be equipped with FRL.
