HIGH-TOUCH CONTACT CENTER.....1
MIGRATING TO A 120 SECOND SPEED-TO-ANSWER5
CUSTOMER COMPLAINTS8

1 **REBUTTAL TESTIMONY**

2 **OF**

3 **SCOTT J. GLASGOW**

4 **EVERGY MISSOURI WEST, INC.,**
5 **d/b/a Evergy Missouri West**

6 **CASE NO. ER-2024-0189**

7 Q. Please state your name and business address.

8 A. My name is Scott J. Glasgow, 200 Madison Street, Jefferson City, MO 65101.

9 Q. Are you the same Scott J. Glasgow who filed cost of service direct testimony in
10 this rate case on June 27, 2024?

11 A. I am.

12 Q. What is the purpose of your rebuttal testimony?

13 A. I will respond to the direct testimony of Evergy Missouri West’s (“EMW” or
14 “Evergy”) witness, Mr. Charles A. Caisley, regarding Evergy’s customer service approach.
15 Specifically, Evergy’s evolution to a high-touch contact center and migration to a
16 120 speed-to-answer metric. I will also respond to the Office of the Public Council’s (“OPC”)
17 witness, Ms. Lisa A. Kremer, concerning customer complaints.

18 **HIGH-TOUCH CONTACT CENTER**

19 Q. In direct testimony, Mr. Caisley states that Evergy has evolved¹ to a high-touch
20 contact center. He defines a high-touch contact center as “a customer service facility that
21 requires human interaction. It’s a hands-on, personalized approach to customer service and
22 every initiative delivers personalized service, which helps customers feel heard and valued.”²

¹ Direct Testimony of Charles A. Caisley page 14, lines 1.

² Direct Testimony of Charles A. Caisley page 13, lines 20 - 22.

1 Q. What are your thoughts concerning Mr. Caisley’s definition and characterization
2 that Evergy has evolved to a high-touch contact center?

3 A. Mr. Caisley’s definition of a high-touch customer contact center is accurate;
4 however, based on Evergy’s initiatives presented within Mr. Caisley’s direct testimony and
5 information collected by Staff, it appears Evergy’s contact center is migrating to a low-touch
6 approach.

7 A low-touch contact center approach is defined as needing, “less interaction, requires
8 automation, AI, digital engagement tools, and self-service resources to streamline
9 communication and engagement.”³ Most of Mr. Caisley’s customer service testimony touts
10 Evergy’s accomplishments of requiring less interaction, such as an increase in digital
11 self-service web options and intelligent virtual agent (“IVA”) enhancements. The initiatives he
12 describes supporting Evergy’s high-touch contact center approach include fewer contact center
13 hours and lowering contact center metrics which could result in fewer Customer Service
14 Representatives (“CSRs”). Both initiatives are counter-intuitive to a hands-on approach that
15 helps customers feel heard and valued.

16 Q. Mr. Caisley states that because customers are using the digital self-service tools,
17 the remaining calls are longer, and that is why Evergy has evolved to a high-touch approach.
18 He states Evergy feels it’s important to help its customers resolve their questions fully and
19 hopefully on the first call. What are your thoughts on that?

20 A. Staff believes that Evergy has always had a goal of helping customers resolve
21 their issues and to do so on the first call. Staff also agrees that, with more routine calls answered

³ <https://mailchimp.com/resources/high-touch-vs-low-touch/>. Mailchimp is an email market platform and a subsidiary to Intuit Inc., a member of the Nasdaq 100.

1 with automation, the longer calls are left for CSRs. However, just because calls are longer does
2 not mean a contact center has evolved into a high-touch center.

3 From my experience managing call centers, the expense of more CSRs is one reason
4 why companies like Evergy don't utilize a high-touch contact approach with call centers. When
5 a company decides to migrate to a high-touch contact center with a focus on first call resolution,
6 it requires additional handle time for CSRs to provide more human interaction with a hands-on,
7 personalized approach to customer service. Unless a company is willing to accept longer wait
8 times for its customers, a high-touch call center will require more CSRs.

9 This high-touch approach described by Mr. Caisley seems contradictory to Evergy's
10 managerial decisions, as Evergy is simultaneously implementing initiatives that result in less
11 CSR availability, lowering its contact center metric goals and setting shorter contact center
12 hours. As I mention later in my testimony, lowering a call center's target speed-to-answer
13 metric relates directly to staffing.

14 Q. Does Staff take issue with Evergy's goal to encourage the use of digital
15 self-service tools for customers in order to get their needs met?

16 A. Not at all. If a customer can get their needs met with an app, IVA, or the website,
17 the result can have great benefits for both the customer and the Company. What Staff has
18 concerns with is the availability of CSRs when customers require human interaction.

19 Q. Has Staff noticed an increase or decrease in the number of Evergy CSRs?

20 A. EMW and Evergy Missouri Metro ("EMM") utilize the same contact center in
21 Raytown, Missouri. Staff noticed Evergy's CSR numbers in Raytown have been decreasing for
22 the past few years. In EMM's last rate case, ER-2022-0129, Staff asked if Evergy had been
23 decreasing its CSR numbers. Evergy responded, "Through the course of the last several years

1 Evergy has made headcount reductions in the contact center and will continue to focus on
2 self-service improvements to maintain the reduced level of staffing.”⁴

3 Q. In Mr. Caisley’s direct testimony, he includes the below chart⁵ showing
4 customer transactions with CSRs are down to 7% of total transactions with Evergy. With this
5 in mind, doesn’t it make sense that Evergy would need fewer CSRs to answer calls?
6

7
8 A. Absolutely; however, it is important to keep in mind that the 7% represents
9 1.6 million calls offered to CSRs. The data in the chart⁶ represents all Evergy customers in
10 Missouri and Kansas. In this example, the self-service transactions, including web log ins and
11 calls contained in the IVA from 2019 to 2023, have increased from 14.6 to 21.5 million.
12 Consequently, customers who required a CSR have decreased from 2.6 to 1.6 million in the
13 same time period. So, although there has been substantial decline in calls offered to a CSR,
14 customers still needed to speak to a human in 1.6 million instances.

⁴ ER-2022-0129, Evergy’s Response to Staff’s Data Request No. 0301, part 5.

⁵ Direct Testimony of Charles A. Caisley, page 15.

⁶ EMW’s Response to Staff’s Data Request No. 0310.

1 The chart below⁷ represents customer calls at the Raytown call center during the same
2 time frame as Mr. Caisley's chart. As you can see in the chart above, Evergy has had a decline
3 in customer calls over the past five (5) years; and with Evergy employing fewer CSRs at the
4 Raytown call center, customers have had longer wait times to reach a CSR.

5 **

6
7 **

8 **MIGRATING TO A 120 SECOND SPEED-TO-ANSWER**

9 Q. Mr. Caisley mentioned that Evergy is migrating to a 120 second
10 speed-to-answer.⁸ Evergy reports monthly to the Customer Experience Department on their

⁷ Chart uses average speed of answer and CSR monthly data totals provided to Staff.

⁸ Direct Testimony of Charles A. Caisley page 14, line 10.

1 average speed of answer (“ASA”); can you elaborate on the difference between ASA and
2 speed-to-answer?

3 A. ASA is simply the average time it takes CSRs to answer the total number of
4 customer calls offered over a given time period. Speed-to-answer is a contact center term that
5 all call centers use as a basis for establishing its service level (“SL”) goal. The SL refers to the
6 percentage of calls answered within a specific time threshold, which is the speed-to-answer.
7 Although speed-to-answer can vary within the contact center industry, the typical
8 speed-to-answer is around 20 seconds 80% of the time. This is commonly referred to as the
9 80/20 rule.⁹ Meaning, for example, if a contact center offers 1,000 calls to CSRs, they would
10 need to answer 800 calls within 20 seconds to meet their service level goal of 80%.

11

800 Calls answered within 20 seconds

1000 Calls Offered to CSRs

12

13 Q. According to Mr. Caisley’s testimony, Evergy’s new speed-to-answer goal is
14 120 seconds. Mr. Caisley does not mention a SL goal; what SL goal has Evergy set?

15 A. For years, Evergy’s SL goal was to answering 80% of its calls within 20 seconds.
16 Staff asked what metrics changed due to migrating from 20 to 120 second speed-to-answer.
17 Evergy stated that the SL metric changed to 70/120 and that Evergy’s new goal is answering
18 70% of its calls within 120 seconds¹⁰.

19 Q. You mentioned that this goal affects call center staffing. How does a lower
20 speed-to-answer affect call center staffing?

⁹ [How Is Service Level Calculated in a Call Center? \(roicallcentersolutions.com\)](http://roicallcentersolutions.com)

¹⁰ EMW’s Response to Staff’s Data Request No. 0308.

1 A. Once a company establishes its service level goal, that signals how many CSRs
2 it will need in order to meet that goal. Most call centers have a dedicated staff member or team
3 to calculate how many CSRs are needed to meet the company's goal. When the higher
4 speed-to-answer target is paired with a lower SL goal, fewer CSRs are needed to meet that goal
5 and vice versa.

6 If a call center is not meeting its service level goal for a sustained period of time, more
7 CSRs are needed. Or, in the alternative, the company can simply accept longer wait times for
8 its customers and lower its goal so fewer CSRs are required to meet that goal.

9 Another alternative to hiring more CSRs is to decrease hours of operation, which Evergy
10 did in April of 2023 when Evergy moved its contact center hours from a closing time of 7pm
11 to 5pm. Evergy claims that this was due to aligning hours with the rest of the business,
12 bi-lingual support availability, and attracting and retaining workforce.

13 Q. Will you summarize Staff's concern with Evergy's initiatives?

14 A. To reiterate, Staff does not have issues with self-service options that assist
15 customers, but self-service options will never replace the human interaction that ratepayers
16 expect. Adjusting CSR staffing to the level of customers that need to talk to a CSR is a wise
17 business decision. What concerns Staff is the initiatives that diminish the availability of CSRs
18 by either decreasing call center hours or CSRs even though the calls to CSR remains high. What
19 further concerns Staff is Evergy setting its internal goal to accept that customers will wait longer
20 to get their electric service needs met. So far, Evergy is surpassing its speed-to-answer goal in
21 2024 and Staff hopes, for the sake of its customers, that Evergy continues to exceed the low
22 goal it has set for itself.

1 Q. Has the cost-benefit related to the increase in self-service tool usage been
2 evaluated by Evergy?

3 A. Yes. Evergy has stated in previous testimony¹¹ that it intends to pay for these
4 digital self-service tools by lowering operation and management costs.

5 ...we are looking to find incremental hard cost reductions over the
6 coming years to improve our per customer interaction cost and to
7 prioritize regional rate competitiveness.

8 As Evergy continues to look for hard reductions in cost, Staff also hopes that Evergy
9 remembers that customers are already paying for the digital self-services in rates; they shouldn't
10 have to pay again with their time.

11 Q. Did Staff review customer feedback concerning Evergy's initiatives for its
12 contact center?

13 A. Yes. To measure the effectiveness of the contact center and to get feedback from
14 customers who have interacted with the contact center, Evergy utilizes a quarterly survey called
15 the Voice of the Customer. Staff reviewed the Voice of the Customer survey for the 3rd Quarter
16 of 2023. Attached are some of the excerpts from that survey concerning its call center and the
17 initiatives. Staff has attached as Schedule SJG-r1 some customer feedback from the Voice of
18 the Customer concerning the digital self-services and Evergy's initiatives.

19 **CUSTOMER COMPLAINTS**

20 Q. Will you summarize the direct testimony of OPC's witness Lisa A. Kremer's
21 position on customer complaints (item 11)?

¹¹ Direct Testimony of Chuck Caisley, ER-2022-0130, page 7, line 13-15.

1 A. Ms. Kremer determines that EMW may not be compliant with Commission rule
2 20 CSR 4240-13.040 (5)(B) by not tracking all issues forwarded to its Escalation and
3 Resolution specialists the same way it tracks registered complaints from the Commission.
4 Additionally, Ms. Kremer adds that EMW is further non-complaint with the above rule by not
5 retaining issues forwarded to the escalation team for a period of two years.

6 Q. Does Staff agree that EMW is not compliant with Commission rule 20 CSR
7 4240-13.040 (5)(B)?

8 A. No. It is Staff's opinion that when Commission rules refer to complaints, they
9 are referring to informal and/or formal complaints registered with the Commission. Complaints
10 are defined in 20 CSR 4240-13.015(1)(D) as "Complaint means an informal or formal
11 complaint under 4 CSR 240-2.070."¹² Commission Rule 20 CSR 4240-2.070 establishes the
12 procedures for filing formal and informal complaints with the commission;

13 Q. Although Staff does not agree that EMW is out of compliance, what are Staff's
14 thoughts concerning Ms. Kremer's recommendations?

15 A. Concerning the first recommendation to track all issues forwarded to the
16 Escalation team in the same regard as it tracks complaints filed with the Commission, Staff has
17 no opinion. Additionally, this would be a management decision for EMW to consider.

18 Q. What are Staff's thoughts on the second recommendation to separate customer
19 complaints and escalations by EMW and EMM?

20 A. The response EMW gave to Ms. Kremer's data request is that it is not able to
21 do so.¹³ Staff is unaware what is causing this inability to determine where escalations originate,

¹² Currently 20 CSR 4240-2.070.

¹³ EMW's response to OPCs Data Request No. 5053.

1 but Ms. Kremer's recommendation seems reasonable for EMW to consider and it is odd that it
2 is not possible to track which Evergy entity escalations are coming from. One would think a
3 company would want to know not only the type of escalations but also where the escalations
4 are coming from.

5 EMW has spent hundreds of millions of dollars upgrading its customer information
6 systems and plant technology. It collects a massive amount of data on customer energy use and
7 patterns. If a customer's issue is not resolved by a CSR and requires a specialist for resolution,
8 tracking which Evergy entity that escalations are coming from seems like a good business
9 practice that would benefit EMW and its customers.

10 Q. What are Staff's thoughts on the third recommendation to keep the records for a
11 minimum of two years?

12 A. This recommendation seems reasonable for EMW to consider. Apparently,
13 EMW already retains these escalations for over a year. Using the same reasons for good
14 business practice as mentioned in the second recommendation, EMW should consider retaining
15 at minimum the number and general description of escalations for two years.

16 Q. Does this conclude your rebuttal testimony?

17 A. Yes it does.

BEFORE THE PUBLIC SERVICE COMMISSION

OF THE STATE OF MISSOURI

Excerpts from the Voice of the Customer
3rd Quarter 2023

Had to try and get thru the auto system which is not efficient. Finally got a human. Took a long time. – Response ID 2670388379

I never spoke to a person. When a customer loses power for four days, Evergy needs to find better ways of consoling him or her. A computer voice is not helpful – Response ID 2666431672

The online outage reporting system did not work. Was put on hold for over 30 minutes when I tried to call in to report the outage before I gave up. - Response ID 2671161351

Still unable to access Evergy website - Response ID 2676233370

You're [sic] entire automated process is awful. - Response ID 2676764699

The computer voice did not register my request. Had to call next day to find out why power was not on - Response ID 2662584141

Horrible website. Says I don't even have an account which is completely incorrect - Response ID 2679528629

Computer phone answering machine does not pickup what you tell it. Repeatedly asked to schedule a service order and it never picked it up. Would never let me get to an operator. Had to report an outage to get to an operator. – Response ID 2671162784

No one answered the phones after 5pm. Also no texts after the first original text of telling me there was a power outage problem. – Response ID 2671325217

I left 2 messages for a callback instead of waiting on hold. Never got a call back. :(- Response ID -2679173409

You texted me power was out at our home, but it was not out. I phoned to let you know that and was on hold for a long time, then spoke with an overworked rep, kept it short. Response ID – 2676440786

Called yesterday, 15 min wait. Was called back only to be put back in hold for 25 min and no answer. Called back today and question was answered after 5 min wait – Response ID 2679207015

Get rid of the automated gatekeeping computer that answers the phone. With all the money I pay this company to line your CEO's pockets, It should be easy to get a person. – Response ID 2681289109

I was told the estimated wait time was 5 minutes but I had to wait 40 minutes for someone to answer. - Response ID 2670972043

Auto call service could not find me due to multiple accounts, which are for the same address. Asked for my address and when mailing address provided it could not locate my accounts. Kept asking for my address and then my account number which I could not look for due to being in the dark. By the time it finally gave me to a live representative I was beyond frustrated. The live representative was great Response ID - 2665831537

Too many pre-recorded messages before I could explain the situation to a real person. Response ID – 2665842057

I don't like the new talking directive. I preferred[sic] picking the correct number to get to whom I wanted. It's also way too difficult to talk to a live customer service [sic] representative. I do like the call-back option rather than having to hold for 30 minutes etc. - Response ID 2674147072
