

EC-2024-0372

Your honor Ameren itself didn't follow the complaint details listed and staff didn't even follow complaint matters.

If you look at the confidential exhibit listed as attachment 2, it only shows meter detail from 1/31/2021 through 5/19/2023. There were no services at the premises from 5/19/2023 through the middle of December.

Ameren Missouri intentionally left out December of 2023 through July of 2024.

If you look at the Complaint I specifically stated I noticed meter issues in May and June which would apply to 2024. Why Ameren would leave off seven months of newer meter readings is beyond me?

Ameren Missouri left those out because they know the truth.

That being said, based off the level of fraud they have committed I am asking respectfully for you to overview these documents submitted from an evidentiary hearing. While it is true that a report and order was issued. The claim surrounding it falls under Missouri State Statutes 570.095 in which Ameren Missouri filed false documents. Such a document falls under Missouri Statute 570.090 which makes the document invalid under Missouri law.

Please read page 14 of an evidentiary hearing transcript the circled area. Ameren's Regulatory Liaison specifically states.

"I downloaded emails from my personal email box and was able to edit those, not only from Ameren but from other sources of email that I received."

Notice on line 23, their Regulatory Liaison openly admits that she edited, altered and manipulated, forged Ameren Missouri documents. The company she works for. Plus she altered, edited, manipulated forged "other sources" documents, in which she doesn't elaborate in further detail.

Attached clearly you can see the counterfeit document.

I am asking this matter for a Judicial review and for the Commission to reverse any outcome and report and order issued out of EC-2023-0395.

All these documents attached will show that not only did Ameren submit false documents, but prior Staff lied in during their the evidentiary hearing when cross examined and openly admitted an audio recording didn't specify a date of May 18, 2023.

Not only did Ameren Missouri file forged and false documents. Staff of the Commission did the exact same.

Missouri State Statute 570.095 specifically allows for judicial review of a filing or record that is believe to be fraudulent, false, misleading, forged and contains materially false information.

Brett Felber
