

EC-2024-0372

The reason that the Complainants are requesting the subpoena is because the material requested will link to prove that Ameren Missouri filed counterfeit documents on two separate commission complaints. As well the documents will interconnect multiple complaints filed, and some by other parties that will show a possible of three violations that were discovered by Staff that Staff didn't enact on.

The Complainants believe that Ameren Missouri is in possession of a certain agreement and tried to delete it and might have possibly tried to scrub their server, so the Complainants would like to have a computer forensics technician that has 35 years industry that can search through their servers and any computers that Ameren Missouri openly admitted to altering documents on and we will find those exact documents on their computers from a partition drive search.

Ameren Missouri is essentially hiding all Ameren Missouri documents that they admitted to altering, editing, forged or produced as a counterfeit documents.

The Complainants have the right to those documents to be produced or published and the material will be utilized to show that Ameren Missouri can manipulate outcomes to benefit in favor of them.

For the Staff subpoena requested it will be used the material is relevant to develop and show a pattern that a Staff party lied under oath and more importantly lied and committed perjury during an affidavit signature about an audio tape.

As for the Subpoena filed for the Honorable Judge Clark the Commission can use their own faith and judgment on that, but the material requested will show that the Regulatory Judge agreed about violations, and only after Staff decided to interject a statement, the Regulatory Judge changed his statement.

Essentially all these documents will proceed to prove that Complainant (s) were misled, told inaccurate statements, the material will agree with the Complainants material submitted in any and all cases, including EC-2024-0372, along with it will pinpoint the neglect and unfair due process that the Complainant had.

I hope this is a better understanding as to why the subpoena's have been requested and we are asking for those. We would like to have depositions in which we the complainants are confident during the depositions, statements will agree with the Complainants materials.

I hope this is a better understanding of what they are needed for.

Essentially Staff and Ameren Missouri either hid documents or have documents in their possession that agree with the Complainants material and issues and Staff and Ameren doesn't want the Complainant to have those.

Because the outcome would show those violations, errors, more importantly admission of wrongdoing.
