

How is my usage calculated? 

What is a degree day? 

A degree day is a measure of coldness based on the extent to which the daily mean temperature falls below 65°F. For example, on a day when the average temperature is 35°F, there would be 30 degree days experienced.

What is included in the Purchased Gas Adjustment (PGA)? 

How can I read my gas meter? 

Why would I receive an estimated meter read? 

### Question About Your Rates?

Liberty is a regulated utility; our rates must be approved by state regulators. Rates reflect the cost to provide customer care, emergency and outage services, maintain and improve infrastructure and recover operating costs. Rates also reflect the cost and obligation of serving our customers safely and reliably.

When rates change we communicate these changes to our customers with bill inserts and on this website.
