

White River Facilities Planned for Southway Storage – DR 6.0 **Ex 204**

REQ: Please provide a detailed description of the facilities that will be installed in providing the requested service to the proposed Southway Storage on the property located at the southwest corner of the intersection of US Highway 65 and State Highway F near Ozark, MO. Based on recent conversations with Southway Storage regarding the load, White River Valley Electric Cooperative intends to extend its 3-phase underground cable approximately 700' north along Riverdale Rd. White River already has a 10' easement secured for this purpose.

Resp: Our 3-phase will be terminated in a junction box on the Southway Storage property. When the Southway Storage plans are finalized, White River will design and build the balance of the project to serve their facilities.
