

EC-2024-0372

Oh and I'm using collateral attack in the terms and definitions of in which fraud is the basis for the collateral attack.

Ameren Missouri used fraudulent, also know as forged, altered, edited payment agreements.

Ameren Missouri also admitted to alteration.

Staff found a violation in my matter and found a linking violation that was mentioned connected to my matter and Nancy Hurt.

"The prevailing rule is that a judgment may be upset by collateral attack only when fraud is the extrinsic.

In EC-2023-0395 fraud was extrinsic, as the complainant wasn't given a fair trial and that fraudulent conduct actually contributed in procuring the judgment.

The extrinsic articles are .

The counterfeit document Ameren utilized with no PAG terms.

The counterfeit document Ameren utilized with an email address o www2.ameren.com. Which is a web address, not an email address, so the document wouldn't have sent.

The violations of course named.

The perjury in which the May 18, 2023 tape did not credibly pinpoint paymnet being due on May 18, 2023 and Staff further perjured themselves under cross-examination and admitted conclusive evidence didn't point to a May 18, 2023 due date and didn't say the amount and date due.

The counterfeit audio in which Ameren altered the format to state May 18, 2023 for the clip.

Ameren Missouri openly admitting to not only editing Ameren documents, but other documents.

Impersonation of a "senior software engineer) or a networking mitigation specialist.

Perjury, extortion, theft of funds. etc

Denied motions for discovery

So what really do you want to talk about Commission, Staff, Ameren Missouri
and Tueth Keeney?

The judgment is void. I don't need to file an appeal, based off the extrinsic
details.

No matter how many times you try to deny it, doesn't make it true. Let me
know when the impersonator "senior software engineer" gets
www2.ameren.com working as an email address.

So Ameren, Commission, Staff, Tueth Keeney, what do you really want to
