- .02 The characteristics of equipment at either end of the channel shall be such that its connection to the channel complies with the minimum protection criteria set forth below, and does not interfere with services furnished to other customers. Additional protective equipment, where required, shall be at the customer's expense.
- .03 When services using Local Exchange Company voice grade facilities are terminated in customer-provided terminal equipment, channel derivation devices, or communications systems, the customer shall comply with the minimum protective criteria set forth below:
- .031 When the facilities furnished under this tariff are used in common with Bell System services, it is necessary in order to prevent excessive noise and crosstalk that the power of the signal applied to Bell lines be limited. A single valued limit for all applications cannot be specified. Therefore, the power of the signal in the Band above 300 Hertz which may be applied by the customer-provided equipment at the point of termination will be specified by MCI WORLDCOM for each application, to be consistent with the signal power allowed on the telecommunications network.
- .032 To protect the telecommunications services from interference at frequencies which are about the band of service provided, MCI WORLDCOM will specify the acceptable signal power in the following bands to be applied by the customer-provided equipment or communications system at the point of termination to insure that the input to Bell facilities does not exceed the limits indicated:
- .033 Where there is connection via customer-provided terminal equipment or communications system to a Message Telecommunications Service or a WATS service to prevent the interruption or disconnection of all call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided equipment to the interface at no time has energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

.0341 The maximum rms (root-mean-square) value, including dc and ac components, of the current per conductor will not exceed 0.35 ampere.

.0342 The magnitude of the peak of the conductor or ground voltage shall not exceed 70 volts.

.0343 The conductor voltage shall be such that the conductor to ground voltage limit in .0342 preceding is not exceeded. If the signal source is not grounded, the voltage limit in .0342 preceding applies to the conductor to conductor voltage.

.0344 The total weighted rms voltage within the band from 50 Hertz to 300 Hertz shall not exceed 100 volts. The total weighted rms voltage is the square root of the sum of the products times the square of the rms voltage of the individual frequency components. The weighting factors are as indicated:

for frequencies between weighting factor

50 Hertz and 100 Hertz $f^2/10^4$

100 Hertz and 300 Hertz $f^{3.3}/10^{5.6}$

where f is the numerical value of the frequency, in Hertz, of the frequency component being weighted.

.0213112 Multipoint: The rate mileage for the Inter-Office Channel(s) on a private line service with three or more Points of Presence is the sum of the individual airline mileage measured between each pair of MCI WORLDCOM Points of Presence which results in the lowest total mileage charge when all of the MCI WORLDCOM Points of Presence are connected together. The charge for the airline mileage between each pair of MCI WORLDCOM Points of Presence (both a fixed and per mile component apply to each pair) is calculated separately and then summed. (Note: The actual MCI WORLDCOM routing of the private line service may vary from the priced configuration. SECTION C - SERVICE DESCRIPTIONS AND RATES (Cont.)3. METERED USE SERVICE.01 General Description

Metered Use Service offers the use of interexchange communications facilities shared among multiple users, and is provided on the basis of twenty-five separate service options (Dial One/Direct Dial, Credit Card, MCI WATS, Prism I, Prism Plus, MCI 800 Service, Vnet, MCI Vision, Preferred, MCI 900 Service, Commercial Dial-1 Service, MCI PhoneCash, MCI HotelDirect, MCI PrePaid, MCI MASTERS, University Dial 1, MCI Flat Rate, 500 Personal Number, hospitalityMCI, Advanced Option I for Small Business, MCI Flat Rate Plus service, networkMCI One, MASTERS97, MCI One Savings and MCI WorldCom On-Net Services). Depending on the option(s) chosen the customer may select the manner in which calls are originated and terminated, may obtain one-way or two-way service, may enjoy point-to-point or multipoint service, or may originate calls in multiple cities. -

Certain Metered Use Service Offerings may involve a recurring monthly minimum charge for interexchange facility usage or an initiation of service fee. A monthly listing of each call and its duration is available as a standard feature. At additional cost, certain Metered Use Service options offer a customer the ability to: (1) identify the users and allocate the cost of his long distance facilities through the use of additional authorization codes, (2) reduce the amount of dialed digits through the use of speed numbers, and (3) receive their call records on magnetic tape.

Under each of the above service options, the individual customer's total monthly charges for their use of the interexchange communication facilities are based upon the total time the customer (account) utilizes such facilities. In that regard, individual interexchange facilities usage charges, as well as other specific charges, discounts and/or features are applicable to each individual service option. When a metered use service call is established in one time-of-day rate application period and ends in another, the rate in effect in each rate application period applies to the portion of the call occurring within that rate application period. The rates and charges applicable at any given time within the allowable minimum/maximum range for Option A (Dial One/Dial Direct), Option B (Credit Card) and Option C (MCI WATS) will be specified in a supplemental rate schedule filed with and approved by the Missouri Public Service Commission. Any change to a rate or charge within the allowable range shall not be construed as an application to increase or decrease rates. A specific description of each of the Metered Use Service options and its recurring and non-recurring charges, features, applicable discounts and service availability is contained in Sections C.3.02-C.3.32 following.

SECTION C - SERVICE DESCRIPTIONS AND RATES (Cont.)3. METERED USE SERVICE (Cont.).02 Option A (Dial One/Direct Dial) (Cont.).023 Personal 800 Plan R

Personal 800 Plan R provides a telephone number at which calls may be received from any location within the state of Missouri for a monthly subscription fee of \$4.00 plus a one-time installation fee of \$10.00. ^{1/} MCI WORLDCOM will provide to the customer an 800 telephone number, a 4-digit Security Code, and a 6-digit Rerouting Code which will allow the customer to use the "Follow-Me" Routing feature. The customer will be charged \$.3000 per minute, or fraction thereof, for all Personal 800 Plan R calls within the state of Missouri which are made during all time periods. For all customers enrolled in the Friends & Family Program, a rate of \$.3000 per minute, will apply for all time periods. The Friends & Family, and standard Holiday discounts do not apply to these calls. A Personal 800 Plan R customer shares access to an 800 number with other customers and acquires service based on a 4-digit Security Code assigned to the customer. Thus, a customer may not retain the 800 number or any right therein when his or her service is discontinued. There is a limit of ten Personal 800 Plan R numbers per customer telephone number.

.0231 Follow-Me Routing: This feature allows a Personal 800 Plan R customer to change the telephone number to which calls to his or her Personal 800 Plan R number will be terminated. To make a Follow-Me change, a customer may use his or her Personal 800 Plan R number and the 6-digit Rerouting Code. There is no limit on the number of changes a customer may make.

1 . This fee will be waived through June 6, 1995.

SECTION C - SERVICE DESCRIPTIONS AND RATES (Cont.)3. METERED USE SERVICE (Cont.).04 Option C (MCI WATS)

Option C involves the provision of interexchange communications channels. Option C is a one-way, multipoint service requiring the customer to originate calls via dedicated facilities between his premises and MCI WORLDCOM's terminal location and allowing the termination of calls via a combination of MCI WORLDCOM-provided interexchange facilities and local business telephone lines, and the resold facilities of other carriers. All Option C calls are subject to a one minute average connect time (i.e. total monthly minutes of use divided by total monthly calls must equal at least one minute). All Option C calls are rounded to the next higher 6-second increment.

.041 Monthly Recurring Charges

.0411 Interexchange Facilities Usage Charges: Option C is available on the basis of usage charges and is subject to a monthly Minimum Charge.

.04111 Minimum Charge: \$75 for all usage

.04112 Usage Charges: Usage Charges are determined by such variables as Rate Periods, Rate Schedules and Service Areas. The charges are billed according to the average monthly use for each rate period of each dedicated access line within a service group. ^{1/} (See definition of "Service Group" in Section A preceding.) The rate period is determined by the day and time at the Option C dedicated access line location.

^{1/} The average monthly minutes of use for each rate period per access line will be deemed to be the same as the average monthly minutes of total traffic (including traffic to Canada) for each rate period. The resulting effective per minute rate will then be applied to the customers Tier 1 and Tier 2 usage, respectively.

.041122 See Section C-3.044.0412 Method of Determining Usage Charges

Based upon the hourly rates set forth in Section C-3.041122, MCI WATS usage charges are calculated as described below: ^{1/}

- a) Determine the total minutes of monthly usage for each rate period over all dedicated access lines in a service group.
- b) Determine the total number of access lines in service during the month (access lines in service for a partial month will be pro-rated).
- c) Determine the average usage for each rate period per access line by dividing the minutes for each rate period from (a) above by the number of lines from (b) above.
- d) Determine the effective rate step for the desired service area from the appropriate originating state.
- e) Determine the effective Tier 1 hourly rate for each rate period by: 1) Multiplying the total hours in each tapered usage increment for that rate period by the associated hourly rate for that increment; 2) totaling these charges for each rate period; and 3) dividing the total by the average usage per line from (c) above.

^{1/} Minutes used in the calculation include both intrastate and interstate minutes.

SECTION C - SERVICE DESCRIPTIONS AND RATES (Cont.)3. METERED USE SERVICE (Cont.).09 Option H (MCI 800 Service)

MCI 800 Service is an inward WATS service which permits intrastate calls to a customer's station in one location from stations in diverse geographical service areas, and in which the MCI 800 customer is billed for the calls rather than the call originators. 800 Service has one pricing Range for each terminating area code, with total intrastate coverage on every line. Range designation, determined by originating and terminating area code, is shown in Section C-7, Table IV, Part D.

MCI WORLDCOM may require that a customer provide calling pattern information necessary for MCI WORLDCOM to evaluate whether it anticipates network blockage, and MCI WORLDCOM reserves the right to suspend installation of service until adequate facilities are available to meet such traffic. All Option H calls will be subject to an 18-second minimum initial period and additional 6-second increments. All Option H calls are rounded to the next higher 6-second increment. A call begins when call termination is received by or passes through customer premises equipment. It is the customer's responsibility to pass appropriate answer supervision back to the MCI WORLDCOM point of connection. For rules regarding the reservation of MCI 800 Service telephone numbers, refer to Section B-16.

Unless otherwise indicated herein, the terms "MCI 800 Service," "888 Service," and/or "Toll Free Service"; and the terms "800 number," "888 number," and/or "Toll Free number" can be used interchangeably when used throughout this tariff.

.104 Basic Feature Package Charge

Universal Range Privilege - A customer can specify the type of Vnet calls allowable for users on each Dedicated Access Line group, for each Vnet Card authorization code and for each Dial "1" ANI (originating telephone number) band for each ID code (see Section C-3.1055 regarding ID codes). The range privileges are defined as follows:

- 0 = no calls allowed
- 1 = on Vnet numbers (7- and 10- digit private dialing plan numbers)
- 2 = Range 1 plus 10-digit off-Vnet numbers

Accounting Codes - A customer can specify that Accounting Codes are to be dialed from specific dedicated access line groups or from Dial "1" telephone numbers (ANIs). For Dial "1" access, the code must be two digits and cannot be used in combination with an ID Code (see Section C-3.1055). Option K is a one-way, outbound, multipoint service for single or multi-location customers using Dial One or Calling Card origination. In connection with Option K using Dial One Access, Service Type 1 only as described below, the customer can obtain an inbound 800 termination option. Multiple outbound calling locations will be billed via a single invoice. If applicable, upon enrollment, the customer must designate each originating Dial One telephone number as either Service Type 1 or Service Type 2 as described below. Outbound Option K calls may originate from all locations within Missouri. Outbound calls are dialed without the assistance of an MCI WORLDCOM Operator, except for Calling Card calls originating from a rotary phone, and do not include calls as specified in Section C-3.026. Inbound Option K calls are made through a designated 800 number, and the Option K customer is billed rather than the call originators. All Option K calls are subject to a 30-second minimum initial period and are then rounded to the next higher 6-second increment.

.121 Access Methods

A Service Type 1 location is defined as all lines associated with a single billing telephone number (BTN) as provided by the local exchange carrier. At each Service Type 2 location, there can be a maximum of two (2) originating telephone numbers. However, there is no limit to the number of originating telephone numbers at a Service Type 1 location.

.1212 Calling Card Access - Calling Card Access, available for origination from touch-tone or rotary phones by calling an MCI WORLDCOM-assigned "800" number, can be used for Option K alone or in conjunction with Dial One and 800 Access. 4. COMMON CONTROL SWITCHING ARRANGEMENT (CCSA) SERVICE

.01 General Description

.011 CCSA Service does not involve the provision of interexchange communications channels, but rather is offered as a switching service interconnecting network trunks, including circuits and services provided either by MCI WORLDCOM or by other Participating Carriers.^{1/} Use of MCI WORLDCOM's common control switching machines in connection with this offering may be shared with other customers or other offerings.

.012 Two customer options are available under this service: A full service version, Option A (Telemanagement) and a limited service version, Option B (Least Cost Routing). Outlined below are the features available, at the customer's option, which are included under the basic monthly recurring charges, along with the limitations associated with each option:

Feature Limitations

<u>Basic Features</u>	<u>Option A</u>	<u>Option B</u>
<u>Least-Cost-First-Routing</u> An arrangement to provide automatic selection of the least expensive facility available for each interexchange call on an on-line basis.	Route choices limited to total switch capacity	Limited to three route choices

^{1/} Customers who elect to gain access to MCI WORLDCOM's Metered Use Service Option C (MCI WATS) in connection with CCSA Service will be billed for monthly usage on the basis of the Tier 1, Service Area 5, hourly rates specified in Section C-3.041122 for their respective originating city. However, for such CCSA-related Metered Use Service Option C usage, the average monthly minutes of use for each rate period per access line will be calculated based upon the average monthly minutes of total traffic for each rate period per CCSA Dedicated Access Arrangement. The resulting effective per minute rate will then be applied to the customer's Metered Use Service Option C Tier 1 usage. The effective per minute rate for Tier 2 usage will remain unaffected by the above.

6. RATE & MILEAGE TABLES

METHOD FOR CALCULATION FOR AIRLINE MILEAGE

.01 Method of Calculation

The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) Coordinates as obtained by reference to AT&T's Tariff F.C.C. No. 10 according to the following formula:

A. Dedicated Leased Line Service

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

where V_1 and H_1 correspond to the V & H coordinates of City 1 and V_2 and H_2 correspond to the V&H coordinates of City 2.

<u>Example:</u>	<u>V</u>	<u>H</u>
City 1-Kansas City	6152	2174
City 2-St. Louis	5755	2241

$$\sqrt{\frac{V1 \quad V2 \quad H1 \quad H2}{(7027 - 6807)^2 + (4203 - 3482)^2}}{10}$$

Airline Mileage = 239 miles* $\sqrt{56824.1} = 238.378$ miles

*Result will always be rounded to the next highest mile.

6. RATE & MILEAGE TABLES (Cont.)

METHOD FOR CALCULATION FOR AIRLINE MILEAGE (Cont.)

.01 Method of Calculation (Cont.)

B. Metered Use Service

To determine the mileage between any two cities proceed as follows:

1. Obtain the "V" and "H" coordinates of the two cities.
2. Obtain the difference between the "V" coordinates of the two cities. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

3. Divide each of the differences obtained in 2 by three, rounding the quotient to the nearer integer.
4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in 3 by three, and repeat step 4. Repeat this process until the sum of the squares obtained in 4 is less than 1778.
5. The number of successive divisions by three in steps 3 and 4 determines the values of "H". Multiply the final sum of the two squares obtained in step 4 by the multiplier specified in the following table for this value of "H" preceding:

<u>H</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361
5	5,904.9	1,081

METHOD FOR CALCULATION FOR AIRLINE MILEAGE (Cont.)

B. Metered Use Service (Cont.)

6. Obtain square root of product in 5 and, with any resulting fraction, round up to the next higher integer. This is the rate mileage except that when the number obtained is less than the minimum rate mileage shown in #5 preceding. The rate mileage corresponding to the "H" value is applicable.

Example:

The rate mileage between Kansas City and St. Louis is calculated as follows:

	<u>V</u>	<u>H</u>
(a) Kansas City	7027	4203
St. Louis	6807	3482
(b) Difference	220	721

(c1) Divide each difference by three and rounding to nearer integer = 73 and 240

(d1) square integers and add,	73 x 73 =	5,329
	240 x 240 =	57,600
sum of squared integers		62,929

sum of squared integers is greater than 1777, so divide integers in (c1) by three and repeat (d1)

(c2) divide integers in (c1) by three and rounding = 24 and 80

(d2) square integers and add,	24 x 24 =	576
	80 x 80 =	6,400
sum of squared integers		6,976

(c3) divide integers in (c2) by three and rounding = 8 and 27

(d3) square integers and add,	8 x 8 =	64
	27 x 27 =	<u>729</u>
sum of squared integers		793

This sum of squared integers is less than 1778 and was obtained after three successive divisions by three, therefore, "H" = 3.

(e) Multiply final sum of squared integers by factor 72.9 (corresponding to "H" = 3)	793
	<u>x 72.9</u>
	57,809.7

(f) Square root of 57,809.7 = 240 and a fraction, which is rounded up to 241 miles (fractional miles are considered full miles). The 241 miles is larger than the minimum of 121 miles applicable when "H" = 3, so the rate mileage is 241 miles.
