**GENERAL EXCHANGE SERVICE TARIFFS**

**SERVICE CONNECTION CHARGES**

A. GENERAL

1. The term “Service Connection Charge” is used to define the non-refundable charge made for the establishment of a class of telephone service or subsequent additions to that service.
2. All changes in subscribers’ equipment or service from one premise to another are treated as new service connections with Service Connection Charges applying.
3. Service Connection Charges are in addition to any other scheduled rates and charges normally applying under the tariffs. They apply in addition to and not in lieu of mileage charges, installation charges, or construction charges made because of unusual cost in establishing service.
4. Service Connection Charges are payable at the time application is made for the particular service or facility and prior to the establishment of service or upon presentation of a bill. Service may be established in advance of payment in the case of Service Connection Charges for additions to the service for departments, administrations, and agencies of the Federal, State, County, Township, or Municipal Governments.
5. Service Connection Charges do not apply to service re-established once, after the destruction or partial destruction of the customer’s premises by means beyond the control of the customer, i.e., fire, flood or other acts of God, whether at the same or another location.
6. For customers displaced by the major flooding in the summer of 1993, Service Connection Charges do not apply to the establishment of service at an interim location or to the later re-establishment of service at the same or another location. This latter special flooding provision expires on December 31, 1993.
