Date Testimony Prepared: September 10, 2024

MISSOURI PUBLIC SERVICE COMMISSION

CASE NO.: ER-2024-0189

SURREBUTTAL TESTIMONY

OF

CINDY CIRCO

ON BEHALF OF

EVERGY MISSOURI WEST

**Kansas City, Missouri
September 2024**

SURREBUTTAL TESTIMONY

OF

CINDY CIRCO

Case No. ER-2024-0189

1 **Q: Please state your name and business address.**

2 A: My name is Cindy Circo. My business address is 1200 Main, Kansas City, Missouri 64105.

3 **Q: By whom and in what capacity are you employed?**

4 A: I am employed by Evergy Metro, Inc. and serve as Senior Director Customer Care for
5 Evergy Metro, Inc. d/b/a as Evergy Missouri Metro (“Evergy Missouri Metro”), Evergy
6 Missouri West, Inc. d/b/a Evergy Missouri West (“Evergy Missouri West”), Evergy Metro,
7 Inc. d/b/a Evergy Kansas Metro (“Evergy Kansas Metro”), and Evergy Kansas Central,
8 Inc. and Evergy Kansas South, Inc., collectively d/b/a as Evergy Kansas Central (“Evergy
9 Kansas Central”) the operating utilities of Evergy, Inc. (“Evergy”).

10 **Q: Who are you testifying for?**

11 A: I am testifying on behalf of Evergy Missouri West (“EMW” or “Company”).

12 **Q: What are your responsibilities?**

13 A: As Sr. Director for Customer Care, the departments I have responsibility for provide
14 customer service, bill generation, payment processing, collection, compliance, reporting,
15 and data analysis. This includes responsibility to forecast customer contact volume and
16 staffing needs, as well as setting quality assurance standards. These department teams
17 consist of approximately 250 skilled professionals.

1 **Q: Please describe your education, experience and employment history.**

2 A: I graduated from the University Missouri Kansas City with a Bachelor of Liberal Arts. I
3 spent my whole working career in some fashion of the customer care industry. Through
4 my business and community engagement, I transitioned to public service. As an elected
5 official in Kansas City for eight years, my office was recognized for outstanding
6 constituent services. Through those years, I served in significant positions such as Vice
7 Chair of Public Safety and Neighborhood Committee, Planning, Zoning and Economic
8 Development Committee, Finance, Governance & Ethics Committee, and Chair of the
9 Housing Committee.

10 April 2014, I moved to KCP&L as a manager in Public Affairs. I contributed in
11 developing the first Connect, our outward facing customer engagement program. In 2017,
12 I was positioned as a change agent throughout the integration process for the Marketing &
13 Public Affairs department during KCP&L's merger with Westar. This included mapping
14 employees' career tracks, implementing best practices, and assisting with internal change-
15 agent communications. During this time, I also had a role in government affairs for
16 KCP&L.

17 In 2018, I became Sr. Manager, Business Solutions Center for Evergy, restructuring
18 the Business Solutions Center to create efficiency and improved customer experience. In
19 May 2021, I gained responsibility for Customer Care Centers as Evergy's Director of
20 Contact & Business Centers, with the same mindset of creating efficiency and improving
21 customer experience.

22 In April 2024, I assumed the role of Sr. Director of Customer Care, encompassing
23 the departments of Business Center, Contact Center, Billing Services, as well as Credit and

1 Collections. In this role, I stay dedicated to improving customer experiences, streamlining
2 operations through continuous improvement, and implementing strategic approaches to
3 technology integration and customer service excellence.

4 **Q: Have you previously testified in a proceeding at the Missouri Public Service**
5 **Commission (“Commission” or “MPSC”) or before any other utility regulatory**
6 **agency?**

7 A: No.

8 **Q: What is the purpose of your surrebuttal testimony?**

9 A: The purpose of my testimony is to respond to certain issues contained in the rebuttal
10 testimonies of the Commission’s Staff witness Scott J. Glasgow and the Office of Public
11 Counsel (“OPC”) witness Lisa Kremer.

12 **Q: Do you agree with Mr. Glasgow’s general concerns regarding high-touch versus low-**
13 **touch contact centers?**

14 A: No, but I do agree with his statement that “with more routine calls answered with
15 automation, the longer calls are left for CSRs.” This is the primary driver of the culture
16 shift to “high-touch” contact centers. With successful and continuous improvements in the
17 IVA and online self-service options, it is no longer fair to evaluate the success of what
18 CSRs are achieving in a traditional manner. As even Mr. Glasgow noted, technology has
19 taken the basic transactions out of the equation. Previously, contact centers were allowed
20 to average all calls (simple, short, complex, and long) to meet standards. Today, with the
21 Evergy IVA having a 67% (YTD June) completion rate, the teams are measured on
22 managing the remaining 33% of calls that require or prefer the assistance of a live person.

1 As the nature of customer calls has evolved over the years, the mission of our
2 contact center has been to evaluate the needs of those 33% of calls, then adjust to meet
3 their need by moving to a culture of first call resolution mindset.

4 **Q: You mention shifting the culture to a “first call resolution mindset.” Can you give**
5 **some examples of steps taken to ensure this mindset in Evergy contact centers?**

6 A: Yes, as mentioned above, it’s more about culture and redefining what good looks like for
7 Evergy customers in a high-touch contact center. The following focus areas have been
8 and continue to be taken to achieve this.

9 ▪ First Call Resolution (“FCR”) Focus:

- 10 ○ Quality Evaluation score adjusted from 88% to 92%.
- 11 ○ Readily available Quality coaching of CSRs for continuous improvement.
- 12 ○ Transparency Performance. Agents can see their own metrics daily.
13 Promoting near real time adjustments where needed versus lagging
14 improvements.
- 15 ○ Implemented Quality Assurance (QA). Kudos to CSRs to foster
16 engagement in the success of FCR.

17 ▪ New Hire Training Retooling:

- 18 ○ Moved from traditional classroom training with a nesting period to more
19 skillset training with live call assistance and mentoring as the new hires
20 progress.
- 21 ○ First call resolution focused.
- 22 ○ Seasoned CSR mentoring for each new hire.

23 ▪ Workforce Management Reorganization to achieve higher success within:

- 1 ○ Forecasting and Scheduling
- 2 ○ Realtime Monitoring
- 3 ○ Performance Analysis and Reporting
- 4 ▪ Change in hours of operations:
 - 5 ○ Data evaluation shows 90% of customers called between 7am-5pm.
 - 6 ○ Aligned shifts during peak hours to ensure more CSRs were available
 - 7 ○ during the times customers called the most.
 - 8 ○ Aligned with field operation shifts to allow CSRs to retrieve answers for
 - 9 ○ customers in a timely manner, therefore preventing unnecessary call backs.
 - 10 ○ All calls in queue at 5pm are serviced by a CSR until the queue is cleared.
 - 11 ○ IVA is available 24/7/365.
 - 12 ○ Trouble/emergency calls are taken by IVA and CSR 24/7/365.
 - 13 ○ Positive change to assist in retention and attraction.

14 **Q: Both Mr. Glasgow and Ms. Kremer make mention of the change to hours of operation**
15 **as creating a negative impact to customers. Do you agree?**

16 A: I respectfully disagree and refer to Mr. Caisley’s rebuttal testimony on page 17, where he
17 addresses this question. We started informing the MPSC in the Q3 2022 Customer Service
18 Performance Review with Staff about our evaluation of changing the hours of operation.
19 Customers seek resolution when they call, and aligning hours to the rest of the business
20 gives Every the opportunity to answer customers’ questions while on the phone versus a
21 call back the next day, which drives good customer service with first call resolution.
22 Another benefit to adjusted hours is they appeal to employees—creating positive work
23 hours, in turn aiding retention and attraction. The strongest supporting evidence for the

1 hours of operation change was the data showing nearly 90% of customers call between
2 7am-5pm. When customers call Evergy, they can easily self-serve or go to a live agent, it's
3 their choice. Outside hours of operation, the IVA and our online portals are readily
4 available with no limit to when a customer can self-serve. In addition, live agents are
5 always available for emergency calls. For all these reasons, we were comfortable
6 informing the MPSC of the timeline to change the hours of operation in the Q1 2023
7 Customer Service Performance Review meeting with Staff.

8 The hours of operation change was implemented before TOU, and had been a
9 project in process since 2022. As stated above, the Hours of Operation project had been
10 communicated to Staff. For additional context, **Schedule CC-1** contains the Company's
11 Q3 2022 and Q1 2023 quarterly reports to the Commission, as well as an associated heat
12 map.

13 **Q: Mr. Glasgow shares a slide titled *9 of 10 Customers Use Self Service* in his testimony**
14 **to support his assertion that the call center had 1.6 million calls offered to CSRs. Can**
15 **you provide context to what Mr. Glasgow is presenting and his evaluation of it?**

16 A: The slide referenced is a representation of Evergy's entire service territory. For this
17 conversation, we would focus on Raytown Call Center only. In 2023, the Raytown Call
18 Center volume of customer interactions was 980,041 calls offered. We also need to point
19 out that KS Metro is incorporated in Raytown calls offered. For clarification of Mr.
20 Glasgow's evaluation the 1.6 million he refers to are calls offered to all of Evergy's service
21 territory.

1 **Q: In both Mr. Glasgow’s and Ms. Kremer’s testimonies, they have raised concerns**
2 **about staffing reductions in the contact center. Can you offer any insight to Evergy’s**
3 **contact center staffing?**

4 A: Staffing challenges are not a new issue for any call center. Evergy’s experience with
5 staffing challenges reflects a broader trend that many companies have faced since 2021,
6 exacerbated by the COVID-19 pandemic and transition to remote work, labor shortages, as
7 well as an aging workforce. The high skill and stress levels associated with utility call
8 center roles make these positions more difficult to fill. We have communicated hiring
9 challenges with the MPSC in our quarterly meetings over the past several years. The July
10 2024 YTD Service Level is 89% as shown in our monthly report to the MPSC, which is
11 evidence that we are finding and achieving the right balance of technology and people to
12 best serve our customers. I also attach **Schedule CC-2**, containing July 2024 monthly
13 reports to the Commission by EMW.

14 **Q: In Mr. Glasgow’s testimony, he presents a chart titled *Average Yearly CSR Staff***
15 ***Compared to ASA* asserting that staff reductions are the reason for the rise in Average**
16 **Speed to Answer (“ASA”). Do you agree that staffing is the reason for a longer ASA?**

17 A: Looking at the chart that Mr. Glasgow presents, the change in trajectory of ASA in 2021
18 starts outpacing the drop in staffing through 2023. The years represented in the graph
19 coincide with the February 2021 implementation of the IVA technology and the strain of
20 the labor market.

21 Average Speed to Answer is impacted not only by headcount but other factors
22 including concentration of calls within a compacted point in time, storms, peak season, and
23 transient events. Additionally, successful self-service programs have shown their impact

1 by the reduction in call volume. By handling the basic inquiries, self-service reduces the
2 volume of simple calls, leaving longer, complex calls for agents to manage. Staffing is a
3 factor that must be managed as attrition happens and technology continues to absorb a
4 growing share of calls. Evergy manages this with its first call resolution focus, new hire
5 training retooling, workforce management reorganization, and a change in hours of
6 operations. Each of these initiatives is addressed in more detail above. Further, as I noted
7 above, **Schedule CC-2** contains July 2024 monthly reports to the Commission.

8 **Q: Why did the Company adopt a 70% within 120 seconds answering standard, from**
9 **80% within 20 seconds, and does that affect call center staffing?**

10 A: To clarify, Evergy has maintained a 70% SL, while what has changed is the speed of answer
11 from 20 seconds to 120 seconds. The success of self-service and technology has reduced
12 the number of calls offered, leaving longer, complex calls for CSRs to handle. In Q1 2022,
13 we were evaluating the impact of longer calls to CSRs and shared this information during
14 MPSC quarterly Staff meetings. Implementing a 120 second ASA allows space for CSRs
15 to achieve the type of call taking we are trying to attain for our customers. Customer wait
16 time before hanging up is relative to the types of calls and hold times, during storms, peak
17 season, and transient events. Referenced above, **Schedule CC-1** contains the Company's
18 Q3 2022 and Q1 2023 quarterly reports to the Commission, as well as an associated heat
19 map.

20 **Q: Ms. Kremer questions the Company's approach to using contingent workers for**
21 **TOU. What was the Company's plan for additional call takers for TOU?**

22 A: Supplementing the full-time employees were 33 contract call takers on average for the
23 months of August, September, and October 2023. The strategic decision-making regarding

1 hiring contract workers had many factors. For instance, they only took TOU calls, whereas
2 Evergy CSRs took all call types including TOU. For retention purposes, it is critical not to
3 train too soon before a call taker is needed on a project. To train them, and then not have
4 them take calls for a long period of time, decreases retention of the information. Knowing
5 this fact, we timed graduation in July so the knowledge would be fresh for the first wave
6 of TOU calls and beyond. Not hiring full time employees for a transient spike in demand,
7 such as experienced during the TOU event, demonstrates fiscal responsibility and foresight.

8 Indeed, TOU was a transient event that brought extremely long call times. This
9 impacted all metrics in the months of August, September, and October 2023. Evergy
10 focused on enhancing CSR training to be able to educate and assist customers effectively,
11 as well as creating a dedicated group of TOU CSRs. At the height of volume in August,
12 September, and October 2023, TOU CSRs' call time average was nearly 22 minutes, as
13 reported in the TOU monthly report to Staff. The longer call times reflect an investment in
14 customer education, talking to the customer about their rates, and assisting them with
15 online tools. This investment in customer education likely contributed to a more informed,
16 engaged customer base, capable of making autonomous decisions online or by phone
17 regarding their rate plans. I have included the Company's last TOU report in 2024 as
18 **Schedule CC-3.**

19 **Q: On page 19 of her rebuttal testimony, Ms. Kremer cites call center metrics during**
20 **the TOU roll-out months compared to the same metrics during 2021. Does this**
21 **comparison make sense to you?**

22 **A:** Yes, on page 19 of Ms. Kremer's testimony, she mentions the percent of abandoned calls
23 and the average speed to answer for the months of August, September, and October for the

1 years of 2021 and 2023. The months of August, September, and October in 2023 were the
2 highest TOU-impacted months. It is logical that those metrics would not be in line with
3 2021 data during the same period of months.

4 **Q: Ms. Kremer describes in her testimony that contact center escalations should be**
5 **considered complaints as defined in 20 CSR 4240-13.015(1)(D). Do you agree with Ms.**
6 **Kremer's assessment?**

7 A: No, I respectfully disagree and refer to Mr. Caisley's rebuttal testimony on page 16, where
8 he addresses this question. As noted by Mr. Caisley, many of the calls considered
9 escalations in the contact center are minor issues and are not considered complaints. They
10 may involve process clarification for new CSRs or there may be certain processes such as
11 fraud that require an escalation. Evergy is handling these escalations consistently with how
12 we have done for many years and this has not ever been an issue. Additionally, Mr.
13 Glasgow does not agree with Ms. Kremer's assertion and believes that Evergy is compliant
14 with all statutory requirements for informal or formal complaints as defined in 20 CSR
15 4240-13.040 (5)(B).

16 **Q. Does Staff agree that EMW is not compliant with Commission Rule 20 CSR 4240-**
17 **13.040 (5)(B)?**

18 A. No. It is Staff's opinion that when Commission rules refer to complaints, they are referring
19 to informal and/or formal complaints registered with the Commission. Complaints are
20 defined in 20 CSR 4240-13.015(1)(D) as: "Complaint means an informal or formal
21 complaint under 4 CSR 240-2.070." Commission Rule 20 CSR 4240-2.070 establishes the
22 12 procedures for filing formal and informal complaints with the commission. Included

1 herewith as **Schedule CC-4** are the Company's responses to certain Data Requests that
2 may provide more context and helpful information.

3 **Q: You mention monthly, quarterly, and TOU reports in some of your above responses.**

4 **Did Mr. Glasgow have access to any documents that you mention in your testimony?**

5 As a Staff member of MPSC, Mr. Glasgow would have access to quarterly reports. Each
6 month's slide decks are provided to Staff in advance of the MPSC quarterly meetings, as
7 well as the Monthly Evergy West Customer Service Data Detail report which are emailed
8 to MPSC each month.

9 **Q: What is your reaction to Mr. Glasgow's mention of Evergy surpassing its speed to
10 answer goal in 2024?**

11 A: We agree with Mr. Glasgow, Evergy is surpassing its Speed to Answer goal in 2024. I
12 would refer to Mr. Caisley's rebuttal testimony on page 17, where he comments that
13 Evergy is having its best year since merger as it pertains to customer service metrics. The
14 implementation of many tactical adjustments has been the right approach to grow into this
15 fast-paced environment of technological advancement. Average speed to answer July YTD
16 is 33 seconds, SL is 89%, and ACR is 1.9%, as shown in our monthly report to the MPSC.
17 We believe we are seeing a stabilization in the labor arena. Evergy strives to exceed its
18 baseline goal while continuously adjusting to an ever-changing environment, leading to
19 ongoing positive trends.

20 **Q: Does that conclude your testimony?**

21 A: Yes, it does.

***Customer Service
Performance Review
(Q3 2022)***

Missouri Public Service Commission

November 29, 2022

Agenda

Voice of Customer Survey Q3 2022

Customer experience up YoY: Combined Centers 2021: 4.24, 2022: 4.30

- Overall satisfaction with your call experience
- Energy made it easy for me to accomplish my task
- Overall satisfaction with the customer service representative

Succes and Challenges

- Labor market continues to be a challenge
 - Contract Classes not filling to capacity along with poor attrition
 - Exploring overflow Business third-party call center
 - Exploring hours of operation 89% of calls are between 7am-5pm. Moving this direction would allow for an additional current CSR with in the highest peak time frame.
- Success of Customer Self Service
 - IVA Containment 63%
 - Web Start completions up 16% compared to Sept 2021
 - Self-Serve (Web & IVA) Stop completions up 12% since Sept 2021
 - Mobile App
- Impact to Contact center
 - More difficult and complex calls left for call takers resulting in longer call times reflecting in higher abandon times.
 - Despite the challenges, Customer Satisfaction is still holding strong.

Focus Areas

- Exploring industry standards for metrics
- Define and track First Call Resolution
- Q4 Combine Workforce Management and Quality Assurance groups
 - High focus on QA scores continuing to deliver high Customer Service scores.
 - Drive down call times.
 - CSR engagement to reduce shrinkage.

Revenue Management

Travis Lincoln

Director, Revenue Management

travis.lincoln@evergy.com

David Austin

Manager, Credit Management

Performance Review
(Q1 2023)
Missouri Public Service Commission***

June 6, 2023

Agenda

10:30 am	Safety Moment & Introductions	Sarah Gott
10:40 am	Performance Updates:	
	▪ Self-Service	Dave Clauson
	▪ Contact Center	Cindy Circo
	▪ Revenue Management	Travis Lincoln
	▪ Customer Affairs	Maria Lopez
12:00 pm	Wrap-up & Adjourn	Sarah Gott

Safety Moment: Juice Jacking

Recommendations to protect yourself and your data

- 
- 1. Avoid public charging stations**
 - 2. Always select “charge only”**
 - 3. Avoid using charging cables and power banks that seem to be left behind.**
 - 4. Carry your own external power bank charging source**
 - 5. Use a USB “data blocker”**

Self-Service

Dave Clauson
Director, Digital Strategy
dave.w.clauson@evergy.com

95% of Customers Used Self Service

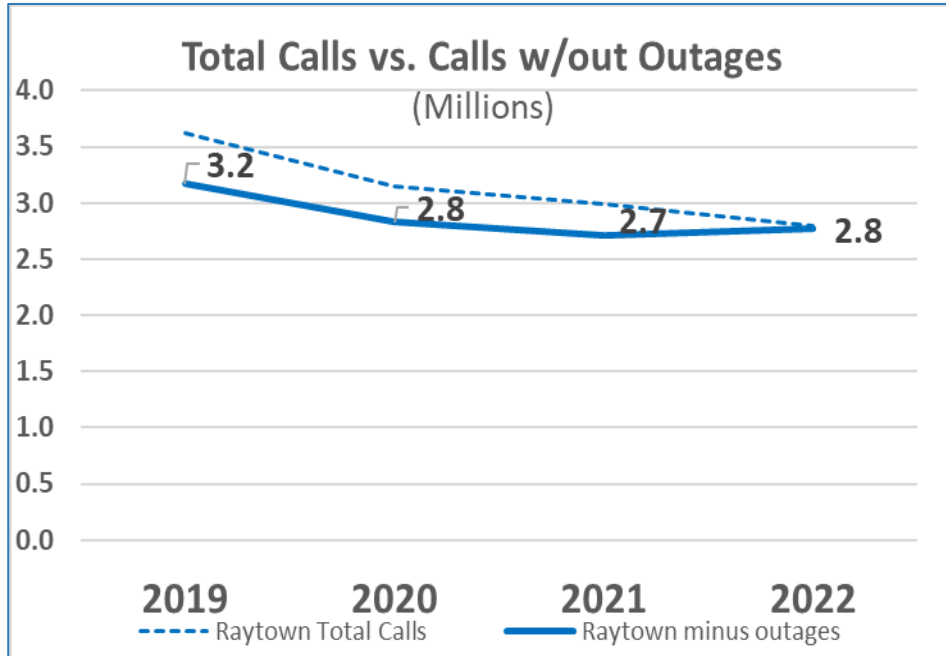

- Web channel share grew 2% points in Q1
- IVA still handles significant portion
- CSR traffic mix has declined 3% points in Q1

Total calls continue to decline...

Calls have decreased by 900k over the last 4 years

- Q1 tends to have less call volume than other quarters. However, we still see a drop in overall calls.

IVA Containment at All-Time High

- Represents a 2% increase in containment for Raytown over Q1 2022 (65%).
- Q1 is always a good quarter for containment.

Online Accounts are up 6.5% YoY

Evergy Mobile Share 65.7%

Customer logins driving Mobile Growth...

Evergy Mobile App downloads exceed expectations

Evergy Self-Service Payment Mix up 3% pts YoY

Mail payments have declined by 2% pts YoY

- Self-Service payments include, in order of volume: One Time Payment, Autopay, Third party web, IVA (automated phone)
- CSR payments are actually 0.5%

Self-Service in 2023

- IVA Start Service 1Q23 (Live)
- Uplight Non-Residential Tool (Live)
- MO TOU Self-Service Support (Web & IVA)
- Opt-in Outage enrollment continuation

Voice of Customer Survey

- *Overall satisfaction with your call experience*
- *Evergy made it easy for me to accomplish my task*
- *Overall satisfaction with the customer service representative*

What our customers are saying

Email:

I had to go out of my way to let individuals at Evergy know that Holly with customer service was fantastic assisting me this morning (1/26) with what was a confusing situation. Well at first it was when I called, but she quickly and politely explained it to me and fixed the issue. She is a wonderful asset to your company, and I know when it comes to customer service it is a difficult and often thankless position, so I just wanted to reach out and give one of your great associates the praise that they deserve.

Call:

Spoke to Robin who states that CSR (Staci Mendoza) yesterday was professional and to the point. States you don't see that kind of customer services every day and just wanted us to know she did an excellent job.

Mail:

Thank you for your thoughtfulness. You took time out of your day to bring a smile and reward of faith in humanity to a stranger.

Focus Areas/Accomplishments

- **Workforce**
 - Hours of Ops - Day One June 16, 2023
 - Spring contract class – TOU
- **Training**
 - Annual Ethics and Compliance training
 - Uplight CSR Tool Training
 - TOU workshops
- **Average Handle Time**
 - Call to Contact Center are the most complex and difficult.
 - Evaluating data
- **Technology Roadmap**
 - Verint Upgrade - Q3 2023

Results

Since entering Phase 3 of the education campaign in August:

- Phase 1 (June-August): saw uptick in calls, with more informational questions
- Phase 2 (August-October): an average of over 250 TOU calls per day, helping customer pick a rate and educational focus
- Phase 3 (October-December): call offers and average duration times are lower
- Phase 4 (January – May): calls offers continue to decrease with a little higher duration time compared to all other calls

Third Party Quarterly Survey

Quarterly TOU Awareness & Understanding Research

End-of-Year Report and Wave1,
Wave2, Wave3 Trend Analysis

Insights by TrueNorth

Jan 2024

Objective and Methodology

Measure the Impact of how the Time-of-Use Campaign is Performing on Educating its customers

- Measure awareness of the transition to a Time of Use rate plan.
- Determine understanding of and familiarity with Evergy's specific TOU rate plans and the appeal of multiple rate plans to fit customers' lifestyles.
- Measure overall satisfaction with Evergy as a provider and with customers' current rate plan.
- Monitor customer's opinions and perceptions of Time Of Use rate plans and reactions to Evergy making this change.

Survey

- A 15-minute online survey was conducted in May 2023 among n=600 respondents, wave 2 in September 2023 among n=604 respondents, and wave 3 in December among n=603. This was a blind study among Evergy customers

Sample

Respondents were screened based on the following criteria.

- 18+ years old
- Evergy is the current electricity supplier
- Sole or joint decision maker for household energy decisions
- If renter, electric bill must not be included in rent

Executive Summary

There is relatively high awareness for the new rate plans

- Over 3x the number of customers indicated they heard about the new rate plan options by wave 3.

- Customers are becoming increasingly familiar with the plans, with 82% being familiar with the plans. Those indicating they know “a lot” or “a good amount”, increased a significant +7 percentage points in wave 3.

Many proactively selected their new rate plan

- Over half of customers proactively selected their plan, 56%. When selecting a plan, most selected the TOU plan at 51%, while some still chose the standard utility rate plan at 33%.
- Proactive plan selectors were overall more satisfied (35% vs 21% non selectors)

Overall satisfaction with Evergy is Coming Back Around

- There was an initial drop in satisfaction overall; however, satisfaction has started to show an increase in W3.

Executive Summary

The TOU awareness campaign was successful

- Awareness of the Time of Use Plan saw an increase of 38% among non-plan users from May to December throughout the ad campaign, with the most significant increase shown in September.

Time Of Use Plan Awareness

- Around 3 in 4 recall communications about TOU rate plans, with the top recall including mail, email, and the electric bill insert.

Communications

Satisfaction with the TOU plan remains low

- Although we do see a significant increase in TOU customer satisfaction in wave 3.

Satisfaction with their Current Plan
(% extremely/very satisfied)

W2 Diff

Rate Plan	Satisfaction (%)	W2 Diff
Green-based rate plan	63%	-7%
Electric vehicle rate plan	60%	-7%
Solar rate plan	56%	-9%
Tiered rate plan	37%	+14%
Standard utility rate plan	30%	-8%
Time-based rate plan	28%	+8%

Opportunities

- Most understand the basic premise of the plan, but still opportunity to learn more.
- There remains some divergence in opinions as to whether the TOU plan will save customers money (30%), or cost more (26%).

Awareness and Satisfaction of Rate Plans

- *Satisfaction with Evergy*
- *Awareness of plans*
- *Selection of Plans*
- *Satisfaction of Plans*
- *Awareness of Online Tools*
- *Evergy Brand Evaluation*

Awareness of New Rate Plans

Approximately 75% of respondents noted awareness of the various rate plan options, with a notable +10% increase in TOU comments observed in W3.

Have Heard About the Rate Plan

Analysis Note: Customers under age 44 are least likely to have heard about the new rate plan. (36% vs 75% overall)

Have Heard About the Rate Plan

Base: Missouri respondents W1 n=601; W2 n=604; W3 n=603

Q12. Today, we are talking about your electricity supplier, Evergy. Have you seen or heard anything recently about Evergy offering new rate plan options to customers?

Base: Missouri respondents aware of new rate plan W1 n=146; W2 n=477; W3 n=451

Q13. What type of new rate plan is Evergy offering customers?

Aided Awareness of Rate Plan Options

Almost double of customers were aware of the different choices by the end of the year.

Aware of Choices of Different Types of Rate Plans

Familiarity with Rate Plans

Base: Missouri respondents Q14 W1 n=600; W2 n=604; W3 n=603 and Missouri respondents aware of different plans Q15 W1 n=270; W2 n=489; W3 n=495

Q14. Are you aware that Evergy currently offers you choices of different types of rate plans?

Q15. How familiar are you with the different types of plans available from Evergy?

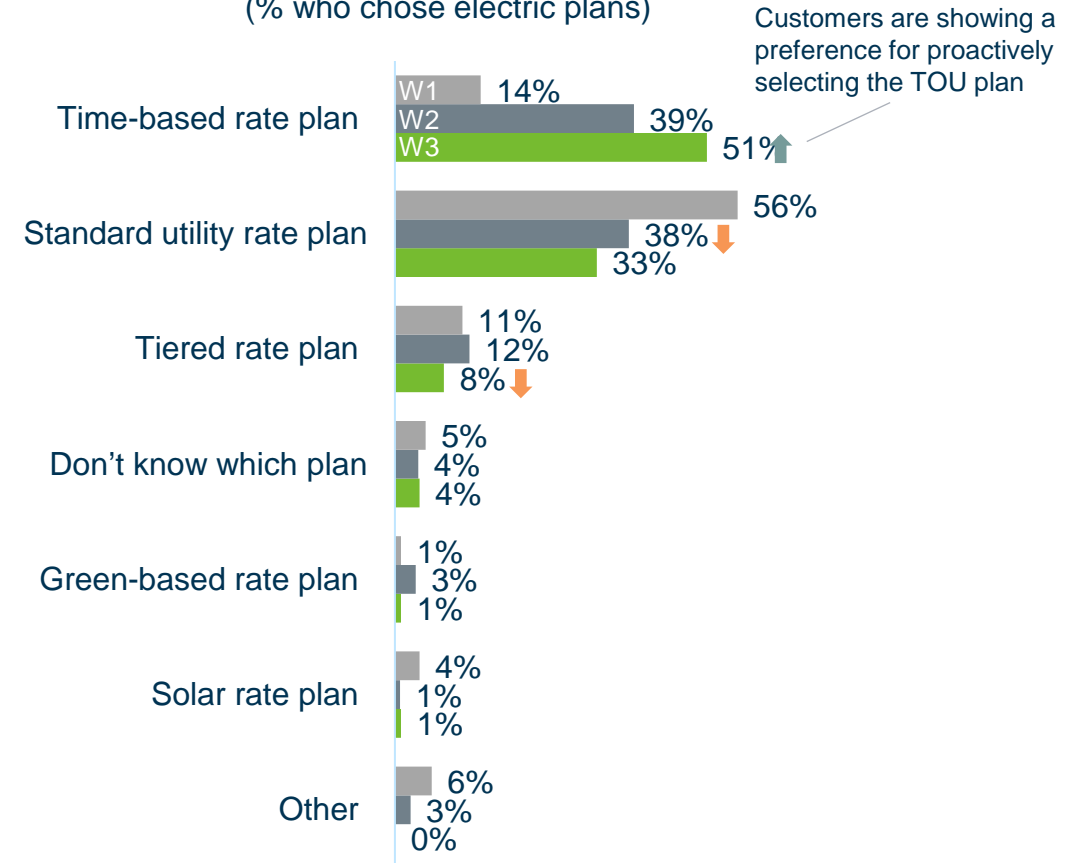

Selection of Rate Plans

A growing number of customers opted for a proactive approach in choosing their rate plans across successive waves.

Actively Selected Rate Plan
(% selected rate plan)

Electric Plans
(% who chose electric plans)

Base: Missouri respondents W1 n=600; W2 n=604; W3 n=603 and Missouri respondents who chose plan Q17 W1 n=270; W2 n=238; W3 n=336
 Q16. Did you actively select your current rate plan, or did Evergy assign you to a default rate plan?
 Q17. What electric rate plan did you choose?

Overall Satisfaction With Evergy

Just over half (53%) of customers are satisfied with Evergy. This marks a positive shift from the significant decline seen in Wave 2.

Satisfaction with Current Rate Plan Selection

While there is a general decrease in overall satisfaction, those who proactively selected their plan were more likely to indicate higher satisfaction.

Overall Satisfaction with Evergy Rate Plans

Although representing a smaller demographic, customers enrolled in the green-based, electric vehicle, or solar rate plans consistently exhibit high levels of satisfaction.

Awareness and Usage of Evergy Tools

A growing number of customers are aware of tools on the website.

Knowledge of Tools on Evergy's Website

(% overall respondents)

Usage of Tools

(% aware of tools)

Base: Missouri Respondents W1 n=600; W2 n=604; W3 n=603

Q44. Did you know that Evergy is providing tools on their website which you can use to understand your electricity usage to help you choose the Time Of Use rate plan which is best for you?

Base: Missouri Respondents aware of website tools W1 n=152; W2 n=347; W3=391

Q45. Have you visited the Evergy website and used any of these tools?

Evergy Brand Evaluation

There has been a notable surge since W2 in brand perceptions relating to, leadership, communications, and resourcefulness.

Evergy has increased perceptions in 6 attributes since W1. Evergy is more likely to be seen as:

- Helpful in providing resources and information (+10% since w1), managing home energy use (+10% since w1), and helping customers manage bills during seasonal weather(+7% since w1).
- A supportive leader of local business and the community (+3% since w1), with communications fitting with their image (+8% since w1), and proactive and transparent with customers (+6% since w1).
- There is only one perception significantly lower than in W1: provides more reliable service than other utility companies (-3% since w1).

Statements to Describe Evergy

(% overall respondents)

W3 v W2 W2 v W1

Statement	(% overall respondents)	W3 v W2	W2 v W1
Provides helpful resources and information	37%	7% ↑	3%
Helps me manage my home energy use	30%	8% ↑	2%
Proactive and transparent with customers	26%	1%	5% ↑
Communications from Evergy fit with their image	25%	5% ↑	3%
Helps me manage my bill during changes in seasonal weather	25%	5% ↑	2%
Powers my life with affordable and reliable power	23%	4%	-4% ↓
Seeks customer or community input on important issues	20%	2%	-1%
Supports local businesses and my community	20%	6% ↑	-3% ↓
Seen as a leader in its communities	18%	4% ↑	-3%
Provides more reliable service than other utility companies	16%	1%	-4% ↓
An important part of customers' lives, beyond providing energy	15%	3%	-4%
Is seen as an innovator in its communities	13%	1%	0%
Has my best interests at heart	13%	2%	0%
Adds value beyond just providing energy	9%	0%	-1%
Cares that my home is where I can be myself	8%	1%	-2%
None of the above	26%	-6% ↓	2%

Time of Use Rate Plans

- *Awareness*
- *Understanding of the plan*
- *Recalled messages*
- *Plan perceptions*
- *Interest in the Time of Use Plans*

Time of Use Rate Plans

Awareness of the TOU plans has more than doubled since W1.

Awareness of Time-Based Plans
(% not on plan)

Knowledge of Time-Based Rate Plans
(% aware of plans)

Base: Missouri respondents not on Time Of Use plan Q20 W1 n=559 ; W2 n=479; W3 n=360

Q20. Before today, have you ever heard of Evergy's time-based rate plans? This would be a rate plan where electricity costs will vary based on the time of day you use it.

Base: Missouri respondents not on Time-Based but who have heard of it Q21 W1 n=204; W2 n=339; W3 n=267

Q21. How would you rate your knowledge of the different time-based rate plans that Evergy allows you to choose from? (10-point scale with 10 as Know a great deal and 1 is Know nothing at all)

↑↓ Statistically higher/lower than previous wave

TOU Perceptions

Most understand the basic premise of the plan.

Many understand you pay more for your electricity during peak hours and less off-peak

- However, there is room for improvement; less than half believe you can change when you use electricity in your home to save money, 43%.

There remains some division on whether the TOU plan will save money

- Around 30% indicated time-based plan would lower your electric bill, while 26% indicated the plan could make your bill higher.

What Customers Believe About the Rate Plans

↑↓ Statistically higher/lower than previous wave

Customer Are Increasingly Informed About the TOU Plans

Communication channels such as mail, emails, and inserts are most effective.

Recall Rate Plan Communications

Where Customers Have Heard Communications

Base: Missouri respondents Q23 W1 n=600; W2 n=604; W3 n=603 and Q25 W1 n=206; W2 n=490; W3 n=513 those who have heard about communications
Q23. Do you recall any communications from Evergy about the new rate plans where the electricity costs will vary based on the time of day you use it?
Q25. Which, if any, of the following changes to your Evergy electric service have you heard about?

Message Retention

Most customers are aware that if they do not switch, they will be automatically enrolled in a plan, up significantly since W1.

Changes to Electric Services Respondents Have Heard About

Future Communications Preference

Over half (58%) want more information, although many feel as if they already have the information they need.

More people in W3 (+10%) indicated no more information was needed vs W2 (32%).

Customer Comments

- “What are the different **time frames**?”
- “How **can I use less energy**?”
- “**Nothing**, I already have one.”
- “What is **my cheapest route**?”
- “Which one is **most cost-effective**?”
- “**What choices are there**? Are there options to use energy during the day and not pay so much extra for work-from-home employees?”
- “**Cost differentials**, what would it cost the same energy usage on a different plan?”

Awareness Continues to Increase

More believed the benefits of TOU were for the government, Evergy, or the environment and less for the benefits of the consumer.

Awareness of Time-of-Day Rate Plan

↑↓ Statistically higher/lower than previous wave

Why Evergy Needs Customers on a Time-Based Plan

Significantly fewer people in W3 said, "Increase rates" (-6%)

Now that customers know about the plan, the focus needs to be on communicating the benefits.

Base: Missouri respondents W1 n=600; W2 n=604; W3 n=603
 Q26. Before today, were you aware that the costs of electricity will vary based on the time of day that you use it by the end of 2023?
 Q27. Why do you think Evergy needs to change all their customers to enroll in a time-based rate plan? (unaided)

Perceptions of Why Evergy is Switching to TOU Plans

Several perceptions saw increases in W3.

Uncertainty Exists on Money Saving Ability of TOU Plans

However, most customers who believe they will save money, believe they will save more than just a little.

Perception of Saving Money on a Time-of-Use Rate Plan

(% all respondents)

Amount Saved

(% of those who believe it will save money)

Base: Missouri Respondents W1 n=600; W2 n=604; W3 n=603

Q42. Do you think you will save money with the new rate plan?

Base: Those who think they will save W1 n=123; W2 n=99; W3 n=139

Q43. How much money do you think you will save?

How Evergy Switching to TOU Affects Perceptions

Unfavorable views have decreased since wave 2. The remaining customers are divided.

Current Electric Plan (Selectors and Non-Selectors)

The trend of embracing the TOU plan has continued to gain momentum consistently across successive waves.

The likelihood of being on the standard utility rate plan or the time-based rate plan is evening out

- The proportion of these customers who did not know their plan dropped significantly from Wave 1. Only 11% indicated they did not know which plan they were on in Wave 2 compared to 35% in Wave 1.

Current Electric Plan

The Overall Appeal of the TOU Plan is split

However, most residents found the ability to choose their rate plan at least somewhat appealing.

Overall Appeal of Time Of Use Rate Plan

Appeal of Being Able to Choose Time Of Use Plan

Base: Missouri respondents W1 n=604; W2 n=604; W3 n=603

Q30. How appealing is the idea of switching to a rate plan where you get charged different amounts for electricity used at different times of the day?

Q31. Every customer is going to have a choice of time-based rate plans so they can select the one that best fits their lifestyle. How appealing is the idea of being able to choose the rate plan that best fits how you use electricity?

↑ ↓ Statistically higher/lower than previous wave

Customers Express Concerns About Switching to TOU

Campaign Strategy, Outreach Examples and Special Customer Group Approach

Communication Strategy & Special Group Customer Details

Campaign Goals

Goals

1. Prepare customers for the upcoming change in rate structures, including the new mandatory rate, and how TOU rates work.
2. Offer choice and inform customers of their rate options and the benefits depending on the customer's lifestyle.
3. Provide customers with tools, resources, and reports that serve to help them understand TOU rates and options, empower them to choose their rate, and provide guidance to modify their behaviors so that they can mitigate usage and bill impact to increase their success on a TOU rate.
4. Help all customers (and with increased emphasis on special customer groups) be successful before, during and after the mandatory TOU rate transition and/or enrollment on their selected TOU rate option.

Education and Awareness Strategy

Strategy Overview: Use a phased approach, that incorporates both mass awareness and direct marketing tactics, to move a customer from awareness to action and then finally to transition and success.

Campaign Phase	Objective	Message Idea	Tactic Type
Phase 1 Awareness & Education June 15 th – Nov. 30 th , 2023	Inform customers that Missouri is changing rate structures soon and educate them on how TOU rates work.	Missouri will be changing electric rate structures starting this Fall. Learn how to prepare.	Mass Awareness
Phase 2 Action & Preparation Aug. 1 st – Nov. 30 th , 2023	Prepare customers for the upcoming change, inform them of their rate options & how they work, and encourage pre-selection of a rate.	As Missouri moves to TOU rates, Everygy is offering new personal power plans. Learn about your plan options and select a plan before October.	Mass Awareness and Direct
Phase 3 Transition & Coaching Oct. 1 st – Dec. 31 st , 2023	Ensure customers know they will be defaulted into a new rate and provide coaching to help them be successful on the new plan.	Your rate will change on X date. We are here to support your transition to TOU.	Direct
Phase 4 Success & Coaching Jan. 1 st – April 30 th , 2024	Help customers understand how their rate works and encourage shifting usage to off-peak times.	Your new rate allows you to save money by shifting to off-peak times. Here are tips and tricks to help you save.	Direct
Phase 5 Summer Prep & Coaching May 1 st – Sept. 30 th , 2024	Prepare customers for the change in summer pricing and provide tools, tips, and resources to avoid summer peak usage.	Prices change in the summer, start preparing your home and family to avoid high usage during the summer.	Mass Awareness and Direct

Campaign Phases

Mid-June	July	Aug.	Sept.	Oct	Nov.	Dec.
----------	------	------	-------	-----	------	------

Phase 1: Awareness & Education →

June 15th – Nov. 30th

Phase Objective
Inform customers that Missouri is changing rate structures soon and educate them on how TOU rates work.

Main Message Idea
Missouri will be changing electric rate structures starting this Fall. Learn how to prepare.

Tactics
Out-of-Home, Social, Digital Display, Email, Bill Inserts/Message, Website, Media Relations, Search

Creative Approach
Text over branded background. CTA: Learn more at evergy.com

Phase 2: Action & Preparation →

Aug. 1st – Nov. 30th

Phase Objective
Prepare customers for the upcoming change, inform them of their rate options & how they work, and encourage pre-selection of a rate.

Main Message Idea
As Missouri moves to TOU rates, Evergy is offering new personal power plans. Learn about your options & select a plan before Oct.

Tactics
Out-of-Home, Radio, Digital Display, Search, Social, Media Relations, Rate Education Reports, Direct Mail, Community Events & Special Group* 1:1 Support, Website

Creative Approach
Addition of lifestyle images and rate plan creative. CTA: select your rate now.

Phase 3: Transition & Coaching →

Oct. 1st – Dec. 31st

Phase Objective
Ensure customers know they will be defaulted into a new rate and provide coaching to help them be successful on the new plan.

Main Message Idea
Your rate will change on X date. We are here to support your transition to TOU.

Tactics
Direct Mail, Email, Energy Coach Emails and Weekly Reports, Community Events & Special Group* 1:1 Support

Creative Approach
Energy Coach and detailed plan information.

Q1 2024	Q2 2024	Q3 2024	Q4 2024
---------	---------	---------	---------

Phase 4: Success & Coaching →

Jan. 1st – April 30th, 2024

Phase Objective
Help customers understand how their rate works and encourage shifting usage to off-peak times.

Main Message Idea
Your new rate allows you to save money by shifting to off-peak times. Here are tips and tricks to help you save.

Messaging Strategy

Overarching Campaign Message

Missouri is changing electric rate structures this Fall, and Evergy is here to help you understand your new rate options, how to pick a plan that is best for your home, and how to be successful on the new plan as the seasons change. This means that Missouri customers will have a choice of electric rate plans that fit their household. The new rate plans will help you save money when using less energy during peak times, when people use it most.

Sub Message by Campaign Phase

Phase 1

Missouri will be changing electric rate structures starting this Fall. Learn how to prepare and review your new plan options.

Phase 2

Evergy is offering new rate plans to help you save money by using less energy during peak times, when people use it most. Learn which plan may be best for you and select an option by October 2023.

Phase 3

Your new rate plan will start in October/November. You can save money on your new rate plan by shifting usage away from peak hours of 4-8pm, learn how.

Phase 4 & 5

As the seasons change, Evergy will support you with customized rate education and usage reports to help you maximize savings with on your new time-based rate plan.

Key Messages

	Phase 1	Phase 2	Phase 3	Phase 4 & 5
Objective	Inform customers that Missouri is changing rate structures soon and educate them on how TOU rates work.	Prepare customers for the upcoming change, inform them of their rate options & how they work, and encourage pre-selection of a rate.	Ensure customers know they will be defaulted into a new rate and provide coaching to help them be successful on the new plan.	Prepare customers for behaviors needed to lessen impact of high usage season.
Primary Message	Missouri is moving to time-based rate plans this Fall.	We have 4 new time-based rate plan options. Select your plan before October.	Your energy rate plan is changing to the {Rate Plan Name}. Evergy is here to help during the transition.	We are heading into high energy use season and we want to make sure you are managing your new rate plan during seasonal changes.
Supporting Message	Timing plays a crucial role in the cost of energy. That is why Missouri is moving to time-based rate plans. As the demand for energy rises, so does the cost of producing electricity. This usually takes place during the busy peak hours of 4-8pm. Conversely, the demand for energy decreases during off-peak times, typically in the early morning and overnight, resulting in lower energy costs.	<p>Missouri is changing how electric rate plans work this Fall, so Evergy has introduced four new rate plan options to fit your household needs. To help you choose the best option for you, we have developed new tools that analyze your energy usage and determine the plan that offers the greatest savings. Every household is different, so your savings will depend on how much energy you're able to shift to times when the demand is lower and energy is cheaper.</p> <p>If you don't want to make a choice by October, you'll be moved to the Standard Peak Saver plan.</p> <p>Timing plays a crucial role in the cost of energy, which is why Missouri is moving to time-based rate plans. As the demand for energy rises, so does the cost of producing electricity. This usually takes place during the busy peak hours of 4-8pm. Conversely, during off-peak times, typically in the early morning and overnight, the demand for energy decreases, resulting in lower energy costs. According to our analysis, the time-based rate plan offers a modest cost reduction for the majority of customers, with savings varying depending on the season.</p>	<p>Since you have transitioned to a time-based energy rate plan, it is important to minimize significant energy usage between 4-8pm. During this period, we recommend reducing use of high-energy appliances or activities that consume a substantial amount of electricity. By avoiding peak hours, you can reduce your energy usage and benefit from lower costs.</p> <p>As the demand for energy rises, so does the cost of producing electricity. Helping Groups At-Risk with New Rates

Income-Eligible & Seniors

Strategy: Leverage community events and trusted agency partners to offer more educational opportunities.

Electric Heat Customers

Strategy: Increase customer engagement with TOU plans through targeted direct mail, email, and trade ally network efforts.

Net-Meter & Solar Subscription

Strategy: Proactively inform these customer they are moving into the Default Time Based Plan and educate on how the rate works.

Income-Eligible and Seniors

Strategy: Enhance TOU engagements by leveraging community events and collaborating with trusted agency partners to offer more touchpoint and educational opportunities.

Special Support Tactics:

- Conduct training workshops for agency partners to enhance their knowledge and ability to promote our services.
- Develop a bilingual handout and video on Time-of-Use (TOU) plans in Spanish to facilitate customer understanding and engagement.
- Participate in over 70 community events from June to October to create awareness about our services and engage with potential customers.
- Organize Connect Center events to offer in-person assistance and support to customers.
- Increase the frequency of email and direct mail campaigns to better inform and engage customers about our services.
- Offer both in-person and virtual appointments to provide more convenient options for customers to learn about and sign up for our services.
- Targeted paid media tactics to provide additional touchpoints.
- Specialized TOU support number highlighted on education material.
- Food bank and Library outreach events and materials

evergy

Your current rate plan will be changing.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. This means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

To meet the new requirement, Evergy will move you to our new Standard Peak Saver plan in October. No action is needed on your part.

How does the Standard Peak Saver plan work?

- **October through May:** During these months, the cost for energy will be lower all day, every day. It's especially lower during super-off peak times from midnight to 6 am.
- **June through September:** During these summer months, the cost for energy is highest during peak hours of 4-8 pm Monday - Friday. All other times the cost for energy is lower than you pay today.

Tip: To lower your energy bill with this new plan, try to limit the use of large appliances, like the clothes or dishwasher, during the summer months from 4-8 pm Monday through Friday. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on monthly bill.

Want a different rate plan?

Evergy has three other time-based rate plans, including our new Peak Reward Saver plan, which is similar to the plan you have today. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online Personalized Rate Comparison Tool or read your Rate Ed Report that arrived by mail in August to see which of the other plan options may be best.

We're here to help!

We know rate plans can feel confusing. If you need help, we are here to assist you.

- **Give us a call:** 1-800-541-0427 from 7 am to 5 pm Monday through Friday.
- **Visit us in-person:** Evergy Connect from 9 am to 4 pm Monday through Friday, 1710 The Paseo Blvd., Kansas City, MO 64108.
- **Visit us online:** evergy.com/SavePlans

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- **Delay running your dishwasher:** Use your dishwasher timer to delay running it until after peak hours.
- **Adjust when you use your dryer:** Electric dryers use more energy than washing machines, so you'll save even more money when you wash for off-peak hours to dry your clothes.
- **Use a smart thermostat to automate off-peak savings:** Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- **Be mindful of peak hours:** Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The average to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Electric Heat Customers

Strategy:

Increase customer engagement with TOU plans through targeted direct mail, email, and trade ally network efforts, emphasizing the best available rates and winter savings tips.

Special Support Tactics:

- Conducted a workshop with trade allies in May to educate them about the change with Electric Heat Rate.
- Will send an additional Rate Education Reports (RER) for customers who are not on the best plan.
- Increase direct mail and email campaigns to electric heat rate customers.
- Provide winter heating coaching support as part of Phase 4, to assist customers in maximizing their savings during the winter season.

It's time to select your new time-based rate plan.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

With time-based rate plans, you'll pay less for energy than you do today during 20 off-peak hours a day, but when energy demand is high during the peak hours of 4-8 pm, the cost for energy will be higher. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

In order to assist customers with this change, Evergy has developed four new time-based rate plans for you to choose from. It's important to select your new plan by October. If you decide not to choose a new plan, you'll be moved to the new default plan, the Standard Peak Saver starting in October.

Visit evergy.com/SaverPlans or call 1-800-541-0407 to learn more about the plan options and to select your new plan.

We invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which plan best fits your household based on your past energy usage.

An important note about your old rate plan
As part of the new mandate from the MPSC, your current All-Electric rate plan (or electric space heating rate) is being discontinued. Your old plan offered a discounted rate in the winter for electric space heating customers, which is no longer offered. Due to this change, customers with electric heat may experience more impact moving to time-based rate plans, making it especially important to understand your home energy usage, and shift large appliance usage, like doing laundry and running the dishwasher, to off-peak times.

*Note: If you have selected a payment plan (such as the Standard Peak Saver) and have a Budget Billing program, you will receive a separate Rate Education Report. Please contact your account manager for more information.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher. **Do shift a few of your major appliances to off-peak times to save on your energy costs.**

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Net-Meter & Solar Subscription Customers

Strategy:

Proactively informed net-meter customers of the change in their rate to the Peak Reward Saver plan and provided them with comprehensive information on how the rate works.

Special Support Tactics:

- Sent a direct mail letter to all net-meter customers, providing them with clear and concise information about the upcoming change in their rate and how it will impact them.
- Followed up with multiple email touchpoints to remind and update customers about the rate change, and to offer additional support and assistance as needed.
- Provided specialized TOU support number for net-meter customers to provide assistance and answer any questions.

evergy

Your new time-based rate plan is coming soon.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Net Metering program, your rate plan with Evergy will change to the Peak Reward Saver plan in October.

The Peak Reward Saver plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 5 am every day.

The Peak Reward Saver plan is the only plan currently available for Net Metering customers.

Peak Reward Saver
Closest to Our Current Standard Residential Rate

12am 6am 4pm 8pm 11pm

Peak hours (2¢) Off-peak hours (1¢) Super Green hours (0¢)

What's next?
This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your energy will be billed on the Peak Reward Saver Plan. If you have questions, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit evergy.com/SaverPlans.

Why is Missouri moving to time-based plans?
Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Why can't I pick one of the other time-based rate plans?
The MPSC has ordered that Net Metering customers move to the Peak Reward Saver plan. This is partly due to Missouri state statute that specifies how net metering is to be calculated and when it is to be available. The Peak Reward Saver plan is currently the only rate plan that meets the Missouri statute criteria.

Are there changes to my net metering agreement?
Although your rate plan is changing, your net metering agreement is not. Just as now, Evergy will purchase energy from you at the Cost to Fuel rate.

How to save on the Peak Reward Saver plan.
This plan is very similar to your current rate, but you can save money by shifting some energy to overnight times. You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Example of Special Group Customer Outreach Journey

Missouri is moving to time-based electric rate plans this fall.

Choose your new plan by October or you'll be placed into the Standard Peak Saver Plan.

It's time to choose your new time-based rate plan.

We're here to help. To help you understand the best plan for your household, we have developed online tools and resources that answer your energy usage and determine the plan that best fits your household.

Check out our **Rate Education Report** arriving in your mailbox or visit [energize.com/SavePlans](https://www.energize.com/SavePlans) to learn more.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered utilities to transition to time-based rates. This means that electricity rates will vary throughout the day. The goal of time-based rates is to encourage customers to use electricity during off-peak hours, which helps reduce the need for new power plants and lowers the overall cost of electricity.

Four new time-based rate plans - Choose by October:

- Standard Peak Saver:** The most popular rate plan, featuring a single on-peak period during the day.
- Peak Reward Saver:** Offers a reward for using electricity during off-peak hours.
- Nights & Weekends Saver:** Offers lower rates during evenings, weekends, and holidays.
- Nights & Weekends Max Saver:** Offers the lowest rates during evenings, weekends, and holidays.

Early August - Postcard

Introducing Your New Rate Plans

You may have heard: Missouri is moving to time-based rate plans this fall.

The Missouri Public Service Commission has required utilities, including Energy, to transition to time-based rates in order to assist customers with their energy needs. This report will help you understand the possible costs of each of the new rate options and how you might be able to save money by shifting energy usage to off-peak times.

Why is Missouri changing?

Timing plays a crucial role in the cost of energy, which is why Missouri is moving to time-based rates. The cost of producing electricity, resulting in 'peak' and 'off-peak' times. During off-peak times, the demand for energy decreases, resulting in lower energy costs. By shifting your large appliance use to off-peak times, you can take advantage of these lower rates and potentially save both energy and money on your new rate plan. With time-based rates, you'll see the energy cost of the time.

A note about electric heating

Since you home use electric heat, it's especially important to understand how time-based rates affect your heating costs. Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that reduces usage during the peak hours of the day. If you don't have a smart thermostat, Energy offers free **Smart Thermostat** services. You can start by using our **Home Profile Tool**, which can show you where your home uses energy along with suggestions on how to save.

We're here to help

Energy has developed our Rate Education Report, along with our **Rate Comparison Tool**, which shows you an estimated cost on each of the four new time-based rate plans. To determine the plan that best fits your household, you can use our **Temperature Plan Selector** for assistance. 1-888-841-4827

Welcome to your Rate Education Report

Missouri is moving to time-based rate plans this fall, and Energy is here to support you through this change. That's why we're sending you this **Rate Education Report**. This report uses your home's past energy usage data to estimate the costs of each new time-based rate plan. This report will help you understand the possible costs of each of the new rate options and how you might be able to save money by shifting energy usage to off-peak times.

Select your plan by October!

Before your plan automatically goes to the Standard Peak Saver plan, you have the opportunity to select your new rate plan by October 31. If you don't select a plan by October 31, you will be placed into the Standard Peak Saver plan.

Why is Missouri changing to time-based rates?

Timing is everything when it comes to energy costs. By switching to time-based rates, Missouri is working to reduce the cost of electricity during off-peak hours. During off-peak hours, when demand for energy is lower, the cost of producing electricity is lower. By shifting your large appliance use to off-peak hours, you can take advantage of these lower rates and potentially save both energy and money on your new rate plan. With time-based rates, you'll see the energy cost of the time.

How to read your Rate Education Report

The report shows you the estimated costs of each of the four new time-based rate plans, based on your home's past energy usage. Please note that this is only an estimate, and any changes to your home or household members could affect the estimated cost of each plan. Additionally, the report does not consider anything of your energy usage to off-peak times, which could help lower your monthly energy costs.

Questions about the plan or your estimated costs?

- For energy-related questions, please contact our Customer Care team at 1-888-841-4827.
- For questions about the plan or your estimated costs, please contact our Customer Care team at 1-888-841-4827.
- For questions about the plan or your estimated costs, please contact our Customer Care team at 1-888-841-4827.

Early September - Postcard

Choose your plan by October

How does the Rate Comparison Tool work?

This tool uses your household's past energy usage data to estimate the costs of each of the four new time-based rate plans. This report will help you understand the possible costs of each of the new rate options and how you might be able to save money by shifting energy usage to off-peak times.

Pick a plan that fits your home

Each of the four new time-based rate plans has a unique set of on-peak and off-peak periods. On a plan, you can avoid the higher energy costs during peak hours by shifting large appliance use to off-peak periods. If you're willing to make a larger effort to shift usage, you can take advantage of the lower rates during off-peak periods. Here are the four plans in order of the lowest difference in cost between peak and off-peak hours, which could help lower your monthly energy costs.

Standard Peak Saver: The most popular rate plan, featuring a single on-peak period during the day.

Peak Reward Saver: Offers a reward for using electricity during off-peak hours.

Nights & Weekends Saver: Offers lower rates during evenings, weekends, and holidays.

Nights & Weekends Max Saver: Offers the lowest rates during evenings, weekends, and holidays.

Update Your Rate Plan

It's time to choose your new rate plan

The Missouri Public Service Commission (MPSOC) has required utilities, including Energy, to transition to time-based rates in order to assist customers with their energy needs. This report will help you understand the possible costs of each of the new rate options and how you might be able to save money by shifting energy usage to off-peak times.

Plan Options

Standard Peak Saver: The most popular rate plan, featuring a single on-peak period during the day.

Peak Reward Saver: Offers a reward for using electricity during off-peak hours.

Nights & Weekends Saver: Offers lower rates during evenings, weekends, and holidays.

Nights & Weekends Max Saver: Offers the lowest rates during evenings, weekends, and holidays.

How do I change my plan?

If you need help, we are here to assist you.

- Change your plan online before October 31.
- Call our Rate Plan Hotline at 1-888-841-4827 from 7 am to 5 pm, Monday through Friday.
- In Kansas City, stop by our **Customer Center** for in-person assistance.

Energy is committed to providing the information and tools you need to manage your usage and to be successful on your new plan. See [more details on the Missouri changes](#), and what they mean for you.

Do I have to pick one?

If you decide to pick one of the four new plans, you will automatically be assigned to the Standard Peak Saver plan, which is the new default plan for residential customers. However, that plan might not be the best choice for your household. It's a good idea to look at **all four plan options** and make an informed decision.

You don't need to use your energy strategically during peak hours to save money. Instead, you can use our **Home Profile Tool** to determine the best plan for your household. You can also use our **Temperature Plan Selector** for assistance. 1-888-841-4827

Adjust when you use your dryer

Since you use a clothes dryer, it's especially important to understand how time-based rates affect your heating costs. Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that reduces usage during the peak hours of the day. If you don't have a smart thermostat, Energy offers free **Smart Thermostat** services. You can start by using our **Home Profile Tool**, which can show you where your home uses energy along with suggestions on how to save.

Use a smart thermostat to automate off-peak usage

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that reduces usage during the peak hours of the day. If you don't have a smart thermostat, Energy offers free **Smart Thermostat** services. You can start by using our **Home Profile Tool**, which can show you where your home uses energy along with suggestions on how to save.

Be mindful of peak hours

Campaign Goals and Measurement Plan

Goals

1. Prepare customers for the upcoming change in rate structures, including the new mandatory rate, and how TOU rates work.
2. Offer choice and inform customers of their rate options and the benefits depending on the customer's lifestyle.
3. Provide customers with tools, resources, and reports that serve to help them understand TOU rates and options, empower them to choose their rate, and provide guidance to modify their behaviors so that they can mitigate usage and bill impact to increase their success on a TOU rate.
4. Help all customers (and with increased emphasis on special customer groups) be successful before, during and after the mandatory TOU rate transition and/or enrollment on their selected TOU rate option.

Measurement

Customers enrolled in Average Payment Plan

- Evergy has worked to add information about the Average Payment Plan onto outbound communications, like letters, postcards and emails and on Evergy.com TOU landing page.

By submitting, you authorize Evergy to change your rate plan. Your new rate plan will become effective on the next business day. Depending on where you are at in your billing cycle when your rate change becomes effective, you will either receive a final, separate bill for charges on your current rate plan or you will receive a bill with both your final charges on your current rate plan and a prorated amount due for the charges incurred up to the point of billing on your new rate plan. If you are enrolled in the Average Payment Plan, changing your rate will unenroll you from that plan. If you have an Average Payment Plan balance, that amount will be added to the final balance due for your current rate plan. Once your rate is changed, you will have the option to re-enroll in Average Payment Plan. All subsequent bills will include charges on your new rate plan. There will be no interruption in your electric service during this transition.

You may change your rate to another available rate option at any time, but we recommend staying on a plan for 3 months to understand usage patterns and determine impact. Changing your rate plan does not guarantee savings.

What to Expect Next
Depending on where you are at in your billing cycle when your rate change becomes effective, you will either receive a final, separate bill for charges on your current rate plan or you will receive a bill with both your final charges on your current rate plan and a prorated amount due for the charges incurred up to the point of billing on your new rate plan. All subsequent bills will include charges on your new rate plan. Your electric service will remain on during this transition.

Budget Billing
All rate plans start with the Budget Billing feature turned off. You can turn on Budget Billing in your preferences after your new rate plan becomes effective.

You have a Budget Billing account balance of \$210.05. This amount will be added to the final bill for your current rate plan. This balance is an estimate and may vary slightly at the time of billing.

Address

Current Plan → **New Plan**
Standard Plan → Time of Use Plan

Effective Date
10/18/2019

Use *Energy Analyst* to manage your energy usage, find energy saving tips and more.

Your current rate plan will be changing in October.
You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission, which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Why is Missouri moving to time-based plans?
When there is a high demand for energy during peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Shift a few of your major appliances, like the dishwasher or dryer, to off-peak times to save on your energy costs. It's ok to use appliances that use less energy, like lights and computers.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan program (sometimes called Level Payment or Budget Billing) and you can still be on Average Pay with these new rates.

We're here to help!
We know rate plans can feel confusing. If you need help, we are here to assist you.

- Give us a call: 1-800-541-0407 from 7 am to 6 pm Monday through Friday
- Visit us in-person: Evergy Connect from 9 am to 4 pm Monday through Friday
1710 The Paseo Blvd., Kansas City, MO 64108
- Visit us online: evergy.com/SaverPlans

Why is Missouri moving to time-based plans?
Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

- Delay running your dishwasher**
Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer**
Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Use a smart thermostat to automate off-peak savings**
Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours**
Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?
The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

STEP ONE: Be mindful of peak and off-peak hours
Energy costs are higher during peak hours of 4-8 pm, and off-peak times and pricing varies by plan.

STEP TWO: Optimize when you use your large appliances
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Be mindful of peak hours
Reduce large appliance use during peak hours of 4-8 pm.

- Use your dishwasher delay button
- Adjust your thermostat to avoid peak hours
- Shift when you use your clothes dryer

STEP THREE: Use our Evergy energy engagement tools
Use our personalized tools to help you understand when you're using energy and how to save money.

- Weekly Rate Coach Emails**
With our weekly Rate Coach emails, you'll get an email every week that breaks down your weekly energy usage by each hour of the day, helping you to see when you're using energy.
- Energy Engagement Portal**
Through your online Energy MyAccount portal, you can see your usage patterns broken down by hour, helping identify when you're using the most energy.
- Compare My Rate Tool**
Use our online rate compare tool to see which time-based rate plan is best for you.
- High Bill Alerts**
When you enroll in our High Bill Alert emails, you'll receive a notice if you're currently on track to receive a higher-than-normal bill.
- Average Payment Plan**
Sometimes called budget billing, this program averages your bills each month to help keep payments level throughout the year.

Costs and times vary by each plan. Get your plan's peak and off-peak times at evergy.com/SaverPlans

Learn more at evergy.com/SaverPlans → evergy

Be mindful of peak and off-peak hours
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Optimize when you use your large appliances
Reduce large appliance use during peak hours of 4-8 pm.

- Use your dishwasher delay button
- Adjust your thermostat to avoid peak hours
- Shift when you use your clothes dryer
- Set your EV or other appliances to charge overnight

Here to help you with time-based rate plans.
Evergy has personalized tools to help you find ways to shift some of your energy usage, manage costs, or choose another rate plan option that best fits your household.

- Our **Average Payment Plan** program (sometimes called budget billing) averages your bills each month to help keep payments level and consistent throughout the year.
- With our weekly **Rate Coach Emails**, you'll get an email every week that breaks down your weekly energy usage by each hour of the day. Not receiving these emails? Sign up online or give us a call.
- Use our online **Rate Compare Tool** to see which time-based rate plan is best for you. Check back to see if a different rate may be best for you as your energy usage changes.

Modifications Based on Customer Feedback

- **Average Payment Plan (APP) Information:** Evergy added information about APP on most TOU materials to help clarify that customers could still stay on their APP.
- **Finding Monthly Breakdown Estimates:** Updated Compare My Rate tool to make it easier to find estimated cost breakdown by month.
- **Additional Graphics:** Evergy worked to add more charts and graphics to help explain both the rate plans and how TOU works.
- **Rate Descriptions:** Added subheads under each plan name to give more details about the plan.
- **Additional Rate Plan Differences:** Due to the similar nature of many of the plans, Evergy provided additional descriptions of differences between plans to help customers make a selection.
- **Additional Spanish Resources:** Added a Spanish contractor to help with outreach events and translations to Spanish speaking groups and communities. Created Spanish video.

Campaign Website Landing Page

Audience: Mo Residential customers
 Launched Date: June 2023

The screenshot shows the full landing page layout. At the top is the Evergy navigation bar with links for 'Manage Account', 'Outages', 'Ways to Save', and 'Smart Energy'. The main header features a woman in a yellow top and the text 'Changes are coming in Missouri'. Below this is a section titled 'Why is Missouri changing?' explaining the transition to time-based rates. A 'Making the switch' section includes a 'Change My Rate' button. A 'New Missouri time-based plans are here' section lists four plan options: Standard Peak Saver, Peak Reward Saver, Nights & Weekends Saver, and Nights & Weekends Max Saver. A bar chart shows electricity prices for Summer Weekdays (Mon-Fri) with a peak at 4-8 PM. A 'Frequently asked questions' section is at the bottom with expandable questions.

This screenshot shows the main content area of the landing page. It features the same header and hero image as the full page. The 'Why is Missouri changing?' section explains that time-based rates charge a lower price for most of the day but a higher price for a few hours during peak times (4-8 pm). The 'Making the switch' section includes a 'Change My Rate' button. The 'New Missouri time-based plans are here' section lists the four plan options. A 'Frequently asked questions' section is at the bottom.

This screenshot shows the 'Check out your new time-based plans...' section. It features a bar chart titled 'Summer Weekdays (Mon-Fri)' showing electricity prices for different times of the day. The peak price is \$51 during the 4-8 PM period. To the right of the chart is the 'Standard Peak Saver' plan details, including a 'Who's it for' section, 'Savings level' information, and a 'Tip' to set the thermostat. Below this is a 'KANSAS CUSTOMERS' notice. At the bottom is a 'Frequently asked questions' section with expandable questions.

Why is Missouri changing to time-based rates?

Timing is everything when it comes to energy costs. Time-based rates match the cost you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy during off-peak times, when demand for energy is lower, and more for energy used during the peak hours of 4-8pm.

The YOUtility Company

Missouri está adoptando planes de tarifas eléctricas en función del tiempo este otoño.

Los clientes de Missouri tendrán la opción de elegir entre **cuatro nuevas opciones de planes de tarifas**. Evergy está aquí para ayudarle a comprender sus opciones y a elegir el plan de tarifas que mejor se adapte a su hogar.

Obtenga más información en evergy.com/Time

Nuevas opciones de planes de tarifas en función del tiempo
Elije tu nuevo plan antes de octubre o se le asignará de manera automática el plan Estándar de Ahorro de mas demanda.

-  **Estandar de Ahorro de mas demanda**
-  **Ahorro en Noches y Fines de Semana**
-  **Plan de Ahorro con Recompensas en tiempo de mas demanda**
-  **Ahorro Maximo en Noches y Fines de semana**

¿Por qué Missouri está adoptando tarifas en función del tiempo?
El tiempo lo es todo cuando se trata de costos energéticos. Las tarifas basadas en el tiempo se ajustan a lo que paga con el costo real de producir energía. Con los planes de tarifas en función del tiempo, se pagará menos por la energía durante los períodos de menor demanda, cuando el consumo de energía es mas bajo, y más por la energía utilizada durante las de mas demanda de 4-8 pm.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times.

We're here to help:

To help you choose the best plan for your household, we have developed online tools and reports that analyze your actual energy usage and determine the plan that best fits your lifestyle.

Four new time-based rate plans – Choose by October

With time-based rate plans, you can take advantage of lower off-peak pricing by shifting your larger appliance usage, like dishwashers and clothes drying, to off-peak hours.

Standard Peak Saver
New Default Residential Rate

Peak Reward Saver
Closest to the Current Standard Residential Rate

Nights & Weekends Saver
Three Time Periods, Overnight and Weekend Discount

Nights & Weekends Max Saver
Three Time Periods, Largest Difference in Price

Cover Letter Insert in the Rate Education Reports

Welcome to your Rate Education Report

Missouri is moving to time-based rate plans this fall, and Evergy is here to support you through this change. That's why we're sending you the attached Rate Education Report. This report uses your home's past energy usage data to estimate the costs of each new time-based rate plan. This report will help you understand the possible costs of each of the new plan options and how you might be able to save money by shifting energy usage to off-peak times.

Select your plan by October!

Select your new plan before October by going to evergy.com/PickMyRate. If you have not selected a new plan by October, you will be moved to the Standard Peak Saver plan.

Why is Missouri changing to time-based rates?

Timing is everything when it comes to energy costs. By switching to time-based rates, Missouri is working to match the cost you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during the peak hours of 4-8 pm.

With time-based rate plans, you can take advantage of discounted off-peak pricing by shifting your larger appliance usage, like dishwashers and clothes drying, to off-peak hours.

How to read your Rate Education Report

The attached report estimates what your average monthly Evergy bill might be on each of the new time-based plan options, based on your home's last year of energy usage. Please note that this is only an estimate, and any changes in your home or household members could affect the estimated cost of each plan. Additionally, this estimate does not consider any shifting of your energy use to off-peak times, which could help lower your monthly energy costs.

Questions about the plans or your estimated costs?

- Visit evergy.com/My-Plans for plan details and your personalized Rate Comparison.
- Talk with a rate plan specialist: 800-541-0407.
- Keep a look out for our weekly Rate Plan Coach emails, which provide a weekly breakdown of your energy usage and costs by time of day.

Time-based Plans - Savings Tips

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Choose a rate plan that works for your household

Missouri is changing how electric rate plans work to match the cost you pay with the actual cost to produce energy—and Evergy has responded with four new time-based rate plans for you to choose from. The good news is that you're estimated to save with the default Standard Peak Saver plan, which takes effect in **Month 2023**. Want to start saving sooner? Switch to the Standard Peak Saver plan now!

Learn more and select your new rate plan at [evergy.com/PlanDetails](https://www.evergy.com/PlanDetails).

! Make your selection today

If you don't select a new plan, you'll be enrolled in Standard Peak Saver starting **Month 2023**.

Standard Peak
No Peak pricing for 8 months of the year

To save, shift your energy use away from weekday Peak hours in the summer (June – Sept.).

Peak Reward
Earn discount credits

Keep your electricity use low during Peak hours and earn discount credits by using large appliances during Super Saver hours.

Nights & Weekends
Lower overnight prices

To save, schedule your smart thermostat and large appliances to run during Saver and Super Saver hours.

Nights & Weekends Max
Lowest overnight prices

To save, charge your EV overnight and set your large appliances to run during Super Saver hours.

How do rate plans compare?

Estimated average monthly cost per plan (based on your historical usage)

How can time-based plans work for you?

Small actions go a long way when it comes to shifting your energy use away from Peak hours. You'll save energy *and* money—while lessening the impact on the grid for everyone. Take simple steps like delaying running large appliances such as your dryer and dishwasher until Saver hours. Another great way to save is using a smart thermostat to automate your heating and cooling systems to run less frequently during Peak hours.

What time should your household use energy based on new plans?

To make the most of your plan, do your best to make a habit of shifting energy use away from Peak hours (4 to 8 pm). See below for a breakdown of each rate plan's hours so you can find the one that works for your household.

Choose your new plan today!

Customer Event Handout

Missouri's Time-Based Rate Transition

In October, customers will be moved to time-based rate plans

Evergy's Missouri customers will be automatically enrolled in the **Standard Peak Saver plan** if you don't choose one of the other three additional rate plan options before October.

Why is Missouri changing to time-based rates?
The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:
With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times. With time-based plans, it's important to avoid using large amounts of energy during peak hours.

Standard Peak Saver
New Default Residential Rate

Peak Reward Saver
Closest to the Current Standard Residential Rate

Nights & Weekends Saver
Three Time Periods, Overnight and Weekend Discount

Nights & Weekends Max Saver
Three Time Periods, Largest Difference in Price

Time-Based Plans - Savings Tips

- Delay running your dishwasher:** Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer:** Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Adjust your thermostat to automate off-peak savings:** Adjust your thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours:** Reduce large appliance energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Analyze: Use our online *Compare My Rate* tool to see which plan might be best for you.

Transición a tarifa basada en la hora de uso de Missouri

En octubre, los clientes pasarán a planes de tarifas basadas en la hora de uso

Los clientes de Evergy en Missouri quedarán inscritos automáticamente en el plan **Standard Peak Saver** si no se elige una de las otras tres opciones de planes de tarifas adicionales antes de octubre.

¿Por qué se realiza el cambio a tarifas basadas en la hora de uso en Missouri?
La Comisión de Servicios Públicos de Missouri ha ordenado a los proveedores de servicios públicos de Missouri, incluido Evergy, que realicen la transición a planes obligatorios de tarifas basadas en la hora de uso. El objetivo de las tarifas basadas en la hora de uso es equilibrar los costos que se pagan con el costo real de producir energía. Con los planes de tarifas basadas en la hora de uso, pagará menos por la energía utilizada durante las horas de menor actividad, cuando la demanda de energía es menor, y más por la energía utilizada durante las horas de mas demanda.

¿Cómo funcionan los planes de tarifas basadas en la hora de uso?
Con las tarifas basadas en la hora de uso, pagará menos por la energía utilizada durante las 20 horas de menor actividad. Pero cuando la demanda de energía es alta durante las horas de mas demanda, el costo de la energía será mayor. Es importante cambiar el uso de grandes electrodomésticos, como lavavajillas, secadoras y sistemas de calefacción y aire acondicionado, a horas de menor actividad, como durante la noche y a primera hora de la mañana, para evitar pagar un precio más alto por la energía durante las horas de mas demanda. Con los planes basados en la hora de uso, es importante evitar el uso de grandes cantidades de energía durante las horas de mas demanda.

Standard Peak Saver
Nueva tarifa residencial predeterminada

Peak Reward Saver
El plan más cercano a la tarifa residencial estándar actual

Nights & Weekends Saver
Tres períodos de tiempo; descuentos nocturnos y de fin de semana

Nights & Weekends Max Saver
Tres períodos de tiempo; la mayor diferencia de precio

Planes basados en la hora de uso - Consejos para ahorrar

- Retrase el uso del lavavajillas:** utilice el temporizador del lavavajillas para retrasar su uso hasta después de las horas pico.
- Ajuste la hora de uso de la secadora:** las secadoras eléctricas consumen más energía que las lavadoras, por lo que ahorrará aún más dinero si deja el secado de la ropa para las horas de menor actividad.
- Ajuste su termostato para automatizar los ahorros en las horas de menor actividad:** ajuste su termostato para que su sistema de calefacción/aire acondicionado no opere durante tanto tiempo durante las horas pico.
- Tenga en cuenta las horas pico:** reduzca el consumo de energía de los electrodomésticos grandes durante las horas pico, de 4:00 a 8:00 p. m., cuando la demanda y los costos son mayores.

Non-TOU customer

It's time to pick your new time-based rate plan!

Missouri is moving to time-based rate plans in October. With time-based rate plans, you'll pay less for energy during off-peak times and more for energy used during peak hours.

Select your new plan by October: customers without a preference will be moved to our default Standard Peak Saver Plan.

[LEARN MORE AND PICK YOUR PLAN](#)

Customers on TOU Pilot

We have new time-based rate plan options!

Your Time of Use Plan has been renamed to the Nights and Weekends Saver plan, and we are introducing three additional time-based rate plans. Your existing plan will remain the same, but we recommend exploring the new alternatives to see if any are more suitable for your household.

Visit our online Rate Comparison Tool to see which plan might be best for you.

[COMPARE PLANS](#)

All Mo Customers: August Email

Introducing: Your New Rate Plans

You may have heard: Missouri is moving to time-based rate plans this fall

The Missouri Public Service Commission has required utilities, including Evergy, to transition to mandatory time-based rate plans. In order to assist customers with this change, Evergy has four new time-based rate plans for you to choose from. These plans offer you the flexibility to select the plan that best fits your household's needs.

With time-based rates, you'll pay less for energy used during 20 off-peak hours a day, and more for energy used during a four-hour peak period.

It's important to pick your new plan by October. **If you decide not to choose one, you will be moved to the new default plan, the Standard Peak Saver.**

[Compare Plans](#)

We're here to help

Evergy has introduced new four rate plan options, along with our [Rate Comparison Tool](#)*, which shows your expected annual cost on each of the new plans, based on your past energy usage. In addition, we will send you weekly usage reports, to show which time of day you're using the most energy.

All Missouri customers are encouraged to compare the new plans and make a choice by October. If you decide not to choose one, then you will automatically change to the [Standard Peak Saver](#) plan.

Note that you don't have to keep the Standard Peak Saver plan after October. You can change to one of the four new plans anytime.

See [more details on the Missouri changes](#), and what they mean for you.

Why is Missouri changing?

Timing plays a crucial role in the cost of energy, which is why [Missouri is changing](#). As the demand for energy rises, so does the cost of producing electricity, resulting in "peak" and "off-peak" times.

During off-peak times, the demand for energy decreases, resulting in lower energy costs. By shifting your large-appliance use—like running the dishwasher and doing laundry—to off-peak times, you'll potentially save both energy and money on these new plans. With time-based rates, you'll pay less for energy most of the time.

According to our analysis, time-based rate plans may result in a small annual savings for most customers, depending on the season and household.

A note about electric heating

Since your home uses electric heat, it's especially important to understand how your home uses energy, and to shift large-appliance usage like laundry and dishwasher use to off-peak times.

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that optimizes usage around time-based rate plans. If you don't have a smart thermostat, Evergy offers [free and discounted models](#).

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool will not yet have enough data to provide cost estimates. Please view each rate description to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407

Introducing: Your New Rate Plans

New plans are here

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

To support customers in this change, four new rate plans have been created to reflect the actual cost of energy, which varies throughout the day depending on demand.

Please look for your Rate Education Report, coming to you by postal mail in August, which will contain more information on your home's energy use, along with which new rate plan will be best for your home.

What does this mean for me?

This means that all customers now have the opportunity to select from four new plans, designed to provide lower prices for the majority of the day. However, it's important to choose a plan by October. If no selection is made by that time, you will be moved to the [Standard Peak Saver plan](#).

Keep in mind that this may not be the most cost-effective option for your specific needs. We recommend you explore your rate-plan options with our [Rate Comparison Tool](#) and make an informed choice before the October deadline.

[Compare Plans](#)

How do I change my plan?

If you need help, we are here to assist you.

- [Change your plan online](#) before October
- Call our special hotline at **1-800-541-0407** from 7 am to 5 pm Monday through Friday
- In Kansas City, stop by our [Connect Center](#) for in-person assistance

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

Suggestions to save on time-based plans

By shifting some of your energy use to off-peak times, you can pay lower rates of 75% or more compared to peak times. The more you shift, the more you save.

Laundry

- Wash clothes on cold. They get just as clean and save energy
- Run your dryer after 8 pm on weekdays, or on weekends

Dishwashing

- Run full loads and wait until after 8pm on summer weekdays

Heating and cooling

- Adjust your thermostat to cool your home a few degrees lower before peak hours begin to delay using the AC when energy is more expensive.
- In winter, warm your home a few extra degrees before peak hours begin.

You can also check out this chart to understand which appliances tend to use the most electricity in your home.

Missouri Rate Update

Missouri makes changes to rate plans for Energy customers

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

While many customers, based on their current usage, are expected see a modest reduction on their energy bill, others will not. Those customers will need to offset the increased costs by shifting the use of large appliances away from the peak hours (just four hours per day and never on weekends), when energy costs will be highest.

Impact to your home

Based on your past usage history, time-based plans may increase your overall energy bill if you don't make some effort to shift energy usage to the 20 hours of the day when energy will cost less.

What you can do

By October, choose one of the four time-based plans that will be least expensive for you, based on how you currently use energy. Our [Rate Comparison Tool](#) shows you what you would pay on each of the four new plans, based on 9 months of your prior usage.

[Choose Now](#)

We're here to help

If you need help choosing a plan, we have a special hotline to help from 7am to 5pm Monday through Friday: **1-800-541-0407**. Or you can visit us in person at our [Evergy Connect location](#).

Lastly, once you sign up for your new plan, you'll receive tips and strategies to avoid higher costs.

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

Net Metering: August Email

Your New Rate Plan

Get to know your new plan

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

As a participant in our Net Metering program, your rate plan will change to the new Peak Reward Saver plan this fall.

[Peak Reward Saver](#)

No changes to your net-metering agreement

Although your plan is changing, your net-metering agreement is not. Just as now, the energy you generate will continue to offset your bill.

Also unchanged from your current agreement is the purchase of excess energy over and above what you use per billing cycle. This energy will continue to be purchased at the Cost of Fuel rate.

The [Peak Reward Saver plan](#) is similar to your current plan in that it is a tiered plan, with prices that change based on the amount of energy used, and with variation in summer and winter.

Additionally, on the Peak Reward Saver plan, there is a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm. This means that any energy received from your system during those peak times could provide even greater savings.

Subject: Your new rate plan is coming soon
Audience: Net-metering ~6,000
Note: electric heat pod only shows for space heating customers
Send Date: August 25th

The diagram illustrates the rate plan structure with four time periods: 12-6 AM, 6 AM-4 PM, 4-8 PM, and 8 PM-12 AM. The 12-6 AM period is labeled 'Super Off-Peak' with a blue bar and '\$0.01 credit added'. The 4-8 PM period is labeled 'Peak' with an orange bar and '\$0.01 or \$0.0025 added charge'. The other periods (6 AM-4 PM and 8 PM-12 AM) are shown with green bars.

What's next?

No action is needed on your part. Beginning with your October bill cycle, your new plan will be in effect.

 [Download the Evergy app](#)

Solar Subscription: August Email

Plan changes in Missouri

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Evergy, to transition all customers to [time-based rate plans](#) starting in October.

As a participant in our Solar Subscription program, your rate plan will change to the new Peak Reward Saver plan this fall.

Peak Reward Saver

The [Peak Reward Saver plan](#) is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in summer and winter.

Additionally, on the Peak Reward Saver plan, there is a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm. There is also a one-cent discount on energy used between midnight and 6 am.

Subject: Your new rate plan is coming soon
Audience: Solar Subscription Customers ~900
Note: electric heat pod only shows for space heating customers
Send Date: August 23rd

What's next?

No action is needed on your part. Beginning with your October bill cycle, your new plan will be in effect.

Can I pick one of the other time-based plans?

You may have heard that additional time-based plans are available to Missouri customers.

Currently, the Peak Reward Saver plan is the only plan compatible with Solar Subscription. However, we will reach out as other plan choices become available.

Phase 2 – Preparation and Action Tactics

September and October

Customer Postcard - September

It's time to pick your new time-based rate plan.

Four new plan options. Which plan is right for your household? **We have a tool for that!**

Send Date: September 15-20, 2023

Your current rate plan will be changing in October.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission, which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

Why is Missouri moving to time-based plans?

When there is a high demand for energy during peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Shift a few of your major appliances, like the dishwasher or dryer, to off-peak times to save on your energy costs. It's ok to use appliances that use less energy, like lights and computers.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan program (sometimes called Level Payment or Budget Billing) and you can still be on Average Pay with these new rates.

Bill Message

It's time to choose your new rate plan. Evergy's Missouri customers will be switching to time-based rate plans starting in October. With time-based rate plans, you'll pay less for energy during off-peak times and more for energy used during the peak hours. **Select your new plan at evergy.com/NewPlans.**

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times.

Which plan is right for your household? We have a tool for that!

Visit our online Rate Comparison Tool* to see which plan may be best for your home based on your past usage history.

Visit evergy.com/TimePlans

*At least 9 months of usage history at your current home is needed to use the Rate Comparison Tool.

All MO: September Email

Choose your plan by October

You have probably heard that the Missouri Public Service Commission (MPSC) is requiring Missouri utilities, including Evergy, to change to [time-based rate plans](#).

While changing to a time-based plan is required, you do have the opportunity to choose from one of four new plans.

To help you choose, our personalized [Rate Comparison Tool](#) can recommend the best plan for your home, based on your past usage.

We ran the numbers...
The **BEST PLAN** for your home is:
Nights & Weekends Max Saver Plan

[Change My Plan](#)

How does the Rate Comparison Tool work?

This personalized [Rate Comparison Tool](#) takes 9-12 months of your historical usage data, applying that information to the rates of the four new time-based plans.

You'll see an estimate of what your Evergy bill would be on each of the four plans, based on your home's last year of energy usage. This estimate does not consider any shifting of your energy use to off-peak times, which could help lower your energy costs.

To use this customized rate tool, you'll first log into your [online Evergy account](#). If you don't yet have an account, you can easily create one with the Evergy account number shown on your bill.

Pick a plan that fits your home

Each of the four plans has various peak and off-peak pricing periods. On all plans, you can avoid the higher energy costs during peak hours by shifting large appliance use to off-peak periods.

If you are willing to make a bigger effort to shift usage, plans with the largest price difference can potentially save you more.

Here are the four plans in order of the lowest difference in cost between peak and off-peak hours, and the largest difference.

-  [Peak Reward Saver](#)
Closest to the current standard residential rate, with the lowest price difference between time periods
-  [Standard Peak Saver](#)
This is our default residential rate plan if you don't choose a plan by October
-  [Nights & Weekends Saver](#)
Three time periods with different prices, with an overnight and weekend discount
-  [Nights & Weekends Max Saver](#)
Three time periods with different prices, with the highest difference in prices between time periods

What happens if I don't choose?

If you don't decide to switch to one of the new plans, you'll be automatically enrolled in the default rate plan, the [Standard Peak Saver](#).

We encourage you to [check out all the plans](#) in case there's a better one for your household.

How well do you know your home?

You can avoid higher peak-hour prices by spreading your energy use throughout the day, especially when it comes to larger appliances.

Using your laundry machines during off-peak hours, for example, can cost less. But smaller items, like hair dryers or cell-phone charging, won't make much difference.

[Appliance Chart](#)

You can get personalized information about your home's energy use with our [Energy Analyzer tools](#).

A note about electric heating

As part of the new mandate from the MPSC, your promotional All-Electric rate plan is being discontinued, and these new time-based plans may impact your home this winter (depending on the weather). There are steps you can take to reduce that possibility.

- Plan to shift some of your large-appliance usage, like laundry and dishwashing, to off-peak times.
- Take time now to seal window leaks, install draft stoppers, and replace any dirty furnace filters.
- Pre-heat your home during the day, taking advantage of lower daytime rates.

The most important tip? Choose the right rate plan. Use our tool to compare last year's usage to what you would have spent on each of the four new plans. Then simply choose the most cost-effective plan.

Evergy August 29

We have followed the conversation on Facebook and elsewhere about Missouri's shift to time-based rate plans. We want to take the time to walk through the changes for Missouri residential customers. Let's talk time-based rate plans and your plan options.

Your lives are full and busy, especially when you get home at night. From cooking dinner to washing laundry to watching your favorite shows in the comfort of your homes from 4-8 p.m. It's also the period when energy demand is highest.

The Missouri Public Service Commission (MPSC) mandated Evergy Metro and Evergy West implement time-based rates starting October 1. The intent is for customers to shift your usage to off-peak hours to help reduce grid strain for the benefit of all in our communities.

The good news for you is that you still have a choice here.

- There are four plan options, including the Peak Reward Saver, which looks similar to the plan most customers in Missouri are on now.
- The new default plan, the Standard Peak Saver, offers customers a discounted price on their usage for 20 hours a day (For example: Instead of about \$0.14 kWh, Evergy Metro customers will pay \$0.0958 kWh during summer months). That discounted rate will offset the prices customers pay during the peak hours of 4-8 p.m. during summer months. <https://www.evergy.com/landing/missouri-rate-plans>
- Over 70% of Evergy customers are predicted to see their costs stay the same or save money annually on the new Standard Peak Saver without changing usage habits. If customers on this plan choose to shift their usage away from the peak hours, there's potential to save even more on your bills, especially with the discounts during non-peak hours. We encourage you to use our rate comparison tool to see a month-to-month rate comparison based on your last 12 months of usage to help you find the best plan for your needs: <https://www.evergy.com/ma/rate-comparison>

Evergy's mission is to provide reliable, affordable and sustainable energy for you. A resilient energy grid now and in the future is important to us and state regulators. It's what empowers the communities we live in and serve. We hope this offers some understanding about the changes to come, how they may benefit you and why the MPSC has implemented time-based rates in Missouri.

In the comments, we're going to offer answers to some frequently asked questions about time-based rates and your options. Remember to choose from one of the four time-based rate plans by October 1. Don't worry, if you don't choose a plan, you'll be placed on the default Standard Peak Saver plan.

Electric Heat Customers: September Letter

Audience: Customers on the Space Heating Rate ~103,749

Send Date: September 5-15, 2023

It's time to select your new time-based rate plan.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

With time-based rate plans, you'll pay less for energy than you do today during 20 off-peak hours a day, but when energy demand is high during the peak hours of 4-8 pm, the cost for energy will be higher. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

In order to assist customers with this change, Evergy has developed four new time-based rate plans for you to choose from. It's important to select your new plan by October. If you decide not to choose a new plan, you'll be moved to the new default plan, the Standard Peak Saver starting in October.

Visit [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans) or call 1-800-541-0407 to learn more about the plan options and to select your new plan.

We invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which plan best fits your household based on your past energy usage.

An important note about your old rate plan

As part of the new mandate from the MPSC, your current All-Electric rate plan (or electric space heating rate) is being discontinued. Your old plan offered a discounted rate in the winter for electric space heating customers, which is no longer offered. Due to this change, customers with electric heat may experience more impact moving to time-based rate plans, making it especially important to understand your home energy usage, and shift large appliance usage, like doing laundry and running the dishwasher, to off-peak times.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Don't use all your major appliances during the peak hours when energy costs are higher.

Do shift a few of your major appliances to off-peak times to save on your energy costs.

How to save on time-based plans.

You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Net Metering Customers: September Letter

Audience: Customers on the Net Metering Rate ~6,766
Send Date: September 5-15, 2023

Your new time-based rate plan is coming soon.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Net Metering program, your rate plan with Evergy will change to the Peak Reward Saver plan in October.

The **Peak Reward Saver** plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 6 am every day.

The Peak Reward Saver plan is the only plan currently available for Net Metering customers.

What's next?

This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your energy will be billed on the Peak Reward Saver Plan. If you have question, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit evergy.com/SaverPlans.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

Why can't I pick one of the other time-based rate plans?

The MPSC has ordered that Net Metering customers move to the Peak Reward Saver plan. This is partly due to Missouri state statute that specifies how net metering is to be calculated and when it is to be available. The Peak Reward Saver plan is currently the only rate plan that meets the Missouri statute criteria.

Are there changes to my net metering agreement?

Although your rate plan is changing, your net metering agreement is not. Just as now, Evergy will purchase energy from you at the Cost to Fuel rate.

How to save on the Peak Reward Saver plan.

This plan is very similar to your current rate, but you can save money by shifting some energy to overnight times. You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Net-Metering: September Email

Your New Rate Plan

Get to know your new plan

You may have heard that the Missouri Public Service Commission (MPSC) has ordered Missouri utilities, including Eversource, to transition all customers to [time-based rate plans](#) starting in October.

As a participant in our Net Metering program, your rate plan will change to the new Peak Reward Saver plan this fall.

Peak Reward Saver

No changes to your net-metering agreement

Although your plan is changing, your net-metering agreement is not. Just as now, the energy you generate will continue to offset your bill.

Also unchanged from your current agreement is the purchase of excess energy over and above what you use per billing cycle. This energy will continue to be purchased at the Cost of Fuel rate.

The [Peak Reward Saver plan](#) is similar to your current plan in that it is a tiered plan, with prices that change based on the amount of energy used, and with variation in summer and winter.

Additionally, on the Peak Reward Saver plan, there is a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm. This means that any energy received from your system during those peak times could provide even greater savings.

Subject: Your new rate plan is coming soon

Audience: Resend to non-opens from August: Net-metering, ~3,000

Low Income and Seniors: September Letter

Your current rate plan will be changing.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

To meet the new requirement, Evergy will move you to our new **Standard Peak Saver plan** in October. No action is needed on your part.

How does the Standard Peak Saver plan work?

- **October through May:**
During these months, the cost for energy will be lower all day, every day. It's especially lower during super off-peak times from midnight to 6 am.
- **June through September:**
During these summer months, the cost for energy is highest during peak hours of 4-8 pm Monday - Friday. All other times the cost for energy is lower than you pay today.

Tip: To save on your energy bill with this new plan, try to limit the use of large appliances, like the clothes dryer or dishwasher, during the summer months from 4-8 pm Monday through Friday. With this change to time-based rates, it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

Want a different rate plan?

Evergy has three other time-based rate plans, including our new Peak Reward Saver plan, which is similar to the plan you have today. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online personalized Rate Comparison Tool or read your Rate Education Report* that arrived by mail in August to see which of the other plan options may be best.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407

We're here to help!

We know rate plans can feel confusing. If you need help, we are here to assist you.

Update Your Rate Plan

It's time to choose your new rate plan

The Missouri Public Service Commission (MPSC) has required utilities, including Evergy, to change to [time-based rate plans](#) by October. We've made it quick and easy to make your choice right now.

We understand that time-based plans are a big change. Evergy is committed to providing the information and tools you need to manage your usage and be successful on your new plan.

[Plan Options](#)

How do I change my plan?

If you need help, we are here to assist you.

- [Change your plan online](#) before October.
- Call our rate plan hotline at [1-800-541-0407](tel:1-800-541-0407) from 7 am to 5 pm Monday through Friday.
- In Kansas City, stop by our [Connect Center](#) for in-person assistance.

Evergy is committed to providing the information and tools you need to save the most on these new plans.

See [more details on the Missouri changes](#), and what they mean for you.

Do I have to pick one?

If you decide not to pick one of the four new plans, you will automatically be assigned to the Standard Peak Saver plan, which is the new default plan for residential customers.

However, that plan might not be the best choice for your household. It's a good idea to look at [all four plan choices](#) and make an informed decision.

We have a personalized [Rate Comparison Tool](#)* that shows what you would pay per year on each plan.

A note about electric heating

As part of the new mandate from the MPSC, your promotional All-Electric rate plan is being discontinued, and these new time-based plans may impact your home this winter (depending on the weather). There are steps you can take to reduce that possibility.

1. Plan to shift some of your large-appliance usage, like laundry and dishwashing, to off-peak times.
2. Take time now to seal window leaks, install draft stoppers, and replace any dirty furnace filters.
3. Pre-heat your home during the day, taking advantage of lower daytime rates.

The most important tip? Choose the right rate plan. Use our tool to compare last year's usage to what you would have spent on each of the four new plans. Then simply choose the most cost-effective plan.

The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans. That means what you pay for energy will be aligned with the cost to produce it. This is not a rate increase, and the new time-based rate plans provide less expensive energy most of the day.

As a participant in our Solar Subscription program, the portion of your energy bill from the solar program will not change, but any non-solar energy will be billed on the new **Peak Reward Saver plan**.

The Peak Reward Saver plan is similar to your current plan in that it is a tiered plan, with rates that change based on the amount of energy used, and with variation in the summer and winter. Additionally, on the Peak Reward Saver plan, the time of day you use energy can also make a difference, with a small surcharge (one-cent or less per kWh) during peak hours of 4-8 pm, and a corresponding one-cent bill reward credit during off-peak hours of midnight to 6 am every day.

The Peak Reward Saver plan is the only plan currently available for Solar Subscription program customers.

What's next?

This letter is to inform you of the upcoming change, but no additional action is needed from you. Beginning with your October bill cycle, your non-solar energy will be billed on the Peak Reward Saver Plan. If you have questions, contact our Time-Based Rate Plan Hotline at 1-800-541-0407 or visit evergy.com/SaverPlans.

Why is Missouri moving to time-based plans?

Supply and demand play an important part in the overall cost to produce energy. When there is a high demand for energy during the peak hours, producing energy becomes more expensive. On the other hand, when energy demand is lower, the cost to produce energy goes down. With the new time-based rate plans, you'll pay less for energy during the off-peak times, which are most of the time, and more during the few peak hours.

How to save on the Peak Reward Saver plan.

This plan is very similar to your current rate, but you can save money by shifting some energy usage to overnight times. You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak hours when the cost of energy is lower. For example...

Delay running your dishwasher

Use your dishwasher timer to delay running it until after peak hours.

Adjust when you use your dryer

Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.

Use a smart thermostat to automate off-peak savings

Schedule your smart thermostat so your heating/cooling system doesn't run as long during peak hours.

Be mindful of peak hours

Reduce energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Are you on the Average Payment Plan?

The change to time-based rate plans does not affect our Average Payment Plan (sometimes called Level Payment or Budget Billing) program and you can still be on Average Pay with these new rates.

Send Date: September 5-15, 2023

Evergy now has more time-based rate plan options.

You may have heard that Missouri is moving to new time-based rate plans this fall. The Missouri Public Service Commission (MPSC), which regulates Evergy, has required some utilities to transition to time-based rate plans starting in October.

Good news! You're already on a time-based rate plan (or TOU plan), so you're set. But we encourage you to explore the new additional time-based options in case there's a better plan for your household.

Our online Rate Comparison Tool shows your annual estimated cost on each of the four time-based plan options, based on your past energy usage, as long as you've lived in your home for more than 9 months. We invite you to use the personalized online tool or read your Rate Education Report* that arrived by mail in August to see which plan may best fit your household.

Your current plan has a new name

You were an early adopter of time-based plans, nice work! We have updated the name of your current plan and it is now called the **Nights & Weekends Saver plan**. Nothing else has changed with your current plan, just the name.

What's next?

No action is needed on your part if you're happy with your current plan. Our analysis shows, however, that some customers on a time-based plan could save more money on a different one, so it's worth checking out.

Visit [evergy.com/SaverPlans](https://www.evergy.com/SaverPlans) or call **1-800-541-0407** to learn more about the plan options and to select your new plan.

*Note: If you have lived in your current home less than 9 months, the Rate Comparison Tool and Rate Education Report is not yet available for your location. Please view the rate descriptions to choose a plan, or call our Time-Based Plan Hotline for assistance: 1-800-541-0407.

A note about electric heating

Since your home uses electric heat, it's especially important to understand how your home uses energy, and to shift large-appliance usage like laundry and dishwasher use to off-peak times.

Smart thermostats can be a huge benefit, allowing you to create a home heating schedule that optimizes usage around time-based rate plans. If you don't have a smart thermostat, Evergy offers [free and discounted models](#).

You can start by using our [Home Profile tool](#), which can show you where your home uses energy, along with suggestions on how to save.

Call: 800.541.0427

Analytics: Use our online Compare My Rate tool to see which plan might be best for you.

Why is Missouri changing to time-based rates?

The Missouri Public Service Commission has ordered Missouri utilities, including Evergy, to transition to mandatory time-based rate plans. The goal of time-based rates is to match the costs you pay with the actual cost to produce energy. With time-based rate plans, you'll pay less for energy used during off-peak times, when demand for energy is lower, and more for energy used during peak hours.

How time-based rate plans work:

With time-based rates, you'll pay less for any energy used during the 20 off-peak hours. But when energy demand is high during peak hours, the cost for energy will be higher. It is important to shift your large appliance usage, like dishwashers, dryers, and HVAC, to off-peak times, like overnight and early morning, to avoid paying a higher price for energy during the peak times. With time-based plans, it's important to avoid using large amounts of energy during peak hours.

Default Time Based Plan
Default time-based rate plan with the lowest difference between peak and off-peak times.

Summer Peak Time Based Plan
Only has peak pricing during the summer months.

Nights & Weekends Plan
Three time periods with different rates, with the highest difference in price between time periods.

Nights & Weekends Max Plan
Three time periods with different rates, with the highest difference in price between time periods.

Time-Based Plans - Savings Tips

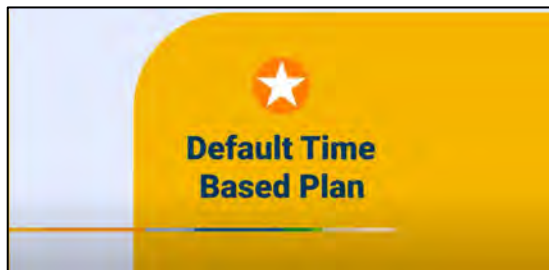

- Delay running your dishwasher: Use your dishwasher timer to delay running it until after peak hours.
- Adjust when you use your dryer: Electric dryers use more energy than washing machines, so you'll save even more money when you wait for off-peak hours to dry your clothes.
- Adjust your thermostat to automate off-peak savings: Adjust your thermostat so your heating/cooling system doesn't run as long during peak hours.
- Be mindful of peak hours: Reduce large appliance energy consumption during peak hours of 4-8 pm when demand and costs are higher.

Send Date: October 9-14, 2023

Dear [Name],

Important update to Evergy's Time-based rate plans.

Please note: The default time-based rate plan has changed from past Evergy communications.

During the last few months, Evergy has been working to inform you about our new time-based rate plans. Recently, the Missouri Public Service Commission (MPSC), which regulates Evergy, has updated which of the four rate plan options will be the default rate plan. For customers who do not select a time-based plan on their own, **the new default plan will be the Default Time Based Plan (formerly called Peak Reward Saver).**

We've noticed that you have not selected a new plan yet. There is still time to pick your plan but **if you don't select soon, you will be placed into the Default Time Based Plan before the end of the year.** We encourage all customers to select a plan that works best for their household.

How does the new default plan work?

The **Default Time Based Plan** is very similar to the rate plan you have today. It also has the lowest price difference between peak and off-peak times. This means that energy used during peak times won't have a major impact on your bill.

The Default Time Based Plan has a set rate for energy most of the day, with only a small increase during the 4-8 pm peak period.

TIP: On the **Default Time Based Plan** it will be important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

Want a different rate plan? We're here to help!

Evergy has three other time-based rate plans. If you want to switch to one of these other rate plan options or learn which one might be best for your household, we invite you to use our online personalized Rate Comparison Tool. You can change your rate plan at any time.

We know selecting the right rate plan can feel confusing. If you need help, we are here to assist you.

Changes to the default time-based plan

By now, you know that [Missouri is changing](#) to time-based rate plans this fall. You can choose from one of four new plans, or if you do not select one on your own, you will automatically be moved to the default plan.

Recently, the Public Service Commission (MPSC), which regulates Energy, has updated which of the four rate plans will be the "default" plan. The new default plan will be the [Default Time Based Plan](#) (formerly called the Peak Reward Saver plan).

Monthly kWh	June - Sept	Oct-May
First 500	\$0.14094	\$0.12283
Next 400	\$0.14094	\$0.07302
Over 1000	\$0.15094	\$0.04481

*Standard usage during peak hours is 0.0021 per kWh. **Standard usage during off-peak hours is 0.0021 per kWh.

We requested this change based on feedback from customers. Among the four plans, the Default Time Based Plan is the most like Energy's previous standard plan. It has the lowest price difference between peak and off-peak times.

This means that energy used during peak times won't have a major impact on your bill.

The Default Time Based Plan has a set rate for energy most of the day, with only a small increase during the 4-8 pm peak period.

Want a different plan?

It's not too late to choose one of the other time-based plans.

We have a personalized [Rate Comparison Tool](#) to help you choose the plan that's best for your home, based on your prior year's energy usage.

energy

STEP ONE:

Be mindful of peak and off-peak hours
Energy costs are higher during peak hours of 4-8 pm, and off-peak times and pricing varies by plan.

Off-Peak Hours
Demand for energy is lower during these times, so you're charged less. Off-peak times vary by plan but are typically late at night and in the early morning.

Peak Hours
Demand for energy is higher during these few hours, so energy costs more during peak hours. Peak hours are 4-8 pm and vary by day and season.

Costs and times vary by each plan. Get your plan's peak and off-peak times at evergy.com/SaverPlans

STEP TWO:

Optimize when you use your large appliances
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Be mindful of peak hours
Reduce large appliance use during peak hours of 4-8 pm.

Use your dishwasher delay button

Adjust your thermostat to avoid peak hours

Shift when you use your clothes dryer

Learn more at evergy.com/SaverPlans

STEP THREE:

Use our Energy energy engagement tools
Use our personalized tools to help you understand when you're using energy and how to save money.

- Weekly Rate Coach Emails**
With our weekly Rate Coach emails, you'll get an email every week that breaks down your weekly energy usage by each hour of the day, helping you to see when you're using energy.
- Energy Engagement Portal**
Through your online Evergy MyAccount portal, you can see your usage patterns broken down by hour, helping identify when you're using the most energy.
- Compare My Rate Tool**
Use our online rate compare tool to see which time-based rate plan is best for you.
- Average Payment Plan**
Sometimes called budget billing, this program averages your bills each month to help keep payments level throughout the year.
- High Bill Alerts**
When you enroll in our High Bill Alert emails, you'll receive a notice if you're currently on track to receive a higher-than-normal bill.

energy

Welcome to your weekly Rate Plan Coach, an email designed to help you save money by avoiding high-cost times

You're currently on the Super Saver & Weekend Max Saver plan which offers a very low energy price overnight. To help avoid heavy electricity use during the weekday peak hours of 4 to 8 p.m. (and shift your electricity usage to overnight).

Here's how you used electricity during the weekdays

What parts of your routine could you do at off-peak times?

17% less expensive to purchase energy between 12am and 8am.

On weekdays, electricity is 12x more expensive from 4 to 8 p.m.

How can you save big during peak hours?

Appliances that use a lot of energy. By using them at lower-priced, Super Saver hours, you'll save more energy.

These high-energy appliances can be used at lower-priced, off-peak times to save energy.

Time to prepare for lower seasonal price changes!

Starting October 1, Energy's summer pricing will end for the year. While fall and winter rates are lower than summer pricing, you'll save even more if you still have appliances and heavy loads that peak loads of 4-8 p.m. on weekdays, especially if you have electric heating. Take a moment to review the seasonal pricing to make sure you're getting the best rates. View an alert on the power 1 app.

Customer	Non-Summer	Non-Summer
12am	1.40 - 1.60	1.40 - 1.60
12am - 4pm (Super Saver)	0.80 - 1.00	0.80 - 1.00
4pm - 8pm (Peak)	2.40 - 2.60	2.40 - 2.60
8pm - 12am (Super Saver)	0.80 - 1.00	0.80 - 1.00

You spent about the same amount on electricity during peak hours last week

Here's how you used electricity during the weekdays

What parts of your routine could you do at off-peak times?

On weekdays, electricity is 12x more expensive from 4 to 8 p.m.

Ways to Save

- Shift internet use to off-peak hours.
- Consider using electric water heaters during off-peak hours. This can help you save money on heating your water.

evergy

Your new time-based rate plan is now starting.
We're here to help!

Learn more about your rate plan at evergy.com/TimePlans

Note: Recently, the Missouri Public Service Commission (MPSC), which regulates Evergy, has updated which of the four rate plan options will be the default rate plan. If you did not select a time-based plan, your plan will be the Default Time Based Plan (formerly called Peak Reward Saver). You can change your rate plan at any time.

Default Time Based Plan
Default residential rate plan, with the lowest difference in price between peak and off-peak times.

Summer Peak Time Based Plan
Only has peak pricing during the summer months

Nights & Weekends Saver
Three Time Periods, Overnight and Weekend Discount

Nights & Weekends Max Saver
Three Time Periods, Largest Difference in Price

Bill Message

Your time-based rate plan is now starting. To save money on your new plan, shift when you use some of your major appliances, like the dishwasher, to off-peak times. **Learn more at evergy.com/NewPlans.**

Be mindful of peak and off-peak hours
You don't need to avoid using energy altogether during peak hours but try to shift when you use large appliances to off-peak times.

Optimize when you use your large appliances
Reduce large appliance use during **peak hours of 4-8 pm.**

Use your dishwasher **delay button**

Adjust your thermostat to avoid peak hours

Shift when you use your clothes dryer

Set your EV or other appliances to **charge overnight**

Here to help you with time-based rate plans.
Evergy has personalized tools to help you find ways to shift some of your energy usage, manage costs, or choose another rate plan option that best fits your household.

- Our **Average Payment Plan** program (sometimes called budget billing) averages your bills each month to help keep payments level and consistent throughout the year.
- With our weekly **Rate Coach Emails**, you'll get an email every week that breaks down your weekly energy usage by each hour of the day. *Not receiving these emails?* Sign up online or give us a call.
- Use our online **Rate Compare Tool** to see which time-based rate plan is best for you. Check back to see if a different rate may be best for you as your energy usage changes.

DEFAULT TIME BASED PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

The Default Time Based Plan has very small differences in price between peak and off-peak hours, so you don't have to worry much about when you use energy during the day.

This is a tiered plan, meaning that prices go up or down by tiers as you use more energy throughout the month, depending on the season.

Default Time Based Plan All Year (Mon-Sun)

Monthly kWh	June - Sept	Oct-May
First 600:	\$0.11829	\$0.09784
Next 400:	\$0.11829	\$0.07718
Over 1000:	\$0.12829	\$0.07718

Default Time Based Plan All Year (Mon-Sun)

Monthly kWh	June - Sept	Oct-May
First 600:	\$0.11829	\$0.09784
Next 400:	\$0.11829	\$0.07718
Over 1000:	\$0.12829	\$0.07718

How does the plan work?

October through May
During these months, the cost of energy gets lower as you use more.

There is a small extra charge of ¼ of a cent, for energy used during the peak times of 4-8 pm, and there's a one-cent discount for energy used between midnight and 6 am.

June through September
During the summer, energy prices increase as you use more.

There is an extra charge of one cent during peak hours of 4-8 pm, and a one cent discount on energy used between midnight and 6 am.

How to save on this plan

On the Default Time-Based Plan, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Wash clothes on cold. Studies show they get just as clean while using less energy. Avoid peak hours to save, too.
- Run full dishwasher loads to save energy and use the delay-start setting to run to cheaper overnight hours.
- Pre-heat your home: If you have electric heating, adjust your thermostat a few degrees before 4 pm, reducing the time the compressor runs during the peak hours. Tip: most [smart thermostats](#) have time-based settings.

Shifting the use of your large appliances to off-peak hours will make a more significant difference on your bill.

Smaller items like cell-phone chargers, the vacuum cleaner, laptops

SUMMER PEAK TIME BASED PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

With time-based plans, WHEN you use energy matters.

On the [Summer Peak Time Based Plan](#), it pays to think about the timing of your energy use. From the months of October-May, shifting some of your appliance usage to the overnight hours of midnight to 6 am can really make a difference. That's because energy used during overnight hours costs about half as much.

October - May Every Day (Mon-Sun)

Super Off-Peak Off-Peak

[View Rate Details](#)

How does the plan work?

October through May
During these months, the cost for energy will be lower all day, every day. It's especially lower during super off-peak times from midnight to 6 am.

June through September

During the summer months, the cost for energy is highest during peak hours of 4-8 pm on weekdays. At all other times the cost for energy is lower.

How to save on this plan

With time-based rates, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Schedule your laundry to run overnight by using a delay timer.
- Use the delay-start setting on your dishwasher so it runs after midnight.
- Pre-heat your home before 6 am. If you have electric heating, set your thermostat to warm your home a few degrees higher before 6 am, then set it back to normal. Tip: most [smart thermostats](#) have time-based settings.

Smaller items like cell-phone chargers don't draw enough energy to make a huge difference, so it's up to you whether to delay charging to after midnight.

How does your home use energy?

It's helpful to know which items in your home use a lot of energy, and which use much less.

We have a tool to help. Our quick quiz asks you about your home, then estimates what you are spending on appliances, heating/cooling, lights and more.

NIGHTS AND WEEKENDS PLAN

Your Rate Plan
We're here to help!

Making the Most of Your Plan

With time-based plans, WHEN you use energy matters.

On the Nights and Weekends Plan, thinking about the timing of your energy use, and shifting some usage to off-peak evening and weekend hours can really pay off. That's because off-peak power costs about 60% less.

[View Rate Details](#)

How does the plan work?

Weekdays
From Monday through Friday, the days are divided into three time periods: Peak, Off-Peak and Super Off-Peak.

The Peak prices are higher because energy costs the most to produce on weekdays between 4-8 pm.

Weekends and Holidays
There are no peak hours at all on the weekends or on holidays.

How to save on this plan

With time-based rates, it is important to monitor not only how much energy you use but also when you use it, to save on your monthly bill.

- Try doing your laundry in the mornings or on weekends.
- Start your dishwasher at bedtime instead of right after dinner or use your delay-start setting.
- Pre-heat your home: Adjust your thermostat a few degrees before 4 pm, reducing the time the compressor runs during the peak hours. Tip: most [smart thermostats](#) have time-based settings.

Shifting the use of your large appliances to off-peak hours will make a more significant difference on your bill.

Smaller items like cell-phone chargers, the vacuum cleaner, laptops and lamps don't draw enough energy to make a huge difference, so it's up to you whether to avoid peak hours with those types of items.

How does your home use energy?

It's helpful to know which items in your home use a lot of energy, and which use much less. The impact of spreading your usage throughout the day will be greater if you shift the use of large appliances.

We have a tool to help. Our quick quiz asks you about your home, then estimates what you are spending on appliances, heating/cooling, lights and more.

December Bill Insert

Get winter ready on your new time-based rate plan.

To save this winter, optimize your home's energy usage to avoid peak hours.

Costs and peak times vary by each plan. Get your plan's peak and off-peak times at [evergy.com/TimePlans](https://www.evergy.com/TimePlans).

Stay cozy and save with these time-based plan savings tips

Energy costs are higher during peak hours of 4-8 pm on most rate plans.

- 1 Kitchen**
Delay Start: Delay your dishwasher until overnight or in the morning.
- 2 Living room**
Program Your Thermostat: Use a smart thermostat to adjust your heating system to avoid peak hours.
- 3 Garage**
Off-Peak Charging: If you have an electric vehicle, charge it during off-peak hours to save on charging costs.
- 4 Laundry room**
Wash Clothes Wisely: Try cold water for washing clothes, and run your washer and dryer during off-peak hours.
- 5 Bedroom**
Seal Drafts: Ensure windows and doors are sealed to prevent heat loss.
- 6 Office**
Monitor Energy Usage: Login to your Evergy online MyAccount to monitor your usage by hour.

Do you have Electric Heat? Customers that use electricity to heat their home may experience more impacts on time-based rate plans, making it especially important to limit high energy use during peak times. Adjust your thermostat so your heating system doesn't run as long during peak hours.

Time-Based Rate Campaign Tracker

Missouri residential customer survey

(23-0013)

*November 2023**

Methodology

Evergy’s Missouri Residential Customers

- Random sample of Missouri residential customers with email on file
- Evergy emails survey to 30,000 customers each month
- Same questionnaire sent each month with 40 questions

Month	Completes
June	557
July	831
August	702
September	816
October	787
November	670

*with all customers now moved to TOU Plans, the last monthly survey took place in November 2023. No additional updates.

Evergy Mandated Time-Based Rate Campaign

Executive Summary

Evergy's Time-Based Rate Campaign has proven to be successful in creating awareness among Missouri residential customers.

- In November, 87% of Missouri residential customers had heard about Evergy's time-based rates. That is a 93% increase from the baseline measurement in June.
- The number of Missouri residential customers who recall Evergy communications about the new time-based rates has more than doubled in the past few months (increased from 32% to 89%)
- When first asked about their knowledge of time-based rates, Evergy customers rate their knowledge a 4.1 on a 7-point scale. But when asked what they believe to be true about time-based plans, most correctly identify the key aspects of time-based plans. This may show that customers know more about the plans than then think they do.

Customer Satisfaction with Evergy

Satisfaction appears to be slowly starting to level off

Overall, how satisfied are you with Evergy as your electricity provider?
