Appendix D – Incentive Ranges

Any direct installation of residential measures will have the following costs added to the stated incentive amount:

1. Labor for installation.
2. Removal, decommissioning, recycling and disposal of the existing item for which the new measure will substitute and
3. Acquisition and functioning installation of the new measures complete with all accessories and appurtenances required for its intended use and safe operation.

Any shipped or mailed residential measures will have the shipping and handling costs added to the stated incentive amount.
