

EC-2025-0165

Also, I'm going to point out for the Commission that document number MPSC 0015 is also a counterfeit document.

Look at the amount due below.

Minimum due was \$ [REDACTED] with a new balance of \$ [REDACTED]

\$ [REDACTED] + \$ [REDACTED] = \$ [REDACTED] not \$ [REDACTED]

Now take a look at the counterfeit exhibit containing email address that Ameren claims www2.ameren.com as their email address and send payment agreements from.

Even that on the payment agreement shows \$ [REDACTED] + \$ [REDACTED] = \$ [REDACTED]

While fake payment agreement labled as exhibit D confidential it is a counterfeit agreement embedded with an email address of www2.ameren.com because it never sent, so this was never an action performed from Ameren.

It makes exhibit or confidential exhibit a forged and counterfeit copy because I had actually pay \$ [REDACTED] to restore service to Ameren, they didn't ask me for only \$ [REDACTED]. Plus the total balance due doesn't add up to the actual balance of \$ [REDACTED] as Ameren labeled my balance at total \$ [REDACTED]

\$ [REDACTED] - \$ [REDACTED], is a difference of \$ [REDACTED].

It's also a counterfeit and altered forged agreement with the wrong payment due date.

So tell me another lie Ameren.

Also when was the Commission going to tell me that the Chairwomen is on the advisory board of FRI and Ameren Missouri lobby's money to them? I think that should've been told upfront . How much money did Ameren lobby to FRI back in 2023.

See, if Ameren Missouri was to lose their complaint, the money trail or lobbying money stops, however, Ameren keeps the Commission and FRI Advisory board happy and they get their money. Prior Commissioner Mr. Rupp was on the advisory board too.

I essentially had two Commissioners that overheard my complaint that had ties to Ameren and lobbying money, which should've resulted in a recusal or removal from the matter, due to conflict of interest.

So, when does the Commission want to come clean about how much money they got from Ameren Missouri?

I want my Judicial Review of EC-2023-0395 to be granted, I'm going to continue my matter EC-2025-0165, therefore Ameren is found in violation of the same exact payment agreements and we are going to talk about the prior violations listed in EC-

2023-0395 that the Commissioners allowed Ameren to eclipse and become exempt of.

Also as an early Christmas present I penned emails to my local tv media outlets such as KTVI, KMOV, KSDK, and National News media companies like CNN letters.

As and FYI, I also hold a press and media pass. Yep. I certainly do.

Also, it isn't the in State Corporation you should be worried that uncovered all this, it's the out of state Corporation that uncovered all this. The Corporation the Commission doesn't know about or Ameren Missouri.

Since Ameren loves to con individuals and business, they finally get to learn how to deal with a reputable Corporation and individual who follows rules, regulations and tariffs and who's business are in good standing with numerous Secretary Of States Offices around located in the United States and Internationally.

Maybe they can tell the media outlets "they were trying to do better," "your honor we promise to do better," "we are trying to put matters like these on litigation hold."

My personal favorite is " we agree with staff and file leave to implement and change our payment agreement policy."

No matter what way you try to spin the terminology it remains the same and broken and will never change.

Oh, and before anyone tries to lie and deny and say I didn't send anything to the media about this matter, I have the emails. But Ameren Missouri is still trying to remember how to send those because they use www2.ameren.com, right Ameren?

I've also given the media the audio copies of the tapes to show that the audio Ameren used didn't state May 18, 2023 or the amount due, or how much was due, etc,

But it's May 18, 2023 Ameren, right? Because you altered the wav format to say that, right Ameren, just like the counterfeit agreement that embeds www2.ameren.com, as your email address. Right Ameren.

Also, since the Commission and Ameren are on better speaking terms than I and Ameren are, you should probably tell them to be honest in the near future.

But hey, "they were just trying to do better, right?" Yeah, I'm sure that statement fixes everything?

Merry Christmas, Happy Holidays and I hope Ameren enjoys the gift of investigations in return. it is my Christmas present to them for the year and a half of continuous lies.

Also, when is Ameren going to reach out to the senior citizen they tried to scam by stating that AMI Smart Meter Engineering Group is a licensed business in Missouri? According to SOS records, there is no business.

Look at it on the bright side Commission and Ameren, you tried to sell your lies to someone with a media background and also has a data recovery business and networking and IT mitigation business.

As an FYI, Ameren not only owes me more than apology, they owe me back what they stole and created in damages to my property and what I lost regarding the illegal disconnection and what I lost in subpoena service and any other damages from this current matter.

I'm telling my story and remember, the Federal Government & State Government work for me. They like the information I give them.
