

EC-2025-0165

This is just a friendly reminder that Ameren has to file a response by Friday December 20, 2024.

Also, lets talk about another lie that Banks Law LLC told. Remember when I told the Commission about a pending or open lawsuit out of Sangamon County, that Eric Banks swore Ameren wasn't in litigation with?

Welp, here's that. Apparently Sangamon County still agrees there's an open lawsuit against Ameren Missouri for tort damages. Don't worry though, it's a business tort suit, not a personal tort suit. It revolves around, property damage they did at a business address of mine back a while ago.

My corporation sued Ameren's corporation.

Lets see how many delusional stories Ameren can make out of this. I also want to let every know, I've never heard so many false, fabricated and delusional stories as Ameren Missouri has made up.

They lied about www2.ameren.com being an email address, they lied about the counterfeit document that never got sent. They lied about the lawsuit. Everything they stated in their last evidentiary transcript is a lie and the paperwork submitted in this matter validates Ameren Missouri lied.

Don't worry, he probably got it confused by all the "promises" he's making to help Ameren change.

As and FYI, Ameren has been "promising" to do better since 2018- 2019 or at least since my first ever matter I've brought before the Commission, whether informal or formal.

I think their "promise" to do better act has been an ultimate failure.

It's also amazing that all my documents can actually be shown from the vendor, itself or the government entity, itself. Not on a blank piece of paper with Ameren's beneficial writings, with no vendor information, source information or legal letterhead documentation.

Ameren Missouri is a con artist though. They don't care what they do, what they try to steal, who they try to hurt. They only care if it benefits them, and them only. They'll craft counterfeit documents, because their legal counsel runs back to their alteration specialist who alters Ameren documents and "other sourced documents." Talk about a career of pathological lying.

Maybe that can become the new role of their alteration specialist. Maybe Ameren can promote her to the head of their career counterfeit crafting department.

But, I'm sure they were on altering documents, therefore they would "promise" to do better, right?

Is www2.ameren.com an email address, Ameren don't worry. It will eventually come out in the lawsuit that exists, that Ameren said doesn't exist.
