

EC-2025-0165

Today is the day! Just a friendly reminder, Ameren's delusional stories and filing are due today.

I have one recommendation to give for the Commission and Ameren. I would strongly recommend that the Commission and Ameren both hire Internal Asset Consultants. You both have major issues.

I would recommend that both the Commission and Ameren report back to me when they re-read the evidentiary hearing transcript. Get back to me when you find the six lies Ameren made as "promises," along with the *** kissing they made with Staff on the terminology of "payment agreements."

I recommend in the report and order and evidentiary hearing you read the parts where Ameren, Staff admitted to violations on Ameren. I counted three.

That doesn't include all the delusional stories Ameren has made up. Or the delusional excuses that the Commission allowed Ameren to make up and fabricate.

If Ameren and the Commission need the number to a great Internal Asset Consultant firm, I have one. One that will tell you exactly where the problem is.

All I know is if the Commission and Ameren want to continue the pathological lies and delusional fabricated stories.

Welcome to round 2 of payment and settlement agreements and disconnection notices. I look forward to using the Commission's, Staffs, Ameren's Regulatory Judges words against them.

This is where the eight months of services being illegally disconnected comes out. Con Artists.

Now here is my "promise" to the Commission where I stop filing little reminders and phrases that Ameren Missouri pathological lied about.

No matter what way they try to spin, tweak, manipulate their wording to, it's all the same. Ameren's a con artist though, so they don't understand that. They are instilled with telling pathological lies.

But www2.ameren.com is an email address, right Ameren?

See, if the violation would have been addressed the first time, we wouldn't be here a second time, still addressing, but we are. Now they get to deal with it.
