

EC-2025-0165

What's even further pathetic is a State entity and State Regulated business having the audacity to try and hide discovery documents, audio documents, destroy documents and still have the same audacity to try and hide documents , destroy documents , audio documents that agree with the Complainant.

(Yes, that takes a sick person to do that)

Remember, while lawyers have the "powers" to regulate. Businesses that engage in telecom, networking, data recovery, IT mitigation, mobile and landline, cloud and voip, services, have the "powers" to obtain those documents, audio files, deleted documents when deemed necessary.

Just remember, lawyers aren't the only ones that can get a hold of documents. They don't have special powers, like they are try to grasping for in this matter. The only special powers they have in Commission matters, revolve around *** kissing the Commission and Staff for a favorable outcome and changing the terminology around when something doesn't agree with them.

Sorry I speak the truth, if Ameren doesn't like the truth. Maybe they shouldn't take it upon themselves of doing the quite obvious. Some of the sloppiest work I've ever seen a corrupt business try to perform and make noticeable.

Oh and if the Commission wants to setup a hearing therefore I can showoff some of Ameren's sloppiest work ever. I'm all for it. We can tackle and resolve their delusional stories that don't exist either. While we are at it, we can take a gander at all the "promises" Ameren made that imploded and backfired on them. WE can tackle their violations too. It would save I, the Commission, Staff numerous amount of time if we tackle that in one hearing, instead of allowing to fabricate and make further delusional stories.

I do "promise" this will be my last filing until the Staff report comes out. I gave myself the limit of 28 filings.

The word "promise" is also a figure of speech of expression that doesn't obligate or hold you to a "promise." It is also a common term that corrupt lawyers use to *** kiss to the Commission and Staff to make it appear they will do better. Only to not do better and then pretend the word doesn't exist and state the phrase over again.
