

EC-2025-0165

Oh, and since you all decide to play corrupt justice and deceive customers and use bogus email address. Just to let you know, the reason I keep giving you the opportunity, is because I've been talking internally with Ameren Missouri's own domain provider this whole entire time.

So, while corrupt Judge Clark was kissing Ameren's rear and the Staff and Ameren were kissing each other's rears and the Commission was busy getting their slush funds, I was talking to GoDaddy's abuse and fraud department for a good year and a half.

This transcript should pretty much sum up the entirety of the corrupt practices that the Commission has allowed Ameren to do.

In my industry. I'm the Final Boss, not Corrupt Judge Clark or the Corrupt Staff, or Corrupt Commission or the Corrupt Ameren Missouri.

I think your s**t stinks and you better get it together, because the only person you are fooling, is yourself.

Just let me know when you want to admit www2.ameren.com isn't and email address.

Even better, maybe we can setup a time and date, to talk to Ameren Missouri's vendor of their Domain, therefore they can tell you directly that it is counterfeit document and bogus email address.

Shotty work from shotty and corrupt lawyers. No more than that!

See you all on January 23 for that virtual rate hearing. Maybe you can try to get www2.ameren.com working as an email before then.

No more than incredible bs and absolute bs. I believe you all have severe mental problems.
