Subject:

Judge Morris L. Woodruff

Missouri Public Service Commission

Dear Judge Woodruff:

Thank you for the *Order Setting Procedural Conference*. I contacted the Missouri Public Service Commission because *American Water* (AW) told me that relocating a valve was going to be expensive and did not tell me that there was no valve in my front yard. Several facts supported the conclusion that there is a valve in my front yard. First, an AW employee who solved the problem the night of February 3, 2019 told me that there is water valve is in my front yard, deep underground. Second, that night there was a massive water leak at the entrance to the Bird Sanctuary of Blackburn Park and there was no water leak on my front yard, half a block away. Third, the Park's water leak stopped right after the AW crew reached my front yard. If AW did not know about a valve in my front yard, why would the AW crew move quickly half a block from a massive leak to a site that was not leaking and dig four feet deep there? The City of Webster Groves, previous water supplier for this area, had a similar experience. To resolve that problem, it dug deep in the same section of my front yard and tore up half of my driveway.

If there is no water valve in my front yard, there is no reason to meet. I would not be able to go to Jefferson City for this conference, because of prior commitments. I thank you and other members of Missouri Public Service Commission for your help.

Sincerely,

George L. Eliceiri
