

EC-2025-0165

I disagree with Staff asking for an extension of time. This matter is already serious in nature enough as it is. Staff has lied, more importantly Ameren has lied.

Further, I have a copy of the exact transcript with Ameren Missouri's vendor that conclusively shows that Ameren Missouri using the bogus email address of [www2.ameren.com](http://www2.ameren.com)

Just another tactic to delay due process and not answer what is in front of them. Mr. Felber has uploaded a series of truthful documents or exhibits, that point out the amount of fraud that Staff conducted in EC-2023-0395, and what Ameren Missouri is most likely trying to do in EC-2025-0165.

I think the Commission should order a hearing, have Ameren answer the questions, more importantly Staff answer the questions.

The Commission gave Staff 60 days to file a response and further want to push it off another almost two and a half weeks.

I think that the Commission should set this for hearing, therefore the Complainant, Staff and Ameren can narrow down what is still needed from Staff in order to file a report. Plus Ameren to date, still hasn't sent some documents to me that I asked from them back prior to December 23, 2024.

The reason Ameren doesn't want to produce them is because they agree with the Complainant.

Also, here's the transcript confirming that [www2.ameren.com](http://www2.ameren.com) is not an email address.

I think Mr. Felber raises a series of persuasive and valid concerns to set this for a hearing and from there, the Commission can decide whether to grant or deny Staff an extension.

That's if Staff and Ameren are okay with it of course, and I would think if they had nothing to hide, they'd be okay with it.

To be fair, the sooner everyone tells the truth, the sooner this matter gets settled. However, I believe my tax dollars are going to be further wasted on the clear obvious attached to this.

Fake document, fake email address. Forged and counterfeit.

Plus, I'm going to to police prior to that date. There are no more "do-overs" or "extensions," on my end to Ameren or Staff.

At this point Ameren has dug so big of a hole and Staff has dug themselves in a big hole that I don't believe a word they say.

Because obviously, the real documents that I have published point towards corruption and lying.

You went in with a plan to defraud me and got caught. Just admit it.

Complainant prays the Commission sets this for hearing, prior to granting or denying Staff and extension to file their report.

Brett Felber
