## ORDER SCHEDULING A WORKSHOP MEETING AND DIRECTING RESPONSE

Issue Date: July 2, 2014

Effective Date: July 2, 2014

The Commission has established this working case to consider the potential impacts of current and future Environmental Protection Agency (EPA) rules on the reliability and cost of the electric generation plant operated by Missouri's electric utilities. On June 30, 2014, the Commission's Staff filed a motion asking the Commission to schedule a workshop meeting to address the cost of compliance with the EPA's recently published proposed state-specific rate-based goals for carbon dioxide emissions for existing fossil fuel-fired electric generating units. Staff also asks the Commission to direct the electric utilities to make presentations at the workshop meeting to explain how they are responding to the proposed EPA regulations.

The Commission will schedule the workshop meeting that Staff has requested.
