**BASIS OF ALLOCATION
UTILITY FACTORS-GAS**

1 The gas utility allocation factors for Missouri Public Service ("MPS") and St. Joseph Light &
2 Power ("L&P") are listed below by FERC account. These factors were used to distribute
3 adjustments to the Income Statement into utility components. The test year income statement
4 uses the product allocation method within the PeopleSoft financial accounting system. This
5 method direct assigns when possible and all other costs are then allocated on either the
6 Massachusetts Formula, which uses margin, payroll and net plant, or number of customers.
